This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

Digitized by Google

VOLUME No. 3

In the third volume.

No. 12.—Detailed statement of all duties, tolls, forfeitures and penalties (in connection with the collection of the Revenue) remitted by the Lieutenant-Governor in Council, from the 9th of January, 1890, to the 4th November 1890, as required by article 826 of R. S. P. Q.

No. 13.—Copies of Orders in Council, passed since last session, respecting the appointments and promotions made in the Civil Service.—Revised Statutes, article 675.

No. 14.—Return to an Address,—Statement shewing the number, the date and the amount of all letters of credit issued by the Government or by any of the Departments, from the 27th January, 1887, to this day 18th March, 1889; as also the nature of such letters of credit and the reason why such letters were issued; as also the number and amount respectively of those which have been paid, and of those which are still due.

No. 15.—Return to an Address,—Copies of all Orders in Council relating to the claim of J. P. Whelan, which was submitted to an arbitrator last year; for copies of the deed of compromise, of all proceedings before the arbitrator, and of the arbitrator's decision, copies of all papers.

No. 18.—Return to an Order,—Comparative statement of the amounts expended by the Government of this Province for the purpose of encouraging Agriculture, directly and indirectly, during the years 1882-83, 1883-84, 1884-85, 1885-86, 1886-87, 1887-88, 1888-89 and the amounts asked for in the Estimates for these purposes for the years 1889-90 and 1890-91; such statement to show under which special heading each item is enterred in the Public Accounts or in the Estimates for the current year and for the next year.

Digitized by Google

No. 21.—Return to an Order,—Detailed statement of the payments made out of the sum of $10,892.69, which appears on page 177 of the Public Accounts for 1889, under the heading "Iron Bridges in Municipalities," on the following account: "Commissioner of Public Works to meet expenses,"

No: 25.—Return to an Address,—Copies of all Orders in Council, relating to the sale and management of timber upon Crown Lands, passed from the first January, 1881, up to this date.

No. 26.—Return to an Order,—Copies of the correspondence exchanged between the Government, or any of the Members of the Executive Council, and the Reverend J. Bachand, *curé* of Saint-Edouard de Knowlton, or the school commissioners of that school municipality, or any of them and any other person, respecting the amount of $300, entered in detail in item 11 of the Supplementary Estimates, for the financial year ending the 30th June, 1890.

No. 28.—Return to an Order,—Detailed statement of all expenses incurred in the matter of the detectives Fahey, Nægelé and Bureau with the total in each case.

No. 35.—Return to an Address,—Copies of all documents, discharges, subrogations &c., &c., &c., in connection with the distribution of the $400,000 granted by the Act of 1888 as the share of the Roman Catholics, in the settlement of the question of the property known as the Jesuits' Estates.

Copies of all correspondence, papers, &c, exchanged between the Government or any of its Members and the Protestant Committee of the Council of Public Instruction, with reference to the sum of $60,000.00 referred to in the Act of 1888, respecting the settlement of the Jesuits' Estates.

No. 39.—Return to an Order,—Copies of the Order in Council, authorizing the Government to dispose of the property kown as the Jesuists' Estates, and for copies of all correspondence on this subject.

Digitized by Google

No. 42.—Return to an Address,—Copies of all orders in Council distributing the moneys voted for. colonization purposes for 1889-90, and for 1890-91, in each county of this Province.

No. 45—Return to an Address,—Order in Council, of the 27th March, 1888, to amend the Order in Council of the 11th August, 1886, respecting the decoration of the front of the Parliament Buildings.

No. 47.—Return to an Address,—Copy of a contract passed between Mr. Charles Berger, contractor, and the Government or the Department of Public Works, for the enlargement of the Montreal Court House.

No. 51.—Return to an Order,—Statement of all amounts remitted to various municipalities on account of the Municipal Loan Fund, since the 12th February, 1890, shewing the amounts due in capital and interest aud the dates of such remission.

No. 52.—Return to an Address,—Copies of all correspondence between the firm of Gilmour & Co., or any of its members and the present Government, or any of its departments or ministers, with reference to the suit of P. Paradis *et al* and Allan Gilmour *et al*, or with reference to the timber lands referred to in the suit, or with respect to the cost thereof, or copies of any claim or memorial made by Messrs. Gilmour & Co., respecting the same.

No. 54.—Return to an Order,—Copies of the letter of the 7th June, 1890, addressed by the Honorable P. Garneau, to the President of the lake St-Françis Railway and navigation Company, Lambton, county of Beauce.

No. 60.—Return to an Order,—All correspondence and documents, having refered to the stoning of municipal roads, together with a statement, from the 31st January, 1887, of all sums of money promised or expended on such roads and the dates of such promises or grants.

Digitized by Google

No. 61.—Return to an Order,—Copy of a letter addressed by the Honourable Prime Minister or one of the Honourable Ministers, to John Whyte, Esq., of Leeds, Megantic, dated in the month of May or June last making reference to a subsidy granted or to be granted to the Quebec and Boston Line Railway Company.

No 62.—Return to an Order,—Copy of letter addressed by the Government, or in its name by any of its Members, to Dr Fiset, Federal Member, or to any other person in the county of Matane, in the course of the months of May or June last, respecting a subsidy in favour of the Matane Railway.

No 63.—Return to an Order,—Copies of the correspondence and reports of the architects employed in the reconstruction and repairs of the Montreal Normal School.

No 64.—Return to an Order,—Copies of all correspondence between the Government and any persons interrested in the Berthier or Farnham beet root sugar factories since January, 1890.

No 69.—Order of the House,—Copies of the reports of Mr. Arthur Buies on the counties of Témiscouata, Rimouski and Matane.

The report of Mr. H. A. Turgeon, on the Valley of the River Squateck and that of Mr. C. E. Damour.

No 70.—Return to an Order,—Tabular statement showing :—The names of municipalities, corporations or individuals who have obtained or asked for assistance in the construction of iron bridges since January 1887.

No 71.—Return to an Order,—Copies of correspondence exchanged between the Executive of the Province of Quebec and all other persons, respecting the remission of the municipal debt of St. Michel de Bellechasse.

No 73.—Return to an Order,—Copy of the written declaration read by the Honorable Honoré Mercier, Prime Minister, in the name of the

Digitized by Google

Government, at a public meeting held at St. Martin, in the county of Laval, during the last elections, a few days before polling day, to the effect that the Government intended to abolish tolls on bridges and turnpike roads.

No 81.—Return to an Order,—Copy of the pay-list showing the names, dates and appointments of all the officers, clerks and employees in the Quebec Court House, for the month of December, 1886, and January 1887, and also for a copy of a similar pay-list for the month of October, 1890.

No 86.—Return to an Order,—Copy of all documents showing the total expenses of the trial of Remi Lamontagne, and to whom the same were paid.

No 87.—Return to an Order,—Copy of all documents showing the total expenses of the trial of Léda Lamontagne, at Sherbrooke, and to what parties the same were paid.

No 89.—Return to an Order,—All correspondence exchanged between the Government or any of its Members and the Great Northern Railway Company, or any of its officers, for obtaining a subsidy either in land or in money.

No 90.—Return to an Order,—All letters, correspondence and documents respecting the promise of the Government or of any of its members, of a subsidy to the Cap Rouge Railway Company.

No 91.—Return to an Order,—Copies of all correspondence exchanged between the St. Lawrence and Adirondack Railway Company, or its attorneys, representatives, etc. and the Government of the Province of Quebec, respecting a grant in favour of the said Company.

No. 92.—Return to an Order,—Statement of all amounts paid by the Government, from year to year, for the construction of the Parliament Buildings, showing, in different columns, the amounts paid on account of the contract price and those paid for extras.

Digitized by Google

No. 93.—Return to an Order,—All correspondence and other documents respecting the promise of the Government, or any of its Members, of a subsidy in land or in money to the Metabetchouan Bridge, on the Lake St. John Railway.

No. 94.—Return to an Order,—Copy of all correspondence exchanged between the Government, the Department of Agriculture and all persons of the county of Bagot, respecting the draining of certain lands in the 20th and 21st range of the township of Upton, in the county of Bagot.

No. 109.—Return to an Order,— Detailed statement of the sundry accounts, with date, included in the sum of $5,000.00 mentioned in the Public Accounts 1889-90, page 199, as a payment *re* Quebec, Montreal, Ottawa and Occidental Railway. (Traffic expenses).

No 112.—Return to an Order,—Statement showing the extent of Crown Lands actually under license and the names and places of residence of the license holders, the names of the original purchasers, the *bonus* they have paid and the names of the present holders of these limits.

No 119.—Supplementary Return to an Order,—For a statement showing the extent of Crown Lands actually under license and the names and places of residence of the license holders, the names of the original purchasers, the *bonus* they have paid and the names of the present holders of these limits.

SCHOOL INSPECTORS' CONFERENCE

The only fact of any importance which has occurred in connection with my department since I had the honour of sending my last report to the Government, was the meeting of the Roman Catholic and Protestant school Inspectors of the Province, whom I assembled in conference on the 19th and 20th August last, in the chamber of the Council of Public Instruction.

Although the conference was not held during the past scholastic year, I nevertheless deem it my duty to give a summary of the work which was done.

On the 29th May last, I sent the following circular to all the school inspectors of the Province.

Department of Public Instruction.

Quebec, 29th May, 1890.

To Mr .....

School Inspector.

SIR,

I have the honour to inform you that I intend to hold a conference of the school inspectors on the 19th of August next, at Quebec, for the purpose of conferring with them as to the means to be taken for improving our school system. This meeting will also enable the school inspectors to be come acquainted and to communicate to each other the knowledge which they have acquired by an experience of many years in the performance of their important duties.

The following list contains some of the subjects to which I specially call your attention.

Digitized by Google

1 SCHOOL LAWS :—Amendements to be made.

2 SCHOOL REGULATIONS :—General remarks and suggestions. Special remarks regarding the course of study, etc. ;

3 SCHOOL INSPECTORS :—Duties, salaries, travelling expenses, residence in district of inspection, educational institutions which they do not visit and the reason thereof ;

4 INSPECTION DISTRICTS :—Which of the two projects of remodelling the districts suggested in my report for the year 1888-89, do you recommend ? Other suggestions on this subject.Extent of districts, number of schools, means of communication, etc. ;

5 TEACHERS :—Methods of giving professional instruction to teachers who have not received practical training : lectures on professional instruction, etc. Means of improving the financial position of teachers ;

6 PENSION FUND :—Remarks and suggestions ;

7 BOARDS OF EXAMINERS :—Remarks and suggestions respecting the boards of examiners, their number, organization, present examination programmes, age of candidates, etc. ;

8 SCHOOLS : —School-houses, furniture and school sites Causes which hinder the progress of the pupils and the remedies thereof. Defects to be removed in the system of teaching. Means of exciting the emulation of the rate-payers for the improvement of their schools.

9 STATISTICS :—Uniformity in the method of preparing statistics for the Department, inspection bulletins, half yearly reports of commissioners, etc.

If there are any other important subjects, which you would like to submit for discussion, please let me know at once.

You should prepare a memorandum of the remarks you intend to make and leave your notes with me at the conference. Please, let me know beforehand the subjects with which you intend to deal in a special manner.

Your travelling and other expenses occasioned by your stay here will be repaid you by the Department. Arrangements will be made for your board and lodging at the Laval Normal School, where you may proceed on your arrival, if you wish to do so.

I have the honor to be, etc.,

GÉDÉON OUIMET,

Superintendent.

Three only out of the thirty-seven inspectors failed to attend for reasons beyond their control. During this conference, at which the greatest harmony prevailed, the most important questions in connection with our system of education generally and the inspection of schools in particular, were very ably treated by most of the members present.

The following questions were taken up in the order given below !

Digitized by Google

1. Opening address by the Superintendent;
2. Reading of letters and communications;
3. Subjects connected with the inspection of schools;
   a. Extent of districts of inspection.
   b. Number of schools and scholastic institutions and their inspection.
   c. Salaries and modes of payment
   d. Travelling expenses;
   e. Place of residence of inspectors;
   f. Regulations concerning the inspection of schools;
   g. Statistics furnished by school inspectors and school boards;

4. Boards of examiners: Their number, organization, present programmes of examinations, the age of candidates, etc;

5. Teachers—Professional training, lectures on pedagogy, salaries.

6. Schools—Schoolhouses, furniture, sites; causes which retard the progress of pupils; means of improving the schools generally;

7, Pension fund of officers of primary instruction;

8. Amendments to the school laws.

The following resolutions were adopted during the course of the discussion to which these various questions gave rise:

After discussing the subject of *the extent of each inspection district and the number of schools it should contain*, on which subject Messrs Lippens, Fontaine, McGregor, Stenson, Beaulieu, Vien, Demers. Belcourt, McGown, Savard, Bégin, Dupuis, Tremblay (Charlevoix) Brault and Hubbard expressed their views, it was moved by Mr. Stenson, seconded by Mr. McGregor and Resolved: "that in order to make known to the Council of Public Instruction the extent of the different districts of inspection, each inspector shall calculate the actual and unavoidable distance travelled by him, in visiting his district, and shall forward this information to the Department of Public Instruction as soon as possible."

Moved by Mr. Stenson, seconded by Mr. Ruel and Resolved:

"That the Committees of the Council of Public Instruction be requested to re-arrange the districts of inspection, in such a way that each Inspector may be able each year to pay two visits to every school of his district."

The subject of *salaries and the method of paying school inspectors* having been discussed and Messrs Vien, Lippens, Rexford, Taylor, McGregor, Stenson, Beaulieu, Demers, McGown, Bégin, Tremblay (Charlevoix), and Hubbard having expressed their views, it was moved by Mr. McGregor seconded by Mr. E. M. Taylor and resolved:

"That the present salaries of school Inspectors be annually increased at the rate of $50 per annum till $1200 per annum is attained with $2.50 for expenses for every day that the inspector examines and reports two, or

Digitized by Google

more schools or departments of schools—and $1.25 for every day that he examines only one school."

Rev. Mr. Taylor and Messrs. Thompson, Dupuis, Stenson, Levesque, Ruel, Lippens and Vien having expressed their views as to *the residence of the inspectors*, it was moved by Rev. Mr. Taylor seconded by Mr. Hubbard and Resolved:

"That we respectfully recommend that each inspector shall reside within the limits of his District, unless he receives special permission from the Department of Public Instruction to reside elsewhere."

The convention then proceeded to discuss the *regulations concerning the inspection of schools.*

These regulations were discussed, clause by clause, and approved after remarks had been made by the Reverend Messrs. Rexford and Taylor, and Messrs Beaulieu, Dupuis, Roy, Stenson, Demers, Nantel, Hubbard, Lippens, McGregor, Grondin and Belcourt.

Mr. Lippens moved, seconded by Mr. Dupuis and it was Resolved: "That the Roman Catholic committee of the Council of Public Instruction be respectfully requested to repeal the regulation, which prevents a School Inspector from visiting the schools at an earlier period than six weeks after the reopening of the classes."

It was proposed by Mr. Lippens, seconded by Mr. Nantel, and resolved: "That the government be respectfully requested to open a competition for a treatise on agriculture and horticulture, specially adapted to the elementary and the model schools of the Province, and suited to the wants of this country."

The convention then took up the question of *statistics furnished by the school inspectors and the school boards.*

Messrs. Rexford, Taylor, Hubbard, McGregor, McGown, Stenson, Demers, Dupuis, Vien, Nantel, Belcourt, Lippens, Beaulieu, Bégin, Fontaine, Grondin, Prémont and Lefebvre expressed their views on the subject. The meeting generally approved the blank forms of reports, forms, tables, etc., prepared by the Department of Public Instruction but suggested that in future the inspection bulletins be so arranged as to correspond as nearly as possible to the grand statistical table.

It was moved by Mr. Hubbard, seconded by Rev. Mr. Taylor:

That we, the Inspectors, in conference assembled, respectfully request that the Department of Public Instruction, cause to be prepared, for the use of the Inspectors, a book ruled and with printed headings for the keeping of the records of their individual visits and fromwhich they may collate the statistics required in the Annual Statistical Tables.

The question of: *Boards of Examiners, their number, organization, the present programmes of examination, the age of candidates, etc.*, was then taken up, Rev. Mr. Rexford and Messrs. Stenson, Tremblay (Charlevoix), Nantel,

Digitized by Google

Fontaine, Bégin, Ruel, Belcourt and Tetreault discussed this question, and on motion of Inspector Ruel, seconded by Inspector Tétreault, it was resolved :

"That the Roman Catholic Committee of the Council of Public "Instruction be respectfully requested to pass a resolution by which each "school inspector would be *ipso facto* a member of the board of Examiners "within his district of inspection, with the same powers as the other "members."

The conference then decided in favor of the law which fixes eighteen years as the age of candidate who present themselves for examination before a Board of Examiners.

On motion of Mr. Nantel seconded by Mr. Vien it was also Resolved :

"That the conference of School Inspectors unanimously recognize "the utility of a Central Board to prepare the examination papers for can-"didates for teachers' diplomas."

After a carefully prepared essay had been read on *Teachers; professional teaching; lectures on pedagogy, salaries&c.* Mr. Stenson moved, seconded by Messrs. Tanguay and McGrath.

"That the School Inspectors of the Province of Quebec are convinced that it is necessary to establish schools of pedagogy, for the instruction of teachers who have not been trained in a Normal school."

This resolution was unanimously adopted.

Messrs. Bégin, Beaulieu, Fontaine, Vien, Lippens, Demers and Rev. Mr. Hexford expressed their views on the subject of *salaries* and it was then moved by Mr. Demers, seconded by Mr. Lippens and unanimously resolved :

"That the government be respectfully requested to increase the grant to public schools and that such increase be payable directly to the teachers of the different schools, and that in deciding the amount to be given to each teacher, two things be considered: 1st. the grade of the diploma. 2nd. the results obtained as stated in the report of the inspector."

The 6th. item of the order of the day was then taken up.

The Rev. Mr. Lyster and Inspectors Hubbard, Dupuis and Nantel took part in the discussion, after which Inspector Grondin moved, seconded by Inspector Bégin and it was Resolved : "That article 2057 of the Revised Statutes (art. 260 of the Code of Public Instruction) be amended in such a manner, as to clearly establish the right of School Boards to expropriate land adjoining a school site already built upon, but which is not sufficiently large,—such expropriation to be made only after consulting the Superintendent and obtaining his approval."

It was then moved by Mr. McGown, seconded by Mr. Hubbard, and resolved :

Digitized by Google

"That the school inspectors of the Province in conference assembled desire to place on record their lively appreciation of the value of such a gathering and their gratitude to the government for having placed the necessary funds at their disposal."

"That in order to obtain more efficiency from the primary schools of this Province it is imperatively necessary that a larger grant be given to our public schools as asked for by a former resolution."

The subject of the *pension fund of officers of primary instruction* having been discussed by Messrs. Stenson, Brault, Lippens and Dupuis, it was moved by Mr. Grondin, seconded by Mr. Bégin, and unanimously Resolved:

"That the inspectors do not deem advisable at present to suggest any amendment to the law governing the pension fund for officers of primary instruction."

The question of *amendments to the school law* then came before the convention. In the discussion which ensued, the Rev. Mr. Rexford and Inspectors Lippens, Demers, Hubbard and McGown took part. Different suggestions were made with respect to amendments to articles 2040, 2055, 2180, etc., of R. S. P. Q., but they were left over for further consideration, and the conference drew attention to the injustice which appears to result from the liberty which article 157 of the Code of Public Instruction (Article 1996 R. S. P. Q.), allows to a ratepayer of a dissentient municipality of ceasing to belong to such municipality without reasonable cause and of placing himself under the control of the School Commissioners.

THE MUSEUM OF NATURAL HISTORY.

As shown by the report, given below which was forwarded to me, by Mr. Saint-Cyr, too late to appear as one of the appendices of the report, which I have the honour to present, the Museum of Natural History of the Department of Public Instruction, of which he is curator, has become, under his able management, one of the most interesting scientific institutions of our Province. The collections which Mr. Saint-Cyr has got together, through the persevering work of several years, are visited daily by a large number of persons of high position; among them being members of scientists from different parts of Canada and the United States, with whom he is in communication. I would therefore be greatly pleased if your Government would kindly take into favourable consideration the reasonable requests made by Mr. Saint-Cyr, both for his Museum and for himself.

TO THE HONOURABLE GÉDÉON OUIMET

Superintendent of Public Instruction

Sir,

I have already, on several occasions and particularly in my report of the 8th, of February, 1888, given an abridged account of the struggling commencement and of the progress of the Museum of Public Instruction since the spring of 1880, the period at which I commenced to lay the

Digitized by Google

foundations of the institution and to collect the first elements, up to February 1888. I shall not repeat here what I have already written upon this subject on pages 5, 6 and 7 of the above mentioned report. I shall simply quote a few words to show the confidence I had in the future of the Museum. Having taken communication of a letter, by which the Provincial Secretary of the day, the Honourable C. A. E. Gagnon informed you that the Government was favorably disposed towards the Museum and that rooms were to be prepared for its reception, I mentioned the fact in my report and added : " We have therefore every reason to " believe, thanks to the justice and well known liberality of the Govern- " ment of the Province of Quebec, that we shall, in the near future, be " able to remove our Museum into more suitable rooms of a sufficient size " to enable the various classes of specimens to be systematically arranged. " I am happy to be able to say that the hopes which I then entertained, " have been fully realized. We took possession of the Museum rooms on " the 7th, of December, 1889. The rooms were well furnished with glass show " cases, provided with locks and keys.

I therefore lost no time in conveying thither the specimens of Natural History collected during the last ten years and in arranging them in the show cases intended for that purpose. I resumed the work with more courage than formerly. The results of my operations, during the years 1888 and 1889, will be found on pages 3, 4 and 5 of my last report (27th, February, 1890). The catalogues accompanying this report may be consulted by persons desirous of obtaining information on the animal, mineral and vegetable wealth of the Province of Quebec. In the formation of the Museum I have never lost sight of the fact, that, before all, it should be a national work, that is to say composed of native elements and materials ; without, however, at the same time, altogether setting aside or refusing specimens from foreign countries, with which it is important to become acquainted. I do not hesitate to say that the desired end has been attained to as great a degree as possible and that the three kingdoms of Nature are here largely represented :

The animal kingdom by an almost perfect collection of the birds of the Province of Quebec and by important collections of native mammalia, of fish, of shell-fish, of crustacea, etc., and finally by a collection of more than 2500 specimens of the insects of our country ; the vegetable kingdom by a collection of plants comprising 2600 specimens, among which plants fit for fodder (roots, grasses, &c.), were the objects of most particular and careful research on account of the interest they excite from an agricultural point of view ; the mineral kingdom by a lithological collection, comprising almost every known species of rock in the Province, named, labeled and classified with care, with references to the localities whence they were taken. There will also be found the minerals used in domestic economy, such as building stone, granite, gneiss, sand-stone, lime-stone, ornamental-stone, jasper, porphyry, labradorite, serpentine and marbles ; those used in various manufactures, such as sulphate of Baryta, molyb-

Digitized by Google

denite, gypsum, ocres, carburet of iron or black-lead; those employed in agriculture, such as phosphates, marl; and finally metalliferous minerals, auriferous quartz, silver ores, and those of copper, zinc, lead, antimony, chromium, and of iron of many kinds known in this Province. I must also draw your kind attention to the large collection of chrysotile or asbestos and associate minerals, which I selected during the course of last summer in the mines in actual operation in the townships of Broughton, Thetford, Coleraine, Wolfestown, and Garthby. This collection which fills ten show cases in the Museum, is much admired by connaisseurs. I must not omit to mention the fact, that on the recommendation of the Honourable Ministers, collections of plants and minerals have been prepared, even in duplicate, for public institutions or sent to foreign countries, with the praiseworthy object of making the natural resources of the Province known abroad. Thus, quite recently, when a collection of minerals of the Province of Quebec was being prepared for the Jamaica Exhibition recourse was had to the Museum for part of the collection. Among the specimens supplied on this occasion, I might mention iron and copper ores, sulphates, blacklead, chrysotile or asbestos, serpentine picrolites, building-stone, ornamental stone, pressed turf, &c., &c.

I desire also to call your attention to a rich collection of Natural History specimens, made at my request by one of my sons, a surveyor, in the Bahama Islands, in the years 1889 and 1890. This collection fills 34 cases of the Museum and comprises 1400 specimens both animal and vegetable. I took advantage of the opportunity of my son's residence in those islands to have this collection made, an opportunity which will probably never occur again.

Under the intelligent protection of the Honourable Mr. Gagnon, Provincial Secretary, during the first three years of the Government of the Honourable Mr. Mercier, the Museum has increased rapidly and to day presents a collection of specimens of Natural History, which, most assuredly do honour to the Government and daily attract many visitors. I have perfect confidence that Honourable Mr. Langelier, the present Provincial Secretary, will continue the work of his predecessor and that, at no distant day, the Museum of Public Instruction will yield nothing in importance to any of the Provincial Museums of Canada.

I shall not quit this subject without begging of you to draw the attention of the Honourable Provincial Secretary to the wants of the Museum and to the insufficiency of the sum of $600.00 hitherto voted by the Legislature, as aid to an institution which has already rendered great service to the country and which is destined to render still greater in the future.

The Curator of the Museum has had an annual salary of $800.00 since the first of July 1886. His duties and occupations are numerous and varied and demand close and fatiguing work of at least eight hours per day in winter, and ten hours and over, in summer. There are also excursions to

Digitized by Google

be made and long and tiresome walks which must be taken to increase the collections of the Museum and make it as perfect as possible. There are also the preparation, mounting, classification and labeling of the specimens collected during my excursions. The specimens, the glass cases and the rooms of the Museum, must be kept in the highest degree of neatness and cleanliness, the only effective way of preserving the collections from the ravages of destructive insects.

An enormous amount of labor has been required to form the museum. The various species it comprises number about 8000 and the specimens of these about 15.000. To this must be added the study and researches which the Curator of the Museum must make to meet the requirements of his position. Submitting these few observations,

I have the honour to be

Sir,

Your obedient humble servant.

D. N. SAINT-CYR.

Curator.

MUSEUM OF PUBLIC INSTRUCTION,

29th November 1890.

THE CHICAGO EXHIBITION.

The marked success obtained by your school exhibition at London in 1886, notwithstanding the limited time at the disposal of the members of the Committe entrusted with its preparation, will probably induce your Government to take part in the great international school competition which will assuredly form part of the Exhibition to be held in Chicago in the spring of 1892.

If such should be the intention of your Government, I would request that the instructions to be given me would allow me sufficient time for the preparations necessary to enable us to appear to advantage in this intellectual competition to which all the nations of the world are invited.

THE HONOURABLE P. J. O. CHAUVEAU.

During the scholastic year just completed the cause of Education has lost one of its most valued promoters by the death of the Honourable P. J. O. Chauveau who devoted the greater part of his existence to that important subject.

After having been, if not the founder, at least the organizer of our school system, both as Minister and as Superintendent of Public Instruction, the Honourable Mr. Chauveau, after his retirement from public life,

Digitized by Google

worked, with the same zeal, in the Council of Public Instruction, of which he was one of the most assiduous members, to complete the labor of his life. Therefore the Roman Catholic Committee gave true expression to the feelings of all friends of Education in this Province, when on motion of His Eminence Cardinal Taschereau, seconded by the Honourable Mr. Justice Jetté, it adopted the following resolution :

" That this Committee desire to record in their archives the expression " of their profound regret at the death of the Honourable Mr. P. J. O. " Chauveau, a member of this Committee since the organization of the " Council of Public Instruction and formerly Minister of Public Instruc- " tion, who, during the whole of his career, so continually strove for the " advancement of education in this country and to whom we are indebted " for most of the progress so far attained."

I have the honor to be, Sir,

Your obedient servant,

GÉDÉON OUIMET,

Superintendent.

REPORTS OF THE SCHOOL INSPECTORS.

Digitized by Google

Digitized by Google

REPORTS OF THE SCHOOL INSPECTORS.

Mr. T. BEAULIEU.

(*Translation*)

ISLE-VERTE, 7th. August 1890.

Sir,

I have the honour to submit my annual report and grand statistical table for my district for the year 1889-90.

This district comprises 42 municipalities: 15 in the county of Kamouraska and 27 in that of Temiscouata.

During the past year, there were 229 schools in operation in these municipalities: 212 being elementary scools (2 for boys, 6 for girls and 204 mixed), and 17 model schools (8 for boys, 3 for girls and 6 mixed); there were also 9 independent schools, one being a classical college, one girl's academy, 7 model schools (6 for boys and one mixed), which brings up to 238 the total number of institutions of all kinds in my division.

The schools were kept in 230 houses, 197 of which were the property of the school boards, 24 were rented by them and 9 belonged to the independent schools.

The teachers consisted of 14 priests, 10 ecclesiastics, 7 Christian Brothers, 40 nuns, 4 male and 232 female teachers, making a total staff of 307. Nearly 9,000 pupils attended the schools, with an average of 6,000.

The schools on the whole were *good* If, on the one hand, some were *inferior*, on the other hand others were *excellent* and compensated for the former, thereby bringing up the average. In some of the good schools the system of teaching is all that can be desired and, in this respect, they compare favorably with the good primary schools which I visited, in France, last winter. If there be any difference in favour of the latter, it is not because they know better how to teach, but because they know better what to teach. The teaching in these schools is very practical, while it is not practical to the same extent in our good and still less practical in our inferior schools.

There are always a good many of the latter amongst the elementary schools of my district, and this is due to the fact that the commissioners continue to engage teachers who are not sufficiently competent. They are not to be blamed, for they cannot do otherwise; they have to engage whatever teachers they can get if they want their schools to go on. Last year, the commissioners had great difficulty in getting teachers and some schools had to

Digitized by Google

remain closed through want of them, although 52 non-certificated teachers were engaged. We are compelled by circumstances to confide a good many of our schools to inferior teachers and when will this end? So long as we have not enough teachers, we cannot make a selection and so long as we pay lower wages than those given to the most humble domestic, the number of teachers and, above all, of capable teachers, will not increase.

I was happy to distribute in all the schools and to explain to the teachers the course of study which you sent me.

By having this printed in a form which allows of its being studied at a glance and having it distributed through the Province, your department has done a great deal, in my opinion, towards obtaining progress in the schools, unformity in teaching and correctness in statistics This course of study has, as a rule, been well received by the teachers; but some persons who have influence in educational matters, find that it contains too much. In the conversations which I had with some of these persons on the subject, I admitted that, I myself, would find it too full of subjects if the same importance had to be given to each of them; but I added that such was not the case and that, as the teacher was allowed perfect freedom as to the time to be devoted to each subject, he should give to each one the importance it deserves and teach some every day, others every second day and others still once or twice a week. By this means, the course of study may be followed and the time given to matters of secondary importance, far from impeding progress in the essential subjects, stimulates it by developing the pupils' intellects, and by the varied exercises, making them more attentive to all the lessons.

But little heed has been paid, in my district, to the school regulation which says that the holidays in rural districts are to begin on the 15th July. A good many schools had their holidays at the end of June. But I must say that it is very difficult to carry out this regulation here; a good many schools change teachers every year and the commissioners, owing to the difficulty they experience in finding teachers, cannot replace those who leave before the first fifteen days of July have passed. When the teacher is replaced at once and the new one lives at a distance, it is hard for him to move only for a fortnight and then go home for his holidays. The regulation is still unobserved.

I confine myself to these general remarks which, with my inspection bulletins and statistical table, will show the condition of public instruction in my district.

I have the honour, etc.,

T. BEAULIEU.

School Inspector.

Digitized by Google

MR. D. BÉGIN.

(*Translation.*)

RIMOUSKI, 10th August 1890.

Sir,

I have the honour to submit my grand statistical table for the scholastic year 1889-90 with my report on the schools of my district for the same year.

This table shows that this year there were 138 elementary schools in operation under control of the Roman Catholic commissioners, 2 under the Protestant trustees, at Metis, and one independent school kept by the *Sœurs des Petites-Ecoles* in the town of St-Germain de Rimouski ; 17 model schools also under control ; 2 independent model schools, one taught by the Sisters of the Good-Shepherd, in the parish of St-Jérôme de Matane and the other in the town of St-Germain de Rimouski by the Sisters of Charity, and finally the academy of the latter at the same place.

These were the institutions I had to inspect during the year and they were attended by 6,243 pupils The schools were taught by 203 female teachers, 24 being Sisters of Charity, 4 Sisters of the Good Shepherd, 13 *Sœurs des Petites Ecoles*, 100 by female teachers holding certificates and 62 without certificates.

I am sorry to say that the number of the latter has increased this year by 19. This is the result of the insufficient salaries paid to teachers, for I am convinced that, in many instances, teachers with certificates could be procured if a little or more remuneration were offered them. Of these 62 schools, 24 are inferior or useless.

I distributed to all the schools in my district the " Regulations concerning pupils, " and the " Course of study " for the various schools. I think they will be productive of some good. In my opinion, every school should be provided with the *Journal d'inscription et d'appel*, prepared by Mr. J.-A. Langlais, of Quebec, on account of the excellent professional information it contains and the forms of the half-yearly reports which the teacher has to send in to the secretary-treasurer of his municipality.

My statistical table shows that the average yearly salary for female lay teachers of elementary schools in the country parts is $76.00, and of model schools $82.00 ; but these figures are exclusive of lodgings and fuel.

The school houses which are now built are better from a sanitary point of view than formerly. The ceilings are higher, but it is difficult to have the houses built at a reasonable distance from the public road.

The average attendance is a little over two-thirds ; this is explained by the fact that, during the six months, between the first of May and the

Digitized by Google

first of November, the schools are almost deserted, because the parents require the services of their children. This is why I would like to see the schools at work during the six winter months and that no holidays be allowed except from the 31st December to the 6th January inclusively.

A great many of my schools are good, very good, some are excellent as you may have observed by my inspection bulletins which I had the honour of sending you during the year. I refrain, this year again, from passing them in review and from mentioning those which have especially distinguished themselves—it is so delicate a matter—reserving my right to do so in my next report. However, I consider that, in justice, I should mention here the model school of Ste-Cecile du Bic, taught by Miss Adèle Richard, a former pupil of Laval Normal School, where the course of study is followed throughout and with the greatest success.

I have the honour, etc.,

D. BÉGIN.

School Inspector.

Mr. P. F. BELAND.

(*Translation*)

STE-JULIE, 23rd July 1890.

Sir,

I have the honour to submit my annual report for the scholastic year 1889-90. This is my 39th annual report. I have been for quite a long period of time an inspector, besides six years as a teacher I am proud of it and I hope to die an inspector. There is nothing more glorious and more consoling than work done in educating youth. I have the pleasure of seing the third generation in nearly all the schools.

What gives me most pleasure is to be able to say, in all truth, that each year has shown progress. In our sphere of duty we require patience and perseverance which may stand any trial; a thousand obstacles have te be overcome to obtain success in teaching. We have studied and tried many systems; the Department of Public Instruction of this Province has chosen the most practical one. It contains all the elements necessary for enabling us to compete with advantage with other nations. If, at some future day, our government can vote a sufficient amount for the encouragement of the teachers, many good ones will be obtainable, for teaching will then be an enviable career. However, in my district, I cannot complain of the quality of the school teachers. There are 152 of them; 35 at least are excellent, 100 very good, 12 good and 5 middling.

Digitized by Google

If the salaries were higher, teachers would work with greater ardour, for their merits would at least be more fairly rewarded. The average salary of female teachers is the ridiculous amount of $77.00; many of them have only $60.00. A maximum figure should be determined and the minimum should not be less than $100.00 per annum for elementary schools, and $150.00 for girls' model schools. Male teachers should not get less than $400.00. There are, in my district, 23 municipalities which have in operation 126 elementary schools attended by 4,061 pupils, of whom 2,045 are boys and 2,016 are girls. The average attendance is 3,277 or nearly four fifhs There are 13 model schools in operation. This is not enough. Of these 13 schools, 3 are for boys, 1 for girls and 9 mixed. In the 3 boys' schools, there are 109 pupils; in the girls' schools, 47 and in the 9 others 293: 126 boys and 167 girls. Total number of boys in model schools: 235. This is by far too small a number. When will we have a good model school for boys in each parish? I cannot say; but every year I point out this deplorable want.

Plessisville, in the county of Megantic, has made great sacrifices to keep up a boys' academy. The teacher, Mr. Fournier, had only 16 pupils this year; he would have had more if the monthly contribution had not been so high. This institution is, on the whole, very satisfactory.

The Sisters of Charity have a model school in their convent, which is a great credit to them and which does very good work. Their model school for girls compares favorably with the boys' school and is even better. It should be classed as an academy. The same may be said of the two other convents. These three institutions have 214 pupils. The teachers who are trained there teach in a very pratical manner. I may again repeat that our model schools supply their contingent of good teachers.

Hon. Mr. Joly's independent school, at Ste-Emélie, county of Lotbinière, is a great boon to the children of the working classes who attend it to the number of 38. This is an excellent school.

The elementary schools are attended by 1,972 French and 73 English speaking boys. There are 1,932 French and 84 English speaking girls. The grand total of the institutions of all kinds in my district is 144. Increase 2. The total number of pupils is 4,808; last year it was 4,744. Increase, 64.

Three school houses have been built and several have been repaired. The closets, in many municipalities, are being repaired and built on a better plan.

The school furniture appears sufficient in the eyes of the great majority of the rate-payers. We must be satisfied with this for the present.

The secretary-treasurers, with few exceptions, collect the rates and pay the teachers punctually. They keep their accounts according to the official method.

There are time-tables in all the classes. I ordered the teachers to

Digitized by Google

keep them always hanging up in the class-rooms for the benefit of those who may succeed them. I distributed the copies of the "Course of Study" and of the regulations which I received.

I am proud to be able to say that, on the whole, every thing works very well in my district. There are 14 teachers without certificates, but I must say that they are all qualified and will have diplomas as soon as they are old enough.

I conclude by saying that all the schools in my district fully supply the wants of the localities which I visit.

I have the honour, etc.,

P. F. BÉLAND.

School Inspector.

Mr. J. E. BELCOURT.

(*Translation.*)

NICOLET, 7th July 1890.

Sir,

I have the honour to submit my report on the state of Public Instruction in my district for the scholastic year 1889-90.

This district comprises the counties of Nicolet and Yamaska and contains 37 municipalities, with 236 educational institutions of all kinds: a classical college, 3 academies, 20 model schools and 212 elementary schools.

There were 8,591 pupils in the schools under control and 1,028 in the independent schools. The average attendance in the schools under control was only 70 per cent, a lamentable state of affairs which must be attributed, to a great extent, to the epidemie *influenza* which prevailed throughout my district during the months of January and February. In fact the school registers show very many absences from the schools during these two months.

As regards the progress made during the year, I found 43 schools *very satisfactory*, 25 *satisfactory*, 42 *inferior* and in 12 no progress was made. All the subjects of the new course of study were taught in most of the schools. However, the teaching of Drawing, Agriculture and elementary Book-keeping leaves much to be desired. A greater number of pupils might learn these subjects and they should be taught in a more practical manner. In many instances, I found the teachers but little qualified to teach these subjects.

Digitized by Google

Allow me to call your attention to the fact that, in some municipalities, teachers without certificates are engaged to the detriment of those who hold certificates and who will not give their services for a salary of from fifty to sixty dollars. I can imagine that a vacancy may occur during the year and that it may then be difficult to find a teacher, but I am convinced that, at the beginning of the year, it is always possible to procure teachers with certificates, provided a reasonable price be offered.

I found but few houses in bad condition and I am happy to say that, for some years, the school houses have every where been repaired or built It would be desirable that a little of the same zeal be displayed for improving the furniture which, in many schools, is not what it should be.

The secretary-treasurers, with very exceptions, perform their duties to everybody's satisfaction and most of the teachers are paid regularly.

However, in some municipalities, the commissioners are obliged to wait for the grant for the last half-year, to pay the last instalment to the teachers. It would be much better if the commissioners could always do without this grant to pay the teachers' salaries before the holidays.

The municipality of St-Guillaume has a new independent institution under the Brothers of St-Joseph. I have entered this institution in my grand statistical table amongst the subsidized independent model schools.

I have drawn up, as last year, the following list which also gives, as nearly as possible, to each municipality, its relative merit with respect to various prescriptions of the new school regulations.

The municipalities of Nicolet, St-Thomas, village, La Baie du Febvre, St-François, village, Ste-Angèle de Laval may be classed as excellent.

The municipalities of St-Elphège, St-Grégoire, St-Bonaventure, St-Zephirin, St-Pierre-les-Becquets, St-Wenceslas, St-Guillaume, St-Thomas, parish, Ste Monique, St-Célestin, St-François, parish, St-Pie de Guire, St-David, St-Sylvestre, Ste-Marie de Blandford and Ste-Gertrude may be classed as very good.

The municipalities of Ste-Brigitte des Saults, Ste-Sophie de Levrard, St-Michel d'Yamaska, Gentilly, Ste-Perpétue, Ste-Eulalie, St-Léonard and Becancour may be classed as good.

The municipality of St-Samuel kept only 4 points out of 10 and is, in consequence, classed as inferior.

These remarks, with the details given in my bulletins for each school which I visited, will suffice, I trust, to inform you as to the state of education in my district.

I have to honor &c.,

J.-E. Belcourt,

School Inspector.

Mr. BOUCHARD.

(*Translation*).

ST-RAPHAEL, 30th July 1890.

Sir,

I have the honour to submit my report on the state of public instruction in my district for the year 1889-90.

I made 272 inspections during the year ending the 30th June last. I was unable to do more, owing to the extent of my district, the number of schools it contains (209), the difficult roads and the diseases which prevailed throughout the Province during the winter and from which I myself did not escape.

I have much pleasure in stating that the laws are generally observed, but the regulations are not followed in some municipalities as they should be.

I must admit in all sincerity that we cannot get the school laws and regulations observed without a good deal of trouble and discussion; and if you did not support our recommendations by the letters which you send to several school boards after the inspector's visit, our efforts would often be useless.

I am compelled to admit that, in two parishes of the county of Bellechasse, the commissioners will not levy the monthly contribution and in another parish they do not it regularly.

There have been but few extensive repairs executed or new buildings put up this year, but I expect that more will be done nex tyear The commissioners, as a rule, do not sufficiently follow the regulations with respect to the repairs to be made to the school houses, furniture, closets or with respect to maps, black-boards and registers for visitors.

At my first inspection, I distributed in all the schools of my district the copies of the " Course of study " and of the school regulations which you sent me. I am convinced that they, together with the new journal authorized by the Department of Public Instruction, will do a great deal of good in the schools and will greatly assist the teachers in the performance of their duties, especially those who have but little professional knowledge.

By following the models of time tables published in the journal, the teachers will be able to draw up some for their schools. A great many teachers have none yet, and I have not insisted on the observance of the rule because some of them do not even know what it means.

The secretary-treasurers, with few exceptions, perform their duties faithfully and notwithstanding the bad crops of the past two years, succeed in collecting sufficient money to pay the teachers regularly.

Of the 183 elementary schools under control, 9 were very good, 74 were good, 65 were only middling, 34 were inferior and one useless.

The schools which are only middling are still of some use to the children who attend them, since they learn a little Reading, Writing, Arithmetic and Catechism. The late Dr. LaRue used to say that it was better to have a little baggage than no baggage at all. I am of the same opinion and think that it is better to have a small school than none at all.

The 13 model schools under control give satisfaction ; 3 of them are taught by laymen, 9 by lay women and one by the Sisters of Charity.

The two academies under control are taught by male religious teachers. That of L'Islet, founded in 1852, has always been flourishing under the management of the Christian Brothers. It has trained young men who have made their mark in all classes of society. It has a wide-spread reputation, for pupils come to it from all parts of the Province.

The Montmagny academy will soon be a rival to the older establishments. Although the *Frères du Sacré Cœur de Jésus* have been only four years in charge, they have already given complete satisfaction to all interested parties.

The model schools and independent academies are taught by nuns, except one which is taught by a lay teacher. The Ladies of the Congregation have three institutions, the Sisters of *Jesus-Marie* have two ; those of the Good Shepherd, two, and the Sisters of Charity one. All these communities rival with each other in their zealous efforts to give a good sound education to their pupils and provide them with every possible comfort by making all the most recent improvements in their establishments.

The parish priests, with very few exceptions, encourage the school commissioners and teachers by word and deed, and I congratulate them. I thank them for the kind welcome they always give me and for the trouble which some of them take to accompany me in my inspections.

Mr. C. BRAULT.

(*Translation.*)

POINTE CLAIRE, 9th August 1890.

Sir,

I have the honour to submit you the following information with reference to the state in my district for the year 1889-90.

I

The 115 scholastic institutions of my district were attended by 7,062 pupils, or 16 pupils more than last year.

Of these 7,062 pupils,

3,394	attended	87 elementary schools,
1,323	"	15 model schools under control,
498	"	5 independent model schools or convents,
25	"	1 independent lay model school,
1,155	"	5 academies,
667	"	2 classical colleges.

The total average attendance was 5,413, a little less than 77 per cent, and 4 per cent more than in 1888-89.

French speaking pupils 6,660. English speaking pupils 402.

275 English speaking pupils have learnt French.
1,960 French speaking pupils have learned English

Roman Catholics	6,864
Protestants	198

II

All have learnt Reading, Writing and Arithmetic. The beginners, even those who are learning the alphabet, are provided with slates on which they amuse themselves by copying the letters or figures which the teacher traces on the black-board or on the slate.

In all or nearly all the convents and in many boys' and mixed model schools, the two first subjects are remarkably well taught. In some institutions they teach oratory or declamation in connection with Reading, a subject which I consider of great importance. Amongst these institutions I may mention: 1. The Christian Brothers' school at Lachine, where I heard children of from 10 to 15 years of age express themselves most eloquently; 2. The school in the village of Ste-Justine, where the teacher, Mrs A. Lussier, has taught the children to recite their lessons, in Sacred History amongst others, in a very natural tone, correctly and without paying too much attention to learning by rote; 3. School No 4 in St-Polycarpe, under

Digitized by Google

Mr. Joseph Lavallée, whose young pupils recite with great facility and in the most natural manner, narratives, amusing anecdotes, etc.

III.

Comparing the statistics for the year 1889-90 with those for the year we find :

An increase of 240 in Object lessons,
14 in Sacred History,
120 in History of Canada,
51 in Agriculture,
89 in Vocal Music,
A decrease of 61 in Grammar,
385 in Drawing,
113 in Composition,
151 in Geography,
320 in Book-keeping.

IV.

Male teachers in religious orders	72
Male lay teachers	21
Female teachers in religious orders	85
Female lay teachers	88
Teachers of both sexes in religious orders	157
Lay teachers of both sexes	109
Grand total of teachers	266
Male teachers with Normal School diplomas	7
Female " " " " "	3
Male teachers with certificates from boards of examiners	14
Female " " " " " "	71
Male teachers without certificates	0
Female " " "	14

Out of the 14 female teachers without certificates, 8 teach in elementary schools, 2 teach English and Music in convents and 4 act as under-teachers in model schools with more than 40 pupils, or elementary schools with more than 50 pupils.

The lay teachers who seemed to me to be the most efficient are :

The Misses Emma Boucher, Eva McMartin and Maria Olivier, at St-Laurent ; Mr. Robert M. Smith, at Lachine (town) ; the Misses Marie-P. Décary, at Lachine (parish) ; Angèle Payment, at Ste-Geneviève No 3, Célina Normandeau, at Ste-Anne (village) ; Mr. Léandre Proulx, at Ste-Anne (parish) ; Mr. Napoléon Gélinas, at Pointe-Claire ; the Misses Artémise Lavigne, at l'Isle-Perrot ; Fabiola Chartrand at Vaudreuil ; Emilie Duperré and Gertrude Bienjouetté, at St-Lazar ; Emma Mallette and Lucie Leduc, at Rigaud (parish) ; Mrs. Ernestine Gravel at Très-St-Rédempteur ; Miss Elise Cam-

Digitized by Google

peau and Mr. Lucien Normandin, at St-Marthe; Miss Brigitte Séguin and Mrs Alida Lussier, at St-Justine; Messrs Isaac Gélinas, Ed. Dorion and J. Lavallée, at St-Polycarpe; Mrs Maria Héroux and Miss Catherine Riley, at St-Télesphore; Messrs Maurice Lapointe and J.-E. Juaire, at St-Zotique; Mr. St-A. Vébert, Mrs. Flore Proulx and Miss V. Hurteau, at Coteau-du-Lac; Mr. J. E. Lefebvre, the Misses Alexina Parand, Amanda Bourbonnais and Mrs Alphonsine Contant, at St-Clet and Messrs. J. Guérin and Onésime Aubry, aux Cèdres.

Other teachers who seemed in other respects to perform their duties well, could not teach all the subjects of the "course of study," either on account of irregular attendance or of the youth of the pupils.

The average of the salaries has not increased to any extent.

V

I think that article 241 of the Code of Public Instruction should be amended so as to make the teachers' salaries payable in ten monthly payments instead of every six months.

I regret to say that several school directors pay the salaries of the assistants whom they are obliged to have, according to the regulations, without their own salaries being increased. One of them, a very well educated man, knowing both languages perfectly, has become discouraged, and has resolved to give up teaching.

The information, containing a summary of my inspection bulletins which I would have to give, is about the same as that contained in my last annual report.

The school accounts are generally well kept and the teachers regularly paid. However, three or four secretary-treasurers are not sufficiently diligent in collecting the taxes.

VI

I conclude with the statement prescribed by article 13, paragraph 14, of the regulations of the Roman Catholic Committee of the Council of Public Instruction:

I have the honour, etc.,

C. BRAULT,

School Inspector.

MR. J. B. DEMERS.

(*Translation.*)

ST-JOHNS, 30th August 1890.

Sir,

To the inspection bulletins which I have already had the honour of sending to you as to the particular condition of each school in my district, as also the table of the general statistics of these schools, I consider that I have only to add a few remarks on the most important changes effected during the scholastic year 1889-90.

I was happy to observe that all the schools of my district, under the control of the commissioners, were, with two or three exceptions, open during the year although a great many were temporarily closed on account

3

Digitized by Google

of *grippe* which prevailed in all the municipalities, last winter. Of those under trustees, five, two roman Catholic and three Protestant, were closed throughout the year on account of there not being enough children or through want of funds.

My statistical table for the year 1889-90 shows that the number of pupils registered in institutions of all kinds exceeds by about 300 that of last year, and that the average attendance has increased in about the same proportion. The short comparative table given below for past years shows the progress made in 1889-90 in the chief branches of the official course of study.

COMPARATIVE TABLE FOR THE YEARS 1888-89 AND 1889-90.

Branches		1888-89	1889-90	Increase.	Decrease.
Reading	spelling	1,990	2,160	170	
	fluently	4,698	4,517		181
	with explanation	804	1,055	251	
Writing		6,644	7,433	789	
Arithmetic		6,649	7,490	859	
Grammar		3,164	3,083		81
Geography		2,035	2,074	39	
Sacred History		2,075	2,269	194	
History of Canada		1,648	1,196		552
Drawing		2,266	3,380	1,124	
Agriculture		1,117	1,157	40	

Thus, the number of pupils learning the principal branches has increased in a fairly considerable proportion, with the exception of Grammar and History of Canada, in which there has been a slight decrease. This I attribute, on the one hand, to the illness already mentioned, and, on the other, to the fact that a much larger number of children have made their first communion this year, so as to take advantage of the visit of the bishop, which was to take place during the summer, in order they might be confirmed.

Noteworthy improvements have also been made in the construction of school houses and in school furniture. During two years, not less than 24 houses for schools under control have been rebuilt or repaired so as to be as good as new. Most of them fully meet the requirements of the law and of the regulations; however, I regret to state that, in some cases, advantage has been taken of the fact that a portion of the materials come from an old house which was demolished to make the work come under the head of repairs and thereby the obligation of preparing a plan and getting it approved by the Superintendent has been evaded. Ineed not add that these houses still leave much to be desired.

As regards the school furniture, I am very happy to say that this year a certain number of municipalities have at last taken a step in the right

Digitized by Google

direction, and I consider it my duty to name them. They are: the municipalities of the parish of St-Johns, Ste-Marguerite de Blairfindie, the dissident municipality of the town of St-Johns, those of St-Remi and the parishes of St-Alexandre and St-Sebastien, in the county of Iberville. Of all the municipalities in my district, St-Sebastien has the best school in this respect; it has the most improved furniture as well as all the articles necessary for intuitive teaching, such as moveable alphabets, an arithmeticon, terrestrial globe,series of tables of Sacred History, History of France, Natural History, etc. Moreover, it has the great advantage of having an able teacher who knows how to turn all these to advantage.

Of the books of the school boards I have but little to say, except that the annual auditing it not always as productive of as much good as was expected. I do not wish, however, to insinuate that the auditors are not disposed to do their duty properly, but in most instances they have not the necessary knowledge and are not sufficiently conversant with the financial affairs of the commissioners and especially the school laws: this is thoroughly confirmed by a certain number of cases submitted to you during the year.

I have the honour, etc.,

J. B. DEMERS,

School Inspector.

Mr. J. C. DUPUIS.

(*Translation.*)

L'ASSOMPTION, 12th August 1890.

Sir,

I have the honour to submit my report on my second yearly inspection of the schools of my district. A much larger number of pupils attended the schools this year; nevertheless, the average attendance is less than last year. This is generally attributed to the prevalence of *grippe* in the district; I however noticed that the parents too frequently prevent their children, without reasonable cause, from going to school.

In my district there are only seven model schools for boys. They are in the municipalities of Rawdon, Lachenaie, L'Assomption, Laurentides, St-Roch, Lanoraie and St-Jacques. Wealthy parishes like Mascouche, Lavaltrie, St-Esprit, St. Liguori, L'Epiphanie, Ste-Julienne, Repentigny, St-Paul l'Ermite, St-Sulpice, have no model schools for boys. In nearly all these parishes I find important citizens who ask for these model schools, but they do not wish to push matters for fear of hurting the people's feeling and injuring their practice. The rate-payers are nearly all opposed to the idea because *it costs too dear.*

Digitized by Google

Last year, two schools were closed in St-Lin ; they were re-opened this year. The parish of Wexford also opened two schools in the course of the past year.

In accordance with your instructions, the old school in the town of L'Assomption was demolished and replaced by a splendid building.

In St-Roch, all the schools in bad order, which I had mentioned to you, have been repaired or rebuilt.

The new course of study has been followed as well as possible, and I think I may assure you that it will be more so next year. I have already observed that it has done a great deal of good. The only drawback in my district is that a great many children go to school only until they have made their first communion, that is to say for two or three years ; consequently, the pupils leave school without learning what is set apart for the third and fourth years. This remark applies to so many pupils that I deem it my duty to mention this fact.

I have succeeded in introducing almost everywhere the new register for Roman Catholic schools in the Province of Quebec, authorized by the Department of Public Instruction. Next year it will be in use in all the schools. I have already noticed that the teachers read over carefully the excellent preface in the register and derive great benefit from it.

The *Journal de l'Instruction Publique*, which is indispensable for every person who devotes himself to teaching, is not received here, which is much to be regretted.

The secretary-treasurers pay the teachers twice a year. In my opinion, this system should be altered. When a poor teacher, who earns only $80.00 or $100.00 a year, is obliged to wait six months before getting a cent, she cannot avoid running into debt. She, then, has to pay dearer for things and during all that time the money lies idle in the hands of the secretary-treasurer. As the taxes are collected in November, I think that, after that month, the teachers should be paid monthly. With money they could buy where they liked for cash and would not be imposed upon. This would be rendering them a service and justice.

I have the honour, etc.,

J. DUPUIS.

School Inspector.

Digitized by Google

Mr. A. FONTAINE,

(*Translation.*)

JOLIETTE, 9th August 1890.

Sir,

I have the honour to submit my report for the scholastic year 1889-90.

My statistics for the year just ended, show that 5,868 pupils attended the elementary schools under control, 324 the model schools under control, 518 the independent model schools, 410 the subsidized independent academies; 320 the Joliette classical college, which is subsidized, and 57 a subsidized independent model school; making a grand total of 7,497 pupils in the institutions of all kinds.

I beg to observe that as regards the boys' independent school, at St. Barthélémy, and the boys' and girls' academy, at Berthier, I have given the figures approximately, as I could not obtain from the directors of these institutions the statistics I asked of them.

During the year 1889-90, two elementary schools were opened: one at St. Emmélie de l'Energie, and the other at St. Gabriel de Brandon. In addition, an independent model school was opened at St. Cuthbert, under the direction of the Christian Brothers. The house intended for them is of solid stone, spacious, elegant, well ventilated and well adapted in every respect. The establishment of this school is due to the unbounded self-sacrifice and generosity of Rev. Mr. Brien, the parish-priest of St. Cuthbert, as well as to the good will and generosity of the parishioners. It is a credit to all and shows that the rate-payers take an interest in education.

At St. Michel des Saints, owing to the bad condition of one of the school houses and the want of pupils in another district, two schools remained closed. They will, I think, be re-opened in the fall of 1890.

My inspection bulletins have already made known to you the working of the schools in my district To be just to all, I must say that zeal, in the cause of education, is displayed in every municipality. If there be apathy in some districts, the majority, I can say in all sincerity, make great efforts to attain the end for which schools are established, that is to say, to educate and fit oneself to perform the duty which Providence assigns to each.

This year, I had no complaints with reference to the payment of the teachers' salaries, although in two or three municipalities, the arrears of taxes have accumulated beyond measure. I hope that the Department will give strict orders about this and have them carried out. In some municipalities, the commissioners pay the teachers' last instalment of salary only two months after the end of the year. I consider that this is an abuse which the law or the school regulations should remove.

In accordance with article 13 of the school regulations, I submit the following table, modifying it by adding *pretty good* after the note *good*.

Digitized by Google

NAMES OF MUNICIPALITIES.	State of school houses.	State of furniture.	Observation of course of study.	Use of approved books.	Teachers' salaries and mode of payment.	Classification.

(*Translation.*)

HULL, 31rst July 1890.

Sir,

I have the honour to submit my report for the scholastic year 1889-90.

There are in the two counties of Ottawa and Pontiac, 180 schools in which all or the majority of the pupils are Roman-Catholics. These 180 schools are under control.There are in addition 2 independent girls' schools with 6 classes or departments and 150 pupils. The following remarks apply only to the former. These 180 schools under control comprise 218 classes. I found this year 162 schools open comprising 200 classes. There were therefore 18 schools comprising 18 classes which remained closed. Out of this number, one half cannot reasonably be expected to be found open every year, owing to the limited means at their disposal. The others have more means and would be opened every year if the rate-payers took more interest in the education of their children.

The number of children inscribed is 7,921. Last year it was 8,458, a decrease of six per cent. This decrease is to be attributed to three causes : 1. The decrease in the population of Hull. Where there was work for 2,000 families, 2,500 came and the surplus had to go away. Moreover, the lumber trade, which was so prosperous ten years ago, is at a stand-still for a time. Several persons who earned their living by it, found themselves without work and have left the town. There is one industry which is always prosperous, which assures the existence and even the comfort of those who are employed in it.and which has never enough hands to work at it ; that industry is farming. While the saw mills are crowded, the fields are deserted. The surest source of wealth is the least sought after ; people run after the shadow and neglect the reality. 2. Another cause of the small attendance was the prevalence, in the district, of influenza, which did not leave a square mile without a victim. 3. Contrary to my usual habit, I inspected the schools with the most pupils first ; they are situated in the more thickly populated localities. It is a well known fact that the number of pupils inscribed goes on increasing between the beginning and the end of the year. There must therefore have been more pupils registered than I have entered in my notes.

The 7,921 pupils, divided into 200 classes, give an average of 40 pupils per class. There were 5 schools which had at least 10 pupils inscribed ; 6 which had from 11 to 15 ; 90 from 16 to 20 ; 22 from 21 to 25 ; 23 from 26 to 30 ; 25 from 31 to 35 ; 22 from 36 to 40 ; 11 from 41 to 45 ; 15 from 46 to 50 and 51 over 50.

The average salary was $135, say $3.40 per registered pupil. There are some places where heavy rates are paid. There was one school of 10 pupils, with an average attendance of 7 or 8, in which the teacher received

Digitized by Google

$16 per month. There was another in which, out of 23 pupils registered, there was an average daily attendance of 5 pupils ; the teacher was paid $150. for her 10 months, say $30. per pupil. This small attendance is something extraordinary. There must have been some reason to complain of the teacher ; if there were, I was not informed of it. I was twenty hours in the place and did not hear a single complaint against the school. They are so accustomed to have an inferior school that they are not alarmed if it seems to decline a little.

The finances are fairly well administered ; nearly all the secretaries have the official account books. The law requires the accounts to be audited every year ; there are very few persons who know how to audit accounts and there may be some who know how to do it but they do not do it properly. When they have audited the receipts and expenditure account and struck a balance, they think they have done all and yet all they have done has been to add up the figures written in the book ; the real amount of the receipts may be greater than it appears in the book. To ascertain what it is, we have to compare what it seems to be with what it really is, that is to say, that it must be checked by making a list of the amounts due and not yet collected, which is very seldom done. All the municipalities should be provided with a general form for auditing accounts, to which they should be obliged to conform. Everyone would benefit by this, inspectors, commissioners, secretary-treasurers and rate-payers.

The publication of our laws and regulations in the form of a code has already done some good. The Christmas and Easter holidays have been shortened. The teachers did not expect this, but they submitted nevertheless. There is another article of the regulations which is opposed to the custom which generally prevails. According to the latter, the holidays commence on the 1st July and end on the 31st August ; according to the former they are to commence on the 15th July. It will be difficult to get this regulation observed. Moreover, it may give rise to law suits ; if a teacher is engaged for a scholastic year without specifiying the number of days he has to teach, and if the school be kept open to the 15th July, the teacher will reply that, according to the custom, he is only engaged for 10 months and considers himself free from his engagement after the 30th June. This is a source of trouble which should be removed as soon as possible.

There were 2 male and 19 female teachers without certificates ; this is the smallest number for 7 years. Our schools suffer from the want of qualified teachers ; there are some districts where the rate-payers would increase the salary 50 per cent if they could find really competent teachers. But these are very scarce. What the rate-payer wants is not so much that his teacher should hold a certificate, but that his children should get on at school. What deceptions there are on this score and how necessary it is to devise some means of attracting competent persons to the profession of teacher and of excluding the incapable. In the meanwhile, a more

Digitized by Google

frequent inspection might somewhat remedy this state of affairs, and it is to be hoped that the government which, at present, has the latter point under consideration, will not do things by halves.

I have the honour, etc.,

AUG. GAY,

School Inspector.

Mr. L. GRONDIN.

(*Translation.*)

LAPRAIRIE, 4th August 1890.

Sir,

I have the honour to submit for your consideration my annual report on the state of the schools under my supervison, nearly all of which I have visited twice during the scholastic year 1889-90.

I am happy to say that the grand statistical table shows considerable improvement in educational matters in this extensive and populous district. This continuous and very perceptible improvement relates both to the total and average attendance of the pupils and to the learning of the various branches of the course of study for elementary and model schools and academies, to say nothing of religious instruction which has not been neglected, but, on the contrary, has been taught in all the schools in as intelligent a manner as possible. This is to some extent due, I flatter myself, to my own recommandation, but it is, above all, due to the clergy whose zeal and solicitude for education are unbounded. I may add that the moral conduct of the teachers has been such that there does not seem to have been any ground for complaint in that respect against a single one of them throughout the year.

The health of the master and teachers was generally good, which proves that the school houses are much better from a sanitary point of view than they used to be, and it is to be hoped that the Department of Public Instruction, by insisting upon a strict observance of the regulations respecting the construction of new school houses, will succeed in having proper sanitary arrangements in all educational establishments in the Province.

The proportion of lay teachers without certificates has greatly decreased since some years, and of course there is an improvement in the teaching, owing to the teachers being better prepared; however, in a good many municipalities, it is difficult to obtain sufficient teachers with certificates,

Digitized by Google

and complaints are made, which I consider well founded, of the rigour of the law which does not allow a young girl to qualify herself to teach before she is eighteen years of age, although it is proved in many instances that young girls of seventeen and even of sixteen have taught in a very creditable manner. Another very good reason for admitting girls of 15 to 17 as teachers, is that, as a rule, they leave the convents at that age and are then able to obtain the certificate while they are not so well able after having been otherwise engaged for one or two years.

As my inspection bulletins already give you an exact idea of each of the schools of my district, and as I find but good will on the part of the commissionners, trustees and rate-payers in general, I will now conclude this short report.

I have the honor, etc.,

S. GRONDIN.

School Inspector.

Mr. H. HUBBARD.

SHERBROOKE, 2nd July 1890.

Sir,

I have the honor to submit my annual report and statistical table for the year just closed.

The general prevalence during winter of a severe epidemic, and the unusually bad weather and roads during a large part of the year, have rendered it exceptionally unfavorable for the success of schools and school inspection. Though so fortunate as to escape the epidemic myself, I found its effects almost everywhere I visited. In many cases, schools had to be closed, at least temporarily, owing to the illness of teachers and pupils; and in very many cases, the attendance was seriously affected, both by prevailing illness, and the state of the weather and roads. The latter cause rendered the work of inspection unusually difficult; and the difficulty was increased by the still somewhat prevalent irregularity in the length and arrangement of the school year; for, though there has been some improvement in that regard, there is still considerable variation in the time of vacations. I have to repeat what I said last year, that although I have not been able strictly to carry out the regulations in regard to visiting, *I have done what I could*; and I think I have succeeded better than during the previous year.

Notwithstanding the unfavorable circumstances above referred to, there has been a slight increase in the number of schools in operation and

Digitized by Google

in the aggregate attendance. I have reported the Protestant schools of 40 municipalities, (the school of one reported last year, Simpson, having been united with the adjoining municipality,) though one of those reported had no school.

Of these, 24 are under control of school commissioners, and 16, under dissentient trustees. I have reported 167 schools in operation under control, and 7 independent schools. Those under control may be compactly shown *by counties*, as follows :

Counties.	No. of municip.	No. of schools.	No. of pupils.
Sherbrooke, (Electoral,)	4	26	1220
Stanstead, (Magog,)	1	6	194
Shefford	14	53	1317
Richmond	10	49	1130
Drummond	10	30	581
Arthabaska (Tingwick, diss)	1	3	54
	40	167	4496

Adding to the above 7 independent schools with 450 pupils, I have a total of 174 schools and 4,946 pupils, with an average attendance reported of 3,552. Of the schools under control, 157 are classed as elementary, 6, as model schools, and 4, as academies. I have included the school at Lennoxville among the model schools, though it has not yet received a grant. The independent schools include Bishop's College school, and St-Francis College school. As the 4 academies include 13 departments, the 6 model schools, 15, and the 157 elementary schools, 163 departments, each under separate and duly qualified teachers, there are really 191 departments or schools to be inspected. In these schools, 9 male, and 188 female teachers have been employed, from which it will be seen that there has been but little changing of teachers. 4 of the male teachers and 31 of the female teachers held diplomas from McGill Normal School, 133 in all; from Protestant boards of examiners, 15 from Roman-Catholic boards, and 14 held no diplomas. I can report but little change as regard, salaries. I have been called upon to hold only one special audit, which resulted favorably for the School Board.

Owing to the remoteness of Richmond and Drummond counties from the points where the Institutes are held, comparatively few of the present teachers of these counties have attended the Institutes; but in other sections, a large proportion of them have availed themselves of the benefit of these gatherings, much to the advantage of their schools. As I am making this report somewhat in advance of the usual time, I can only refer in anticipation to the Institutes to be held the present month, and express the earnest hope that they will be successful.

I am glad to notice indications of improvement in regard to the matter of school appliances, though these are not as marked or as general as I

Digitized by Google

could wish. As this is generally the weakest point, I shall be happy to recognize such improvement in my classification of the municipalities. In that classification for this year, which I will now give, several municipalities have changed places since last year. Danville, on account of its new and excellent school building, moving well up into class 1 ; two or three changing, owing to improvements, from class 3 to class 2 ; and some, owing to short terms or other irregularities in one or more districts, dropping to class 3. I have also slightly varied the order of division, entering in class 1, all ranking above 50 ; in class 2, all ranking 40 and upwards, and in class 3, all below 40 ; the points being :

1. The length and arrangement of the school.....10 marks
2. The condition of the school houses and grounds.....10 "
3. The supply of appliances, blackboards, maps, etc.....10 "
4 The use of the course of study.....10 "
5. The use of uniform series of authorized text books...10 "
6. The salaries of teachers, and method of payment.....13 "

CLASS 1st.—EXCELLENT.

Sherbrooke	55	Lennoxville	53
Danville	54	Richmond	52
Waterloo	55	Granby (village)	51

CLASS 2nd.—GOOD.

Kingsey, diss	46	North Stukely, diss	41
Melbourne (village)	46	Cleveland	40
Durham	42	Drummondville, diss	40

Mr. D. LEFEBVRE.

(*Translation.*)

THREE-RIVERS, 30th July 1890.

Sir,

I have the honour to submit my annual report on the state of Public Instruction for the scholastic year 1889-90.

My district now comprises 29 municipalities.

The following is the classification I have made of each of the municipalities as regards the organization and administration of the schools:

EXCELLENT :

Cap Santé (village), Champlain (village), Cap Santé (parish,) Ste-Anne la Pérade (village), Batiscan, Champlain (parish) and Ste-Anne la Pérade (parish).

VERY GOOD :

St-Prosper, St-Jacques des Piles, Ste-Geneviève de Batiscan, Deschambault, St-Tite (parish), St-Thècle and Portneuf.

GOOD :

Cap de la Magdeleine, St-Luc, St-Narcisse, Mont-Carmel, St-Maurice, Ste-Flore, Grondines (village), St-Ubalde, St-Tite (village), Notre-Dame des Anges, St-Alban and St-Casimir.

MIDDLING ;

Grondines (parish), St-Stanislas and Fermont village.

In these 29 municipalities there are 118 school houses belonging to the commissioners, 32 houses or school rooms rented by the commissioners, 2 are given free and 4 are used for independent schools Total number of school houses : 156, of which 151 one of wood, 2 of brick and 3 of stone

In my district there are 150 elementary schools, only one of which is independent and all these schools are mixed (boys and girls). These 150 schools are attended by 6,140 pupils, 3,089 boys and 3,051 girls. All are Roman-Catholics, except 2 boys and 2 girls, who are Protestants.

There are also 14 model schools, 2 being girls' schools, one independent and the other under control ; 5 boys' schools and 7 mixed schools (boys and girls) all under control. These 14 schools are attended by 961 pupils, 572 boys and 389 girls. Of these 961, 837 are in the elementary course, and 124 in the model course.

Finally, there are also 3 girls' academies, one under control and the other two are independent. These two academies are attended by 335 pupils, of

Digitized by Google

whom 215 are in the elementary course, 75 in the model course and 45 in the academical course.

The total number of institutions of all kinds is therefore 167, 5 more than last year and the total number of pupils attending these institutions is 7,436 or 115 more than last year. The average attendance is 65 or 66 per cent which is about the same at last year This is not very satisfactory but it must be said that several epidemic diseases prevailed in many places during the winter. However, I cannot refrain from stating that there is also a good deal of apathy on the part of the parents and pupils in general with reference to the attendance at school. But as regards the want of assiduity, I would repeat what I have already stated in one of my previous reports, and that is, that if the attendance is irregular, we must rather blame the teachers than the parents or even the pupils themselves, for it is a well known fact that, in well managed schools, the attendance is always more regular than in inferior schools.

Therefore, by offering better salaries to the teachers, we would secure more competent persons, and the attendance would thereby become more regular and success more certain.

The total number of teachers in my district is 200. Of these, 170 are female lay teachers and 24 are nuns; 18 of the former have not yet obtained certificates. There are only six male teachers in my district, three being laymen and three in religous orders. It is unnecessary for me to repeat in this report the well earned praises of the latter; they always teach conscientiously and with tact, to the great advantage of the municipalities which are so fortunate as to have such teachers.

I have much pleasure in stating that two of the male lay teachers, Mr. Camille Dostaler, who teaches the model school in Champlain village, and Mr. Etienne Dostaler, who teaches the model school of St-Narcisse, have both done very good work.

The female lay teachers, teaching model schools, who have done very well, are: Miss Rose-de-Lima Descormiers, Ste-Geneviève de Batiscan, Miss Eugénie Lacroix, St-Stanislas, and Miss Clara Marcotte, Portneuf. The others did well, and I must say that if they are not in the highest class, it was not due to want of ability or to unwillingness on their part, for I consider them all competent and energetic.

Those of the female lay teachers at the head of elementary schools who have done very well are: the Misses Victoire Brousseau, at Batiscan; Exilda Pagé, Léonile Picher and Céline Chevalier, at Cap-Santé; Amanda Montambault, at St-Alban; Estelle Langevin, at Portneuf; Anna Naud and Octavie Morisset at Deschambault; Clorinthe Tessier, Zéphise Tessier and R. E. Baril, at Ste-Anne Lapérade; Mrs. Antoinette Cinqmars, at Ste-Geneviève de Batiscan; the Misses Honora Déry, at St-Stanislaus, Vitaline Denancourt, Delphine Forest and Emma Levasseur, at Mont-Carmel; Anna Desaulniers, Victoria Sawyer and Clara Raiche, at St-Mau-

Digitized by Google

rice ; Bernadette Turcotte, at Champlain ; Zéphirine Plaisance, at St-Flore, and Estelle Bédard, at Ste-Thècle. 90 were classed as good ; 22 as middling and 2 as useless.

The teachers' salaries are about the same as last year.

By comparing my statiscal table of last year with that of this year, I find a considerable increase in several subjects, and if there is a decrease in others it is because the classification was made, last year, in a more rational manner.

On the whole, there is every reason to be satisfied with the success obtained in the majority of the schools in my district, considering the little encouragement the teachers receive from the school authorities.

I expect a good deal from the placing in the schools of the copies of the "Course of study" and the school regulations, which I was happy to explain to the best of my ability when I made my inspections.

Complaints are now more numerous than ever, with reference to the number of subjects contained in the course of study, especially for elementary schools. It is quite true that several of subjects are only taught for form's sake in some of the elementary schools. The purchase of text books for many of the subjects is very frequently the reason for the refusal of the parents who send their children to school only until they are old enough to make their first communion. For my part, I am of opinion that we might retain the "Course of study" as it is, and declare that the teaching of some of the subjects shall be optional, such for instance as the History of Canada, Drawing and Agriculture.

The teachers should continue to be obliged to teach all the subjects to such of their pupils as wish and are able to learn all the subjects of the "Course of study" ; it would be a point in favour of those who properly teach all the subjects to a greater or lesser number of their pupils.

The secretary-treasurers, as a rule, faithfully perform the duties of their office and the teachers are paid punctually.

It only remains for me to heartily thank the commissioners who were good enough to accompany me in my inspection of the schools under their control, as also the members of the clergy and others who take a lively interest in educational matters in their respective municipalities.

I hope that the above remarks, with the many details on each school given in my inspection bulletins which I sent you during the year, will give you sufficient information as to the state of education in my extensive district.

I have the honour, etc.,

D. LEFEBVRE,

School Inspector.

Mr. L. N. LEVESQUE.

(*Translation.*)

ROXTON FALLS, 31st July 1890.

Sir,

I have the honour to submit my annual report on public instruction in the counties of Drummond and Arthabaska for the year 1889-90.

The total number of children who attended the 193 institutions of all kinds which were in operation during the year, was 6,767: 5,932 in the elementary schools under control, with an average attendance of 4,479 or two thirds; 291 in the model schools under control, average attendance 238; 338 in the subsidized independent model schools, average attendance 317; 189 in the academies, average attendance, 175, and 17 pupils with an average attendance of 16 in an independent elementary school not subsidized.

Of these 193 institutions, 2 are académies, one for girls under the Ladies of La Présentation de Marie, at Drummondville, the other for boys under the Brothers of Ste-Croix, at Arthabaskaville; four couvents; seven model schools under control and 180 elementary schools under female lay teachers.

The teaching staff consists of the following: 41 nuns, 13 clerical teachers, 1 male lay teacher, and 180 female lay teachers, 21 of whom have no certificate.

The salary of the male lay teacher is $375. with lodgings; the average salary of the clerical teachers is $158, and that of the female lay teachers $80.72.

The pupils are classed as follows; 1st year, 2,082; 2nd, 2,185; 3rd, 1,501; 4th, 674; 5th, 165; 6th, 136; 7th, 9; 8th, 15.

In the various branches there are, in spelling, 1,567; reading fluently, 4,456; reading with expression, 744; writing, 4,977; arithmetic, 5,198; grammar, 2,194; parsing, 211; composition, 246; geography, 1,375; map making, 298; drawing, 1,748; object lessons, 5,200; book-keeping, 800; business correspondence, 56; sacred history, 2,007; history of Canada, 925; history of England 70; history of France, 77; history of the United-States, 127; ancient history, 22; natural history, 38; agriculture, 911; mensuration, 129; algebra, 82; geometry, 87; hygiene, 116; sewing, 398, and vocal music, 931.

All the remarks which I might make with reference to the institutions under clerical teachers and nuns would only be an addition to the many marks of esteem these zealous teachers receive on all hands. The lay teacher who teaches a model school in my district, is a very talented

Digitized by Google

man and a distinguished member of the profession; he is a credit to the institution in which he was trained, the Jacques-Cartier normal school. As to the four female lay teachers who teach the model schools, I cannot make any distinction, with reference to their knowledge, but the long experience of Miss Bernier, at St. Germain, and Mrs. Mercier, at St. Norbert, places them in the first rank as teachers.

The elementary schools are relatively less satisfactory. The causes of this are always the same: irregular attendance and the want of books and other school appliances If some parents are negligent in this respect, I also know of several teachers who would have less reason to deplore such a state of things, if they knew, by more intelligent work, how to get the little children to like school. If they knew how to excite emulation, their efforts would soon meet with success.

Notwithstanding serious obstacles in some places, there is a general progressive movement. The standard of education is being raised little by little, and there is constant progress, for it is admitted that the people are becoming more and more alive to the necessity of education.

The distribution of copies of the "Course of study" and of the school regulations will effect great changes in the organization of our primary schools and in the classification of the pupils; the teachers will derive very useful information from them. The school regulations will have the effect of saving the teachers, who are exposed to such repeated attacks, from a good deal of annoyance.

The action of the Department, in sending Mr. Paul DeCazes' code to the school commissioners, has already had a good effect. I observed, with great satisfaction, that many of these gentlemen who were anxious to perform their duties faithfully, consulted this valuable book and obtained information which will be of benefit to their schools. In many places, this has brought about an improvement in the school furniture; this movement is becoming more general and I believe that in the near future steps will be taken everywhere to remove this obstacle to the proper working of the schools.

In obedience to the instructions contained in paragraph 14 of article 13 of the Regulations of the Roman-Catholic Committee, of the Council of Public Instruction, I make the following classification:

Two municipalities	were		*excellent*,
Seven	"	"	*very good*,
Twelve	"	"	*good*,
Seven	"	"	*middling*,

and there is a new municipality, Ste. Anne-du-Sault, which I did not classify on account of its recent organization.

Digitized by Google

Before concluding, allow me to publicly thank the members of the clergy with whom I came in contact, as inspector, for the assistance they gave me in the performance of my duties.

I also thank the Commissioners who were good enough to accompany me in my inspection of the schools under their control; however, there were not enough of them, for all should take advantage of the opportunity to show the interest they take in their schools. There is no unwillingness on their part, but rather indifference. I hope I will have less to complain of in the future.

The secretary-treasurers are careful in the management of the finances of their respective municipalities. The teachers say they are satisfied with the mode of payment in each locality.

I will not enter into further details, as in my inspection bulletins I have called your attention to the working of each school in particular.

I have the honour, etc.

L. N. LÉVESQUE,

School Inspector.

MR. LIPPENS.

(*Translation.*)

QUEBEC, 20th July 1890.

Sir,

I have the honour to submit my report for the scholastic year 1889-90

The following is a complete list of the school municipalities in my district, classified by order of merit, in accordance with the new school regulations, with the marks awarded for each subject.

The number of pupils who attended the schools was 7,999 or 703 less than last year. This decrease is due to two causes: *grippe* and emigration. But it must also be said that there is considerable negligence on the part of the parents, who seem to care little for the education of their children. Indifference as to education is general, but it is especially noticeable amongst the rural population of the county of Richelieu. In some parishes of that county, a pupil of 12 years of age is a rarity in the elementary schools, and most of the children leave school as soon as they have made their first communion.

I did my best to make the new course of study known, appreciated and carried out, but the difficulties to be overcome are many and the result obtained seemed to me to be but little satisfactory in a good many schools. The course of study is perfect in itself, but many teachers have neglected to follow and even to examine it. On more than one occasion, I was unable to obtain a satisfactory answer to my question as to how many pupils belonged to the different years of the course of study. They did not seem to understand what was meant.

I would have liked, in this report, to speak of the lectures on professional training, of summer lectures, of the practical steps to be taken for removing obstacles in connection with certain subjects, especially drawing, agriculture and object lessons; but in a few days, a meeting of all the school inspectors will be held to discuss these questions. I will take advantage of this happy opportunity to communicate to my colleagues some notes I have taken on the subject and especially to benefit by their counsel.

I have drawn up my grand statistical table as carefully as possible, and I think the figures are correct on all points.

I have the honor, &c.,

B. LIPPENS,

School Inspector.

Mr. L. LUCIER.

(*Translation.*)

MARIA, 12th July 1890.

Sir.

I have the honour to submit my report for the year 1889-90.

In my district, there are 15 school municipalities, comprising 61 schools as follows: one convent, five model schools and fifty-five elementary schools, three of which are independent. These schools were attended by 2,687 pupils, which gives are increase of 2 schools and 248 pupils over last year.

Of these 61 schools, only 2 remained closed throughout the year, owing to there not being enough children or to want of funds; these were school No. 2, of Richmond, and No. 2, of Miguasha.

Three other schools were in operation for five or six months, viz: No. 2, of St. Laurent de Matapediac; No. 3, of St.Alexis de Matapediac and No. 6, of St. Jean l'Evangéliste, as the commissioners could not find teachers to keep them open longer.

With the exception of the model school of St. Jean l'Evangeliste, which is under a male teacher, all the other schools are taught by female teachers, five of whom are Sisters of Charity, two *Sœurs des Petites Ecoles* 51 teachers with certificates and 8 without. In all, 66 female and 1 male teacher.

The average salary of the female teachers in the schools under control is, for elementary schools, $96.00, and for model schools, $180.00, less advantages, viz: lodging and fuel.

Although very low, the salaries do not vary much; I notice, however, that in some municipalities there is a tendency to lower them, owing to competition amongst the teachers and ill-advised economy on the part of some commissioners. In my opinion, the remedy to this evil can only be applied by the Legislature.

Digitized by Google

In accordance with your instructions, I distributed copies of the new course of study and of the regulations for teachers and pupils, in all the schools, and I expect great results from it. It is a safe guide for the teacher and tells her what work she has to do during the year. In my inspections, I endeavor to give the explanations which I deem necessary as to the course of study and the means of observing it.

In most of the schools, there is a time-table and a register for visitors.

The teachers who, this year, distinguished themselves the most in teaching all the branches, were : Miss Elmina Allard, at Carleton, and Miss L. A. Parant, at Maria. They are very able teachers and their model schools are classed as *excellent.*

Miss Langlais, at Port-Daniel, and Miss LeBlanc, at St. Bonaventure, are very well qualified teachers Their model schools are deserving of the grant. I have also reason to be satisfied with the model school of St. Jean l'Evangeliste, under Mr. Jean Gauthier, a distinguished pupil of Laval Normal School. His salary is $300.00.

Amongst the teachers of elementary schools, I would mention the Misses Aurélie Gauthier, M. McCauly, Eugénie Soubert, A Lepage, Ang. Audet, Diana LeBlanc, Anna Guité, Virginie Bernard and the *Sœurs des Petites Ecoles.*

There are also, in each municipality, other teachers who keep their schools on a good footing, but whose pupils are less advanced.

The convent of Carleton continues to give young girls a good education with careful training. As a rule, the pupils, by their application and good conduct, respond to the zeal of the nuns who teach them.

As regards school houses, furniture and other school appliances, the observation of the course of study, the use of authorized books, salaries of teachers and mode of payment, the municipalities are classed by order of merit as follows :

VERY GOOD.—Carleton, Maria, St. Jean L'Evangéliste, St. Godefroi and Port-Daniel East and West ;

GOOD.—St. Alexis, Mann, Caplan, New-Richmond, St. Bonaventure and Paspébiac.

MIDDLING.—Miguasha, St. Laurent and Cox, diss.

The secretary-treasurers keep their accounts faithfully and according to the official method. The municipalities with the heaviest arrears of taxes, are : St. Alexis de Matapediac, Carleton, Paspebiac and St. Bonaventure. At St. Alexis, the teachers are badly paid.

The commissioners perform their duties properly. Each year, the furniture improves and some old houses are repaired or replaced by more roomy and better ventilated ones.

Digitized by Google

On the whole, I am satisfied with the schools under my supervision. Praiseworthy efforts have been made almost everywhere to promote instruction in the various branches, and those efforts are generally successful, considering the age of the pupils who attend the schools.

I have the honour, etc.,

L. LUCIER,

School Inspector.

Rev. Mr. LYSTER.

CAPE-COVE, GASPÉ, August 8th, 1890.

Sir,

I have the honour to submit my report upon the condition of the Protestant schools of Gaspé and Bonaventure counties for the year 1889-90.

From the accompanying table of statistics, it will be seen that the number of children attending the schools is, in the aggregate, about the same as last year, although the schools of St. Godfroi, diss., Metapediac and Barachois, diss., have been closed, owing to the extreme difficulty of securing qualified teachers.

This is a pressing want which is being felt more and more.

The coast no longer provides a sufficient number of teachers for the elementary schools, and salaries are not large enough to induce them to come from a distance. Indeed, one has only to glance over the advertising columns of a Montreal paper, to perceive that the competition for the services of trained teachers, is at present, extremely active. In this competition, we are not likely to be successful. We must depend chiefly on the home supply; and though our model schools have not yet been very prolific, we have reason to hope for an early improvement in this respect. I think the opening of a model school in Haldimand is likely to prove advantageous.

There are many respectable families in the vicinity who will gladly take advantage of it; and, as board is cheap, young people living at a distance, who desire to secure scholastic training, will not he deterred by the expense.

I am glad to be able to speak in high term of the New-Richmond model school. Assisted by the energetic chairman, Dr. Thornton, I examined the pupils in winter, and again in June; and, on both occasions, we were much gratified by the general good answering. Nearly all the pupils

Digitized by Google

in the model class are excellent scholars, and will be, in a short time, quite capable of passing the examination for the diploma.

A public examination of this school was held in July; and I have been informed that the exercises were of the most gratifying character. Many prizes, amongst them a silver watch, given by the chairman, were awarded to the best answerers.

Mrs. Delamotte, the head teacher, deserves much credit for having raised the school to its present satisfactory condition.

The model school in Paspebiac has also made progress, under Miss Murray, in the model, and Miss Cole, in the elementary department.

Both of these young ladies are, I think, excellent teachers; but they have remained for too short a time to produce permanent results. This perpetual shifting of teachers, is one of the most serious hindrances to real improvement.

The Gaspé village model school has not been ineffective; on the contrary, I noticed decided improvement when I examined it in winter. But the very small number of young people, in the model class,—only three on that occasion,—must have been very discouraging to the accomplished and pains-taking teacher, Miss Moss, who has since resigned.

Of the elementary schools, by far the largest is Cox, No. 1, with one hundred and seven pupils on the roll, I think some progress was made during the year; but the number of the children in the junior division was far too large for one teacher. The senior division answered fairly well last June; but the school was not on the whole satisfactory. Here also, the teachers who had been in charge for less than a year, have both resigned. I have called upon the commissioners to make certain necessary improvements and to build a new school-house in district No. 2, and they have promised compliance with my request.

In Hamilton diss., I noticed decided improvement, especially in discipline: a much needed reform. The teacher here also, has resigned.

Of the elementary schools, in New Richmond, two were excellent. Not only was the answering good, but neat grounds and fences, and new furniture, all pointed in the direction of taste and progress.

The other schools were good, considering. In all; I noticed improvement.

Miss Thorton's prizes for needlework, given year after year, have proved a valuable incentive to the industry of the girls, some of whose work was extremely neat and good.

The commissioners deserve great credit for the spirited manner in which they manage their affairs. They have recently increased the teachers' salaries, and they seem determined to have good schools throughout their large municipality.

Digitized by Google

The Shoolbred schools do not seem to make much progres. It is, however, rather difficult to form a judgment; for the school visited this year, is nearly certain to be found closed at the time of my next visit.

Of Restigouche and Sellarville, the same remark may be made.

These schools, which are open only at intervals, cannot be very useful.

The frequent closing of such schools, with the changing of teachers from one district to another seems to be an unfortunate necessity in poor and scattered communities.

I have little to say about the Gaspé schools. They are in about the same condition as last year.

Nearly all them were visited by influenza, in winter and spring; and teachers and children were alike prostrated.

However, I may say confidently, that the commissioners and trustees, in nearly every municipality, are doing all that can be fairly expected to carry out the law.

The little school of Douglass, diss., supplies a decided want, and makes fair progress.

Haldimand, as usual, has two well attended schools; No. 1, under Miss Whinfield, who has since resigned, was very satisfactory.

York has two small schools kept constantly in operation.

In No. 1, under Miss Davis, shorthand has been so successfully taught, that a specimen, which I sent to Mr. Howard, of Cincinnati, editor of the "Phonographic Magazine," received high commendation for its exceptionally beautiful and correct execution.

It is not easy to class the municipalities as required; that is, if one is to take into account the difficulties arising from sparseness and poverty of population as well as from other causes. The difficulties are much more severely felt in some places than in others.

Making due allowances, therefore, I think I may safely say, that of the 25 municipalities in my district, 5 are excellent, 10 good, and 10 middling.

I have the honour, etc.,

W. G. Lyster,

School Inspector.

Mr. J. G. W. McGOWN.

(*Translation.*)

MONTREAL, 28th July 1890.

Sir.

I have the honour to submit my annual report for the scholastic year 1889-90.

My district comprises :

Schools under control.	Number of pupils.	Number of male teachers.		Number of female teachers.		Total.
		Religious.	Lay.	Religious.	Lay.	
53 Elementary schools	3,214	8	6	9	64	87
32 Model schools	10,993	61	48	112	14	235
9 Academies	4,929	37	24	35	12	108
Total 94	19,136	106	78	156	90	430

Independent subsidized institutions.	Number of pupils.	Number of male teachers.		Number of female teachers.		Total.
		Religious.	Lay.	Religious.	Lay.	
8 Model schools	2,214	31	.....	51	5	87
12 Academies	2,278	28	.....	174	.....	202
1 Classical college	399	17	1	.....	.....	18
Total 21	4,891	76	1	225	5	307

Non-subsidized independent institutions.	Number of pupils.	Number of male teachers.		Number of female teachers.		Total.
		Religious.	Lay.	Religious.	Lay.	
20 Elementary schools	4,323	18	1	62	27	108
6 Model schools	951	.....	.....	21	2	23
13 Academies	3,977	38	5	143	3	189
1 Classical college	300	21	1	.....	.....	22
Total 40	9,550	77	7	226	32	342
Grand total 155	33,677	259	86	607	127	1,079

These various institutions are distributed throughout forty school municipalities, and the following is the classification I have made of these

Digitized by Google

municipalities, with reference to the condition and working of these schools under control :

EXCELLENT : City of Montreal, Côte St. Léonard, Côte St. Paul, Haut-du-Sault, Hochelaga, Pointe-aux-Trembles, Pont-Viau, Sault-au-Récollet, Ste. Cunégonde, St. Gabriel, St. Henri, St. Jean-Baptiste, St. Louis de Mile. End, Ste. Rose (village), St. Vincent de Paul.

VERY GOOD : Bas de St. Martin, Bas du Bord-de-l'eau, Côte des Neiges, Côte St. François, Côte St. Louis, Côte St. Michel, Les Ecors, Longue-Pointe, Notre-Dame-de-Grâce, Ste. Dorothée No. 2, St. Martin.

GOOD : Côte-Visitation, Côte St. Antoine, Côte St. Elzéar No 1, Haut de St-Martin, L'Abord-à-Plouffe, La Grande-Côte, Maisonneuve, Outremont Rivière-des-Prairies, St. François de Sales, Ste. Rose (parish).

MIDDLING : Ste-Dorothée, St-Elzéar, St-Jules.

The following classification will give an idea of the work done in the schools : 9 academies, 29 model schools, and 10 elementary schools were excellent ; 3 model schools and 18 elementary schools were very good ; 19 elementary schools good ; 5 elementary schools middling ; 1 elementary school *bad*.

Out of 86 male lay teachers who teach in the schools under control, 8 have no certificates. Most of the latter are assistants in the schools taught by the Christian Brothers who have not enough members in their community for all their classes.

Out of the 127 female lay teachers, 49 have no certificate. They are assistants, either in the convents or in the model or elementary schools, taught by lay teachers. Only one is at the head of a school, that of Ste. Dorothée. The commissioners of that municipality could have found one with a certificate if they had been willing to pay a reasonable salary.

The secretary-treasurers perform their duties in a satisfactory manner. I always insist upon their books being kept according to the official method, but this improvement takes a long time to effect. There are secretaries who are accustomed to routine and it is difficult to get them to understand the importance of the uniformity required.

I have endeavoured to give the exact statistics of the independent schools in my district, which have nearly 15,000 pupils. I obtained them more easily than last year. Only two institutions of but little importance, taught by the Sisters of Providence, did not give me the information I asked for. I gave approximate figures for these two institutions based on those of last year.

I have the honour, etc.,

J. G. W. McGOWN,

School Inspector.

Digitized by Google

Mr. B. MAGRATH.

(*Translation.*)

AYLMER, 29th July 1890.

Sir,

I have the honour to submit for your consideration my report for the year ending the 30th June 1890, on the condition and progress of the schools that come under my inspection, in the counties of Ottawa and Pontiac.

In last year's report, I mentioned the difficulty of giving from year to year much novelty or freshness to papers of this character. It is inevitable that they should exhibit more or less sameness, in as much as the same topics invariably suggest themselves, and remarkable features of interest are naturally rare in such rural districts as fall under my review.

But despite my inability to offer new suggestions for the advancement of our primary schools, I shall attempt to speak frankly on such subjects as seem worthy of some notice, even at the risk of repeating what I have said on previous occasions. At all events, I shall not imitate the example of one of my predecessors, who, it is said, some thirty-five years ago, copied a Nova-Scotia school report, and forwarded it to the Department as his own.

Notwithstanding, there is still room for improvement in the education of this Province, I think on the whole we have much reason for congratulation. When I look back for a quarter of a century and compare the present state of the schools with what they were then!! I am much encouraged and look confidently to the future of elementary education in this country. The progressive element, in fact, has been decidedly marked during the past five years.

While we have not been able as yet to have normal training schools in each country, we have had, for the past four years, the advantage of annual Teachers' Institutes, conducted by practical and qualified persons. These Institutes have already produced far better results than I possibly could have anticipated three years ago.

The Institute held at Shawville, in the county of Pontiac, a short time ago, was conducted by Dr. Harper and Professor Parmelee, and was highly appreciated.

I think every teacher in the county of Pontiac was present on the occasion.

The lectures related chiefly to the important subjects: "How to teach" and "What to teach," and the teachers were able to fill their note-books with many valuable suggestions on the new and best methods. The attendance from the county of Ottawa was small for various reasons. Some of the

Digitized by Google

teachers do not hail from Ottawa county, while many others reside a long way off Shawville. If the subject: "Higher salaries for teachers" had been discussed, probably there would have been a larger attendance at the lectures.

I am glad to find that the pernicious system of "cram," so long peculiar to our common schools, was severely condemned in the course of the lectures, and must, at last, practically disappear.

The lectures also dwelt on primary-instruction, and on what I may term, the upper stages of the primary schools, I mean, the stages where the child has left the infant course behind him and has taken a hold of those lessons which bring him nearer to the great practical world where he must soon work and struggle. His instruction in language is now generally regulated by the reading books in vogue, and when I consider that they form the whole literary course in our common schools, I cannot but wish that the authorities would take some means of supplying a better selection in prose and verse.

Literary taste and a just appreciation of a Canadian child's needs, are, in many ways, sadly wanting. Two things should always be borne in mind in our reading books: to give the best models of style, and, above all, to create a deep interest in Canada, her history, her literature, and her national development.

These Institutes have also wisely afforded excellent examples of Object and Nature Lessons, with the view of showing teachers the best methods of increasing the facility of pupils in expression of language, and in the use and application of words.

I am decidedly of opinion that the school registers should show, *on each page*, the names of all pupils who have attended from the commencement of each school year, be the attendance ever so short. By this method, one could at a glance see whether parents have given their children every opportunity of acquiring an elementary education. It will be a useful check on the indifference of some parents in this particular.

I knowfull well that one of the greatest obstacles to the success of the common school system is the absence of proper classification, and the showing of irregular attendance. Children are frequently kept at home, owing to the niggardly propensities of some parents. For instance, a boy who has not been allowed to attend school regularly on the ground of "home work", could have gone on the 6th of a certain month, but his parsimonious father says: "If you go for the remainder of this month, I'll have to pay a quarter of a month's school fees—some five or six cents—for which you will receive no benefit." Consequently, the boy is made to stay at home until the beginning of the subsequent month. The result of all this is, that the boy, probably the brightest boy naturally in his class, makes "no show" at the teacher's examinations. It would be well *to remember sometimes* that it is easier to examine than to be examined.

Digitized by Google

The school law provides that, in case the regulations made by the commissioners for the management of any school, are not agreeable to any number whatever of the rate-payers, who profess a faith different from that of the majority, these rate-payers can dissent and establish a school for themselves. While I regard this provision as possibly the fairest that could be devised under the circumstances, still I am bound to admit—and I speak simply for this district, and not for the Province generally,—that the consequent separation works injuriously in certain instances. If a school district, composed of Roman-Catholics and Protestants, with just a sufficient revenue for its work, is brought under this provision of the law, it is obviously impossible that efficient teachers can be procured for the small salaries that will be available under the circumstances. It is my opinion, derived from a practical operation of the law, that such a separation should not be allowed in poor and weak school districts.

The religious exercises in such mixed schools could be conducted at fixed hours—at the close,—as a rule, so that dissenting children need not attend. This is the practice in several cantons of Switzerland, where the conditions are similar to our own in this province.

I make this suggestion in all sincerity, and under the conviction that it is in the interest of elementary education.

In some remote settlements, it is absoluty impossible for small children to attend school in mid-winter, owing to the snow-drifted roads. Permission should be given commissioners in such localities, to keep their schools in operation during the month of February, in each year.

The weak and remote schools continue to make but slow progress, and so it must be until larger inducements can be offered to capable teachers. Experience tells me that where there are well paid instructors, there is educational development.

I noticed a statement, some time ago, that it is the intention of the Protestant Committee to devote special attention to our elementary schools, and offer rewards to the most deserving among them But while approving of any plan that gives to the best organized schools, who are doing good work, I fear that the one in question may not do justice to those small schools in remote and poor districts, which are doing their best, while labouring under great disavantages, compared with those in rich and populous settlements.

Such schools are, in their way, deserving of every encouragement, and should not be placed at a disadvantage in any system of rewards that may be devised with the praiseworthy object of encouraging elementary education.

In conclusion, I may be permitted to refer to another matter of personal interest. In your last annual report, you had the goodness to express your opinion that the School Inspectors of this Province are

Digitized by Google

insufficiently paid. I trust that this expression of opinion will receive favorable consideration from the Government and Legislature. I know too well that a net average allowance for the long time I have held office of $1.40 per day—all that I have actually received—is but poor compensation for the labour and time I devote to the duties of an office which extend over a district most extensive in arrear, and offering many hardships during the cold and stormy season of travel. I trust that after many years of conscientious endeavour in the public service, my claim to adequate remuneration will be favourably regarded.

I have the honour, etc.,

BOLTON MAGRATH.

School Inspector.

Mr. McGREGOR.

HUNTINGDON, 9th August, 1890.

Sir,

I have the honour to submit my ninth annual report on the state of education in my inspectorate, for the year ending 30th June, 1890. The Statistical Table was forwarded to the Superintendant of Public Instruction, on the 24th ulto. The full and explicit information given in it, and in the "Bulletins of Inspection" leaves but little of importance to report. But in order to express some of the statements in a concise form, I will recapitulate to some extent.

In this district, there are 57 municipalities, including 216 schools in operation—188 elementary, 8 model, 6 academies and 14 private institutions, —scattered over nine counties, or over an area of about 6,000 square miles; 13,200 pupils—Protestants, 6,278 boys and 6,011 girls; Roman Catholics, 497 boys and 414 girls—taught by 422 teachers, 59 males and 363 females. Five of the male teachers hold elementary, 6 model, and 31 academy diplomas, while 17, eleven of whom are teachers in private schools, are without any diplomas. Of the female teachers, 147 hold elementary diplomas, 132, model, 43, academy, and 41, eighteen of whom taught in private schools, have no diplomas. 13 of the diplomas were granted by the Roman-Catholic boards, 95 by the Protestant boards, and 256 by McGill Normal School.

The municipalities are arranged in the Statistical Table according to our instructions. The condition of many of them, both as regards schools and school houses, has been much improved during the year, while that of

Digitized by Google

others, though greatly in need, remains unchanged. In the latter class are included the outlying municipalities of Argenteuil; those in the county of Vaudreuil; St. Anicet No II, and the dissentient municipalities of Dundee, Godmanchester, and Hinchinbrooke in the county of Huntingdon.

Various methods have been tried during the past nine years, in order to assist the teachers in securing better attendance and closer application to school-work; but, one after another, as the novelty wore away, became ineffectual and therefore had to be abandoned. The plan followed for the past two years is that authorized by section 9 of article 9 of Public Instruction. I regret to have to say that the response to the call for specimens was neither so large, nor so general last year, as it was the year before. In comparing school with school in general proficiency, the pupils of nearly all the city schools, as shown by the examination of the 1st and 2nd intermediate classes; those of Nos. 1, 2 and 3, Chatham No. 2, of Nos. 1 and 5, Lachute, of Nos. 1 and 4, Gore, of Nos. 1 and 4, St. Andrew, of Nos. 2 and 6, Chatham No. 1, and of No. 3, Grenville No. 3, in the county of Argenteuil; those of the schools of St. Henry, and Cote St. Paul, in the county of Hochelaga; those of Nos. 3, 5 and 6 Franklin, of No. 5, Havelock, of Nos 1, 2, 5, 7, 9 and 10, Godmanchester, of Nos. 1, 4, 5 and 9, Hinchinbrooke, of Nos. 4 and 5, Elgin, of Nos. 1 and 3, Hemmingford, of Nos. 4 and 6, Dundee, in the county of Huntingdon; those of Nos. 1, 4, 5 and 7, Ormstown, of Nos. 1, 2 and 5, Howick, of No. 3, Chrysostome, No. 2, in the county of Châteauguay; those of No. 5, Lacolle, in the county of St. Johns; and those of Pointe-Fortune, in the county of Vaudreuil, take the head and well deserve the title of excellent.

Physiology and Hygiene and the French language are now taught in nearly all the schools whose teachers are capable of so doing.

Obtaining statistics from private schools is a precarious matter. Though the inspector is generally courteously received, seldom he is favored with the desired information at once, but is frequently put off by being asked to leave a list of what is required. These lists, with few exceptions, are never returned. Owing to the energetic measures adopted by the school commissioners of the city of Montreal, in providing superior accommodation for the children under their care, the number of private schools is diminishing. If there is a spark of gratitude in man, the Premier, Mr. Mercier, should feel the effects of it for the inestimable advantages that he has conferred on the youg artisans, clerks and labourers, not only of the city of Montreal, but also of the Province of Quebec, by the night schools. It was my privilege to teach a class of young men and women (Jews) that I found without a teacher one night, last winter, in the British and Canadian school; and a more studious and interesting class I have scarcely ever taught.

There is necessarily a sameness in our annual reports that makes them tedious; and as the educational machinery is working somewhat smoothly, this one is no exception. The prize books have been awarded to deserving

Digitized by Google

pupils of the schools of Argenteuil, Lacolle, Hemmingford and the suburban schools of the city of Montreal. The prize cards are given only to such pupils as are found ready to be promoted to the the next grade.

I have the honour, etc.,

JAMES McGREGOR.

School Inspector.

Mr. J. P. NANTEL.

(*Translation.*)

ST-JEROME, 26th August 1890.

Sir,

I have the honour to submit my general report on the inspection of my schools, for the scholastic year 1889-90.

This year, there were 177 institutions in operation in my district, viz: 1 classical college, 2 boys' academies, 3 girls' academies, 3 boys' model schools, 4 girls' model schools, 4 mixed model schools, (boys and girls) and 160 elementary schools.

There were 164 schools under control, viz: 156 elementary schools, 7 model schools and 1 academy, and 13 independent institutions, 9 subsidized by the Government and 4 entirely independent. 160 schools are under Roman-Catholic teachers, and 17 under Protestant teachers.

All these institutions were attended by 7,933 pupils; average attendance about 80½ per cent, which is very satisfactory.

I found that progress continues to be made with respect to the improvement of the school houses and furniture.

This year, there are eight new school houses in my district, viz: the schools of districts Nos. 2 and 3, of St. Canut No. 1, the school in district No. 4, of Ste. Anne des Plaines, the school in district No 1, of Morin, the school in district No. 1 of Chatham, diss, and the school in district No. 1 of St. Faustin. All these school houses are satisfactory.

I have to congratulate the school commissioners of St. Eustache upon their new model school house in the village. I have also to congratulate the school commissioners of St. Jovite upon their new convent, built of stone, which will be ready for the opening of the classes.

I have taken special pains to make the classification of the school municipalities of my district by order of merit. I am convinced that this classification will excite emulation amongst the various school municipalities of my district.

* St-Jovite.

* St-Jovite is not classed as it had no school this year.

Digitized by Google

As you may see by the above tables, the municipalities which have the best schools are, in the county of Argenteuil, Lachute (town) diss., and Grenville No. 2, diss.; in the county of Two-Mountains, Ste. Scholastique and Côte St. Joachim; in the county of Terrebonne, Terrebonne (town) Terrebonne, diss., and Ste. Thérèse (parish).

By comparing this classification with last year's, I find that several municipalities have made great efforts and have succeeded in obtaining a higher place, amongst others: St. Eustache and St. Placide. This example will, I trust, be followed by other municipalities. On the other hand, some municipalities have not done so well, like Ste-Adèle and Ste-Monique; these municipalities will, I hope, before long, regain the ground they have lost and resume their places in the front rank.

I am, as usual, very well satisfied with the academies and model schools under my control; I have observed considerable progress in all these institutions.

Amongst the teachers in charge of elementary schools, those who have done best this year, are: Reverend Sister Jean-de-Marie, at Carillon; the Misses P. Sauvé, Ste-Placide; E. Touchette, A. LeBlanc, St. Eustache; M. Guay, St. Augustin; G. Lafrance, D. Paquette and G. Corbeil, Ste. Scholastique; M. Carrière, Ste. Monique; A. Latour, St. Jacques; C. Maillé, F. Beauchamp, St. Jérôme.

By comparing my grand statistical table for the year 1889-90 with that for 1888-89, I find that 38 teachers without certificates taught in 1889-90, while there were only 20 in 1888-89. This is regrettable, but I would not be surprised if this number were to become even greater, owing to the difficulty which the school commissioners and trustees experience in procuring teachers with certificates; these are becoming scarcer and scarcer, although there is a general tendency towards increasing the salaries. To what must we attribute this? Probably it is due to the fact that the position of school teacher is rather precarious and that a young person who is at all educated, prefers to accept any other situation; a time will come when the school commissioners will be compelled to pay teachers a salary proportionate to their position, otherwise, they will be unable to find any.

My grand statistical table shows a decrease of 451 in the number of pupils attending school in 1888-89. This is a considerable decrease, but it is easily explained. Several school municipalities, in the northern townships, were obliged to close their schools, owing to want of means; amongst others: Doncaster, Ste. Marguerite, St. Adolphe de Howard, St. Jovite. The successive bad crops of the past three or four years in these localities, explain this decrease in the attendance at school; several families have been compelled to give up their farms and go elsewhere to earn their living.

The new course of study is in all the schools of my district. It has

Digitized by Google

already been productive of good results, as I ascertained in my second round of inspection. These results cannot fail to become better year by year, as the course of study becomes better known and better appreciated. I never lose an opportunity of showing its utility.

Mr. Inspector Brault, in his general report for the year 1888-89, complains that educational journals are not sufficiently read by teachers. I am entirely of his opinion. Like my colleague, I regret that so few teachers receive educational journals. Are they to be blamed? Who can blame them, when they are so ill-paid? The Department of Public Instruction, assisted by the inspectors, would give a considerable impetus to education if they could find a remedy for this state of affairs.

I trust that these few remarks, with my tables giving the classification of the school municipalities, with my grand statistical table and inspection bulletins, will suffice to give you an exact idea of the state of education in my district for the year 1889-90.

I have the honour, etc.,

J. P. NANTEL,

School Inspector.

Mr. F. H. O'BRIEN.

(*Translation.*)

TADOUSSAC, 30th August 1890.

Sir,

I have the honour to submit my report for the scholastic year 1889-90.

My district, which comprises the whole of the county of Saguenay, is, beyond contradiction, the most difficult to inspect, owing to the great distances to be covered, the absence of easy means of communication, etc.

Notwithstanding these disadvantages, I succeeded in inspecting all the schools two or three times.

All the schools are taught by female teachers, some of whom have no certificates. The reason of this almost deplorable state of things, is that the rate-payers are, as a rule, too poor to pay a suitable salary to teachers with certificates. In some school districts, the maximum salary is sixty dollars per annum. Too young teachers are engaged, and the natural consequence is that they have hardly any authority and do not give sufficient attention to the performance of their important duties.

Digitized by Google

So long as the parents remain under the impression that they require cheap teachers without paying any heed to their professional knowledge, we cannot expect much progress on the part of the children.

This year, for the first time, Tadoussac has had the advantage of having a model school. Miss Albertine Mercier was placed in charge, and her system of teaching, the result of long experience, has had the most satisfactory results. Rev. Mr. J. Lemieux, who takes the greatest interest in education, visited this school frequently during the year to excite the emulation of its too numerous pupils. I say too numerous, for there were 73. Miss Mercier applied more than once for an under-teacher, but unfortunately, the commissioners did not grant her request. She will teach again this year with an assistant for the younger pupils.

Miss Mathilde Boucher, who taught so long at Tadoussac, has taught the elementary school at Escoumins in a most intelligent manner, and there, as at Tadoussac, her efforts have been successful. Two other teachers who are also deserving of praise, are Miss Gagnon, at Mille Vaches, and Miss Quinn, at Portneuf. Both have certificates and have proved themselves zealous and competent.

Monsignor Bossé, the venerable Apostolic Prefect of Labrador, has this year, as in past years, made education in my district the object of his predilection. He has everywhere excited the zeal of the parents and commissioners, has seen to the selection of teachers, and has even paid for school supplies out of his own pocket.

The convent, which he has founded at Pointe-aux-Esquimaux, and placed under the management of the admirable Sisters of Charity, gives a first class education in every respect. During last winter, five young girls, former pupils of this institution, obtained elementary school certificates from the local board of examiners I carefully went over the French dictation written by each of them, and I can say that there were no mistakes.

I also attended the convent examination at the end of the year, and I must admit that the result was as satisfactory as possible in every respect. All the various subjects of the course of study had evidently been taught on an excellent system. I observed, amongst other things, that Writing, Arithmetic and Parsing left nothing to be desired.

By dint of unceasing labour and endless sacrifices, Monsignor Bossé has almost succeeded in completing the convent at Pointe-aux-Esquimaux, known under the name of St. Joseph de Labrador. It already presents a fine appearance, situated as it is on the sea-shore, facing one of the most picturesque bays of the St. Lawrence.

The school, at Cap-Blanc, is divided into two classes, each of which has a teacher. The result of the examinatian at which I was present was satifactory.

Digitized by Google

The schools at Moisie, Thunder River etc., are elementary schools. The worthy missionaries who preach the Gospel in this distant land, are the principal and constant promoters of these schools which are so difficult to open and maintain amongst their impoverished population.

There, as elsewhere, I might even say, more than elsewhere in the Province, it is beyond a doubt that without the generous efforts of the clergy in the county of Saguenay, especially near the Gulf, education would be a dead letter.

It is to be regretted, especially in schools where boys are in the majority, that the teachers should be women instead of men. Discipline and application suffer and it is observed that there is less perceptible progress amongst the boys. It is difficult to remedy this, owing to the poverty of the people who have not sufficient means to pay a proper salary to male teachers.

Article 107 and following of the school regulations, are better observed than formerly. By repeated representations, I have succeeded in convincing most of the commissioners of the necessity of watching over the health of the children, the sanitary condition of the school rooms, etc.

As I have already remarked, absence from school is the chief obstacle to the progress of the children. The families which are very poor, require their children for field labour, navigation etc.

Unfortunately for the proper working of the schools, the collection of arrears of school-taxes is neglected by some secretary treasurers of school municipalities.

I cannot let this opportunity pass without thanking you publicly, both in my name and in the name of those who take an interest in education, for the excellent idea you have had of assembling all the inspectors of the Province in a congress, held on the 17th August. The work you had drawn up for this Congress are destined to be productive of the most happy results in every respect.

To this meeting, I might apply the following words, which I find in my report for the year 1882, and which the late Dr Ryerson addressed to a convention of teachers held in Toronto in 1882. " The inspectors of the " public schools of the Province of Quebec are now grouped around the " Superintendent (Hon. Mr. Ouimet) like a well appointed staff of aides-" de-camp, full of confidence in a chief whose experienced eye is ever " scouring over larger horizons for their utility. When summoned by duty, " they boldly enter the battle field and valiantly they court victory, here " over the sophistry of false economists and popularity seekers, there over " the stupid prejudices of routine, but behold them with their banner " always floating high and triumphant over their head, inscribed with " the potent words "Religion and Science". Above the clamour of their foes " they repeat with a voice of increasing sonority, the cry of Longfellow's " hero : Excelsior ! Excelsior ! "

Digitized by Google

As I was obliged, owing as I have already stated, to the great distances to be covered and the impossibility of being on the spot at a specified date, to get myself replaced by the resident missionaries and parish priests, as I will not receive the statistics and notes required for the grand statistical table and bulletins, in time for the publication of your annual report, I hope you will dispense with my sending them this year. Moreover, the statistics would, with a few unimportant variations, be the same as last year.

I have the honour, etc.,

FRS. H. O'BRIEN,

School Inspector.

Mr. D. PAQUET.

(*Translation.*)

MAGDALEN ISLANDS, 28th July 1890.

Sir,

I have the honour to submit my report on the working of the school law in my district for the year ending the 30th June 1890.

During the year, there were 13 schools, 12 being elementary, in operation; they were attended by 751 pupils: 405 boys and 346 girls.

All the teachers had certificates.

Most of the school houses are mostly in good condition.

A model school house is being built in the municipality of St. Magdalen, and an elementary school house in the municipality of St. Pierre de l'Etang du Nord. I recommend these two municipalities to you in a special manner.

The school furniture, although far from what is required by law, is nevertheless as good as can be expected in places so isolated as the Magdalen Islands.

The accounts in the municipalities of Aubert, St. Magdelen and St. Pierre, dissentient, are kept as well as can be desired. They may also be well kept in the municipality of St. Pierre de l'Etang-du-Nord, but for reasons which I mentioned to you when I made my first inspection, I could not see the accounts myself. When I made my last inspection, the secretary-treasurer was engaged in other work so that I did not see the accounts at all during the year.

Digitized by Google

The books and school necessaries are suplied *gratis* to the pupils in all the municipalities, except that of St. Pierre, where serious difficulties exist in this connection.

I wish to call your attention to article 157 of the regulations respecting pupils. By complying with this regulation, the evil continues to exist in the school until the parents or the commissioners put a stop to it. Would it not be better to let the teacher himself have the power to expel the pupil ? The rule may be a good one for towns and villages, but it is a very difficult one to carry out in country parts.

I have the honour, etc.,

D. PAQUET,

School Inspector.

Mr. PARKER.

LEEDS, July 17th, 1890.

Sir,

I have the honor to submit my first report with reference to the state of education in my inspectorate. I send with it the Statistical Table for the scholastic year of 1889–90

In my inspectorate, which comprises the Protestant schools of the Counties of Megantic, Lotbinière, Dorchester, Levis, Portneuf, Quebec and Quebec city, there are thirty-three scholastic municipalities, containing one College, two High Schools, one Academy and seventy-seven Elementary Schools.

As it was late in October, when I was appointed to office, I was not able to visit all the schools twice. The schools of Quebec city, the county of Levis, and several in the county of Megantic I have visited twice; the other schools, once. I experienced some difficulty on my first tour of inspection. Many of the municipalities are not carrying out the regulations with reference to the time in which their schools should be in operation. Here is an example :

Teachers are engaged to commence teaching on July 1st. Two weeks holidays are to be given during the haymaking season; two weeks in harvest, two weeks at Christmas, and two weeks during potato-planting time. Now, I had the misfortune to travel ninety miles to visit schools in the month of May, being ignorant of the existing custom which pre-

Digitized by Google

vailed in these municipalities ; the result was I had to return home as the schools were closed. I was thus compelled to make another visit later. Again, there are other municipalities in which schools are in operation but five months in the year, viz : June, July, August, September and October. These schools were closed before I could visit them. I visited several of them this year, however, during the month of June, and as they had been in operation but a few days, I was not able to report favorably. I shall visit them again before they close, and by so doing, I shall be in a position to note what progress has been made.

In the statistical table, I have reported seventy-seven elementary schools under control. There were in attendance, at these schools, 1,785 pupils. The two model schools reported were attended by 135 pupils. There were in attendance at the high schools and academies 352 pupils, making a total of 2,272 pupils, with an average attendance of 1,762. I have reported in schools under control, 10 male teachers and 91 female teachers. In the elementary schools, there are only two teachers without diplomas.

I inspected the elementary departments of Inverness academy, Leeds model school, and St. Sylvestre model school. These have been reported in the bulletins of inspection. I visited the other high schools for the purpose of obtaining the necessary statistics.

I have classified the different municipalities according to regulation:

1. The length and arrangement of the school year.
2. The condition of school houses and grounds.
3. The supply of apparatus, maps, blackboards, etc.
4. Use of the Course of study.
5. Use of authorized series of text books.
6. Salaries of teachers and method of payment.

Each municipality has a chance of obtaining 60 marks; 10 marks being allowed for each of the above needs.

Those municipalities which have obtained 45 marks or over, have been classed excellent; from 45 to 35, good; 35 to 25, middling; 25 and under, bad.

EXCELLENT.

St. Colomban de Sillery	55
Quebec City	54
Levis	45
St. Romuald	45
St. Sauveur	45

Ireland-South	24
St. Pierre Baptist	24
St. Gilles	24
Tewksbury	23
St. Gabriel West	20
St. Gabriel East	20
Mill-Hill, No. 4	20
Leeds East	20

The majority of the municipalities are deficient under heads 3, 6 and 1, i. e., the supply of apparatus, blackboards, maps, etc. Salaries of teachers and method of payment, length and arrangement of the school year.

In the matter of the use of authorized text books, nearly all the schools are in line.

There are very few schools in which the "Course of study" is not followed. I left a copy of the "Course" in every school, also a copy of Regulations. I found several schools in which the work was not being carried on according to a specified "Time Table. In such cases, I assisted the teacher to make out a provisional Time Table, by means of which her work as well as the pupils' could be carried on systematically.

The condition of the school houses in those municipalities which are classified as excellent, good, middling, is fair. I cannot say much in favor of the school grounds, as there is not much attention paid to them by the authorities in charge. In the matter of school apparatus, the schools in my inspectorate are sadly deficient. Some schools have not a single map upon

Digitized by Google

the walls. One of the essential requisites in teaching school, viz: a blackboard, is not to be found in many schools. I have spoken to the commissioners about these matters, and in many cases, I have been assured that suitable blackboards will be placed in all schools under their control.

In several of the municipalities classed " bad, " the school houses are old and in a bad condition. There is no apparatus for teaching purposes; the school year is badly divided; salaries of teachers, in some cases, are very low.

How are we to remedy this state of affairs ? By an increased grant to the elementary schools. At the present time, on account of the small grant offerred, the school inspector has but little power over the commissioners or trustees. He may advise, recommend, report; but, in many cases, there is no change effected; now, if the grant were larger so that the withdrawing of it would be felt, the inspector would have a lever with which he could move a municipality and bring it into line. The large majority of our people receive no other education than that afforded by our elementary schools, hence the necessity of making these schools as efficient as possible.

Generally speaking, the teachers are faithful in the discharge of their duties. They will be in a position to do better work when their schools are supplied with proper apparatus.

The secretary-treasurers, with few exceptions, perform their duties faithfully. All accounts are honestly kept; but in some cases, the secretary-treasurers are dilatory in collecting taxes, and in consequence thereof, the teachers are not promptly paid.

A teachers' institute was held at Inverness, in the county of Megantic, during the month of July. It was conducted by Dr. Harper and myself. There were 65 teachers in attendance, and great interest was manifested in the work. The meetings were held in the academy. The township of Inverness has reason to be proud of the fine brick building which has been erected, during the present year, for educational purposes. They have also reason to be proud of the high standing taken by their academy, last year. The credit belongs, in a great measure, to the principal, Mr. James Mabon, B. A., who is an excellent teacher, a zealous worker in the cause of education.

I hope that this report, together with the statistical table and the bulletins of inspection, will give you a clear idea of the state of education in my district at the present time.

I have the honor, etc.,

J. PARKER,

School Inspector.

Mr. E. PICARD DESTROISMAISONS

(*Translation.*)

RICHELIEU VILLAGE, 30th September 1890.

Sir,

I have the honour to submit the following observations on the schools in my district, for the year 1889-90.

I am happy to say that I found the schools, especially the elementary schools, generally well managed and flourishing. A good many of these schools are in no wise inferior to model schools. Thus, out of the 185 elementary schools of my district, only 8 remained at a stand-still ; the others made more or less progress.

I would therefore have very little ground of complaint against the teachers of these schools, for they all seem to be anxious to perform their duties to the best of their ability.

The distribution of the " course of study " has produced excellent results. When I first went to the schools, I explained it and expressed the desire that it be followed as faithfully as possible, and, at my second visit, I found that many teachers had complied with my wish.

The model schools are also well managed, but, unfortunately, the number of pupils who are fit for them is frequently too limited.

As to the institutions under religious teachers, they nearly all do good work, and in some places, render great service, especially as regards discipline.

However, although the schools of my district are prosperous, as a rule, it must not be imagined that we have attained the highest pinnacle of success ; the teaching of some subjects, such as Drawing, Agriculture, Object Lessons, History and Geography, leaves somewhat to be desired. I do not attribute this to the teachers, who are quite willing to teach these branches, but to the apathy of the parents.

I cannot agree in the opinion of those who would seek to do away with learning lessons by rote. Pupils who know their lessons, word for word, understand the explanations much better. I am aware that it is not necessary for members of the legal profession to know the code by heart to be able to explain its meaning, but it is not the same thing for a child. I therefore conclude that the pupils should know the word for word of the lessons which require explanation, and I advised the teachers to insist upon it.

Digitized by Google

I also found the pupils apathetic, as regards the study of Geography, especially on the map, and this is due to the maps themselves, which they see before them. I have observed that maps with striking colours are always well studied, and in several elementary schools, where there are maps, I found that the children knew Geography perfectly. The study of map-making is becoming more general in many schools, especially where Drawing is taught.

It is a matter of regret that there is not more uniformity in the books used in the schools. I have found, in the same school, three kinds of Grammars, and as many Arithmetics and Histories. I need not say that I, at once, rectified this. The pupils, when they leave one parish or one district, to go to another, should find the books which they previously used. The want of uniformity in school books gives additional work to the teacher and is an obstacle to the progress of the pupils.

During my inspections, I have had to congratulate myself upon the kind reception I met with from the members of the clergy and the school commissioners. The school boards, as a rule, consist of men who are anxious to promote education. I found only two or three municipalities in which the commissioners are niggardly to a lamentable degree. I think I mentioned them in my inspection bulletins.

The school commissioners of the municipalities of the town of St. Hyacinthe, Notre-Dame de St. Hyacinthe, St. Hugues and St. Paul, deserve the utmost praise for the zeal they display in the management of their schools, which are all on an excellent footing.

I would not like, for this year, to give a special appreciation of each teacher in my district. However, I cannot avoid mentioning Mr. Noé Gervais, the senior teacher in my district, who teaches most successfully the model school of St. Charles village. Mr. Gervais is also the secretary of the St. Hyacinthe board of examiners. I would also mention Mr. J. Meunier, of the school in St. Pie village, as an excellent teacher. As regards the female teachers, the number of those who have done well is too great for me to be able to name them.

There is much to be done in my district, with reference to school houses and furniture, and I advise the Department of Public Instruction not to allow the school commissioners to eliminate the rules respecting the construction of school houses. Long desks and long benches should no longer be tolerated for they always cause disorder in the schools.

I would also recommend that no permission be given to employ teachers without certificates. Under the vain pretext that the children of the parish must be protected, some municipalities abuse of this permission and engage only teachers without certificates, because it costs less, and good teachers are thus left aside. This competition by cheap teachers without certificates prevents many persons from devoting themselves to teaching who are otherwise inclined to do so.

Digitized by Google

The teachers, as a rule, are paid regularly, and this is a sign that financial matters are well managed.

I have the honour, etc.,

E. PICARD DESTROISMAISONS.

Shool Inspector.

Mr. J. PREMONT.

(*Translation*)

STE. FAMILLE, 15th August 1890.

Sir,

I have the honour to submit my annual report for the scolastic year 1889-90.

When preparing my grand statistical table up to and including this year, thought that I entered into the spirit of our laws and of our school regulations and acted as a good patriot by giving to the word "school" the same meaning as is given in Ontario, according to the law which is as follows :

"Each Public School House in use for a school, in a legally established (or duly recognized) school section or division, within the jurisdiction of the Inspector, shall be counted as one school (whether such school be in actual operation, or temporarily closed for not longer than six months.) And each department of a school, with a register of its own, and taught in a separate room or flat of a building, so as to involve the like oversight and examination as an ordinary school on the part of an Inspector at his official visits, shall also be counted as one school ; but a school, with one or more departments, when closed, shall only be regarded as one school, for the time limited above, beyond which time, no school which is closed shall be counted."

Of course this does not refer to colleges or any of our independent institutions whose name and constitution are determined by their act of incorporation, nor is it a definition which would apply to each of the numerous acceptations of the word "school."

It simply means that in order that uniformity may prevail in the statements prepared by us on school statistics, we should be agreed as to the

Digitized by Google

meaning of this expression in so far as it relates to the exercise of our duties as school inspectors, respecting schools under control. There is one thing certain, and that is that there is a misunderstanding, not only among the inspectors, but also amongst the commissioners and the secretary-treasurers.

On the one hand, we find the statistics of two perfect distinct schools, one for boys, the other for girls, united to make one mixed school, and on the other hand, a different report is made for each of these schools ; some time, the report will include the pupils of all the courses without distinction, and another will only mention those following the superior course. It also happens that superiors of convents in which elementary schools under control are kept at the same time as superior independent school, include, in the statement, statistics respecting both, while some inspectors, if not all of them, do the contrary.

What then is the reason for such difference of opinion, if not the fact that the competent authority has not deemed it expedient to define the sense of the term " school " in a clear and incontroversible manner. Since a definition which will cover all the acceptations of the word " school " cannot be found, let one be adopted, at least in view of a new distribution of districts, based on the number of distinct and regular inspections, which would be counted as so many schools to be inspected in each new district.

This would be perfect, because by adopting this mode of counting our schools, which we could not be blamed for, since it is that followed in the other Provinces, we would at once occupy a higher position in the school statistics of the county.

In the Province of Quebec. as in Ontario, we have large institutions under control, which it would take weeks to inspect. These institutions are divided into 8, 10 or 12 departments, each presided over by a professor, who sometimes has an assistant, and in which are to be found 60 to 100 pupils, generally subdivided into several classes.

This professor is either clerical or lay, and bearer of a diploma. He keeps correctly his class register, and the other registers required under the regulations. He watches over the conduct of his pupils and is responsible for their good behaviour He prepares the statistics required by the inspector, etc., etc. In fact, he keeps his school strictly, according to the rules laid down for keeping a school under control.

Is it necessary to state what the inspector has to do in these school departments ? It is sufficient to say, I believe, that he goes through exactly the same as in an ordinary school. Now, in the case under consideration, since the professor teaches and the inspector makes his inspection as in an ordinary school, what harm would there be in classing the schools of such departments amongst the number of ordinary schools, which, frequently, are not as important as the first.

I have certain schools to visit, and so have the other inspectors, in

Digitized by Google

which there are 8 or 10 little children, who do not even know how to read fluently, and no person objects to giving the name of school to these assembly of *babies* frequently presided over by a teacher without a diploma, and in which, I assure you, there is not the least thought of following a course of studies.

Moreover, what are the essential and constituent part of a school, if not the master who teaches to pupils. The remainder is only accessory. We continually hear of courses of study, of directors and of all sorts of rules. This is all purely conventional, may vary like the law and the rules, but can no more constitute the school properly so called, than could the most improved furniture that could be placed in the class room.

Whether such teacher belongs to a religious order and, as such, is subject to a superior or director who maintains him in his position, or whether he be a lay teacher who derives his authority from the school commissioners, it matters little, he is always the leading mind of the school, the channel through which instruction passes, the only one responsible before God and before man of the task which he has undertaken, to instruct and bring up children. Yes, it is the master who makes the school. As is the master, so will the school be.

I therefore propose, that the method authorized by the Ontario school law, for the preparation of statistics establishing the number of schools in operation, be adopted in the Province of Quebec. It may be an illusion, but I firmly believe that the Council of Public instruction will take my proposal into serious consideration, and that it will maintain the conclusions thereof.

If this method of counting the institutions under control were adopted, the number of schools in my district would be as follows:

Total schools	Total pupils.	Avarage pupils for each school.	Total teachers.
135 elementary under control.	7,763	58	145
23 model " "	960	42	26
4 academies " "	127	32	4
Total: 162 schools under control.	8,850	55	175
7 independent model sub.	921	132	38
7 " academies sub.	1,109	159	47
Total: 14 independent schools sub.	2,030	144	85
21 elementary ind. not sub.	1,238	59	27
3 model " " "	340	113	11
4 academies " " "	473	118	75
1 college " " "	350	.....	.....
Total: 29 independent schools not sub.	2,401		

Grand total: 205 schools of all kinds attended by 13,281 pupils.

This year has been an exceptional one on account of the *grippe*, which completely interrupted school as it did private affairs, so much so that I was unable to visit the greater number of independent non subsidized schools

9

Digitized by Google

and to make a second visit to a certain number of schools under control. Without being held to make a regular inspection in this first category of schools, I am however in the habit, when I have time, of accepting the invitation which is tendered me of visiting them. Moreover, the inspector would render a great service to the public if he could extend his inspection to those schools of little children, which are scattered here and there in the suburbs of towns, and in which, with few exceptions, none of the rules laid down for the keeping of schools are observed.

As the Department of Public Instruction has no control over the independent non-subsidized schools, it is not customary for me to forward you any bulletin of my visits to this class of schools, but I do so for the independent subsidized schools who submit to my inspection, so that, if I am not mistaken, I must have sent you not less than 175 separate and distinct bulletins of inspections relating to my first visit.

This will suffice to show you that, in case a new distribution of district is made, I could not be numbered with those who ask for more work. I have been thirty-four years working at public instruction and so there is no wonder that I should find that I have quite enough work, the more so as the schools in my district are increasing every year.

Now, Sir, I deem it my duty to give you some details for which I could find no space in my bulletins.

CITY OF QUEBEC.

The city now comprises the former municipality of St. Sauveur, but the school commission did not deem it advisable to make any change in the management of the schools this year; the same system as in past years has been followed. I am led to believe that, next year, the schools kept by lay teachers will be put on the same footing as those of the same class in the city, that is to say that the commission votes about $150. to the teacher of the school, over and above the monthly contribution; the teacher being obliged to provide at his own cost, a class room, furniture register, etc.

I need not add that this system is not the best, and that is precisely those schools, although some of them are relatively speaking good, which, by their bad notes, as regards the school houses, furniture and other school appliances, as well as the partial putting into operation of the course of study, lower the average, thus reducing the good notes given by other schools in which the school regulations are perfectly followed.

I do not believe that there exists in the whole Province any schools under control better kept than those of the same class, presided over by the Christian Brothers, the Brothers of St. Vincent de Paul, the Sisters of Charity, the Sisters of the Good Shepherd and the Sisters of La Congrégation de Notre-Dame.

Digitized by Google

It is necessary to follow, year by year, the progress which is accomplished in these establishments to be able to state, as I do, that these learned professors, these distinguished lady teachers, known and esteemed by all, have no superiors in the art of educating our youth. They are, however, the last to believe themselves so successful. But I deem it my duty to declare in this report, to what extent the public is indebted to these communities for their unalterable devotion to the great cause of education.

I must add that a great number of lay teachers, in the city, perform the task entrusted to them satisfactorily. It would, however, be very hard to classify their schools, according to their merit, as their conditions for obtaining success are not at all alike. I could easily make a choice, however, of these who are the best qualified for teaching. In my bulletins, I have expressed my opinion as to the merit of each of these schools.

Mrs. Côté keeps a school in St. Roch, which is subsidized out of the funds of Superior Education. She wishes it to be ranked as an academy. I think she is in the right, because several of the young girls, her pupils, could easily learn the subjects taught in academies. Mrs. Côté has made many sacrifices to maintain her school which is well patronized by the public, and it would only be an act of justice were she to obtain a larger grant, which would permit her to make great improvements to her house.

BANLIEUE OF QUEBEC

This municipality possessed two schools. One was closed this year and the only one in operation at present, is almost useless. The commissioners, however, are preparing to build a house and are collecting taxes for that purpose.

ST. ROCH NORTH.

Two houses, one of which is about to be enlarged and repaired. Three flourishing schools. Good female teachers. Too many pupils in Miss Bouchard's school. Miss Gosselin's pupils are the most forward of the three schools. Improved furniture.

LITLLE RIVER ST. CHARLES.

One school and that not a very flourishing one. A school house is to be built this year. Improved furniture, but want of school appliances.

ST. ADOLPHE.

A small municipality lost in the Laurentides. About twenty settlers bravely keep up their school house, which is small, but large enough for the numbery pupils. Everbody is poor here. It is better to give to these good settlers than to ask any thing from them. Additional help is absolutely necessary ; otherwise the school will have to be closed.

ST. BRIGITTE DE LAVAL.

Two school houses. One of an inferior appearance, not painted or whitewashed. The other new and not finished, but large enough. The

Digitized by Google

one should be repaired and the other finished. The expenditure would be large for such a poor municipality. Greatly in need of additional help.

Two schools, one of which is an inferior mixed model school; a competent female teacher; but the attendance of the pupils is far from satisfactory. Furniture almost useless. Very good elementary school. Mrs. Chamberland the teacher does very good work.

L'ANGE-GARDIEN.

Three good school houses and four schools; one, a mixed model school, and three elementary schools. Well satisfied with the progress in the four schools. The elementary school, in the centre, is kept in a room that is too small, and the furniture is insufficient. Competent teachers, but only beginning to teach, except Miss Gosselin. All well liked.

The parish priest gives beautiful prizes to each school for the most studious and assiduous pupil. The distribution of prizes takes place in the presence of the children's parents. An excellent manner of encouraging the children.

CHATEAU-RICHER.

A model school for boys, kept by Mr. Lavoie, an excellent professor. Well disciplined pupils. Course of study well followed. Good progress. The house is solid and large, but of poor appearance. Defective in many places and urgent in want of repairs. A good little elementary school, a dependency of the model school, is attended by about fifty pupils. The furniture of both these schools is very primitive. Small salary to both teachers.

One convent, four sisters of the Good Shepperd and three school departments in this institution. They are at present considering as to the steps to be adopted in order to enlarge and improve the building. Approximate cost: $3,000. Furniture old style. The course of study in operation. Reputation maintained.

Four other good school houses, two of which are not finished. Four elementary schools. Two almost useless. One flourishing; teacher, Miss Josephine Gravel, a really distinguished teacher. Another comparatively good. Miss Côté, who is an excellent teacher, has had less opportunity of being successful.

STE. ANNE

Four schools under control, subsidized, kept by the Sisters of Charity.

The parish priest, Reverend Father Debongnie, is the heart and soul of all progress in educational matters in this parish; thanks to his efforts, the pernicious effects of routine are rapidly disappearing.

The old school houses were falling to pieces and it would have taken thousands of dollars to renew them. The commissioners were in a quandary, for to tax their people with such an amount would mean ruin

Digitized by Google

to many and they did not know what to do. I intended to submit the whole matter to you, but at my last inspection, I had an interview with the parish priest, to whom the whole matter was explained. That gentleman requested some time to reflect upon the subject. The result now is that three magnificent schools are being built at the priest's own expense for which the people should be very grateful.

The four female teachers who teach school at St. Anne, enjoy the best of reputations as teachers ; they are the Misses Filion, Lepetit, E. Morel and R. Morel. An exclusively English school has been opened in the convent, this year : it is presided over by a lay female teacher, holding a diploma, and of Irish origin. Music is now taught in this institution, and all the subjects of a complete course. A number of young girls from the city and the surrounding parishes obtain their education here.

LES CRANS.

This small municipality is very poor and can only support its school if it continues to receive additional help from the government. Where the money to meet the other expenses is to come from, is the secret of the Reverend father, who ministers to the poor settlers inhabiting these mountains.

The female teacher's rooms are in the chapel, in which she keeps her school The Reverend father visits the school from time to time and sees that everthing is kept in order, and that no necessary school books or other school appliances are wanting.

ST. FERREOL.

Three school houses, two of which are of poor appearence and too small. Three elementary schools of the first grade. Very primitive furniture. But few pupils attend school.

Miss Premont, the teacher of the 3rd district, is well liked in the parish and performs the duties of her position with great zeal.

ST. TITE.

Four schools in operation. Within ten years, three school houses have been built in this parish. The school house, in the centre of the parish, has a fine appearance and is completely finished. The two others are not finished yet, but will be before long and as soon as their means will permit them.

This municipality,comparatively a poor one, deserves to be complimented on what it has already accomplished, rather than reproached with what remains to be done. The parish priest is the soul of all that relates to the progress of education in his parish, and he accomplishes with wonderful success the task which he has undertaken for the benefit of his parishioners.

Digitized by Google

ST. JOACHIM.

One mixed model school and three elementary schools. Four school houses, one which will be repaired this year.

Few changes for the better. The pupils, in general, seem careless and not overdesirous of being taught. It is with the greatest efforts that the teachers succeed in obtaining the most ordinary progress. More severe measures will be taken to obtain greater success next year. Two female teachers have sent in their resignations.

BEAULIEU.

A good house which threatens to go to ruin if not repaired very soon. Very plain furniture. The commissioners have already delayed placing this school on a proper footing, but I am assured that they will do so.

The teacher cannot always teach the subjects of the model course of study, because her best pupils, especially in summer, attend school in the city, in order to study English. This really serious defect might he overcome by the teacher being obliged to teach in both languages.

ST. PIERRE.

Three school houses and four schools. The model school and the elementary school annexed thereto were kept by the Misses Guérard, two teachers just beginning to teach and very competent. I was very much pleased with their teaching. They have sent in their resignation on account of ill health. School houses in good order.

The other two elementary schools are not well attended by pupils, who are too young to study all the subjects of the course of study. The teachers are capable of keeping better schools. The furniture is not what it should be.

STE. FAMILLE.

One convent, an independent academy and one elementary school under control. Sisters of the Congregation N. D. Founded in 1685, by sister Bourgeois, at the request of Mr. François Lamy, the first parish priest of this parish. Remarkable progress. Very good in all respects.

One very prosperous model school for boys. Mr. Zoël Dubeau, the teacher, holds an academy diploma. He has passed with distinction the examination which permits him to aspire to the office of school inspector. Good and large stone house. Furniture, although not the most improved, very comfortable. Spacious yard for the pupils and a large garden for the teacher's use. The grant for a model school is paid directly to the teacher over and above his salary.

A very satisfactory elementary school is kept by Miss D. Lapointe, a most zealous teacher, educated at the Laval Normal school. Large and well finished school house. Comfortable furniture.

Digitized by Google

ST. FRANCOIS.

Two school houses in good order. Two good elementary schools. Furniture old style. Teachers zealous; Misses Rousseau and Normand.

ST. JEAN.

Three school houses, and four schools. School house No. 3 is in a ruinous condition, the other two are solid, but of an inferior appearance. Defective furniture in several schools.

One model school for boys and one for girls. Few pupils follow the superior course. Two teachers have resigned. School No. 2 has made some progress. Very few pupils attend No. 3 school.

ST. LAURENT.

Three school houses under control and an independent subsidized convent. The houses are good and well kept. Furniture old style. Sufficient school appliances.

Mr. Bruno Pelletier keeps the boys' model school, the best in Montmorency with that of Ste. Famille. The smallest children, from 5 to 7 years, learn to write their reading lessons, and at the end of their first year at school, they can easily write short dictations. They take part in all the lessons in history, geography, and drawing, and it is astonishing to see the way in which these children draw various objects on the blackboard or slates.

Mr. Pelletier would be of great use if we obtained what we have been asking for so long, that is to appoint lecturers during the vacation to give lectures on school teaching to the female teachers who have not had the advantage of being educated in the normal schools.

One of the two elementary schools is very middling and the other is comparatively good.

The convent is managed by the Sisters of the Good Shepherd. I was unable to visit it this year for reasons beyond my control. I however know that this convent is well patronized by the public, and that a great number of young girls (80) have successfuly followed the course of studies taught there.

All that now remains for me to do is to classify the municipalities in accordance with the 14th section of the school regulations.

Digitized by Google

	Average points retained.	Classification.
City of Quebec	8	Excellent.
Ste. Famille	7	Very good
St. Laurent	7	" "
L'Ange Gardien	6	" "
St. Anne	6	" "
Château Richer	5	Good.
St. Roch North	5	"
St. Jean	5	"
St. Joachim	5	"
St. Pierre	5	"
St Tite	5	"
Baulieu	5	"
St. François	4½	Middling.
Les Crans	4½	"
Laval	4½	"
St. Adolphe	4	"
St. Ferréol	4	"
Rivière St. Charles	3½	Bad.
Banlieue	2	Very good

I have the honour, etc.,

J. PREMONT.

School Inspector.

Mr. P. A. ROY.

(*Translation.*)

LEVIS, 25th August, 1890.

Sir,

I have the honour to submit my report on the schools in my district for the scholastic year ending on the 30th June 1890.

I would have liked to have given you a comparative statement in detail of all the schools in my district for the past four years, with regard to the number of pupils who have studied the various branches, so as to show in a clear and positive manner the progress made in my district since 1885, in each of these branches; but as this would have delayed my yearly report, and all these details would have made the report too voluminous, I renounced the idea, confining myself to the following statistics:

Digitized by Google

There are 103 schools in my district distributed as follows; 74 elementary schools, 72 being under control and 2 independent, 24 model schools, 21 being under control and 3 independent; finally, 1 academy under control and 4 independent academies.

These schools were attended during the year by 5,273 pupils; of whom 4,779 were in the institutions under control, and 494 in the independent institutions.

The number of boys was 2,537 and of girls 2,736.

These statistics show that the average number of pupils was 45 for each elementary school, and 72 for model schools and academies; the average attendance was 29 for the former and 57 for the latter, which seems to me to be satisfactory.

A new municipality was formed at the beginning of last year, that of St. Raymond village. It has three schools, two being model schools: one for boys and one for girls, and an elementary school. These three schools were attended by 208 pupils with an average attendance of 142.

By comparing my report for last year with that for the previous one, I find that the number of model schools has increased by three, two at St. Raymond and one at Sillery. The latter is under the able management of the Christian Brothers; 148 pupils attended this institution. I cannot let this opportunity pass without calling your special attention to this school, which Rev. Mr. R. Casgrain has succeeded in establishing by dint of courage, energy and great sacrifices. It had become indispensable, on account of the great number of pupils who were obliged to leave Sillery, every year, to study in Quebec or elsewere, to enable them to obtain the necessary education to fit them for situations in trade and industry.

In order to obviate this, the reverend gentleman resolutely set to work, and in answer to his appeal, his parishioners and several other benefactors contributed towards the erection of the building required for the purpose, and I am happy to say that their efforts were crowned with success. But this is not sufficient and but one step has been made. The building is a fine one, I admit, it is even provided with excellent appliances; but it must hereafter be used for the purpose for which it is intended, otherwise the object will not be gained and all the sacrifices will have been made in vain if the undertaking were abandoned.

As you are aware, the population of this locality belong almost exclusively to the working classes, and consequently, are not very able to make further sacrifices to keep up the institution; they, therefore, rely with full confidence on the assistance of the government. I hope that the Roman Catholic Committee of the Council of Public Instruction will be able to give it a large grant out of the Superior Education fund

The 101 schools whose statistics I have given, were taught by 7 male teachers, 2 being in religious orders and 5 laymen, and by 129 female teachers, 32 being nuns and 97 laywomen.

Digitized by Google

Amongst the male lay teachers, only one holds an academy diploma, two have model school and one an elementary school diploma; the fifth has no certificate and is only an assistant. The three former do good work in the model schools of Beauport, Charlesbourg, and Pointe-aux-Trembles; their names are Ls. Abdon Guay, Ls. Omer Pagé and Jos. Eudore Locquell. Of the 97 female lay teachers whom I have first mentioned, 41 hold model school and 46 elementary school certificates; the 10 others have no certificate.

As regards those who have distinguished themselves by their zeal, devotedness and ability in teaching, I have to mention the Misses Aurore Dionne, Anne Marie Dionne, Valérie Routhier, Marie Louise Béland, Philomène Pélisson, Joséphine Delisle, Robélia Beaudet and Elodie Pâquet, who teach their schools very successfully. The following are also very good teachers: the Misses Marie Antoinette Laflamme, Cédulie Turcotte, Alice Delisle, Delphine Delisle, Célina Gingras, Mary Loughran, Annie Byrne and Virginie Béland.

The schools may be classified as follows, with reference to their order of merit: 7 are excellent, 2 very good, 25 good, 48 satisfactory, 13 passable, 3 middling and 3 useless. Although the result leaves somewhat to be desired, still I must say that it is very encouraging and that there has been progress in general. The teachers display more zeal and energy than in the past The school authorities and rate-payers are also more willing and there is a better feeling between them. If this continues to any extent, we will meet with still greater success in the future. Education, which yearly meets with fewer obstacles, seems daily to assume a wider sphere and it is evident that it has received a powerful impetus.

I would like to observe that you are not a stranger to the intellectual movement which has made itself felt throughout the Province since fifteen yeers. In unison with all who take an interest in Education, you have, by your wise counsels, your powerful encouragement and self-sacrifice, greatly contributed to the development of science in this country. It is therefore with the greatest pleasure that I take this opportunity to give you the tribute of praise which you deserve.

Before concluding, I beg to state that the various municipalities of my district are, as regards classification by order of merit, in the same order as last year.

Hoping that these explanations will suffice to give you a general idea of public instruction in my district,

I have the honour, etc.,

P. A. Roy.

School Inspector.

Digitized by Google

Mr. P. J. RUEL.

(*Translation.*)

ST. CHARLES DE BELLECHASSE, 25th July 1890.

Sir,

I have the honour to submit my annual report for the year 1889-90.

My district, which comprises the Roman Catholic schools of the counties of Shefford, Missisquoi, Brome and Stanstead, and part of the county of Bagot, contains 50 municipalities of which 22 are under the control of Roman Catholic commissioners, 9 under Protestant trustees, and 19 under Roman Catholic trustees.

This year, there were 199 schools in operation, 181 being elementary schools under control, 7 model schools under control, 6 independent model schools, 3 independent academies and 2 independent elementary schools.

There were 34 male teachers, 28 being in religious orders, 4 lay teachers with and 2 without certificates, there were 267 female teachers, 88 being nuns, 139 lay teachers with and 40 without certificates.

The number of pupils attending the schools was 7,739, 3,885 boys and 3,854 girls, being an increase of 99 over last year. 97 of the above were Protestants.

The 181 elementary schools may be classified as follows : 14 are very good, 82 good, 53 fair, 26 middling and 6 useless.

I regret to say that the results of the three last named classes are in a great measure, due to the fact that I cannot pay two visits to the schools in my district ; the extent of my territory, which is one of largest, the large number of schools under my direction, the heavy expenses entailed by even a simple visit, and the small salary I receive, prevent me from making the two inspections which would assuredly greatly contribute towards the progress of education in this part of the Province.

Let us hope that, before long, you will be in a position to effect those changes which are desired by all who take an interest in education, by redistributing the districts and allotting, in a more equal manner, the work devolving on each inspector.

Amongst my model schools, I regret to say that the boy's school, at Acton Vale, had no model course this year, the pupils being too young or not sufficiently advanced.

The boy's school, at Coaticooke, has not been as successful as in the past. The departure of Mr. Porcheron, during the school year, did it a great deal of harm, but this will not last long, for the *Frères du Sacré-Cœur* whose chief establishment is at Arthabaska, are to take possession, on the

Digitized by Google

1st November, of a splendid school house now in course of construction, and the contract for which was given out for $8,775.

Granby was unable to finish its college this year. It will be under the management of the Marist Brothers, who give great satisfaction wherever they teach, and I have to congratulate all the towns and villages which are fortunate enough to secure them.

The school in the village of St. Damien de Bedford, under the Sisters of St. Joseph, is really a model school, and I hope that, in future, it will be classed and treated as such. These good Sisters display zeal, ability and self-sacrifice, which cannot be too highly praised.

While on the subject of zeal in the cause of education, I may say the same of the Sisters of *La Présentation de Marie*, at Farnham, Coaticook, Granby, Roxton Falls and Acton Vale, of the Ursulines at Stanstead Plain, the nuns of *Jésus-Marie*, at Waterloo, and the Marianite Sisters of Magog.

The commercial academy at Farnham which is called the "College of Ste-Croix de Farnham," is now under the direction of Reverend Father Renaud. This institution has again become very flourishing, and I do not think I exagerate when I say that a pupil leaving this school after going through the commercial course, would be quite at home in any bank, monetary or business institution, whatsoever in Quebec or Montreal. All transactions are made in the commercial language *par excellence*, that is in English.

I had much pleasure in distributing, in the various institutions under my control, the regulations and copies of the course of study which you sent me; this is an improvement which I asked for in my last year's report, and this improvement has been highly appreciated by the school authorities. I have to thank in a special manner several parish priests who read them out and explained them in their churches; this is an additional proof of the interest they take in education I have also to congratulate several school municipalities, especially those of St. Théodore d'Acton, South-Ely and Ste. Anne de Stukeley, which have had the regulations and course of study framed, the better to preserve them.

To give you a better idea of the state of education and the progress it has made in my district, I take the liberty of submitting the following comparative table:

	1888–89	1889–90
Total pupils	7,640	7,739
Pupils in Spelling	2,596	2,617
" Reading fluently	2,830	2,755
" " well	2,214	2,367
" Writing	5,145	5,500
" learning Arithmetic	4,979	5,196
" " Grammar	2,916	2,917

Digitized by Google

Pupils	learning	Geography	1,630	1,792
"	"	Map-making	263	281
"	"	Drawing	2,217	2,750
"	"	Book-keeping	1,634	1,562
"	"	Sacred History	2,122	2,253
"	"	History of Canada	1,226	1,175
"	"	Agriculture	651	875
"	"	Hygiene	7	228
"	"	Object Lessons	2,118	1,971
English speaking pupils learning French			284	243
French " " " English			1,583	1,751

The elementary schools which have done very well, deserve special mention. They are the schools taught by the Misses Aurélie Tétrault, at St. Théodore d'Acton; Marie-Anne Brouillet, at Roxton; Eugénie Peltier, at Shefford; Euphrasie Allaire, at Lawrenceville; Mina L'Heureux, at Frelighsburg (St. Armand West); Adélaïde Côté and Florence Duquette, at Notre-Dame des Anges; Rachel Perrin and Alice Giroux, at St. Damien de Bedford; Zoe Proulx, at Adamsville (East Farnham); Mrs. Vincelette, at St. Andrew d'Acton, and Mrs. Odile Miron, at the village of Ste. Pudentienne.

Several other teachers would deserve honorable mention, but, owing to circumstances beyond their control, their schools were not classed as very good.

As there is no perceptible change in the order of merit which I gave in my last year's report, with respect to the school municipalities of my district, I will not give any classification this year, in accordance with paragraph 14 of article 13, of the school regulations; I refer you to my previous report.

I notice with pleasure, that the excellent Code of Public Instruction published by Mr. de Cazes, the worthy secretary of your Department, after having been distributed to all the commissioners and trustees, will be sent to all the parish priests in the Province, who are the true promoters of Education in their respective parishes, for without them, we would see a great many schools in my district closed the very next day. They should therefore have this valuable guide, which is so precise, so well drafted and so easy to consult, for the better performance of their mission.

I have the honour, etc.,

P. J. Ruel.

School Inspector.

Mr. J. E. SAVARD.

(*Translation.*)

CHICOUTIMI, 31st July, 1890.

Sir,

I have the honour to submit my annual report on the state of Public Instruction in the counties of Chicoutimi, and Lake St. John, for the year 1889-90.

My district, which becomes more extensive every year, owing to the rapid development of colonization, now comprises 27 school municipalities, 110 elementary schools, 9 model schools, 1 independent school (the Indian school) 2 girls' academies and a classical college. Total institutions of all kinds : 123.

3,983 pupils attend the elementary schools under control, with an average attendance of 3,134 ; 80, attended the Indian school, at Roberval, with an average attendance of 36 ; 634 attended the model schools, with an average attendance of 528 ; 248 attended the girls' academies or convents, and 115 attended the classical college of Chicoutimi. Total pupils : 5,060, against 4,927 last year ; increase : 133.

To show you that my district has, as many others, done a great deal as regards progress for many years, I submit a comparative table between the first year that I acted as inspector, and this year :

	1874-75	1889-90	Increase
Municipalities	16	27	11
Elementary schools	54	111	57
Model schools	4	9	5
Number of pupils	2,498	5,060	2,562
Average attendance	1,605	4,061	2,456
Pupils who read well	1,434	3,591	2,157
" writing	1,064	4,986	3,922
" studying Arithmetic	890	4,943	4,053
" " Mental Arithmetic	303	4,943	4,640
" " Book keeping	37	1,250	1,213
" " English	64	374	310
" " French Grammar	686	1,880	1,194
" " History	647	2,930	2,283
" " Mensuration	11	82	71
" " Linear Drawing	.....	4,236	4,236
" " Object lessons	.....	4,540	4,540
" " Letter writing	49	1,159	1,110
" " Agriculture	161	2,233	2,072

Digitized by Google

In addition to the great increase in the number of those studying the principal branches of the course of study ordered by the Council of Public Instruction, I have to call your attention to the fact that teaching is now much more rational and practical.

Out of the 120 elementary and model schools, 15 are classed as very good, 85 good, 12 fair and 8 middling.

I may also say that there has been a great improvement in the school houses and furniture, and the commissioners generally endeavor to comply with the instructions of the Department of Public Instruction.

The secretary-treasurers perform their duties faithfully, with the exception of two or three whom I have mentioned in my inspection bulletins. Two of these resigned during my inspection. The accounts are kept, nearly every where, according to the official method, except in the cases mentioned in my inspection bulletins.

I consider that the office of secretary-treasurer is a very important one; he is the legal and confidential adviser of the school commissioners, and the observance of the law in a school municipality frequently depends upon his ability.

The accounts are audited every year by one or two auditors in each parish, in accordance with a form which shows, at a glance, the detailed statement of the receipts and expenses of the municipality, and which gives the exact financial position of each school corporation.

The girls' academy, at Chicoutimi, continues to do very good work. I cannot too highly praise the Sisters of the Good Shepherd who manage this institution. They display great zeal and ability in the education of their pupils who are a source of gratification to their families and a benefit to society. Last March five of their pupils obtained model school certificates

The school commissioners of Chicoutimi have handed over one of their elementary schools to a Sister of the Good Shepherd, and the result has been satisfactory.

The minor seminary of Chicoutimi has the honour of being under the immediate supervison of Monseigneur Bégin, who is the Superior of the institution, and this fact alone is a sufficient guarantee for its success. The director, Rev. Mr. E. Lapointe and the professors are very zealous in the performance of their duties. This summer, a spacious wing has been built which will give every comfort to the professors and pupils whose number increases yearly. I am satisfied that this addition to the college building will be of great benefit to the institution and to its teaching.

The flourishing academy of Lake St. John is fully equal to everything that could be expected from the Ursulines as teachers, and has produced a most favorable impression upon those who are interested in education and who admire the successful manner in which those nuns teach their pupils. This year, 133 pupils attended the institution.

Digitized by Google

In my district, there is but one male and 118 female lay teachers, besides the nuns who teach in one of the schools in the town of Chicoutimi, and in two girls' academies and the professors in the Chicoutimi college. Out of the above number, there are 31 female lay teachers who taught without certificates, as the school commissioners could not get others.

The average salary of female lay teachers, in the mixed model schools, and in the Roberval model school, including the advantages connected with their position, such as lodgings, fuel, etc., has increased a little this year. Last year it was $200.75 for the mixed school, this year it is $208.50.

The male teacher, at Roberval, received $250.00 last year; this year he received $275.00.

The teachers of the elementary schools, in the country, received last year an average of $105.47, and in the town of Chicoutimi $175.00, including the advantages connected with their position. This year, they receive, in the town, $183.75, and in the country, $107.33.

During my inspection this year, I distributed the copies of the course of study and posted up one in each school. With this course of study, the time table, the notes on the art of teaching and the other regulations which have for a long time been in force in my district I am convinced that the best of results will follow.

I have recommended the adoption of the new register, published by Mr. J. A. Langlais, and which contains nearly all the regulations of the Roman-Catholic Committee of the Council of Public Instruction, respecting teachers and pupils. This register is destined to be of great use to both teachers and pupils.

I would like to see the *Journal de l'Instruction Publique* or *L'Enseignement primaire* in the hands of every teacher, but, unfortunately, a good many refuse to subscribe, owing to the fact that the small salary they receive prevents them from subscribing to one of these excellent journals. Each school board should subscribe to one of them for each of its schools.

On the whole, there has been progress in Reading, Writing, Arithmetic, Grammar, History, etc., as in past years, although, in my district as in others, we have had the same obstacles to overcome such as: apathy on the part of the parents, irregular attendance on the part of the pupils, the fact that many farmers have to keep their children at home to help them in field work.

In accordance with article 14 of the new regulations of the Roman Catholic Committee of the Council of Public Instruction, I will now give you the classification of the municipalities in my district with reference to the following matters :

Digitized by Google

1st. Condition of school-houses, etc.;
2nd. Condition of school furniture;
3rd. Use of course of study;
4th. Use of authorized text-books;
5th. Salaries of teachers and method of payment.

VERY GOOD.

Town and parish of Chicoutimi, St. Fulgence, Hébertville and St. Prime.

GOOD.

Anse St. Jean, St Alphonse, Bagotville, Jonquières, Laterrière, Ste. Anne, Bourget, St. Félicien, St. Bruno, Alma, Normandin, St. François de Sales, St. Louis de Metabetchouan, Roberval.

MIDDLING.

Ouiatchouan, St. Cyriac, St. Cœur de Marie, St. Jérôme, St. Alexis de la Grande Baie, St. Charles Borromée, St. Méthode and St. Gédéon de Grandmont.

I cannot conclude this report without recommending, in a very special manner, the mission of St. Cœur de Marie, a new and poor municipality, which will apply to you for a special grant to build a school house.

I hope that these remarks, with my inspection bulletins, will give you sufficient information as to the condition of education in my extensive district.

I have the honour, etc.,

J. E. SAVARD,

School Inspector.

Mr. M. T. STENSON.

(*Translation*)

WOTTON, 30th AUGUST 1890.

Sir,

The work I had to get through to contribute my share towards the labours of the convention of school inspectors, and the time required for attendance at the convention, have delayed for some days the sending in of my annual report to accompany the statistical tables.

Digitized by Google

This table contains, as usual, all the statistics of the common schools and educational institutions in my district.

I must however admit that, in preparing this grand table, I had to take the statistics of last year for a certain number of schools and municipalities which I was unable to visit this year, owing to persistent attacks of influenza or *grippe*, between the 13th of January and the middle of March, during which period I made three different attemps to inspect school, but, on each occasion, I was obliged to retrace my steps and endeavour to shake off the disease, which I, thought I had got over after the first nine days.

The attendance at the schools which I inspected was greatly affected by the existence of this epidemic, but I am happy to be able to say that the consequences have not been so disastrous as was at first feared, and but few cases were fatal. This spring, nearly all the children were back at school as usual. Ordinary progress continues to be made in teaching, but until we have lectures on professional training for teachers, there will always be something wanting. The want of professional knowledge makes itself felt especially in the teaching of Agriculture, Drawing and Object lessons. The teaching of these subjects depends entirely on the teacher, for the text book has but little to do with it. This is so much the case that one seldom finds a school in which these subjects are taught with any success, except those under teachers who have graduated at the model school or who have taken advantage of the lessons given them by the inspector at a previous visit. And yet these subjects are of great importance and require but little effort on the part of the pupils for they are a recreation rather than labour for the mind when the lessons are given with ability and taste. The time to be devoted to these subjects does not encroach upon the time to be employed on dryer subjects.

As I was unable to visit all the schools in my district, I cannot classify them as required by article 14 of the regulations of the Roman Catholic Committee of the Council of Public Instruction. This year, however, I hope will be the last in which I will find myself unable to comply with the by-lawswhich lay down the duties we have to perform, for I have every reason to believe that there will be a redistribution of districts, which will put me on an equal footing with the majority of my fellow inspectors and leave me a district which it will be practicable to inspect, instead of the vast territory which it now comprises. The number of schools in this district is far too great for one inspector, but the most important fact to be considered is that the population is mixed, and, owing to the complete separation of Roman Catholic and Protestant schools for inspection purposes, I am obliged to go over at least twice the extent of ground required to visit an equal number of schools in a section of the country where the population is entirely Roman Catholic.

The resolution already adopted by the Roman Catholic Committee of Public Instruction, as well as those passed unanimously at the Inspector's

Digitized by Google

Convention, lead me to believe that before long, there will be an improvement as regards the limits of districts.

Allow me to congratulate you on your success in getting the Inspectors' Convention this year.

The fact that the Government granted you the necessary funds for the convention, seems to me to be a sufficient evidence of its intention to benefit by its labours and suggestions and to make use of them.

Circumstances did not allow the inspectors to derive every possible benefit from the convention, for they had not time enough to become familiar with each other by means of friendly conversations outside of the regular meetings.

At the next convention, I hope we will have time to become personally acquainted and, in intimate conversations, learn from each other's experience details which cannot be entered into at the regular meetings.

The point which I consider the most important to obtain at the present to secure more rapid and sure progress in our common schools, is the professional training of teachers who have not graduated from the Normal schools. I have dealt with this subject in my reports for ten years, and I was delighted to see the unanimity with which my colleagues adopted my views as set forth in the paper I had the honour of submitting to the convention.

I am also happy to learn that several inspectors approved of the idea to employing the money intended for the purchase of prize books to be distributed by the inspectors in paying the expenses of the courses of training. By devoting that amount to this purpose, the organization of the training would not necessitate a new grant to the Department of Public Instruction, and I am convinced that an experience of a couple of years would suffice to show positively the usefulness of professional training.

I hope now more than ever, that this course of professional training will be established, and I am convinced that we will then find that rapid progress is made in our common schools. The results obtained by our Protestant colleagues in this connection, during the past six years, remove every doubt as to the efficacity of such a course.

In conclusion, I would like to say that the perfect harmony which reigned during the session of the inspectors', convention between the two bodies, Roman-Catholic and Protestant, proves that the spirit of intolerance and fanaticism has not penetrated the educated classes of this province..

Let us spread education amongst the people and improve our system of teaching, such seems to be the pass-word of the officers of Primary Instruction without distinction of race or creed.

This convention has further shown that the use of both languages,

Digitized by Google

French and English, presents no disadvantages, in the Province of Quebec at least.

This is a happy augury for the future and leads us to hope that as popular instruction progress, prejudices will disappear and public prosperity will be soon assured.

I have the honour, etc.,

M. T. STENSON,

School Inspector.

Mr. A. TANGUAY.

(*Translation.*)

ROXTON FALLS, 30th July 1890.

Sir,

I have the honour to submit my third annual report respecting the schools of my district of inspection for the year ended on the thirtieth of June last.

The district of inspection entrusted with me comprises: eighteen school municipalities in the county of Beauce, four in Megantic, two in Lotbinière and one the new municipality of St. Prosper de Watford, in the county of Dorchester, forming a total of twenty-five, including altogether 195 elementary schools under control, 5 model schools under control, 3 independent subsidized schools, two of which are presided over by lay teachers, four academies, three of which are managed by nuns and one independent school not subsidized.

These various institutions are attended by 7,271 pupils with an average attendance of 5,125.

On comparing my statistics of last year with those of the present year, I find that there is an increase of 818 in the number attending school, and 416 in the daily attendance. If, from this increase, I deduct the 205 pupils who have attended the schools in St. Zacharie and St. Prosper de Watford, schools which were not in operation last year, I find an increase of 613 pupils attending schools, an increase which is in great part due to the fact that sixteen new elementary schools were put into operation during the school year of 1889-90.

Digitized by Google

I noticed, with much pleasure, that in several municipalities efforts have been made to comply with the regulations of the Roman Catholic Committee of the Council of Public Instruction, respecting school houses and their furniture. Yet, on visiting many of these municipalities, one becomes convinced that it is impossible for them to comply entirely with the provisions of the law, on account of their poverty.

In general, I can state that there is progress, that they have every where given proofs of their good will, that my remarks are taken in good part and that they try to put them into practice.

I found that the commissionners of certain municipalities seldom visit the schools under their control. They should be obliged to do so, and the necessary steps taken to force them to fulfil their duties. It sometimes happens that when the parish priest cannot examine the pupils, the teachers are obliged to close their school without the interested parties being able to establish the progress made.

I have much pleasure in remarking that the secretary-treasurers' accounts are kept more regularly than in the past and that they endeavour to follow the method proposed by the department.

I will not speak to you about the academies managed by the Christian Brothers, the Sisters of Charity, the Sisters of the Good Shepherd and the Congregation Notre-Dame, because all these teachers of religious orders rival in their zeal for the great and noble cause of education, and the ever increasing encouragement which they receive from surrounding municipalities proves in what high esteem they are held.

The village of St. Joseph still possesses an independent school, taught by Mr. Tremblay. The pupils educated in this establishment generally find good places. The teacher merits the patronage he receives.

Mr. Morin, who managed the independent school of St. François has left off teaching to join a religious order. He has been replaced by Mr. Laflamme who, although only beginning his career as a teacher, seems to me to possess all the ability necessary to be successful.

These few words on the general result of the year, I believe, will suffice to give a correct idea of the working of the law in the vast inspectoral district with which I have been entrusted. The bulletins which the inspector is obliged to forward to you on visiting the schools have supplied you with much information which would be of little interest in this report.

I conclude, Sir, by giving you the names of the female teachers who have distinguished themselves during the year 1889-90: the Misses Georgiana Poulin, Henriette Bergeron and Georgiana Poulin, in St. Georges; Perpétue Lessard and Albertine Létourneau, in St. Joseph; Henriette Breton, Léda Labbé, Mélanie Demers and Marie Boivin, in Ste. Marie; Vitaline Lessard, Léda Simard and Perpétue Poirier, in St. Frédéric; Marie Grondin,

Digitized by Google

in St. Victor de Tring; Mrs. Pierre Bisson and Miss Eugénie Vaillancourt, in St. Sylvestre ; Mrs. Joseph Turcotte and the Misses Rosalda Doyle, Annie Tuite, Joséphine Rousseau and Georgiana Turcotte, in St. Pierre de Broughton; Délima Bélanger, in St-Côme de Kénébec; Célina Talbot, Amanda Dodier, Délima Gosselin and Hermine Cloutier, in Sacré-Cœur de Jésus ; Ernestine Maillet, in St. Sévérin ; Euphémie and Apolline Veilleux, in St. François ; Emérilda Tanguay and Adélina Bégin, in St. Honoré de Shenley ; Denise Veilleux and Marie Giguère, in St. Ephrem; Florida Bussière and Joséphine Hallé, in St. Martin; Virginie Roy and Mrs. Papin, in St. Méthot d'Adstock.

I have the honour, etc.

A. TANGUAY.

School Inspector.

REV. Mr. TAYLOR.

COWANSVILLE, P. Q., July 30th 1890.

Sir,

Having completed my first year's work as Inspector for the Counties of Brome and Missisquoi, I beg leave herewith to submit my statistical report and the following statements.

I find on comparing the present state of affairs with the last report of my esteemed predecessor, the late Mr. McLaughlin, that I have five more municipalities than existed at the time of his last report.

These are Eastman, Mansonville, Sweetsburgh, Stanbridge-East and Knowlton, which makes the present number 25.

I have visited the schools of every municipality, and each individual school twice during the year, in all cases where the schools have regularly been in session during the year..

I have succeeded in visiting each school which has been in operation during the year, with the exception of four, which were held only for a small portion of the year and were not in operation at the time of my visits.

In some cases, I have made three tours of inspection through some extended municipalities in order, if possible, to see every school.

I have reported the statistics of *no* school that I have not been able to report upon by actual inspection.

Digitized by Google

There are, in my district of inspection, 181 school buildings, 28 of which have been vacant during the year.

There have been, of elementary schools, 141 in session, model schools, 7 and academies, 5 making a total of 153.

I am informed that several of the school buildings which have been closed during the past will be occupied in the coming year.

For some of these, teachers are even now engaged. Hence, I expect next year to report a larger number of schools in session. In the elementary schools, I have found 2970 pupils, in the model schools, 491. In the academies, 555, making a total of 4016 pupils in the schools of the two counties.

There are only seven teachers without diplomas, and several of these expect to present themselves next year for examination.

There are 156 female teachers including those who are teaching in the higher schools, and three male teachers in the elementary and ten in the higher schools, making a total of 169 teachers.

For the most part, these are doing very faithful work, and at my second visit, I was gratified with the evident progress made in the majority of the schools.

The Teacher's Institute, which was held in Cowansville, in July, was largely attended by the teachers of the district of Bedford, notwithstanding the fact that a new departure was inaugurated this year, which seems to have given, in the result, very general satisfaction, namely the introduction of the independent instead of the billeting system hitherto in vogue.

This was done by the hotels giving cheap rates to the members of the Institutes.

The Lecturers were listened to with marked attention throughout the sessions and it is hoped much good will result from the stimulus the teachers received at this Normal Institute.

In my association with the commissioners and secretary-treasurers, as well as the teachers, I have been much gratified with the evident desire to cooperate in any movement for the advancement of education.

For particulars in relation to the municipalities and the individual schools, I would refer to the bulletins which have been regularly transmitted to the department and also to the statistical tables.

Below. I give a classification of the municipalities, based upon the following points:

1. The length and arrangement of the school year;
2. The condition of the school houses and grounds;
3. The supply of appliances, blackboards, maps, etc;

Digitized by Google

4. The use of the course of study;
5. The use of a uniform series of authorized text books;
6. The salaries of teachers and method of payment.

EXCELLENT.

Knowlton, Cowansville, Sutton village, and town of Farnham.

GOOD.

Mansonville, Sutton, Brome, Dunham Village, East Farnham, Dunham, Sweetsburg, Philipsburg and Clarenceville.

MIDDLING.

St. Damien, dissentient, St. Ignace, West Bolton, West Farnham, dissentient, Potton, St. Thomas, East Bolton, Notre-Dame des Anges, diss., and St. Sebastien de Missisquoi, dissentient.

New academy buildings have been erected in Bedford and Mansonville; and one new elementary school house in each of the following: Stanbridge-East, Dunham and Philipsburgh, and each is a vast improvement on the preceding buildings in those localities.

I have the honor to be Sir, &c.,

ERNEST M. TAYLOR,

School Inspector.

MR. A. TÉTREAULT.

(*Translation*).

LOUISEVILLE, 20th September 1890.

Sir,

I have the honour to submit my report for the year ending the first of July last.

The twenty-two municipalities of my district comprise one hundred and thirty-three schools of all grades, attended by 6,852 pupils, with an average attendance of sixty-eight per cent, for the schools under control, and ninety per cent for the superior independent schools. This, a slight decrease compared with last year, as well in the number of pupils as for attendance at school, is due, I believe, to the epidemic which raged during all last winter.

Digitized by Google

Out of this number of pupils, 4,395 attend the elementary schools, 1,492, the model schools and academies under control, and 965, the independent superior schools, or a total of 2,457 pupils who attend superior schools.

The independent superior establishments, all managed by religious orders or members of the clergy, continue to do good work.

The model schools and academies under control have all the same teachers, and I can only repeat all the good I have said of these schools in my preceding reports. If, in some of these model schools, the pupils of the superior course are not numerous enough, this depends upon circumstances over which the teachers have no control and does not in any way affect the value of these schools; a school is a model one, from my point of view, not so much on account of the number of subjects taught as the quality of the teaching.

With respect to the elementary schools, a large number have as usual changed teachers, with more or less success; the change has been beneficial to some, fatal to others. These changes, which are so frequent in our schools, are always disadvantageous to the children, even when the new teacher is not inferior to the one he replaces.

Several of the best female teachers in my district have abandoned their situations to seek employment in the French schools of the Province of Ontario and in the New England States. Had our commissioners been a little more liberal, these highly competent teachers would have remained with us, but to economize an insignificant amount, they preferred to have them replaced by persons of doubtful ability.

I found fourteen persons without certificates, in charge of schools; some of these schools were important ones. It is always the same municipalities who thus ignore their own interests. The municipality of St. Barnabé undoubtedly wishes to head the list in this respect; because, as was the case last year, notwithstanding your reproofs and my protestations, I found five schools out of seven in the municipality, taught by young girls without certificates, well enough educated, I believe, but all too young to manage children, especially boys.

Several of these female teachers without certificates were engaged in virtue of an authorization obtained from the Superintendent under false pretences, as but too often happens. It seems to me to be only right that the reasons for which such authorizations are asked, should be approved by the inspector before being submitted to the Superintendent; the good faith of that Honrable officer would not then be so frequently abused.

A great number of the primary schools of my district are progressing, slowly it is true in some cases, but all are progressing surely. There are very few schools indeed in which the children do not learn enough Reading, Writing and Arithmetic to transact the small amount of business which they will have to do. All the subjects of the course of study,

Digitized by Google

excepting Arithmetic and Agriculture are taught in a satisfactory manner in most of the schools, the two exceptions are neglected.

Little progress has been made in Drawing because the teachers are not masters of the subject and also because in no school have the pupils the necessary requisites. I earnestly entreated several of the boards of commissioners to supply their pupils with the necessary copy-books and models for Drawing, but with but little success.

As to Geography, the want of good maps is badly felt; the maps printed by the Department were distributed a long time ago. Certain French maps can be had which some people may consider excellent, but in my opinion there are too many names inscribed on them for young children.

The school houses have all been well kept, and a certain number of them have been considerably repaired. The schools, as a general rule, have been well supplied with school appliances; although there is still much to do in this respect.

I noticed that several municipalities are again in arrears in the collection of heir taxes; some of them to the extent of from four to five hundred dollars and even more. This abuse could easily be put an end to; it would suffice to retain the grant of the end of the year until all the taxes were paid into the Secretary-Treasurer. All would benefit by this system and the tax-payers the first, because it is doing the latter no good turn to permit their taxes to accumulate to such an extent that the lawyer has to be called upon to make them pay.

The secretary-treasurers' books are well kept, with one exception. I am obliged to audit his books on account of certain irregularities which seem to me to have been committed.

Notwithstanding the arrears of taxes in several municipalities, the teachers are generally well paid; I have heard of no complaints on this point. Loans were made to fill up any deficiency created by the taxes which have not been collected.

All the school masters, excepting one or two. have done their duty as well as their ability would permit. The work performed by a great many of these teachers would be worth three times the amount they receive. There are many reforms to be introduced, but the most pressing of all, in my opinion, is to increase the salaries of school teachers. All the efforts that are being put forth to render our schools more efficient will produce no good effect if at the same time the position of the teaching body is not improved.

I made only one visit to the schools in my district, on account of sickness contracted in the beginning of the winter, which will not permit me to undertake with justice the classification of the various municipalities according to their merit.

I have the honor to be, etc.

A. TÉTRAULT,
School Inspector.

Digitized by Google

MR. W. THOMPSON.

KINNEAR'S MILLS, 30th July 1890.

Sir,

I have the honour to submit my annual report for the year ending June 30th, 1890. My statistical table was mailed to your address last week.

This report shows that there are in my district of inspection twenty-six municipalities of which twenty are under the control of Protestant school commissioners, four under the control of Protestant trustees and two under the control of Roman-Catholic commissioners. Six of these are village municipalities, viz : Coaticook, Waterville, Beebe-Plain, Stanstead-Plain, Dixville, and Lake Megantic. Sixteen municipalities are in the county of Compton, eight in the county of Stanstead, and two in the county of Wolfe. Those having the largest number of schools are Stanstead, Barnston and Compton.

The total number of schools in operation in my Inspectorate, this year, was one hundred and ninety-four, an increase of three over the previous year. The number of pupils attending was four thousand six hundred and fifty-nine, an increase of two hundred and twenty-four over last year's figures

These one hundred and ninety-four schools are classified as follows : One academy, six model schools and one hundred and eighty-seven elementary. There are also the Stanstead Wesleyan college and Compton Ladies, College, neither of which I have included in my report, as both of these institutions send returns directly to your department.

There was a slight improvement in the average attendance this year, being about seventy-nine per cent.

The Coaticook Academy which is, as usual, graded in five departments, was attended this year by two hundred and fifty pupils, with an average attendance of one hundred and sixty-eight.

There were fifty-four pupils in the academy courses, fifty-one in the model school department, and one hundred and fifty-five in the elementary.

The model schools are those of Waterville, East-Hatley, Robinson, Marbleton, Cookshire and Gould.

The largest elementary schools were kept at Beebe-Plain, Sawyerville, Barnston-Corner, Dixville and Scotstown. Two teachers were employed in each of those schools and much improvement shown in all of them.

There is not much change in the general management of the schools

Digitized by Google

since last year. In many of them, there has been marked progress during the year, while a number remain about the same.

The commissioners, as a rule, take a lively interest in the schools under their charges, and endeavor, according to the best of their ability, to carry out your instructions and those of the Protestant Committee of the Council of Public Instruction.

There has been some improvement in the manner of engaging teachers, as most of them are now engaged by the year or at least for the number of months that their schools are to be in session during the year.

Six new school houses have been completed: two in the municipality of Eaton, one in Dudswell, one in East Clifton, one in Stanstead and one in Whitton, while a number of others have been extensively repaired.

In some localities, much difficulty was experienced in obtaining qualified teachers, and consequently, quite a number of schools were taught by teachers having no diplomas

The total number of teachers engaged during the year was two hundred and six, of whom twenty-seven held no diplomas, sixteen had diplomas from Roman Catholic Boards of Examiners, twelve had diplomas from the McGill Normal School, (six model and six elementary.) The average salary for elementary female teachers was one hundred and twenty-eight dollars, and for model school female teachers, two hundred and sixteen dollars.

As full particulars regarding each school were contained in the bulletins of inspection which have been forwarded, it seems unnecessary to give any further details.

According to instructions, I will classify the municipalities in order of merit, with reference to the following points :

1. The length and arrangement of the school year.
2. The condition of school houses and grounds.
3. The supply of apparatus, blackboards, authorized school journals, &c.
4. The use of the Course of study.
5. The use of a uniform series of text books.
6. The salaries of teachers and method of payment.

EXCELLENT.

Marston	33		

I may mention that the above classification is only slightly different from last year. The municipalities of Dixville, Newport and Lingwick having been advanced one step.

Trusting that the foregoing, along with previous reports, will be sufficient to give you a fair idea of the state of education in this inspectorate,

I have the honour, etc.,

WM. THOMPSON,

School Inspector.

M. T. TREMBLAY, (*Gaspé.*)

(*Translation*).

GRANDE VALLÉE, 22nd July 1890.

Sir,

I have the honour to submit my annual report for the scholastic year 1889-90.

Since 1860, now a good many years ago, my reports and private letters have been sufficiently numerous te give you a correct idea of my district. Now, the question as to what should be done in the future, is one which any wise man, with the aid of past experience, can easily solve.

Digitized by Google

If the legislator makes the laws, education trains the morals of a nation which are more powerful than the law. The work of education is to make man as perfect as possible, and this is true progress. Great statesmen, and all men of genius, have always recognized the wisdom of educating the people.

We have to admit that the education of a great many has to be commenced over again. Therefore, it is time that we should reflect and prepare ourselves, with the assistance of education, for the great struggle with moral infirmities, which are the worst of all. Let us frankly persuade ourselves that it is only by educating the people that we can save our province and assure its future greatness.

Quite recently, you sent a circular to the school inspectors, in which you said that you relied on their practical knowledge for obtaining suggestions as to what should be done towards improving our school laws. Well, the most pressing amendment and one which our code of public instruction renders necessary is, in the first place, to double the common school fund and, in the second, to increase tenfold the fund for poor municipalities. Without pecuniary means, we cannot succeed, and our fine code will be like a well equipped ship launched in too shallow water.

The school inspectors, assembled in convention on the 19th of August next, should be unanimous in stating the absolute necessity of a considerable increase of the grant. The people's burden is already too heavy, and if we impose upon the farmer the additional burden of a direct tax for the education of his family, and, if he has none, that of another, who is perhaps in better circumstances, it will be enough to arouse a strong antipathy to our education act which, in reality, already exists.

To my mind, it is a fatal mistake to promote the material welfare of a country and overlook the improvement of the minds of the people.

In the primary schools, thousands of children, a whole generation, are preparing for the struggle of life and no other interest is of greater moment for the present and future welfare of our country.

I have the honour, etc.,

T. TREMBLAY,

School Inspector.

M. T. TREMBLAY, (*Charlevoix.*)

(*Translation.*)

BAIE ST. PAUL, 14th July 1890.

Sir,

I have the honor to submit my annual report for the scholastic year 1889-90.

My district comprises seventy elementary schools, and one academy under control, and finally two independent subsidized academies.

Out of the seventy elementary schools under control, only one is taught by a male teacher ; and of the five model schools, two are for boys and three are mixed ; the three last are taught by female teachers.

One hundred male and female teachers preside over these various schools. There are five male teachers bearers of diplomas from the Laval Normal school. Out of the ninety-five female teachers, 11 are nuns, eight have diplomas from the Laval Normal school, 60, certificates from the board of examiners, and sixteen have none at all.

These 83 establishments are attended by 3,241 pupils. The 70 elementary schools under control by 2,507; the five independent elementary schools, by 88; the 5 model schools, by 333 ; and the 3 academies, by 313.

3,241 of these pupils are in the 1st year; 824, the 2nd year; 584, the 3rd year; 443, the 4th year; 109, the 5th year; 22, the 6th year; 24, the 7th year; and 21, the 8th year.

NUMBER OF PUPILS FOLLOWING THE DIFFERENT SUBJECTS TAUGHT.

Reading: Spelling, 597, Reading fluenty, 1,153, Reading with expression, 1,491 ; Writing, 3,062 ; Arithmetic, 3,064 ; Grammar, 1,996 ; Logical analysis, 177; Narrations, 785 ; Geography, 1,599 ; Map drawing, 317 ; Drawing, 1,144 ; Object lessons. 2,888 ; Book-keeping, 946 ; Sacred History, 3,062 ; History of Canada, 1,756 ; History of England, 112; History of France, 117; Agriculture, 1,278; Chemistry, 24; Physics, 24; Mensuration, 83; Algebra, 87 : Geometry, 84 ; English, 258; Hygiene, 77; Sewing and Embroidery, 145 ; Singing, 194.

These 83 schools are classed as follows: 17, very good ; 49, good ; 13, good enough and 4 middling

The average salary of the male teachers is $105.00 and of the female teachers $62.50.

Remarkable progress has been made in several subjects of the course of study, especially in Writing, Arithmetic, Grammar, Geography, Object

Digitized by Google

lessons, Sacred History and the History of Canada, as may be easily established by comparing the statistics of the present year with the statistics of the last year.

The female teachers at the head of the elementary schools who have done well in teaching all the subjects of the course of study authorized, are: Miss Delima Martel, whose class can favorably compare with any class in the model school; Misses Osithe Rhéaume, Marie Audet and Emelie Simard, in the municipality of Eboulements; Misses Philomene Tremblay, Delima St. Hilaire, Olive Simard, Luce Boily, Elmire Allard, in Baie St. Paul; Misses Victoria Bouchard, Desanges Bouchard, in Petite Rivière; Miss Henriette Perron and Mrs. Olympe Hervey, in Isle-aux-Coudres; Misses Marie Simard and Zoé Tremblay, in St. Placide; Vitaline St. Hilaire and Zénoïde Fortin, in St. Urbain; Misses Marie Tremblay and Sophie Gauthier, in St. Hilarion; Miss Catherine Mercier and Mrs. Adiana Gauthier, in St. Irénée; Miss Emma Warren and Mrs. Victoria Tremblay, in St. Agnès; Misses Grace Bhéreur and Emelie Forgues, in Malbaie; Misses Marie Boulianne and Marie Gaudrault, in St. Fidèle; Misses Adeline Gaudin and Adèle Lavoie, in St. Siméon; Miss Marie-Louise McNichol and Mrs. Marie Fortin, in DeSalles; and Miss Marie-Eva Roy, at Pointe-au-Pic.

The five model schools are presided over by two male and three female teachers, all well qualified; they endeavour to teach all the subjects of the official course of study and ardently strive to make their pupils' progress.

The boys' academy under control is taught by Mr Arsène Tremblay who, thanks to his ability, has succeeded in having his efforts crowned with the greatest success at the examination at the end of the year.

The two academies for girls (convents) are managed by the Dames de la Congrégation and the Sisters of Charity. These nuns have succeded in maintaining their reputation; and I have nothing but praise for the good results obtained during the year.

On the whole, I am highly satisfied with the progress of the schools in my district, taking into account the age and the absence of the children. Efforts have been everywhere made to conform with the school regulations.

I must however declare that one of the greatest obstacles to the progress of the pupils and education, is the indifference of certain parents. On the slightest pretext, they keep their children at home and even refuse to supply them with the necessary school requisites. This evil paralyzes all progress in some schools.

The prizes granted by the Department, and which I had the pleasure of distributing to the pupils during the year, are always a source of great satisfaction and encouragement to the children.

The secretary-treasurers are generally exact in the performance of

Digitized by Google

their duties. They have their accounts audited and submit them to the two meetings, as required by law. However, in certain municipalities, there always remain too great an amount of taxes to be collected. I have earnestly advised the secretaries to do all in their power to collect such taxes as soon as possible.

There are several poor municipalities who cannot keep up their schools without special aid. I would especially recommend St. Placide, Callières, DeSalles, St. Hilarion, La Petite Rivière and St. Urbain. The failure of the crops for two or three years, is the principal reason for the straightened circumstances in which the most of these municipalities find themselves.

In conclusion, permit me, Sir, to express my sincere thanks for the zeal which you have shown in the desire of improving the position of School Inspector, especially those who are not sufficiently paid.

I have the honor to be, etc.,

T. TREMBLAY,

School Inspector.

Mr. G. S. VIEN.

(*Translation.*)

LAUZON, 9th August 1890.

Sir,

I have the honour to submit my report on the state of education in my district for the year 1889-90.

I cannot say that the year just ended has been a successful one, as a rule. In addition to the usual causes which hinder progress in the schools, we had, in the first place, the *grippe* which made us lose nearly two entire months, and then very bad weather which made it almost impossible for the children to get to school during the months of January and February.

In my district, there are, a classical college attended by 331 pupils; 5 academies, four of which, those of Notre Dame de Levis, St Romuald, and St. Nicolas (that of the Ladies of *Jesus Marie*, at St. Joseph de Levis, has not sent in any statistics,) are attended by 881 pupils, with an average attendance of 509; 16 model schools with 1,319 pupils, and finally, 156 elementary schools with 4,971 pupils, making a total of 7,502.

Digitized by Google

In my inspection bulletins, I mentioned the merits of each of these schools, and I consider that it is needless for me to revert to the subject.

I will however take the liberty of saying that so long as we persist in paying, and in paying badly ridiculous salaries, which are not equal to the wages of a servant in a good family ; so long as we have only hovels, which are falling to pieces from old age, for school houses; so long as the majority of the school commissioners continue to neglect the half yearly visit which they are obliged to pay to their schools to encourage both teachers and pupils by their presence ; and to supply the schools with what they require so long will we have a good many perfectly useless schools.

"The school" some one has said "is a workshop where intellects are moulded": Now what can we expect from workmen, who have not the remotest idea of the work they have to do.

And, strange to say, when teachers have to be engaged, as these incapables offer their services at reduced prices, they are given the preference without any pains being taken to ascertain whether they are competent.

I deem it my duty to call your attention to the foregoing facts. I especially insist upon the point that the grant be not given to school commissioners who have not made their half yearly inspection.

All sorts of reasons may be alleged when money has to be spent, but there is not one which can induce the belief that the inspection cannot be made when there are six months in which it can be done. It is by means of these visits that the commissioners can, to a certain extent, ascertain what progress has been made.

Moreover, even if there were only the certainty that the school would be visited twice a year, it would be sufficient to keep the teachers and pupils on their guard, and, I am convinced that this class of teachers, who are the plague of education, would disappear.

It is scarcely necessary to tell you that these teachers are found in the elementary schools and that they are fortunately but few in number; but, even if there were only ten, that would still be too much, as it is now easy to obtain excellent teachers provided a reasonable salary is paid to them.

With respect to the establishments of superior education, which I visited, I am happy to state that they have continued to give great satisfaction.

Teaching is about the same as last year.

I noticed that in some schools the work of the pupils was in inverse ratio to that of the teachers, that, is to say that the more there is exacted from the pupils with reference to memory which, very frequently, is the

Digitized by Google

only faculty which any attempt is made to develop, the less trouble do the teachers take to prepare the lessons. The consequence is that the pupil is under the painful necessity of doing a fatiguing and ungrateful task, which leads to the opinion that there is intellectual overwork. The course of study now in force does certainly not comprise too many subjects. Wherever it is properly followed, the pupils' task is an easy one.

I have not the slighest desire to do away with all learning by heart, and I would regret to see matters go from one extreme to another.

In my opinion, frequent exercises of memory are indispensable, for, without cultivation, this faculty becomes stubborn and without energy. But what seems to me to be desirable is, that it should not be imposed too heavy a task, in a subject which is neither understood nor explained. This reminds me of some teachers who told me that they intended to have their pupils pass the first part of the school year in learning the grammar and other subjects by heart, reserving their explanations for the second part of the year. Such a programme at once shows what we are to think of its author.

Let us now compare this method of teaching with that advocated by authorities on the subject.

" Every lesson in Grammar comprises: 1. The reciting of the rule or of the principle which has been explained by the master *during the preceding* class; 2. the correcting of the exercise given at such class; 3. the explaining of the following lesson; 4. putting questions by which the master ascertains whether his explanations are understood; 5 the giving of the exercise or dictation to which the rules are to be applied.

" The exercises should always be corrected on the blackboard." This is but seldom done.

" The object of teaching " says Mr. Gréard, "is in the first place undoubtely to instil into the mind of the child a certain amount of positive knowledge; but also at the same time to form and develop his good sense and moral sense; the former by exercising his reason, the latter by cultivating all honest sentiments and high instincts of which God has planted the seed in his heart."

These words are, in my opinion, an entire programme, and I am convinced that if they were put into practice, the progress we would make would astonish everybody. Each faculty would be developed according to its importance, and by preserving the proper medium we would obtain the best possible results. To do this requires knowledge, tact and careful preparation.

I cannot avoid mentioning another subject which is greatly neglected, and that is Composition.

In a great many cases none is attempted, or all that is done is to repeat

Digitized by Google

every year, a short letter, always the same, on the occasion of the New-Year. I think that this process will never yield any but very inferior results.

The pupils are not taught to think, to produce ideas and to connect them together; the expressions are wanting or are not suitable and often mean exactly the opposite of what it is sought to express. The object of Composition has been stated to be to exercise the children in wording orthography and writing, consequently, a subject should be selected which is simple and familiar to all, for the intention is not so much to instruct them as to teach them how to express what they already know.

It is therefore highly important that the pupils be accustomed to write compositions. There is no lack of subjects, and not to enter into too many details I may mention only the book on Object lessons, by M. J.-B. Cloutier, in which an intelligent teacher will find everything she requires for the teaching of that subject.

My bulletins have informed you that, in several municipalities, the school furniture is very incomplete, that the pupils have not the necessary books, that the school houses, especially at St. Henri de Lauzon, are in a deplorable state; consequently I need not return to the subject in this report.

I have pointed out the evil to you, and I hope there will be a reform before long. I will certainly be the happiest of all if I can see all these careless municipalities, in a moment of happy inspiration, issue from the state of guilty torpor in which they have hitherto seemed pleased to remain.

The above is what I have thought proper to tell you about my district. If I have had to speak of disagreable things, it is not because I consider my district inferior to others. In reading over the reports of my colleagues, I see that complaints are made almost everywhere, and on a variety of subjects. The hope that in the end, the desirable reforms will be effected has induced me to point out what was defective.

I have the honor, etc.,

G.-S. VIEN,

School Inspector.

APPENDIX No. II.

REPORTS ON THE NORMAL SCHOOLS.

Digitized by Google

Digitized by Google

JACQUES-CARTIER NORMAL SCHOOL.

(*Translation*)

MONTREAL, September 1890.

Sir,

I have the honour to submit my report on the Jacques-Cartier Normal school for the year 1889-90.

I

Eighty-four pupils were admitted during the year.

They were classed as follows :

Old pupils	34	Boarders	71
New pupils	50	Half-boarders	2
		Day pupils	11
Total	84	Total	84

Admitted to the Academy class	7
" " " model school class	12
" " " elementary school class	21
" " " preparatory class	44
Total	84

6 pupils left school in the first half year.
8 " " " second "

Total : 14

The model school classes were attended by 115 pupils, seven of whom were boarders.

The total number of pupils of the Jacques-Cartier Normal school therefore amounts to 199.

II

I can only repeat here what I have said in previous reports, of the zeal of the professors, the application and work of the pupils. Mr. Fahey, the English Professor, was unfortunately prevented by illness from teaching for several months, and I had to replace him.

We could not conclude our labours by the ordinary exercises, as the repairs which the government has had made to the school, compelled us to send away the pupils before the specified time and unexpectedly. This

Digitized by Google

solemnity is only postponed and I have reason to believe that it will take place at the re-opening of the classes in the Fall.

I will then present you :

6 pupils for the Academy diploma,
6 " " Model school diploma,
12 " " Elementary school diploma.

Total 24, which represents about one third of the pupils admitted.

III.

Some of the pupils who are completing their course, have already found good situations as teachers ; the tendency to reduce the salary of capable teachers, which I pointed out in one of my reports, seems to have ceased as a rule.

The nécessity of building school houses on a plan which makes them suitable for their purpose is understood ; if we add suitable furniture as is the case in several municipalities, it may be affirmed that we are making rapid progress in the path inaugurated by your predecessors. You, yourself, Sir, have worked as hard as any one and in spite of many difficulties.

I am convinced that I but echo the opinion of those who have followed the educational movement in our Province during the past quarter of a century.

It may perhaps be said that this progress is in the material order. This, is true but it is an indication of the progress which we have accomplished in the intellectual order, and I would add that it powerfully assists other progress in teaching.

But there is intellectual progress which we can indicate. I will merely mention what has been done as regards the teaching of the French language. I can speak of it with some experience. During forty years, I have had an opportunity of finding the weak point of this teaching and the improvements which have been effected, especially of late years. Zealous efforts are everywhere made in this respect and it is quite right. It would be rather strange to think that the French language, which is at the same time the most difficult and the most flexible, can be learned without special study, by applying oneself, to other languages, or that the course of Literature can replace Grammar.

I do not however wish to pose as an absolute panegyrist. I state that progress has been made, but I am far from believing that it is impossible to obtain still better results without extending the duration of the studies.

As regards Arithmetic, in general, we must admit that progress is slow, too slow perhaps. There seems to be a repugnance for sciences con-

Digitized by Google

nected with Mathematics. Perhaps it is not the more advanced rules of Arithmetic that are neglected ; they offer an attraction to the intellect ; it is the elementary and fundamental part. One would blush, after some years of study, to be obliged to have recourse to the dictionary to find the orthography of words generally used, and we are not ashamed, so natural and usual does it seem, to go several times over a simple addition in order to make sure that the total is correct.

The entire part of Arithmetic which comprises the addition, substraction, multiplication and division tables, in a word everything which may be called the *facts* of the figures, should be studied as carefully and as perseveringly as Orthography.

If the study of Arithmetic and sciences generally were encouraged like that of the mother tongue in the varions institutions,—both primary and secondary,—we would see the gradual disappearance of that species of illusion which attracts a certain number of young men to the liberal professions, a result which every one deplores.

Some reward is asked for those pupils who succeed the best in their classes ; they are generally those who receive the most prizes. Could we not also, by special rewards, develop and encourage a taste for studies which seem neglected like Arithmetic.

IV

I had the honour of stating above that we were obliged to send away the pupils before the usual time,on account of the government repairs made. By so doing, it is quite certain that accidents were prevented, which would have occurred before long, at least in a portion of the buildings. By rebuilding the front, the remainder of the school will be preserved where there has been no settling; it also reduces the expense of repairs and heating which would, before long, have amounted to a considerable sum. This step on the part of the Government cannot fail to be appreciated by all.

The re-opening of the classes will be delayed a few weeks, but we will do our best to prevent this delay being injurious to the pupils.

I have the honour, etc.,

R. A. B. VERREAU, Ptre,

Principal.

Digitized by Google

McGILL NORMAL SCHOOL.

JULY 18th, 1890.

Sir,

I have the honour to transmit herewith the statistical report of the McGill Normal and model schools for the session 1889-90, and a report on the final examinations of the Normal school, including copies of the examination papers and a statement of the marks taken in each subject by each candidate, the whole furnishing a good means of determining the character of the instruction given here to pupil-teachers.

I beg to report that the total attendance of pupil-teachers in the Normal school, during the session 1889-90, was 86, of whom 49 entered the elementary school class, 33, the model school class, and 4, the academy class.

The total enrolment of the model schools was 392, 183 boys and 209 girls.

At the closing examinations of the Normal school, 68 pupil-teachers presented themselves, of whom 23 won model school diplomas, and 37 elementary school diplomas. In addition to the 60 persons who thus received diplomas as teachers in the ordinary course of the school work, three former pupils of the school, having taught for ten years and upward with conspicuous success, had their academy diplomas raised to the first grade by the Protestant Committee of the Council of Public Instruction; two former pupils, on graduating as bachelors of arts, received academy diplomas of the first class; and four bachelors of arts of the McGill University, and four of other British or Canadian Universities, passed the special examinations of the school in the art of teaching, and received, in consequence, academy diplomas, also of the first grade. The total number of academy diplomas of the first grade conferred at the close of the school was 13, and the whole number of diplomas of all grades was 73.

Since its inauguration, in 1857, the McGill Normal school has conferred in all 2,174 diplomas on 1,489 person. The number of elementary diplomas issued is 1,242, of model school diplomas 719, of academy diplomas 213, 52 of the latter being of the first grade.

I am very glad to know that the teachers on whom you conferred diplomas in this institution, last year, are almost, without exception, engaged in teaching or in fitting themselves for better work as teachers. The model school class of last year consisted of 33 persons, 27 are teaching, 3 have entered the academy class, and one is sick. The elementary school class contained 44 persons. Of these, 19 are teaching, 20 re-entered the school to prepare for model school teaching, and two are prosecuting their studies elsewhere.

Digitized by Google

The late sessional examinations were creditable alike to the pupils and to their teachers; but there is no specially marked improvement over those of last year. Indeed it seems unreasonable to expect any great advance in the attainments of Normal school teachers-in-training, until there shall be a decided improvement in the preparation of candidates for admission to the school. It is gratifying to observe that some of the country schools are now sending up pupils thoroughly prepared to enter the model school class, and there are cheering indications that the preparation to receive the special training to teach, which it is the function of a Normal school to give, will be more and more effectively done in the elementary and model schools of the Province.

Not much that is new in our methods or practice can be reported. The chief advance that has been made is in the training of teachers as teachers. During the latter part of the session, a series of short model lessons has been given by the members of the Model School Class to the assembled pupil-teachers of both grades. These lessons have been freely and shrewdly criticized by the pupils under the direction of the whole permanent staff of the school. The method has already given good results, and promises more in the future, so that it is intended to give such exercises a definite place in the time tables of next year.

An orchestra has been recently established in connection with the Boys' Model School, partly in the hope that it may eventually lead to a further and more practical development of instrumental music in the Normal School.

We have had the advantage of two courses of lectures by T. D. Reed, Esq., M. D., one on Chemistry and one on Physiology. Prof. Penhallow, B. Sc., also, has lectured once a week on Botany. It is of the greatest possible advantage to an institution like the Normal School to be able to bring its pupils into contact with the best representative minds. In teaching Botany in the Normal School, a difficulty arises from the fact that its session is a winter session, when wild plants for examination are not procurable. In this respect, the Normal School has suffered in common with all colleges in these latitudes. It is therefore with a high sense of pleasure that I am able to report that, through the generosity of the authorities of McGill University, in allowing our pupils to share in the advantages for study afforded by the proposed maintenance of a winter plant-house, we may hope to make instruction in Botany more practical, more interesting and much more effective.

The Prince of Wales. medal and prize, founded by His Royal Highness on the occasion of his visit to Canada, is the only permanent reward of excellence at the disposal of the school; but our thanks are due to J. C. Wilson, Esq., M. P., for a prize of $40 and a book, annually given for many years past in recognition of the work of an institution of which he was himself once a pupil.

Digitized by Google

His Excellency the Governor-General offers annually a silver medal to the student of the academy class who stands highest in the final year of that course. Unfortunately, it could not be awarded this year through lack of sufficient merit in the only candidate.

The Honourable Mr. Mercier, Premier of the Province, has kindly authorized me to offer for competition in the school a gold medal as a prize for assiduity, rightly supposing that labour conquers all difficulties.

Finally, in this connection, I must crave your permission to record our sense of the obligation under which you have yourself laid us by your generous gifts of many prizes and medals during the time in which, with so much honour to yourself and with so much advantage to education, you have filled the onerous and important position of superintendent of Public Instruction. At the close of the session just completed, you gave a gold medal to the second competitor for the Prince of Wales, medal, a gold medal to the pupil of English extraction who had made the greatest proficiency in the study of French, and a valuable book as a prize to the student who took the highest standing in the French examinations of the model school class.

The Normal school is deeply indebted to the Venerable Archdeacon Evans, M. A., to the Rev. James Fleck, M. A. and to the Rev. S. P. Rose, for the valuable religious instruction weekly given by them to the pupils in attendance at the school.

Last year, I expressed my regret that Mr. Andrew, for many years instructor in Elocution, had decided to relinquish his public school work. Now I must, on the part of the officers of the school, give utterance to our united and sincere sorrow at his death. Having many rare personal qualifications, which he had developed by assiduous application, he was one of the best teachers of elocution to large classes whom I have known. To his effort and success in teaching reading, not only the schools of this city, but, through the Normal school, those of this province, will be long indebted.

I must not here detail the special services of my colleagues on the permanent staff of the school. To them all, to Professor Parmelee, for his kindly faithfulness and tact in management; to Madame Cornu, for her able services in teaching French, and for the charm of her discipline; to Miss Robins, for much good work quietly and unobtrusively done; to Mr. Fowler, for his devotion of time and effort, quite irrespective of renumeration; to Miss Green, for ceaseless and wise endeavor in the development of the artistic taste and skill of her pupils; and to Mr. W. H. Smith, for assiduous zeal in interesting the class in Tonic Sol-Fa, my unreserved thanks are due.

The Normal School Committee, supported in its representations by the Protestant Committee of the Council of Public Instruction, has again and

Digitized by Google

again urged on the attention of the Government the pressing need of repair and enlargement of the school premises. There is now a reasonable hope that thorough repairs will be effected. But the school has outgrown its present accommodation, and ought to have a new building for the Normal School, the present building being assigned to the Model Schools. The required room should be provided without encroaching on the present play-grounds.

The Committee has submitted to the Government two plans for enlargement, one, which appears to be the best, involving the purchase of a neighbouring property, the other contemplating the erection of a much larger building on the site of the primary school.

The whole respectfully submitted,

S. P. ROBINS, LL. D.,

Principal.

LAVAL NORMAL SCHOOL.

(*Translation.*)

QUEBEC, 18th July 1890.

Sir,

I have the honour to submit my report on the state and progress of the Laval Normal school for the year 1889-90.

The course of studies in our school was attended by 110 pupils; 64 of this number were female pupil teachers, and 46 male pupil teachers.

In the girls' normal school, 63 pupils remained to the end of the year. Out of this number, 56 received diplomas.

In the boys' normal school, 40 pupils remained to the end of the year. Out of this number, 38 received diplomas.

The annexed schools were attended by 292 children; 202 girls and 90 boys.

Success was this year considerably impeded by *grippe*, which raged in our school with all the more fury, that want of space and the miserable condition in which the building is from a sanitary point of view, favored its progress. All our pupils, with very few exceptions, were

Digitized by Google

attacked by the disease; some even were obliged to leave off their studies. Several professors and the principal caught the sickness, and during a month, the lectures were given very irregularly. By increased work, the professors and pupils have however been able somewhat to make up for lost time and prevent a decrease in the number of diplomas distributed.

It is useless for me to state with what satisfaction I read the resolutions of the Council of Public Instruction, respecting the building of a Normal school at Quebec. The remaining with which the honourable members of the Council adopted these resolutions is a striking proof of the measure being an urgent one. We are also confident that the government of this province will acquiesce in the request of honourable members of the Council and endow our city with a Normal school whose proportions, hygienic arrangements, facilities for teaching and internal divisions will be equal to the requirements which it has to meet.

The night schools whose importance no one can ignore, demand such a building which would permit of regularizing them and assuring their maintenance. They would become an annex of the Normal school and could be taught far more economically, thank to the help of the pupil-teachers who could be hired for far less pay.

Moreover, the simplicity of the project which his Lordship L. N. Begin, bishop of Chicoutimi, submitted to the Council of Public Instruction, speaks in its favour and it would be no burden on the Province. In reality it would be the Laval Normal school itself which would provide for the building of a new school and the government would only be obliged to guarantee a certain capital, the repayment of which would be secured.

The year 1890 witnessed the disappearance of one of the most sympathetic and remarkable men of one country, Hon. P. J. O. Chauveau, who has left us for a better world. The death of a man as eminent for the qualities of the heart as he was illustrious by the power of his intellect, was deeply felt by the directors and professors of the Normal Schools whose founder and constant friend he was in evil as in happy days. Mr. Chauveau has occupied the highest positions in this country. He has shown himself always and everywhere faithful to the motto: *Pro Deo et patria.* He still lives in his works which have become the sacred inheritance of his family and of his country and in the first rank will forever stand his most cherished work: the Normal Schools of the Province of Quebec.

I have but to congratulate myself upon the courtesy and zeal of the Reverend Ursuline Ladies and of the Professors and upon the conduct and work of the pupils. The closest union has always existed amongst pupils and professors and all have endeavoured to lighten the labours inherent to my office. I am happy to acknowledge this officially and to thank each of them for his good will towards me.

Digitized by Google

I beg also to express my sincere gratitude to you, Sir, for the kindness you have shown me in every circumstance, the constant encouragement you have given our pupils, all of which are things never forgotten and which I am anxious to mention in this modest report.

I have the honour, etc.,

T. G. ROULEAU, PTRE,

Principal.

McGILL UNIVERSITY.

EXTRACTS FROM THE ANNUAL REPORT OF THE GOVERNORS, PRINCIPALS AND FELLOWS FOR THE YEAR 1889.

We beg leave respectfully to present the following Report of the history and statistics of the University and its Faculties and Affiliated Institutions, in the educational year, ending December 31st, 1889.

The past year, while in the main uneventful, has been marked by a steady growth in the efficiency of the University and its Colleges, and in the magnitude of its work ; and was auspiciously inaugurated by the visit of His Excellency the Governor General and Lady Stanley, in February, an honour which will long be remembered by us, and we hope will be the precursor of other visits, more especially on occasion of our annual meetings of Convocation for the conferring of degrees.

The office of Chancellor of the University, vacant by the death of the Honble. Senator Ferrier, in May 1888, has remained for some time unfilled, the senior resident member of the Board of Governors, Mr. J. H. R. Molson, having kindly consented temporarily to discharge its duties. The office has now been filled by the unanimous election of the Honble. Sir Donald A. Smith, LL.D., K.C.M.G., whose public inauguration took place on October 31st, in the presence of the Convocation and students, and of a large gathering of the friends of the University. On that occasion, we were also favoured with the presence of Mr. Peter Redpath, the founder of the Museum which bears his name, who has for some years rarely been able to be present at our University meetings.

We have to record with regret the serious loss sustained by the University in the past year in the removal by death of the honoured and beloved Dean of the Faculty of Medicine, Dr. Robert Palmer Howard, LL.D. Dr. Howard had been one of the professors of the Medical Faculty since 1854, and in his later years occupied the important positions of Dean of the Faculty and Professor of the Theory and Practice of Medicine. His kind and conciliatory manner, his sterling qualities of mind and heart, his able and conscientious discharge of all his duties and his earnest and self-sacrificing interest in the welfare of the University, of his Faculty and of its students, had endeared him to all ; and his death while still in the vigour of his powers was most deeply felt, and cast a dark shadow over the close of the past session of the Faculty of Medicine.

The office of Dean was filled at as early a date as possible by the appointment of Dr. Robert Craik, who was recalled from the well-merited rest of an emeritus professorship ; and in view of the large increase of

Digitized by Google

work now devolving on the Dean, Dr. George Ross, M.A., was appointed Vice-Dean and was transferred to the chair of medicine. These appointments will fully sustain the efficiency of this Faculty.

An important benefaction of a general University character is that of a sum of $40,000 to form the John Frothingham Principal Fund, given by Mrs. J. H. R. Molson and her brother, Rev. Frederick Frothingham, and named in commemoration of their father. This fund places the succession to the principalship in a secure position, and in the mean time has enabled the Board of Governors to relieve the Principal of a considerable part of his professorial work by the appointment of Frank D. Adams, M. A. Sc., as lecturer in Lithology and Geology.

The total number of students attending lectures in McGill College in the present Session is 690 Details will be given in the notices of the several Faculties. In addition to this there are 38 students in Affiliated Colleges in Arts, and 74 Teachers-in-training in the Normal School, of whom however 4 are enrolled in the college classes. It should be noted in connection with the number stated above, that not less than 550 in McGill College and 38 in Affiliated Colleges are undergraduates, actually attending lectures in the full courses of study for University degrees, and, that of these, more than 400 are from places beyond the limits of Montreal.

At the Meetings of Convocation in March and April, seventy-six degrees were conferred, viz :—

In Law	3
In Medicine	38
In Arts	25
In Applied Science	10
	76

The Honorary degree of LL. D. was conferred on George Stewart, D. C. L., F. R. S. C., in acknowledgment of his services to Canadian Literature and History.

Eight gold medals and one silver medal were awarded to successful candidates in the graduating classes of the different Faculties, including the medals kindly presented by His Excellency the Governor-General in the Faculties of Arts and Applied Science.

In the classes of the Normal School, 95 Diplomas were granted by the Superintendent of Education; namely 15 for Academies, 36 for Model Schools, and 44 for Elementary Schools.

In the June examinations for the title of Associate in Arts, 82 candidates passed in the examinations for Associate and three for Junior certificates. These candidates came up from eighteen schools, and a large number fulfilled the requirements for matriculation in Arts or in Applied Science.

An important addition has been made to the number of our Faculties,

Digitized by Google

by the introduction of the long-celebrated and most efficient Veterinary College of Montreal into the University as its Faculty of Comparative Medicine and Veterinary Science.

For the first time in the history of the University, Music has been introduced as a definite study, under Mr. William Bohrer, well known in Montreal as an instructor in musical art and science. Classes have been formed for men and for women, in connection with the University Musical Association and that of the Donalda Special Course. The expenses incident to this new departure have been defrayed in the case of the men by the liberality of Prof. James C. Cameron, M. D., and in the case of the women by the generous aid of the Chancellor. The classes in music are open to the students of all the Faculties.

The Provincial Association of Protestant teachers, having decided to hold its Annual Convention in Montreal in October last, was entertained in the Peter Redpath Museum by the Chancellor and the Principal, and the occasion was honoured by the presence of a large number of leading friends of education from the city and elsewhere.

The wants of the University referred to in former Reports with reference to college lodgings, dining hall and rooms for societies have not yet been supplied, and there is urgent need of division of some of the more important chairs in view of the great increase in the number of students It is also to be observed that notwithstanding the large endowments received for special purposes, the general funds of the University, available for any educational object and for unforeseen emergencies, are still very deficient.

Faculty of Law.

The number of students in Law is still small, in consequence of the operation of the causes referred to in our last Report. The number in attendance is only eighteen, but an increase is expected in next session.

The Session was opened with a public lecture by the Dean of the Faculty, which was well attended and elicited expressions of public interest in the Faculty. Improved and more convenient class-rooms have been secured, and the Professors have exerted themselves to the utmost in the present session to render the lectures useful and efficient.

We have to express our thanks to the Council of the Bar for amending the oppressive regulations against which we felt it to be our duty, in the interest of education, to protest in our last Report.

We regret that serious illness will prevent Prof. Lareau from delivering his lectures in the second term of the Session. The Governors have however secured the services of Mr. J. Fortin, LL.L. of Laval, whose lectures, as substitute for Prof. Robidoux, were so acceptable last session.

The importance of this Faculty in the interest of professional education, and more especially in the preparation of efficient men not only for

Digitized by Google

the Bar, but for the Legislature and the Judiciary, should commend it to the interest of the friends of education. An effort to secure for it an endowment has been begun by some of the graduates, and it is hoped may prove successful. One or two well-endowed Chairs are necessary to secure its permanence and to give to it the position which the value of its work demands.

Faculty of Medicine.

The changes in the staff of this Faculty have already been referred to. Its students have attained to the large number of 257, all of whom are regular undergraduates attending lectures and practical work ; and the fact that so many resort to it from all parts of the Dominion testifies to its high efficiency and reputation.

The Faculty continues to exert itself to keep pace with all the improvements in medical education ; and to that end the Professors have, as in former years, liberally presented the fees of the Summer Session, amounting to $1253, in aid of new apparatus and appliances. A movement is also in progress for a subscription, which has been headed by the Chancellor, toward a Howard Memorial Fund, in memory of the late lamented Dean of the Faculty.

Faculty of Arts.

The number of students in this Faculty continues to increase, and in the present session has reached to 297. Of these, 175 are undergraduates: viz. 130 men and 45 women ; 122 being partial and occasional. The increase in the number of undergraduates taking the full course of lectures and study for the degree of B.A. is a gratifying feature in this connection.

The bill introduced by the Hon. Mr. Lynch in the last session of the Legislature for the recognition of the Degree of Bachelor of Arts as a qualification for entrance on professional studies, was carried in the House of Assembly, but unfortunately defeated in the Legislative Council. It will however be renewed in the present session, and there is every reason to hope that it will now become law, and will remove what has hitherto been a blot on the educational reputation of this Province and a great discouragement to liberal education.

In this Faculty no less than 152 exemptions from sessional fees have been granted in the present session. Of these 79 are to students of Affiliated Theological Colleges in preparation for the Christian ministry, and the greater part are to young men from the country districts. Ten Scholarships, Exhibitions and Bursaries, and one Medal-Prize were awarded in the September examinations, varying in value from $125 to $50. The larger number are the gift of Mr. W. C. McDonald ; the others from the benefactions of Mr. Hague, the late Major Mills, Mrs. Redpath, Mr. Alexander and Mrs. Molson.

We are indebted to some of our friends for a contribution of $250 per

Digitized by Google

annum for three years, in augmentation of the salary of the Chair of Hebrew and Oriental languages, so ably held by Rev. Prof. Coussirat, and it is hoped that means may be found permanently to place this important Chair in an improved position as to salary.

In connection with this Faculty it is to be observed that, in addition to its own regular students, certain of its classes are attended by large numbers of students of other Faculties and Affiliated Colleges, so that the actual number of students in attendance on lectures is over four hundred. This large attendance is now urgently demanding increased accommodation, and the division of some of the Chairs, for which further endowments will be needed.

The Donalda Special Course has now also attained to such importance and assured success that it becomes increasingly desirable that the wishes of its liberal founder should be realized in its extension into a College, so situated as to take advantage of all its present facilities in connection with the University, and yet with more complete appliances than at present and a staff of its own, in addition to that of the Faculty of Arts. In connection with this department a demand has also arisen for instruction in physiology and hygiene, which the Faculty is at present unable to supply, but which, if means could be provided, would be important in the interest of men as well as of women.

The Students in the Donalda Special Course have, as hitherto, distinguished themselves in the examinations: and with the arrangements made for their separate instruction and the careful supervision exercised by Miss Gairdner, as Lady Superintendent, there seems no reason to believe that any injury to health has resulted or is likely to result from their taking the full work of the regular course of study. It is proper to make this statement, since so much discussion has recently taken place elsewhere as to alleged injury to health arising from academical study. Such injury, however, in so far as it occurs, seems to be due rather to certain conditions of competition than to the actual work required of the student.

With regard to the health of the students, it appears that the daily walk to and from classes, though involving some fatigue and exposure, has been advantageous; a fact which makes the provision of college residences less necessary, except perhaps in the case of students from distant homes not having friends or relations in the city.

Material improvements have been made by the Faculty of Arts in its matriculation examinations, both in giving them greater breadth and definiteness, and in making them more accessible, especially to intending students residing at a distance. The institution of June examinations in connection with those for Associate in Arts, in local centres, has tended very much to give greater facilities to candidates; while the several grades of advanced examinations provided, secure to the better prepared students and the schools which train them, proportionate standing and advantages.

Digitized by Google

The Faculty of Applied Science.

The number of students in this Faculty has increased to 72, a gratifying evidence of its appreciation as a means of training for the professions for which it provides, and in the studies leading to which the students divide themselves somewhat evenly, though Civil and Mechanical Engineering still attract a larger number than Mining Engineering and Practical Chemistry.

In the present session a want previously felt has been supplied by the institution of lectures on Sanitary Engineering. In support of these, Mr. J. H. Burland has added to his former benefactions a donation of $100.

The Department of Mechanical Engineering has hitherto laboured under some disadvantages, but these will now be removed by the large bequest of the late Thomas Workman, Esq., amounting to the sum of $117,000, to found the Thomas Workman Department of Mechanical Engineering, providing for the necessary rooms and workshops and an endowment for the professor and assistants. Feeling that it would be most desirable to economize on building and plant, so as to secure as large a sum as possible for salaries and maintenance, the Dean of the Faculty has brought the matter under the notice of a number of leading manufacturers and others, and has secured a large number of subscriptions, which, while valuable in themselves, derive additional importance from the testimony which they afford to the public appreciation of the practical value of the engineering school. It is hoped that the list of these donations may be sufficiently advanced to be appended to this Report. The building for the new Department will, if possible. be begun next Spring.

The Faculty awarded in its September examinations five exhibitions and prizes, including those from the British Association Fund, the Scott exhibition and the Burland prize for Chemistry.

Faculty of Comparative Medicine and Veterinary Science.

This new Faculty is now organized with three ordinary and four associate Professors and a Demonstrator. Its students will henceforth be recognised as University students, and at the end of their course will receive, on passing the required examinations, the degree of Doctor of Veterinary Science.

It is hoped that in its new relations to the University, the Montreal Veterinary College will increase rather than diminish its deserved reputation and the confidence which the public feels in the proficiency of its graduates.

The University, feeling the great importance of a thorough School of this kind, will do all in its power to secure this result.

The number of students in the Veterinary Faculty is 50. Of these, 22 are from Quebec, 7 from Ontario, 2 from Manitoba and the North West, 1 from Nova Scotia and 18 from the United States.

Digitized by Google

Affiliated Colleges.

Morrin College, Quebec, has received a much-need aid in the liberal donation of the heirs of the late Honble. James Ross, which has enabled the College to add to its staff, by the appointments of Rev. T. Macadam as Professor of Logic and Mental and Moral Philosophy, and of Rev. A. T. Love, B.A., as Professor of English and of Political Economy.

The number of students is 23, and the College expects to send up six candidates for the degree of B.A. at the close of the session.

St. Francis College returns 15 students, and has two in preparation for the Intermediate Examination of next April. Fifteen of the students of this College are now continuing their studies in this University, 13 in McGill College and 2 in Morrin. Of the 15 now in attendance, twelve are undergraduates in arts The remaining three are preparing to enter the Faculty of Applied Science.

The four Affiliated Theological colleges are in a prosperous condition, and working in harmony in every respect with the University.

Arrangements have been made for the affiliation of the Wesleyan College, Stanstead, as a College in Arts of the second class, preparing students for the Intermediate Examination. This affiliation will, it is hoped, be an educational benefit to an important section of this Province and will add a useful and creditable College to the University.

The Library.

The Library Committee reports a considerable addition of books by purchase and donation. In this connection, it should be stated that the McGill College Book Club has, as usual, been a considerable contributor. The total number of books now amounts to 28,637 volumes, of which 835 have been added during the past year.

The large increase of books, and the greater number of readers, due to the augmentation of the classes, are now urgently demanding increased accommodation. The Committee has taken all the measures in its power to provide for these wants in the existing rooms, but it will soon be necessary seriously to consider the means of enlargement.

The Peter Redpath Museum.

The work of the Museum and the classes held therein proceed as heretofore. The collections have been increased by many important donations.

The donations of Mr. Peter Redpath and Mrs. J. H. R. Molson for maintenance and salary of the Curator have been continued.

Many improvements have been made in the arrangement and labelling of specimens.

The removal of the Botanical Laboratory from the Herbarium room to

Digitized by Google

the centre building, has set the former free for the better accommodation of the collection of plants.

Mr. Charles Gibb, M. A., now travelling in the East, has kindly undertaken to collect for the Museum, Mr. J. H. R. Molson contributing to meet the expense. Mr. Gibb has already forwarded some fine crustaceans and fishes from Japan.

The Gymnasium.

This is still carried on efficiently by Mr. Naismith, with classes for ladies under Miss Barnjum. The number of male students entered is 120, and the average attendance at the hours of instruction has been 75. The class of women is only 16 in number, owing to the distance of the building and the difficulty of arranging suitable hours.

The Board of Governors has offered the present gymnasium and the lot on which it stands for sale, and on its being disposed of, it is proposed to erect an improved building on the College grounds, if possible in immediate connection with the campus. This it is hoped will secure, not only improved facilities, but much larger classes, as the present building is at an inconvenient distance.

Could means be obtained, it might be possible to connect with a new gymnasium, rooms for certain college societies and a college dining-hall; and it may also be expedient to consider whether the gymnasium itself might not be so constructed as to be available for the larger public meetings of the University.

The Observatory.

The Report of the Superintendent, Prof. McLeod, shows that the meteorological observations and time service have been regularly continued, and gives details as to the methods and results. In connection with the time service, measures have been taken with reference to improvement of this service in the Government buildings at Ottawa, and to extending its benefits in the city of Montreal.

Ten students have availed themselves of the instructions in transit observations. Three students have received instructions in magnetic observing, and one has taken the certificate for meteorological observations.

Observations on sunspots have been regularly maintained and the results are stated in the special Report.

Botanic Garden.

In the past Summer, a portion of the grounds has been enclosed with a wire fence, and partially prepared for beds, and a pond for aquatic plants has been prepared, under the direction of Prof. Penhallow. The work will be proceeded with next Spring, when it is also proposed to solicit contributions for the conservatory to be erected in the garden. The

Digitized by Google

ground enclosed includes that portion in which for several years a collection of trees, shrubs and native plants has been in progress under the care of the Principal. Among these are a number of valuable foreign trees and shrubs presented by Mr. Charles Gibb.

The statement of the Revenue and Expenditure of the University for the financial year ending June 30th is appended.

In conclusion, while grateful for the presperity which has been vouchsafed to us in the past year, and for the liberal gifts of the friends of education, we shall not cease to direct public attention to the many important educational objects in connection with the University which remain to be provided for, and shall hope that ere long some of the more urgent of these needs will be supplied.

On behalf of the Corporation,

(Signed),

DONALD A. SMITH, LL.D.,
Chancellor.

J. WM. DAWSON, LL.D.
Principal

UNIVERSITY OF BISHOP'S COLLEGE

EXTRACTS FROM THE REPORT OF THE TRUSTEES AND PRINCIPAL.

REPORT OF THE TRUSTEES TO THE CORPORATION ON THE ACCOUNTS OF THE YEAR 1889.

In placing in the hands of the Members of the Corporation the Balance Sheet and Profit and Loss Statement of the past year, the Trustees beg to offer the following explanations in regard to the changes which will be found, on comparing the accounts with those of 1888.

There is appended hereto, in addition to the Balance Sheet and Statement of Profit and Loss, a table showing the "Special Funds" classified as Scholarships, Prizes and Professorships' Endowments—with the details of the investments of each fund.

Comparing the Balance Sheets of 1888 and 1889, the following changes will be noticed, viz :

LIABILITIES.

Bishop's College Account.

The amount of this Account at the 31st December last, was.....	$91,301 59
" " " 1888, "	83,917 44
Increase during the year.....	$7,384 15

This increase is accounted for as follows :

The Bishop Williams' Wing transferred.....	$5,470 21
The Smead & Dowd System of Heating, Ventilation and Sanitation, applied to said "Wing," (paid for by the School Association)..	1,286 94
Total Bishop Williams' Wing	$6,757 15
Increase the value of Stukeley lands.....	327 00
Subscription towards the purchase of the Rev. A. C. Scarth property	300 00
	$7,384 15

The Stukeley lands increase was ascertained from a return prepared by the agent, Mr. Stevens, which covered every detail of the property.

The Scarth property subscription, represents the first instalment of the purchase money $1200.00

The circumstances as to this latter account may be briefly stated as follows, viz :

Digitized by Google

The property lies on the left bank of the river Massawippi near its junction with the St. Francis, and fronts on the road from the village to the College.

An anonymous friend of the institution was anxious that this property should belong to the College, as he feared that, at some time, it might be laid out in building lots—on which an inferior class of buildings might be erected. This would become an eyesore, destructive of the beauty of the prospect from the College buildings and terrace. He strongly advised the purchase, and contributed at once the $300.00 above mentioned, and at the same time placed in the hands of the Chairman of Trustees ample security for the further payment by him of $700.00, by seven annual instalments of $100.00 each, thus leaving unprovided for only $200,00 of the principal and the annual interest at 5 per cent, on the unpaid principal. The Trustees accepted the property on these conditions, and the best thanks of the Corporation seem to them to be due to the donor, both for his gift and his forethought.

Furthermore, the Trustees feel that the acquisition of this property will enable the College to secure to the Students a recreation ground of their own, separate from that of the School. The increase of numbers, both in College and School, seems to render such a separation desirable, if not absolutely necessary.

The second item of the Balance Sheet shows the amount due to the Rev. Mr. Scarth, on the above mentioned property.

The other items apart from the " Special Funds" need no comment.

ASSETS.

The Real Estate.

This account is classified under the College, the School, and the Infirmary properties.

Of these, the College property shows an increase over 1888 of $8,479.65 —accounted for as follows:

Bishop Williams' Wing(as above)	$6,757 15
The Scarth Lot	1,200 00
The" Carter" Property (acquired)	475 00
Harrold Lodge (outlay on)	47 50
	$8,479 65

The purchase of the " Carter" property, briefly stated, is as follows: Many years ago, a squatter took possession of a small plot of land on the bank of the St. Francis, situated above the bridge which spans the river. He built a shanty thereon—and had acquired certain rights before the

Digitized by Google

notice of the Trustees was called to the matter. Instead of bringing an action of ejectment against him, he was allowed to remain, paying a ground rent of $2.00 per annum. The property was transferred from one to another, until it was felt that it might, if owned or occupied by an evil disposed person, prove an intolerable nuisance, situated as it is, close to the School playground. An arbitration was agreed on, and an award was made that possession in full should be given to the College on a payment of $475.00. It is now let to a respectable tenant—for a sum which represents a fair interest on the outlay—$48.00, and the College has complete control.

The School property remains unchanged, though it is greatly increased in value by the improvements made at the expense of the School Association.

The Infirmary property shows an increase over 1888 of $1,987.36, of which $10.93 belongs to the year 1888—and $1,976.43 represents the cost of the extension in1889. At the last annual meeting of the Corporation,the sum of $1,500 00 was voted for the extension, so that the actual cost has exceeded the appropriation by $476.43. This is fully accounted for (*a*) By the change in the system of heating from stoves to hot water, the stoves having been condemned, as unsuitable for infirmary purposes,—(*b*) By the addition of a bathroom and water closet, with a permanent and ample supply of water from the tanks in the attics of the School building; (*c*) By connecting the drainage with the main drain of the School building. The Infirmary is now held to be sufficiently large for the whole institution, and is complete in every way. The furniture in the building, including the cooking range, has been supplied by and is the property of the School Association.

The moveable property of the College has been slightly increased in value owing to the increase in the number of Students; and the Chemical Apparatus, the cost of which has been defrayed out of the Museum fund, has also been increased.

The Stukeley lands, notwithstanding some payments made during the year, show an increase in value, as explained above. Some payments have been made on the Halifax lands account, which have reduced the balance.

The mortgages and other investments, held by the College, vary from time to time,—but the whole of these Assets are esteemed to be safe beyond question.

The Library is valued as heretofore—although the number of books shows an increase.

The outstanding College fees are less than at any former period, and the present amount represents uncollected accounts of a date prior to 1889. The accrued interest on the Special Funds, shows $1,451.90 to be outstanding, against $2,125.13 in 1888.

Digitized by Google

The Repairs and Furniture Account has been reduced from $1,622.91 in 1888 to $845.71. A large portion of this reduction was due to the transfer of the profit balance, 1888—($562.88) to this account—as ordered by the Corporation.

The only remaining item untouched upon above is that of the Special Funds, of which a separate table is appended.

The Trustees hope that the foregoing explanations will prove satisfactory to the Corporation and will enable its members to understand the present financial position of the College in regard to its ordinary funds. The year has been a satisfactory one, having yielded a profit of $682.43, as will appear more clearly by the Profit and Loss Statement.

The total of the Special Funds is now $99,451.03, as compared with $95,474.15 in 1888 ; the difference being, for the most part, due to the collections made from subscribers to different funds. A change will, however, be noticed, whereby the "Scholarships" have been reduced in total value, in order to provide a "Maintenance" fund for the proposed Divinity House. For this purpose the two Mountain Deaconship Funds, have been transferred with the consent and under the hand of the Donor.

PROFIT AND LOSS

The net Income of the year has been	$11,464 50
And the Expenditure	10,782 97
Profit	$682 43

Both Income and Expenditure were larger than in the previous year.

In relation to income, the College fees show $1,771.95, as compared with $1,451.00 in 1888. This is of course the result of an increase in numbers. There was a Special Subscription of $60.00 to defray the charge for lectures on Political Economy—as shewn per contra.

The Trinity Sunday Collections, as they are called, were $518.19. against $340.63 in 1888—and with regard to this item it is satisfactory to note that nearly the whole of this increase was due to the Collection ($70.00) from the Cathedral Church of Montreal.

The extra Expenditure over 1888 covers the amount paid, as before mentioned, for the lectures on Political Economy, $60.00 ; an increase in the current expenses $286.00, and an additional $100.00, credited the Repairs and Furniture Account due to the acceptance by the Corporation of the Bishop Williams' Wing.

The only item demanding attention is that of the Current Expenses. The Trustees have no reason to believe that there has been any want of economy in the administration, but they suggest that the greatest care and watchfulness be exercised before authorizing outlay which, however desirable it may seem, may not be absolutely necessary.

Digitized by Google

The income in some important respects is necessarily fluctuating.

With this caution the Trustees desire to congratulate the Corporation on the present position of the College. Public sentiment seems at the present time to run in its favor—and it must be a cause of rejoicing to all those who, during many years of cloud and depression, stood by the College, firm in their faith as to its future, to find that it has weathered the storms which imperilled its existence, and can look forward to a larger sphere of usefulness, which will merit even a greater appreciation and support than it has hitherto received.

Respectfully submitted,

On behalf of the Trustees.

R. W. HENEKER,

Chairman.

FACULTY OF ARTS.

The year of 1889 has been under the Divine Blessing prosperous. It is for others to speak of the material well being of the College. Its educational progress has been satisfactory Five of the Students graduated in Arts in June, 1889, all in honours, two in Mathematics, and three in Classics. Of these five, one was ordained at once by the Bishop of Ontario, three others have entered our Divinitv Faculty, and one, an Exhibitioner of the Diocese of Montreal, has elected to take his Divinity course in the Sister University of Trinity, Toronto. Of the Divinity Students who were in the Faculty a year ago, one has been ordained in the year; the others remain with us. The total number of Students in the Lent Term, 1889, was 31, in Trinity Term, 30, in Michaelmas Term, 34, and 33 in Lent Term, 1890. In the Term now beginning we have 35. Comparatively few failures have occured in the College examinations, and none have failed in the aggregate work. The conduct and general bearing of the Students have been, as a whole, excellent. Very few cases involving discipline have occurred during the year; and the state of feeling of the Students is good and loyal.

The only change in the Tutorial Staff has been the appointment of Mr. G. P. Woollcombe, B. A., of Christ Church, Oxford, (one of the Assistant Masters in the School), as Lecturer in Political Economy; the course has been well attended, and the examinations have shewn good results. It is very desirable that the course should be continued. The Lectures in Physics and Chemistry have been continued, also with success. The three years for which the Principal guaranteed the salary of the Lecturer are now complete, the guarantee having been made in 1887. It is hoped that the Corporation will adopt both these Lectureships as part of the permanent teaching staff, at least, from year to year. The additional work and the option afforded in consequence of these Lectureships have had a beneficial effect: 10 have attended Political Economy, 8 Physics and Chemistry.

The number of Students in the Divinity Faculty since September, 1889, has been eight:—The expectations formed in April, 1889, having thus been amply verified as to increase of Divinity Students, and the consequent inadequacy of the accommodation provided in the present house occupied by Dr. Allnatt; meanwhile, five Divinity Students have been resident in the main building. The daily special duties of the Divinity Students have been carried on, but the idea of the Divinity House could not be fully carried out. The effort to raise $10,000 to provide a new Divinity House has been successful up to that amount, about $10,300 having been promised up to the present date: and Dr. Mountain has transferred his Deaconship Fund, now amounting to $3,600 (with a year's interest still to fall in) as a permanent endowment for the new house. As this was a latent, or rather a potential benefit to the College, we may fairly claim that the gifts to the College for its actual benefit or extension,

Digitized by Google

including the field given by a friend, have in 1889 amounted to at least $15,000 from extraordinary sources. The plans for the building of the new Divinity House have been carefully examined by the Committee appointed for that purpose and we are on the point of receiving tenders shortly. There has been much difficulty in receiving Students during the year from want of room ; one has been taken in the Lodge, two men are duplicated in two of the rooms, voluntarily. Three others have been obliged to take rooms outside. So that if all the Divinity men were already out of the College, there are enough Students to fill the main building.

At the last Examination of the Bar for the Province of Quebec, December 1889, two of our undergraduates of one term standing passed. The recent passage of the B.A. Bill will give our graduates that standing with regard te the study of the professions from which they have so long and unjustly been debarred, and it is hoped this newly acquired Status of our undergraduates in professional education will lead to an increased use of the Art courses of the Universities of the Province Of the large graduating class of 1890, thirteen in number, a fair proportion are Lay Students. Of the 35 Students at this moment enrolled in the College, five are graduates, 25 are undergraduates of this, or some other University, 2 are preparatory, and 3 are partial or occasional Students.

The free tuition offered last year to the best pupils from amongst certain Schools who should pass the A. A. Examination and Matriculation subjects was not adjudged. Possibly, if the offer were renewed and made more general, the free tuition would find a recipient in 1890.

A report on educational matters connected with the University and College would not be complete without the statement of wants. The addition of a lecturer in some of the elementary subjects is very urgently needed in the Arts Faculty, to relieve Prof. Allnatt and the Principal somewhat : by relieving Prof. Allnatt of some of the Arts work proper, we should be able to utilize some further ineome from the Mountain Professorship Endowment.

One great want is the endowment of the Classical Professorship, another the endowment of the applied Science Chair, a third, the completion of the Mountain Endowment for the Professorship of Pastoral Theology, a fourth—adequate provision for additions to the Library, many others might be named, such as a Professorship of English Language and Literature. These wants may seem large, but ignoring our wants will never cause them to be met, while stating them may lead to their gradual removal.

The above respectfully submitted,

THOS. ADAMS, D. C. L.

Principal.

FACULTY OF MEDICINE.

The number of enregistered Students for the past Session was 36. Of these,

27	came from	Province of Quebec,
3	"	" Ontario,
3	"	United States,
3	"	West Indies,
36		

The following gentlemen passed the final examination for the Degree of M. D., C. M.; James Laurie, A. E. Mayner, W. N. Smiley, D. H. Judd, C. A. Lauchlan, G. B. Tanguay, Chas. E. K. Vidal.

WOOD GOLD MEDAL was won by Mr. C. E. K. Vidal, Toronto, for best Examination in all the Branches, Primary and Final.

NELSON GOLD MEDAL, won by Mr. James Laurie, B. A. Quebec, for best Examination in Surgery.

CHANCELLOR'S PRIZE, won by Mr. A. E. Mayner, Havana, Cuba, for best Final Examination.

DAVID SILVER MEDAL, won by Mr. J. J. Edwards, of Jamaica, West Indies, for best Primary Examination.

A special feature of the past Session's work was the evidence of uniform ability and industry which characterized the final year Students. The result of Examinations demonstrated this fact strikingly, for only one graduate failed to win first class honors. The third year Students also ranked well in marks, and are a class highly creditable to any school.

G. TILLERIE ROSS, M. D.,

Montreal, 8th April, 1890. *Registrar.*

BISHOP'S COLLEGE SCHOOL.

It is a matter of thankfulness to me to be able to make a favorable report of the prosperity of the School. The numbers in attendance are at present 110 : this limit was reached at the half Term of Michaelmas, and the same number has been maintained. But for the sickness of a few boys, the number would have been still greater; the average numbers of the three terms, beginning with September, 1889, is 14 more than that of three terms before that. The growth of the school has been steady and gradual. The School was fully organized in six grades in January, 1889, and a gradual increase in the standard has been the result, especially in the body

Digitized by Google

of the School. There is no danger that the increase of the School will conflict with this raising of the standard, for we have with 110 boys, 6 full Masters, besides two Professsors who give part of their time to the School. There are never less than six Masters engaged in teaching, sometimes seven, and one hour in the day eight. It is very difficult to raise the standard in Classical subjects, though this will gradually be done as boys stay longer in the School: the difficulty will be perceived when it is stated that only two boys in the present English Sixth Form have been in the School longer than since April, 1888. It is also difficult to enforce the teaching of Greek in the School, only half of the boys learn Greek, and for these only four grades can be allowed at present. Another difficulty is presented by the multiplicity of subjects, all of which clamour for time and attention, and none of which can be wholly omitted from the curriculum of a school, here and now. The formal division of the School into a Classical and Modern side would be very difficult without an increase of the staff. The desire of the Rector is to raise the standard in the School, and he is glad to report that the general standard is gradually rising, but at the present moment this is not shewn in the Sixth Form, which is not up to standard. Thus the French Master reports that the Sixth in French, at present, is not superior to the standard of last year's Sixth, when the boys who composed that class were in the Fourth. So much does the Rector feel the present deficiency of the highest boys, that he calls the highest Latin, the Fifth Form, and the highest Greek, the Fourth Form.

The only candidate sent in for Kingston last June, was the 4th boy in the School: he had an aggregate standing of two thirds of the highest boy in the School, and came out 5th in the Kingston list, with close upon 6,000 marks. Another boy matriculated in the College, and is doing well. Though it is desirable that the School standard should be kept as high as possible, yet it is better in the interest of the whole Institution and of University Education, that the higher work should in general be carried on in the College, and that the boys should be encouraged to take the Arts Course A boy can now, on one examination, enter the second year in Arts, but no one has as yet done so, nor is it desirable, from several points of view, to shorten the period of undergraduate residence in College.

Since my last report, no serious case of breach of discipline has occurred in the School, and the general development in health and work, in tone and discipline has been very satisfactory.

The only changes in the staff, have been the substitution of Miss Turnor, as Teacher of Music, for Mr. J. D. Lloyd; and the addition of a Superintendent of the Infirmary. Mr. Arthur Dorey will take the music from Sept., 1890.

The Infirmary has been much enlarged during the year, and has

Digitized by Google

been worked very efficiently. It has been in general use for purposes of nursing in all cases of sickness.

The above respectfully submitted,

THOS. ADAMS, D.C.L.,
Rector.

LAVAL UNIVERSITY.

MONTREAL POLYTECHNIC SCHOOL.

REPORT FOR THE ACADEMIC YEAR 1889-90.

Montreal, 6th October 1890.

Sir.

I have the honor to submit the report required by the act 50 Vict., Cap. 21.

The curriculum has continued the same, with the exception of some minor matters which have been struck out of the preparatory course, so as to enable students, following this course, to give more particular attention to the study of Mathematics, before their admission for the first year.

Number of students during the year 1889-90.

3rd Year.....6 students,
2nd Year.....3 students,
1st Year.....6 students,
Preparatory Course.....8 students, of whom only two attended till the end of the year.

CLASSIFICATION OF STUDENTS.

3rd Year.	2nd Year	1st Year.	Preparatory Course
1 Spénard, J.-Léon.	1 Delisle, Olivier.	1 Laberge, Frs-Charles.	1 Hébert, Henri.
2 Arcand, Oscar.	2 Faribault, Phil.-Arthur.	2 Lemire, Jos.-Tancrède.	2 Penèt, Alexandre
3 Fusey, Ernest-F.	3 Parent, Paul-Et.	3 Carmel, Jos.-Edouard.	
4 Gauthier, Hormisdas.		4 Piché, Pierre.	
5 Auclair, Henri-L.-M.		5 Marion, Jos.-Alfred.	
6 Lefebvre, Hercule-J.		6 Goulet, Godefroi.	

Digitized by Google

CLASSIFICATION OF PROMOTIONS AND OF THOSE WHO FINISHED THE COURSE, FOR 1890.

1. Arcand, Oscar,
2. Fusey, Ernest Ferdinand.
3. Spenard, Jos. Leon.
4. Lefebvre, Hercule Jos.
5. Gauthier, J. Armand Hormisdas.
6. Auclair, Henri Ls. Melasippe.

These gentlemen received their diploma of Civil Engeneer after having passed their examinations, the first, *with the highest honours*, and the second and third, *with high honours* and the three others, *with honours*.

The silver medal, presented by Mr. Peter S. Murphy M. C. P. I. and O. A.., to the most deserving student of the third year, whose marks for the entire course reached, at least, a general average of 16½ in 20, was awarded to Mr. Oscar Arcand, who came out with an average of 18,01.

The silver medal, presented on the same conditions, by His Honour the Honourable Auguste-Réal Angers, Lieutnant Governor of the Province of Quebec, to the best student of the second year, was deservedly won by Mr. Olivier Delisle, whose general average was 17.25.

The changes effected in the existence of the Montreal branch of the Laval University by the decree *Jam dudum*, resulted in the giving up by the Seminary of Quebec, of the Polytechnic School, from a financial point of view.I explained the situation to the Government who were good enough to vote a supplementary credit to pay the excess of expenses over receipts for this and the following year.

So as to establish the Polytechnic School upon a solid basis a project is under consideration to place this most useful institution under independent management.

STATEMENT OF RECEIPTS AND EXPENSES OF THE POLYTECHNIC SCHOOL FOR THE SCHOLASTIC YEAR 1889–90.

RECEIPTS.

I certify that I have examined the books of account of the Polytechnic School and that the above statement of receipts and expenses is in conformity with the said books.

(Signed) N. RHEAULT,

Auditor.

I remain,

Sir,

Your respectful and devoted servant.

U. E. ARCHAMBAULT,

Principal.

Bills receivable	1703 57		Hypothecary obligations	155000 00	
			Bailleurs de fonds	8964 26	
			Foundation prizes	3633 12	
			Excess of assets over liabilities	169768 79	
		$540307 96			$540307 95

O. P. JACQUES,
Accountant.

M. C. DESNOYERS,
Secretary-Treasurer.

I certify that I have examined the books of account kept by the Roman Catholic School Commissioners for the city of Montreal, and I declare that all the entries in the preceding report are taken from the said books, which I have checked over and found correct.

I have also checked over and carefully examined in detail all the entries for money paid, with their vouchers, and I have found the whole correct.

N. RHEAULT,
Auditor.

Montreal, 30th September, 1890.

COUNCIL OF PUBLIC INSTRUCTION.

ROMAN CATHOLIC COMMITTEE.

SITTING OF THE 24th SEPTEMBER, 1889.

PRESENT:—The Superintendent, in the chair; His Eminence Cardinal Taschereau; His Grace the Archbishop of Montreal; His Grace the Archbishop of Ottawa; Their Lordships the Bishops of Three-Rivers, Rimouski, Sherbrooke, St-Hyacinthe, Nicolet and Chicoutimi; Sir N. F. Belleau, the Honourable Messrs. L. F. R. Masson, P. J. O. Chauveau, Judge Jetté, H. Mercier, F. Langelier, Messrs. P. S. Murphy and Henry Gray.

Read a letter from His Lordship Mgr N. Z. Lorrain, Vicar Apostolic of Pontiac, notifying the Committee that he would be unable to attend the present meeting.

The sub-committee on class books submitted the following report, which was adopted:

Sub-committee on class books.

SITTING OF THE 24th SEPTEMBER, 1889.

PRESENT:—His Eminence Cardinal Taschereau, His Lordship the Bishop of Sherbrooke, the Honourable the Superintendent and Honourable P. J. O. Chauveau and Mr. P. S. Murphy.

"The sub-committee recommend the use of the "Manuel d'Hygiène" "by Doctor Severin Lachapelle, especially for the normal schools, so that "school inspectors and teachers may be prepared to teach this branch, "especially in the academies and model schools; and the sub-committee "do not, at present, recommend any other works upon hygiene."

(Signed) E. A. CARD. TASCHEREAU,
Archbishop of Quebec.

Read a letter from Inspector J. B. Delage, tendering his resignation which was accepted.

Read a letter from Mr. Daniel Paquet, notifying the Committee that the improved state of his health enabled him to resume his duties of school inspector of the Magdalen Islands, and asking permission to withdraw his resignation, which he was permitted to do.

Moved by His Lordship the Bishop of St. Hyacinthe, seconded by His Grace the Archbishop of Ottawa and resolved "That Evariste Picard-Des-

Digitized by Google

" troismaisons be recommended for the position of school inspector, to " replace Mr. J. B. Delage, who has resigned, with the same salary.

The consideration of a letter received from Inspector Tremblay (of Charlevoix) asking an increase of salary was postponed to the next sitting of the Committee.

The Committee also postponed until its next sitting the consideration of questions concerning the division of the school district of Yamachiche, and the redistribution of the limits of school inspectors.

Moved by the Honourable P. J. O. Chauveau, seconded by His Lordship the Bishop of Rimouski, and resolved : " That, seeing the " necessity of subdividing certain districts for purposes of inspection, on " account of their extent and of the number of schools comprised in them, " this Committee respectfully recommends the Government to ask the " Legislature to increase the sum at its disposal for the inspection of " schools by an amount which will suffice for the above object."

Moved by His Lordship the Bishop of Rimouski, seconded by the Honourable P. J. O. Chauveau, and resolved : " That the Reverend Canon " Carbonneau, the Reverend Menard Belzile, Auguste Tessier, Esquire, " advocate, and Doctor Pierre A. Gauvreau, be recommended as members " of the board of Examiners for Rimouski to replace the late Vicar General " Monseignor Langevin and Canon Rouleau."

Moved by His Lordship the Bishop of Nicolet, seconded by the Honourable F. Langelier, and resolved : " That this Committee recommend " that the examinations for obtaining teacher's diplomas before the Nicolet " Board of Examiners, be held on the second Tuesday of the months of " February, June and October."

The Committee proceeded to the distribution of the Superior Education fund.

Moved by the Honourable Mr. Justice Jetté, seconded by His Lordship the Bishop of Sherbrooke, and resolved : " That a sub-committee, composed " of His Eminence Cardinal Taschereau, His Lordship the Bishop of Three- " Rivers, the Honourable L. F. R. Masson, the Superintendent and the " Honourable Judge Jetté, be formed to ascertain a new method for the " distribution of the grants to institutions of Superior Education, especially " upon the subject of the increase of fees for tuition in colleges and con- " vents so as to make up the deficiency, in whole or in part, in the grants " now made to these educational establishments ; and that, in the mean " time, a reduction of ten per cent be this year made upon the grants to " classical colleges, so as to enable this Committee to meet the fresh " demands made upon it."

SITTING OF THE 25th SEPTEMBER, 1889.

PRESENT:—The same, with the exception of His Grace the Archbishop of Montreal.

Moved by His Lordship the Bishop of Rimouski, seconded by Honourable L. F. R. Masson, and resolved: "That the Reverend Theodore "Landry, parish priest of New Carlisle, and the Reverend S. Fraser, parish "priest of St. John the Evangelist, be appointed members of the Roman "Catholic Board of Examiners of New Carlisle to replace the Reverend C. "E. Trudel and Donat Eusebe Delage."

The Committee continued the distribution of the Superior Education fund.

Moved by the Honourable Mr. Justice Jetté, seconded by His Lordship the Bishop of Sherbrooke, and resolved "That the following amounts "be granted to the hereinafter mentioned institutions, viz:

"Subject, in every case, to the examination by the Superintendent of "the financial condition of the school or institution in question, and the "application of the law by the refusal of the grant, when the debts shall "exceed the rate fixed by article 2907 of the Revised Statutes of the Pro-"vince of Quebec."

Moved by Honourable Mr. Mercier, seconded by His Lordship the Bishop of Three-Rivers, and resolved: "That the Superintendent be "authorized to apportion the deficit in the new grants, (if there be a deficit,) "among the grants made this year to the institutions of superior education "receiving more than twenty dollars—classical colleges not included—"out of the ten per cent deducted from the classical colleges; taking into "account, in reducing such deficit, the reductions already made on former "grants."

The Committee authorized the Superintendent to pay out of the funds of the Roman Catholic Committee the cost of printing the table of Superior Education submited to it, and to publish a similar table for the sitting of next Autumn, as well as a list of grants made to poor school municipalities.

The Committee proceeded to the distribution of the poor municipalities fund.

The Committee recommended to the Government the adoption of the lists redistributing the Superior Education Fund and the Poor Municipalities Fund.

SITTING OF THE 17th MAY, 1890.

PLESENT:—The Superintendent, in the chair, His Eminence Cardinal Taschereau, His Grace the Archbishop of Montreal, His Grace the Archbishop of Ottawa, Their Lordships the Bishops of Three-Rivers, Rimouski, Sherbrooke, St. Hyacinthe, Nicolet and Chicoutimi, His Lordship the Vicar Apostolic of Pontiac. Honourable Sir N. F. Belleau, Honourable L. F. R Masson, Honourable Mr. Justice L. A. Jetté, Honourable F. Langelier, Messrs. P. S. Murphy and H. R. Gray.

The minutes of the last meeting were read and adopted.

Moved by His Eminence Cardinal Taschereau, seconded by the Honourable Mr. Justice Jetté: "That this Committee desire to record in "their archives the expression of their profound regret at the death of the "Honourable Mr. P. J. O. Chauveau, a member of this Committee since "the organization of the Council of Public Instruction and formerly "Minister of Public Instruction, who, during the whole of his career, so "continually strove for the advancement of education in this country and "to whom we are indebted for most of the progress so far attained."

Adopted unanimously.

The sub-committee upon class books made the following reports:

Digitized by Google

The sub-committee upon class-books.

SITTING OF THE 17th MAY, 1890.

PRESENT:—His Eminence Cardinal Taschereau, His Lordship the Bishop of Rimouski, the Honourable Gédéon Ouimet, and Mr. P. S. Murphy,

The Honourable Mr. Ouimet moved: "That the *Traité élémentaire* "*d'Hygiène privée* and the *Cathéchisme d'Hygiène privée*, by Doctor J. J. Des-"rochers be approved."

Adopted.

The Honourable Mr. Ouimet moved: "That the book intituled: "*La* "*lettre ou leçons de style épistolaire*," by Miss A. Germain, be approved."

Adopted.

The Honourable Mr. Ouimet moved: "That Mr. J. A. Langlais' series "of copy-books, be especially recommended."

After discussion, this motion was held over till the next sitting of the sub-committee.

(Signed) E. A. CARD. TASCHEREAU,

Arch. of Quebec

Moved by the Honourable Mr. Justice Jetté, seconded by His Lordship the Bishop of Nicolet, and resolved: "That this report be adopted, but that "at the same time, this Committee must express their entire disapproval "of the lamentable custom which prevails in this country of giving to "children ridiculous names often chosen from novels, and that the "Superintendent be requested to write to Miss Germain to recommend "her, in her next edition to change the names of Rosa, Amanda, Arabella etc., for others more christian and simple."

The sub-committee on the most acceptable manner of distributing the Superior Education fund, also submitted the following report, which was adopted:

PRESENT:—His Eminence Cardinal Taschereau, in the chair, His Lordship the Bishop of Three-Rivers, the Honourable L. F. R. Masson, the Honourable Mr. Justice Jetté and the Superintendent.

The Superintendent submitted a number of statistics, which the sub-committee recommended to be printed.

The sub-committee adjourned till the day preceding the sitting of the Roman Catholic Committee in the month of September next.

The following minutes of the sub-committee on the examination of candidates for school inspectorships, were read and adopted.

Digitized by Google

Eighth Sitting of the sub-committee on the examination of candidates for school inspectorships.

SITTINGS OF THE 15th AND 16th JANUARY, 1890.

PRESENT :—The Honourable P. J. O. Chauveau, in the chair, abbé Rouleau, Messrs P. S. Murphy and F. X. Drouin.

Messrs. F. X. Toussaint and John Ahern, professors of the Laval Normal school also acted as additional examiners.

The minutes of the last meeting were read and approved.

In the absence of His Lordship Bishop Begin, who, being then principal of the Laval Normal School, acted during the last sitting as chairman *pro tempore*, the Honourable P. J. O. Chauveau, chairman of the sub-committee, was authorized to sign the same.

After consideration of a letter from abbé Verrault, principal of the Jacques-Cartier Normal School in which he suggested;

1. The fixing of a date for the annual meeting of this sub-committee.

2. The preparation in writing of the subjects of examinations, as is done for admission to the study and practice of Law and Medicine;

This Committee recommended:

a. "That the date of the annual meeting be fixed for the last Wednesday "of the month of August."

b. "That the question of the preparation in writing of subjects of "examination be submitted for the approval of the Roman Catholic Com-"mittee of the Council of Public Instruction."

Four candidates, Messrs. Jean-Baptiste Primeau, Joseph Zoel Dubeau, Joseph Alexandre Chabot, and Joseph Hormisdas Prud'homme, were admitted to examination.

Mr. Jean-Bte Primeau, who was allowed to present himself again for examination on the following subjects: "the drafting of a report," "a French and English translation", for which subjects he had not obtained a sufficient number of marks at the examination which he had already passed at the last session on the 10th and 11th of March 1887, at which examination he had only obtained the note "*Good*"; was awarded the note "*with distinction*", being the same result as that obtained by each of the other three candidates as shewn in the following table:

Notes of examination of 10th and 11th March, 1887.

Moved by the Honourable Sir N. F. Belleau seconded by His Grace the Archbishop of Ottawa, and resolved : " That Mr. F. X. Toussaint be appointed to replace the late Honourable P. J. O. Chauveau as a member of the sub-committee for the examination of candidates for the position of school inspector."

His Lordship the Bishop of Nicolet produced a list of questions for the examination of candidates for teachers' diplomas, which he had been asked to prepare.

The Committee decided that this list of questions should be considered by the sub-committee on books at its next sitting.

The Honourable F. Langelier gave notice that, at its next sitting, he would bring before the Committee the question of the course of studies, which in his opinion is much too extensive and from which several subjects should be struck.

Moved by His Grace the Archbishop of Ottawa, seconded by His Lordship the Vicar Apostolic of Pontiac, and resolved ; " That the Reve- " rend Father Lauzon be appointed a member of the board of examiners of " Hull to replace the late Reverend Father Gauvin."

Moved by his Lordship the Bishop of Chicoutimi, seconded by His Lordship the Bishop of Nicolet and resolved : " That the Reverend " Ambroise Fafard, parish priest of Baie St. Paul, in the County of Charle- " voix, be appointed a member of the Board of Examiners of Charlevoix to " replace the late Reverend P. Boily."

" And that the Reverend L. Tremblay, parish priest of St. Methode, " be appointed a member of the Board of Examiners for Lake St. John to " replace Mr. A. N. Bourget who has removed from the locality."

Moved by His Lordship the Vicar Apostolic of Pontiac, seconded by

His Grace the Archbishop of Ottawa, and resolved : " That Mr. A. Gaboury " be appointed member of the Board of Examiners for Pontiac to replace " Mr. C. P. Rooney."

After the reading of a letter from abbé Rouleau, principal of the Laval Normal School, requesting the Committee to recommend to the Government, that Mr. Lefebvre, professor of Drawing in the establishment, be specially instructed to acquaint himself with the different methods followed in the best schools of design in the United States, in England, France and Belgium.

It was moved by Mr. H. Gray, seconded by Mr. P. S. Murphy, and resolved : " That the request of Abbé Rouleau with reference to Professor " Lefebvre be recommended to the Government."

After reading the letters of the Reverend Sisters M. de St. Thomas d'Aquin and St. Raphael, suggesting the reduction, to sixteen years, of the age at which pupils should be admitted to their examinations, it was moved by the Honourable F. Langelier, seconded by the Honourable Mr. Justice Jetté, and resolved : " That this Committee do not now consider it " advisable to recommend a change in the law."

The consideration of the petition asking for the division of the municipality of Yamachiche, was deferred to the next sitting of the Committee.

The consideration of the following matters was also deferred to the next sitting, viz :

The application for an increase of the grant to the Commercial Academy of Arthabaskaville.

The application of the Reverend R. Casgrain, parish priest of Sillery, for a grant to the boys 'academy of St. Colomban de Sillery.

The application of the Reverend Sister M. de St. Thomas d'Aquin for authority to give the name of academy to the convent of Lotbiniere, at present classed with model schools.

The application of Messrs. Beland, Gay and McGown for an increase of salary.

Moved by the Honourable F. Langelier, seconded by the Honourable Mr. Justice Jetté, and resolved :

" That a sub-committee, composed of His Eminence Cardinal Tasche- " reau, Sir N. F. Belleau, the Superintendent and the Honourable F. Lan- " gelier, be instructed to consider the question of paying inspectors a fee " for each school visited, according to a fixed scale, and in proportion to " the greater or lesser amount of trouble experienced in making such " inspection in each district; and to report to this Committee at its next " sitting."

Digitized by Google

Moved by His Lordship the Bishop of Rimouski, seconded by His Lordship the Bishop of Nicolet, and resolved:

"That the "Code of Public Instruction" "be, at the request of the "Roman Catholic Committee of the Council of Public Instruction, sent by "the Government to all parish priests and priests in charge of parishes in "the Province."

Moved by His Lordship the Bishop of Chicoutimi, and resolved:

"That the erection of a new building for the Laval Normal School is "desirable, and that a sub-committee, composed of His Eminence Cardinal "Taschereau, His Lordship the Bishop of Chicoutimi, of the Honourable "Messrs. Masson and F. Langelier and of the Superintendent, be appointed "to devise the necessary steps to attain this end, and to report to this "Committee at its next sitting."

The Committee did not deem it advisable to recommend the petition for a gratuity presented by Mr. Tremblay, School Inspector, inasmuch as the settlement of all such claims rests exclusively with the Government.

The Committee then adjourned.

PROTESTANT COMMITTEE.

QUEBEC, 25th September, 1889.

Which day the quarterly meeting of the Protestant Committee of the Council of Public Instruction was held.

PRESENT:—The Right Rev. James Williams, D.D., Lord Bishop of Quebec, in the chair; R. W. Heneker, Esq., D.C.L., L.L.D.; Sir William Dawson, C.M.G. LL.D., The Venerable Archdeacon Lindsay, M.A.; George L. Masten, Esq.; The Rev. W. I. Shaw, LL.D.; Dr Cameron, M.P.P.; A. W. Kneeland, Esq, M.A., Ph. D; E. J. Hemming, Esq., D.C.L.; The Very Rev. Dean Norman, D.D.; The Rev. George Weir, LL.D; The Rev. George Cornish, LL.D.

Theminutes of the previous meeting were read and confirmed.

Moved by the Very Rev. the Dean of Quebec, seconded by the Venerable Archdeacon Lindsay:—

"That the Secretary be authorized to supply any accredited members of the Press with any abstract of the proceedings of this committee as early as possible after each session for insertion in the newspapers.—*Carried.*

A letter was read from the Hon. Mr. Justice Church regretting his inability to attend in consequence of official duties.

The Secretary submitted the following items of correspondence for the consideration of the Committee:—

1. From Mr. S. M. Logan concerning his relation to the Pension Fund.

The Secretary was instructed to inform Mr. Logan that as the time prescribed for the payment of stoppages for years previous to 1880 has elapsed, the Committee regrets that it cannot interfere in the matter.

2. From the Secretary of the Equal Rights Association, Montreal, submitted for the information of the Committee.

The communication was received and laid on the table.

3. The following letter was read from the Honorable the Provincial Secretary concerning the recommendation of an Inspector for the Counties of Quebec, Megantic, etc., to replace the Rev. M. M. Fothergill, resigned.

PROVINCE DE QUÉBEC,
BUREAU DU SECRÉTAIRE.

QUÉBEC, 22 Mai 1889.

No 2090—'89.

MONSIEUR,

Référant à votre lettre du 16, No 850, '89, j'ai l'honneur de vous informer, par ordre de l'Honorable Secrétaire de la Province, que le gouvernement ne peut point approuver la

Digitized by Google

nomination du révérend Richard Hewton, à la charge d'inspecteur des écoles protestantes en remplacement du révérend M. Fothergill.

J'ai l'honneur d'être, Monsieur,
Votre obéissant serviteur,
(Signé), PH.-J. JOLICŒUR,
Assistant-Secrétaire.

L'HONORABLE G. OUIMET,
Surintendant de l'Instruction Publique.

On the motion of Rev. Dr Shaw, it was resolved :

"That as the Rev. R. W. Hewton has fulfilled the conditions prescribed by law, and is, in the opinion of this Committee, a competent person for the position of Inspector, a deputation consisting of Sir William Dawson and Dr. Heneker be appointed to wait upon the Provincial Secretary in reference to the subject of his letter of the 22nd May last."

The sub-committee appointed to wait on the Honorable the Provincial Secretary with regard to the non-appointment of the Rev. R. Hewton as Inspector for Quebec and Megantic, beg to report :—

"That they were received courteously. The Hon. Mr. Gagnon declined to assign any reason for his action in the matter, stating that the refusal to appoint Mr. Hewton was the result of the action of the Cabinet, and that should the Protestant Committee desire explanations he would, on being so informed by the Protestant Committee, lay the matter before the Cabinet.

"(Signed), R. W. HENEKER,
J. W. DAWSON."

On the motion of Sir William Dawson, seconded by Dr. Heneker, it was resolved :

"That this Committee deeply regrets the action of the Provincial Government in declining to appoint Rev. Mr. Hewton, but in order to prevent injury to the public service, will now proceed to the recommendation of another candidate."

It was moved by Dr. Cameron, and seconded by Dr. Hemming, that Mr. E. M. Gilmour be recommended for appointment to the vacant inspectorship.

It was moved by Rev. Dr. Weir, seconded by Dr. Kneeland, that Mr. John Parker be recommended for appointment to the vacant inspectorate.

On the vote being taken, Mr. John Parker, of Leeds, County of Megantic, was recommended for appointment by the Lieutenant-Governor in-Council as School Inspector for the Protestant Schools of the counties of Quebec, Megantic, etc., to replace the Rev. M. M. Fothergill, resigned, in accordance with Article 1940 R. S. Q.

4. From the Provincial Association of Protestant Teachers, requesting the Committee to place drawing models in all the Protestant academies.

The Committee agreed to refer the communication to the Standing Committee on Text-Books, and the Secretary was instructed to inform the Association that the Committee regrets that it has no funds at its disposal for this purpose.

Digitized by Google

5. From Miss Blanche L. Smith, Montreal, Mr. F. H. Keller, Cookshire, and Mr. W. Reilley, Quyon, applying for diplomas under the regulation of the Committee.

The Committee agreed—(1.) To recommend that Miss Blanche L. Smith be granted a first-class Academy Diploma in accordance with Article 56 of the Committee's regulations, and (2.) To instruct the secretary to inform Messrs. Keller and Reilley that it will be necessary for them to produce the certificates required by Article 40 of the Regulations of the Committee.

6. From Messrs. Gage & Co., Messrs. Copp, Clark & Co., the Canada Publishing Co., and Messrs. Drysdale & Co., concerning school text-books.

The Committee agreed to refer these communications to the Standing Committee on Text-Books.

7. From the McGill Normal School concerning repairs to the Normal School building.

On the motion of the Rev. Dr. Shaw, a sub-committee consisting of Sir William Dawson and the Rev. Dr. Cornish was appointed to represent the case to the Government.

8. From the McGill Normal School recommending that Miss N. E. Green now employed as Instructor of Drawing at a salary of $250 per annum, be appointed Associate Professor of Drawing at a salary of $300 per annum.

On the motion of Rev. Dr. Cornish it was resolved :—

"That Miss N. E. Green be recommended for appointment as Associate Professor of Drawing in the McGill Normal School at a salary of three hundred dollars per annum, to be paid from the present Normal School grant."

9, The semi-annual financial statement and the tabulated returns of the sessional examination of the McGill Normal School were submitted for the information of the Committee.

The Committee agreed that these returns be received, and that a summary of the financial statement be inserted in the minutes.

Summary of Semi-Annual Financial Statement of the McGill Normal School and Model Schools from the 1st of January to the 30th of June, 1889.

10. From Mr. Holliday, of Huntingdon, concerning the course of study for Grade III. Academy, and the requirements of the A. A. examination.

The Committee agreed to refer the communication to a sub-committee consisting of Sir William Dawson (Convener), the Very Rev. Dean Norman and the Rev. Dr. Cornish.

11. From Mrs. Wardrop, Beebe-Plain, submitting a manikin to be authorized for use in schools.

The Committee agreed to recommend the manikin for use in teaching the subjects of physiology and hygiene.

12. From Madame Cornu, concerning the limits of the examination in French for the Model School and Academy Diplomas.

The Committee agreed that the examination for the Academy Diploma should be on Darey's Lectures Françaises, and that the examination for the Model School Diploma should be on Duval's Lectures Choisies, or on the extracts from Darey's Lectures Françaises, beginning on pages 10, 13, 15, 20, 32, 33, 37, 42, 47, 51, 56, 63, 68, 74, 76, 85, 87, 92, 94, 99, and that the examination for the Elementary Diploma be on the part of Duval's Lectures Choisies prescribed for Grade I Academy.

13. The Secretary then submitted the following Financial Statement of the Protestant Committee, which was received, examined and found correct :—

Examined and found correct, R. W. H.

On the motion of Sir William Dawson, it was resolved that a sub-committee on Ways and Means be appointed, consisting of the Chairman, Dr. Heneker, the Very Rev. Dean Norman, Dr. Hemming and Dr. Cameron.

REPORTS.

1. The Secretary submitted a report of the Teachers's Institutes held during the second and third weeks of July last for the information of the Committee. The report was received.

2. The Secretary submitted the following report concerning the first examination under the Protestant Central Board of Examiners, which was received and laid on the table :—

The first examination for candidates for teachers' diplomas, under the Central Board of Examiners, was held during the first week in July last.

In making arrangements for the first examination it was to be expected that unforseen difficulties would arise which can be provided for in subsequent examinations. Of these I need mention only two or three. It was found that the number of candidates that presented themselves at Sweetsburg was so large that it was impossible to secure any one room sufficiently large to accomodate them. It was necessary, therefore, to provide a second deputy-examiner at Sweetsburg, Mr. J. D. Bulman the secretary of the late local board of Sweetsburg, to take charge of a number of the candidates in a second room.

At Portage du Fort, in the County of Pontiac, there is no railroad communication, and I was obliged to express the parcel for that centre to a point in Ontario, and then by stage to Portage du Fort. Many of the candidates at Shawville, a few miles distant from Portage du Fort, preferred to go by rail to Aylmer, forty miles distant, rather than to go overland to Portage du Fort. As Shawville is more central, and more accessible, and as it is the seat of the county academy, it would be well, I think, to transfer the local examination to Shawville for the future. The supplemental examination also presented some difficulties. As the candidates' answers are now examined by five examiners, it is impossible to give the results of the examination before the first of August. As the supplemental examination is fixed for the last Tuesday in August, there are only three weeks in which to notify the candidates, to receive their answers, to prepare the questions, and to send the parcels to each local centre. This supplemental examination involves almost as much work as the principal examination in July, and the Central Board will, no doubt, make some recommendation to the Committee upon the subject of the supplemental examination.

Digitized by Google

CANDIDATES

Candidates presented themselves at all the local centres except Three Rivers. There were 28 men and 186 women—214 in all.

Of these 97 obtained 2nd Class Elementary Diplomas.
15 " 3rd " " "
12 " 2nd " Model School "
1 " " " Academy "

making a total of 125 diplomas granted on examination. In addition to these, six were granted first-class elementary diplomas, and two first-class model school diplomas on the ground of successful teaching, making a total of 133 diplomas granted at the July examination. Of the remaining candidates, fotry failed and forty-nine were entitled to supplemental examinations. Of these forty-nine candidates, forty-seven presented themselves for the supplemental examination on Tuesday the 27th of August.

4 obtained 2nd Class Academy Diplomas.
8 " " Model School "
24 " " Elementary "
7 " 3rd Class " "
4 failed in the examination.

The results of the first examination under the Central Board is, therefore, as follows :—

Second Class Academy Diplomas	5
First Class Model School "	2
Second Class " "	20
First Class Elementary "	6
Second Class " "	121
Third Class " "	22
Total number of Diplomas granted	176

FINANCES.

The total income from the candidates' fees was $432.75.

Some of the candidates were exempt from fees, having failed in the examination last year. The expenses incurred are as follows :—

For Stationery	$ 52.70
For Express, Postage, etc	22.63
For Deputy Examiners	110.85
For examination of candidates answers	170.30
For Filling in Diplomas, Registers, etc. and other extra work	50.00
For Sundries	2.00
	$408.48

This leaves a balance of $24.27, which will more than cover one or two small accounts not yet received.

The expenses of the first examination include certain items which will not be required in future, such as the official stamp, and about one-third of the stationery purchased was not used, is available for next year. The results of the first examination are, on the whole, satisfactory, but the experience gained this year will enable the Board to improve the work at many points next year.

(Signed), ELSON I. REXFORD,
Secretary.

3. Mr. Masten, as Convener of the Standing Committee on Text-Books, made an interim report and submitted a first draft of a revised list of text-

Digitized by Google

books, and recommended that in order to meet the requirements of the Provincial Board of Health the present regulation concerning teaching of Physiology and Hygiene in Model Schools and Academies be extended to the Elementary Schools.

The Committee agreed to receive the report and to adopt the recommendation concerning the teaching of Physiology and Hygiene in the Elementary Schools.

On the motion of the Very Rev. Dean Norman, Wilkinson's Easy Latin Prose Exercises, and Foster's Citizen Reader, were referred to the Standing Committee on Text-Books.

On the motion of George L. Masten, Esq., Dr. Kneeland was appointed Convener of the Standing Committee on Text-Books.

4. The Inspector of Superior Schools was then requested to appear before the Committee and present his annual report of the inspection of the Superior Schools, and his report of the results of the June examination of the Model Schools and Academies.

5. The sub-committee on the distribution of grants then submitted a report based upon the results of the examination and inspection of the Superior Schools, which was received, examined and amended, and adopted in the following form :

I.—UNIVERSITIES AND COLLEGES.

1.—*From Marriage License Fees.*			
McGill University	$2,500		
University of Bishop's College	1,250		
Morrin College	1,250		
		$5,000

6. Dr. Heneker, as Chairman of the sub-committee on the Jesuits' Estates, presented the following report :

REPORT OF THE SUB-COMMITTEE ON THE JESUITS' ESTATES.

On Wednesday, the 29th of May, the sub-committee attended at the Government offices, St. Gabriel Street, Montreal, by appointment with the Honorable Mr. Mercier, Premier of the Province. All the members of the sub-committee, with the exception of the Rev. Dr. Shaw, were present. Dr. Shaw's presence was unavoidable, but he signified his full concurrence in the action of the sub-committee.

Digitized by Google

They were received by the Honorable the Premier and the members of the Provincial Government.

Dr Heneker, Chairman of the sub-committee, read the memorandum adopted by the Protestant Committee on the subject of the Jesuits' Estates, and placed the document in the Premier's hands.

The Premier then asked each member of the sub-committee in turn, whether he wished to make any remark, and each in turn expressed his concurrence in the memorandum as an embodiment of his views on the question.

The Premier then stated that he felt quite sure that the sub-committee did not expect from him an immediate reply to so important a document, but promised that the matter should receive early consideration.

On the 11th of June, the Premier wrote to Dr. Heneker (as Acting Chairman of the Protestant Committee). In this letter he—as a preliminary answer to the memorandum—refers to the proceedings of the Protestant Committee of the 14th of May last, and to the amendment then moved to the resolution for the adoption of the memorandum, by the Rev. Dr. Cook, and seconded by the Rev. Dr. Weir, which was lost on a division.

He states that although the Protestant Committee rejected Dr. Cook's amendment, yet they do not express their willingness to accept the $60,000 voted by the Legislature as an equivalent on the part of the Protestant population for the $400,000 granted to the Roman Catholic community.

He also refers to the action of outside bodies who urge and "command" the Protestant Committee to decline the $60,000, and he concludes by stating that when the decision of the Protestant Committee on this question is made known to him the Government will be prepared to enter on the discussion of the memorandum.

On the receipt of this letter Dr. Heneker lost no time in again calling the sub-committee together. Due notice was given to each member, and the meeting was held at the Windsor Hotel, Montreal, on the 17th of June. All the members were present with the exception of Dr. Cameron.

The letter of the Premier was discussed, and after careful consideration the sub-committee came to the conclusion that the Protestant Committee should deal with this new phase of the question as the powers of the sub-committee were limited to the placing of the memorandum in the hands of the Premier. They instructed their Chairman to inform the Premier as to this fact; and also to lose no time in placing in the hands of the Lord Bishop of Quebec—who had recently returned to the Province—the Premier's letter of the 11th of June, with such explanation as would enable his Lordship to understand the present position of affairs.

Respectfully submitted on behalf of the sub-committee,

(Signed,) R. W. HENEKER,

Chairman.

Quebec, 25th September, 1889.

On the motion of the Rev. Dr. Cornish, the report was received.

The following is the letter of the Prime Minister, referred to in the foregoing report:—

CABINET DU PREMIER MINISTRE,

PROVINCE DE QUÉBEC,

QUÉBEC, 11th June, 1889.

MY DEAR DOCTOR:

When the Ministers of the Province of Quebec had the pleasure to receive you at the Government House in Montreal, with Sir William Dawson, Dr. Church, Dr. Cameron and

Digitized by Google

Dr. Hemming, you told that the Rev. Mr. Rexford had received instruction to send me a copy of the proceedings of the sitting of your Committee on the 14th of Maylast, and that no doubt I would find it in my office when I reached Quebec.

I beg to inform you that such copy was never sent to me, and that I had to send for it, and got it only this day.

In receiving this document I communicated with my colleagues and we examined with great care the memorandum, fyled at the Government House, in Montreal, and, as a preliminary answer, we beg to state :—

1. The memorandum submitted to us was contained in a main motion made by Sir William Dawson, seconded by the Very Reverend Dean Norman ;

2. To this main motion an amendment was moved by Rev. Dr. Cook, seconded by Rev. Dr. Weir, which amendment was defeated by ten against two;

3. The last paragraph of the amendment reads as follows : " Also, on their behalf, the Committee declines the proffered sum of $60,000 as at all equivalent to the guarantee of a specially invested fund, inalienable, as the Committee believes, by the conditions on which it was given, and on which it has hitherto been held, and by the special provisions of the 93rd sec. of the B. N. Act ;

4. Althought this amendment declining the proffered sum of $60,000 was defeated, no resolution was passed accepting either that sum, nor any other one, so the Government does not know yet whether the Protestant Committee is disposed to accept anything in compensation, according to the Protestant population of this Province of the $400,000 to be paid to the Catholic community ;

5. In every meeting held by Protestants in this Province or in Ontario, in connection with this very important question, resolutions were passed to the effect of asking the Protestant Committee to refuse, I may say forbidding it to accept, any part of that sum of money ;

6. Under the circumstances the Government of the Province of Quebec do not think it advisable to enter into the merit of the questions raised by the said memorandum, before the Protestant Commitee of Public Instruction of this Province decide formally and in very clear terms, whether they accept the said grant of $60,000, either in the way mentioned in the law, or in any other way, as a fair compensation, according to the Protestant population of this Province, of the $400,000 to be paid to the Catholic community ;

7. When the Protestant Commitee has done what is required in the preceding paragraph of this letter, the Government will be in a position, no doubt, to discuss with you the merit of the questions raised in said memorandum.

Waiting for an early answer, I have the honor to be, with due consideration,

Yours truly,

(Signed) HONORÉ MERCIER,
Prime Minister.

DR. R. W. HENEKER.

Acting Chairman of the Protestant Commitee of the Council of Puclic Instruction, Sherbrooke, P. Q.

The Chairman then submitted the following Memorandum for the information of the Committee :—

MEMORANDUM.

I received from Mr. Heneker the papers and correspondence relating to the Jesuits' Estates. I then called upon Mr. Mercier, and told him that the matter would come before the Commitee at its first meeting.

Digitized by Google

On the following morning I forwarded to Mr. Mercier a memorandum containing the result of our conversation as I apprehended it, and requested him to inform me if I had represented it correctly.

To that communication Mr. Mercier replied that, until he had received an answer to his question, he held our conversation to be confidential. This letter is attached to this memorandum.

(Signed) J. W. QUEBEC.

BUREAU DU GOUVERNEMENT,

PROVINCE DE QUÉBEC.

76 Rue St. Gabriel,

MONTREAL, 9th July, 1889.

MY LORD:

I have just received your Lordship's letter of the 5th inst., giving a synopsis of our conversation of that day, and in answer I beg to state that I consider this conversation to be confidential till I receive an answer to my communication to Mr. Heneker, in connection with the acceptance or refusal of the $60,000 grant by the Protestant Commitee. I have the honor to be, with the greatest respect, my Lord,

Your most devoted,

(Signed) HONORÉ MERCIER,

Prime Minister.

HIS LORDSHIP Bishop of Quebec,

Quebec.

Moved by the Rev. W. I Shaw, LL. D., seconded by the Venerable Archdeacon Lindsay, and

Resolved—That in answer to the communication of the Honorable the Premier, dated Quebec, June 11th, 1889, requesting this Commitee to give a specific reply to the enquiry therein contained, we hereby declare our readiness to discharge the duties devolving upon us as the Protestant Commitee of the Council of Public Instruction, as required by Article 2203 of the Revised Statutes of Province of Quebec, and to administer any sums placed in our hands by the provincial Legislature for Superior Education.

2. That at the same time viewing with apprehension any legislation imperilling existing guarantees ior the support of Superior Education in this Province, and in accordance with the action of this Commitee at its meeting held May 14th, 1889, we hereby strongly re-affirm our request that the Government will by legislation restore the caucelled Trust, as set forth in our repo t of the above date and replace the Jesuits' Estates, or the proceeds thereof, as an Investment Fund for Superior Education; and also re-establish the Superior Education Income Fund as constituted by the Act of 1856.

3. That the principal difficulty felt by this Commitee with respect to the Jesuits' Estate Act and the sum of $60,000 referred to in the letter of the Honorable the Premier, arises from the fact that the grant of the said amount is embodied in an Act of the Legislature whch has been authoritatively stated to render effete the clauses of the educational law containing the above guarantees.

4, This Commitee would also again draw the attention of the Government to the representations contained in its report adopted May 14th, 1889, to the following effect:—

"The Roman Catholic body receive a free grant of $400,000, and the rights of the Government in Laprairie Common, while the Protestants receive permission to distribute the income arising from the investment of $60,000, subject to the approval of the Lieutenant-Governor-in-Council;"

Digitized by Google

Further, we submit that the sum of $60,000 granted by the Jesuits' Estates Settlement Act, is less than the amount due to the Protestants, according to population.

5. We, therefore, respectfully request that the legislation necessary to restore and perpetuate the above mentioned guarantees in favor of Superior Education in this Province, and otherwise meet the views of this Committee in the premises, be obtained, if possible, at the approaching session of the Provincial Legislature, and that in the meantime interest be allowed upon the capital sum of $60,000 from the time the Jesuits' Estates Settlement Act came into effect.

A sub-committee consisting of Rev. Dr. Shaw, Sir William Dawson, and Rev. Dr Cornish, was appointed to draw up a fair copy of the foregoing resolution, and the Chairman was authorized to transmit the resolutions to the Honorable the Premier of the Province.

On the motion of Mr, G. L. Masten, seconded by Dr. Heneker, Peter McArthur, Esq., of Dalesville, was appointed associate member of the Protestant Committee, to fill the present vacancy.

Moved by Dr. Kneeland, seconded by Mr. G. L. Masten, (1) That this Committee henceforth authorize text-books for use in the Protestant Schools of the Province, only on condition that the publishers thereof furnish a reasonable guarantee that said text-books be kept in stock in the Province, and be furnished to the trade, in general, at a fixed maximum retail price for a period of not less than five years, and (2) that, in order to encourage the publication of suitable text-books in the Province, and to prevent loss to the people, any school municipality having selected a list of text-books from the authorized list, according to the regulations of this Committee, be required to retain the said list in use for a period of not less than five years.—Carried.

There being no further business the Committee adjourned to meet on the last Wednesday of November, or earlier, on the call of the Chairman.

(Signed.) ELSON I. REXFORD,

Secretary.

Quebec, 6th November, 1889.

Which day the quarterly meeting of the Protestant Committee of the Council of Public Instruction was held.

PRESENT:—The Right Rev. James Williams, D.D., Lord Bishop of Quebec, in the Chair. The Rev. John Cook, D.D., Sir William Dawson, C M.G., LL.D., R. W. Heneker, Esq., D.C.L., The Hon. Judge Ruggles Church, The Ven. Archdeacon Lindsay, M.A., The Rev. W. I. Shaw, L.L.D., Dr. A. Cameron, M.P.P., A. W. Kneeland, Esq., M.A., Ph. D., E.J. Hemming, Esq., D.C.L., The Very Rev. Dean Norman, D.C.L., The Rev. George Cornish, L.L.D., The Rev. George Weir, L.L.D.

The Minutes of the previous meeting were read, and on the motion of Rev. Dr. Shaw, seconded by the Dean of Quebec, it was resolved:—

"That the following statement be inserted as a marginal note against the grants to the Universities and Colleges in the Minute." The grants to the Universities and Colleges being standing grants were inserted without being recommended in detail by this Committee."

The Minutes as amended were then confirmed.

Digitized by Google

Letters were read from G. L. Masten, Esq., and from R. J. Hewton, Esq., regretting their inability to be present at the meeting.

The Secretary submitted the following items of correspondence for the consideration of the Committee :—

1. From the Provincial Association of Protestant Teachers giving notice of the election of Mr. R. J Hewton, M.A., as an Associate member of the Protestant Committee.

The Communication was received.

2. From Peter McArthur, Esq., accepting the position of Associate member of the Protestant Committee.

The communication was received.

3. From A. W. Stevenson, Esq., concerning the Model School at Lennoxville.

The Committee agreed that the school at Lennoxville be placed on the list of superior schools for inspection and examination.

4. From Dr. Thornton concerning the New Richmond Model School.

The Secretary was instructed to inform Dr. Thornton that as all the funds have been distributed, the Committee regrets that no further action can be taken this year, but that his representations will be taken into favorable consideration at the next distribution of the grants.

5. From the Protestant Board of School Commissioners for Montreal, and from Rev. James Fraser concerning grant of $60,000.

The communications were received and laid on the table.

6. From the Honorable the Premier of the Province concerning the statistics of the Protestant schools, submitted for the information of the Committee.

7. From the Honorable the Secretary of the Province concerning the teaching of French in Protestant schools, submitted for the information of the Committee.

8. From the Hon. Wm. Rhodes concerning scholarships in the Quebec High School.

The communication was received and the Secretary was instructed to inform the Hon. Wm. Rhodes that the Committee has no power to recommend for appointment to the Government scholarships of the High School.

9. From the Protestant Central Board of Examiners recommending the following amendments to the regulations :—

(1.) That Lachute and Waterloo be made Centres of Examination.

(2.) That the Centre of Examination for the County of Pontiac be removed from Portage du Fort to Shawville.

Digitized by Google

(3.) That the English required for the Academy Diploma be the same as that prescribed for Grade III. Academy Course.

(4.) That the Supplemental Examinations be discontinued in view of the practical difficulties involved in conducting them, and that candidates for Elementary Diplomas who fail in one or two subjects may, on the recommendation of the Board, be granted a permit to teach for one year on condition that they agree to present themselves at the next examination of the Board in those subjects in which they failed.

The Committee agreed to amend regulation 20 to read as follows:—

20. The Cities of Montreal, Quebec, and Sherbrooke shall be centres of examination for the three grades of diplomas; and the following places shall be centres of examination for elementary and model school diplomas, viz.: Shawville, Aylmer, Lachute, Huntingdon, Sweetsburg, Waterloo, Stanstead, Richmond, Inverness, Three-Rivers, New-Carlisle and Gaspe Village."

The Committee agreed to amend regulation 39 to read as fellows:—

Candidates for elementary diplomas who fail in one or two subjects of the examination, may, on the recommendation of the Central Board of Examiners be granted third class elementary diplomas, and candidates so recommended shall be entitled to receive second class elementary diplomas at the next examination upon passing in those subjects in which they failed.

10. The elementary schools in relation to the Protestant Committee.

On motion of Archdeacon Lindsay, seconded by Rev. Dr. Shaw, it was resolved,—

"That a standing sub-committee on Elementary Schools be appointed; with instructions to report to this Committee at each meeting, the sub-committee to consist of the mover, as convener, the seconder, Mr. Masten, Dr. Kneeland, and Mr. Hewton, and that the sub-committee be further instructed to enquire as to the best methods of providing increased financial support for Elementary Schools, and to communicate with the Superintendent with the view of securing the same."

11. From J. H. Keller, Esq., Cookshire, applying for a diploma under the regulations of the Protestant Committee, and submitting certificates.

The secretary was instructed to communicate with Mr. Keller to obtain further information.

The Chairman submitted the following letter from the Honorable the Premier of the Province in answer to the resolution of the Committee concerning the Jesuits' Estates Settlement Act, which was read and received:—

Digitized by Google

CABINET DU PREMIER MINISTRE PROVINCE DE QUÉBEC

QUEBEC, October 9, 1889.

My Lord:

We have, my colleagues and myself, examined with great care and a deep sense of the responsibility bearing on us, the resolutions of the Protestant Committee of the Council of Public Instruction, passed at its session of the 25th of September last and transmitted by Your Lordship's letter of the first of October instant, and I am authorized to answer as follows:

1. I am indeed very happy to hear that the members of the Protestant Committee declare their readiness to discharge the duties devolving upon them and to administer any sums placed in their hands by the Provincial Legislature for superior education. I understand, therefore, that they accept, in the name of the Protestants of this Province, the public trust imposed upon them to distribute the $60,000 given them by the Jesuits' Estates Act.

2. I understand also that this acceptance is made on four conditions, viz.: (*a*) That the superior education fund in existence before the Jesuits' Estate Act be restored; (*b*) That the Protestant Committee should receive in capital the sixty thousand dollars, instead of the right to distribute the income arising from the investment of the said amount; (*c*) That this amount of $60.000 should be increased, because it is less than the amount due to the Protestants, according to population; (*d*) That the interest on the said amount of $60,000 be allowed from the time the Jesuits' Estates Act came into effect till the said amount is paid.

3. With your kind permission, My Lord, I will examine separately every one of these conditions, (*a*) That the superior education fund in existence before the Jesuits' Estates Act be restored.

4. The intention of the Government never was to abolish this fund, and therefore we cannot have the slightest objection to recommend that the law be re-constituted as it was before the Jesuits' Estates Act, if it is found necessary. The truth of this statement aud the sincerity of our action in this behalf appear, (1), in the following extract of an official letter sent by the undersigned to Cardinal Simeoni, in answer to a question on the very same subject, (2), in a letter sent me by Mr. Oliver, one of the Law Clerks of the Legislature, and one of the secretaries of the Commission for the revision of the Statutes of the Province, published at the end of last year, and (3) in the text itself of section 4 of the Jesuits' Estates Act. Here are these documents:

1. Extract of an official letter sent to Cardinal Simeoni, Prefect of the Sacred Congregation of the Propaganda at Rome, dated the 25th October, 1888. The first question, "Does the Government of the Province of Quebec intend to continue to give in future, either to the three Archbishops or to the five Bishops of Lower Canada, or again, to the Jesuit fathers, the grants hitherto voted for superior education, even after having paid to the parties indicated by His Holiness the Pope the sum granted by the act of last session in settlement of the question of the Jesuits' Estates?" Answer—Yes. In virtue of an old law the revenues of the Jesuits' Estates formed a special education fund, the amount whereof, which has hardly varied since 1867, is now $78,410, of which $66,240 is at the disposal of the Roman Catholics, and $12,170 at the disposal of the Protestants. The Government intends to leave that amount intact, at the disposal of the Council of Public Instruction. This council consists, (1) *ex-officio* of all the Roman Catholic Bishops of the province and of a Roman Catholic layman, appointed by the Government for each of such Bishops (2) of a certain number of Protestants who are also appointed by the Government. This Council meets very seldom, and then only to discuss matters of general interest respecting education. The affairs are practically managed by two separate committees, (1), one called the Roman Catholic Committee, composed of the Roman Catholic Bishops and Roman Catholic laymen appointed as aforesaid, (2), another called the Protestant Committee, consisting of Protestants, also appointed as aforesaid, and of a certain number of associate members appointed by that committee. Each committee sits separately, and every year it makes the distribution of the sums above mentioned, namely: 1. The Roman Catholic Committee, $66 240. 2. The Protestant Committee, $12,170. The document A herewith annexed shows how this sum of $66,240 was distributed by the Roman Catholic Committee this year and last year, limiting the details to classical colleges, and giving in a lump sum the amounts granted to convents and other institutions of lesser importance in each diocese. Document A: Amounts voted by the Legislature of Quebec,

Digitized by Google

for superior education during each of the years 1886-87 and 1887-88, $78,410; share of Roman Catholics, $66,240; share of Protestants, $12,170. $78,410.

2. Letter from Mr. Theo. H. Olivier :

QUEBEC, 4th October, 1889.

Hon. H. Mercier, Premier, Québec :

SIR, In compliance with your request of this A. M. I have the honor to state the following. During the early part of last session you sent for me as one of the secretaries of the late Codification Commission, to meet and explain to Dr. Cameron, M.P.P., why sections one to five of chapter 15 of the consolidated statutes for Lower Canada had not been included in the Revised Statutes then just come into force. I met you and the doctor in the Speaker's room, and there, in answer to your question, "Whether we, (that is, Mr. Pariseault and myself), had consulted any persons before leaving out the sections in question." I told you that we had consulted no one, considering that we were sufficiently authorized by Sections 6 and 7 of the Act 51-52 V., C. 13, but had spoken to the officers of the Education Office, who had told us that these sections had for years been disused. I have the honor to be, sir,

THEO. H. OLIVER,

English Secretary of the late Codification Committee.

3. Section four of the said Act provides that the interest of the $60,000 " shall be apportioned in addition to and in the same manner as any sums now granted by law for the purpose of Protestant superior education in this province." These words surely show conclusively that our intention was not to cancel the fund of superior education, nor to take away from the Protestant Committee any right they were then enjoying or any grant of money they were then receiving from the Government. (*b*) That the Protestant Committee should receive in capital the $60,000 instead of the right to distribute the income arising from the investment of said amount. 5. Allow me to offer your Lordship the following observation on this point which will. I hope, also be found satisfactory. The said bill was bill No 169 of the session of 1888, and was introduced and read for the first time on the 28th of June, based on resolutions recommended by His Honor the Lieut-Governor. The fourth resolution reads as follows: (Journals of Legislative Assembly, 1888, page 300.) 4. " On such settlement being effected, the Lieutenant-Governor in Council may pay out of any public money at his disposal a sum of $60,000 to to the different Protestant and dissentient Universities and educational institutions, according to the distribution which shall be made by the Protestant Committee of the Council of Public Instruction. On the 3rd July, page 311 of the same journals, the following procedure took place. " The order of the day being read for the second reading of the bill respecting the settlement of the Jesuits' Estates, the bill was accordingly read a second time and committee to a committee of the whole house. *Resolved*, that this house do immediately resolve itself into the said committee. The house accordingly resolved itself into the said committee, and, after some time spent therein, Mr. Speaker resumed the chair, and Mr. Robidoux reported that the committee had gone through the bill and made an amendment thereunto. *Ordered*, that the bill as amended in the committee be now taken into consideration. The House accordingly proceeded to take the bill into consideration. *Ordered*, That the bill be now read the third time. The bill was accordingly read the third time. *Resolved*, That the bill do pass. *Ordered*, That the clerk do carry the bill to the Legislative Council and desire their concurrence. "

Please notice, my Lord, that an amendment, one single amendment, was made in the committee of the whole House, and the said amendment was to strike off section 4th, already quoted, and to replace it by the following section 4th : " (4) On such settlement being effected, the Lieutenant-Governor-in-Council may pay out of any public money at his disposal a sum of $60,000 to the Protestant Committee of the Council of Public Instruction, to be invested by the said committee. The interest from said investment shall be annually apportioned by the Protestant Committee, with the approval of the Lt.-Governor-in-Council among the Protestant Institutions of superior Education in addition to, and in the same manner as any sums now granted by law for the purpose of Protestant superior education in this Province." When the original section 4th was discussed before the Committee, I was

Digitized by Google

asked by the Hon. Mr. Lynch to suspend the sitting for a few minutes to allow the Protestant members of the House to meet together in an adjacent room and see whether they could agree on an amendment to said clause. The majority of the Protestant members of the House not being disposed to leave the distribution of this capital to the Protestant Committee of the Council of Public Instruction. I willingly granted the request. The Protestant members withdrew and came back, after a very short absence, with an amendment in the handwriting of the Rev. Mr. Rexford, the secretary of the said Protestant Committee with the exception of the word "annually" written in the margin, and which was in the Hon. Mr. Lynch's handwriting. That gentleman asked me if I would accept this amendment, and, on my consenting, he moved it and it was unanimously carried. This amendment is verbatim the present section 4th in the said statute. The original of said amendment is still in the custody of the proper officer of the House. The above statements are corroborated by the three following documents, marked respectively, 1, 2, and 3, the first being a letter from Mr. Louis Delorme, clerk of the Legislative Assembly, the second a certificate from Mr. Charles A. Pariseault, law clerk, and the third being a letter from the Hon. Judge Lynch.

1. Mr. Delorme's letter (translation).

QUEBEC, 9th July, 1889.

Hon. H. Mercier, Prime Minister of the Province of Quebec, Montreal :

SIR,—I have the honor to acknowledge the receipt of your letter of yesterday, in which you ask me for certain information respecting the proceedings of the Legislative Assembly on the bill No. 169. submitted to the committee of the whole house as follows: Bill respecting the settlement of the Jesuits' Estates. (See journals of the 3rd July, 1888, page 311.)

You will observe that this bill was read a second time, amended in committee, and read the third time, all on the same day, *nemine contradicente*, although there was an amendment, and that the usual practice is to postpone the reading of an amendment to a bill to a subsequent sitting, if not to another day. I may add that an amendment was made in committee,which was drawn up in the English language (see the certificate of the law clerk respecting such amendment, which is enclosed herewith). From information I have obtained in the Department of Public Instruction, this amendment is in the handwriting of the Rev. Mr. Rexford, the Protestant secretary of the Department of Public Instruction, and was inserted in the bill, in committee of the whole House, at the request of the Hon. Mr. Lynch. There is a correction in the original, motion, viz, the word annually, which is in the handwriting of that honorable gentleman, who watched this bill very attentively, with Mr. W. Owens, the member for the electoral district of Argenteuil. This amendment was adopted and inserted in the bill in committee, then read twice and adopted by the House and read the third time immediately, as none of the members of the Protestant minority objected to the immediate consideration of the amendment, according to our rules 43-47 (see May, 559, Bourinot, 558, 559) I have the honor to be, etc.

(Signed), LOUIS DELORME,

Clerk of the Legislative Assembly.

2. Mr. C. A. Pariseault's certificate (translation). "After having examined the writing of the amendment made to section 4 of Bill No. 169, intituled An Act respecting the settlement of the Jesuits' Estates. I declare that the said bill as passed was passed in the English language, and that the amendment was drawn up in English. I further certify that, from information obtained in the Department of Public Instruction, the amendment, as drafted in the record, was drafted in the handwriting of Rev. Elson I. Rexford, the Protestant secretary of the Council of Public Instruction, with the exception of the word "annually," which come after the following words in the amendment : 'The interest arising from said investment shall be;" and which appears to be in the handwriting of the Hon. W. W. Lynch.

(Signed), CHAS. A. PARISEAULT,

Law Clerk.

Quebec, 9th July, 1889.

Digitized by Google

3. Hon. Judge Lynch's letter.

MONTREAL, 16th July, 1889.

Dear Mr. Premier,

You asked me a few days since if I recollected the circumstances connected with that clause of the bill, introduced by you during the session of 1888, respecting the settlement of the Jesuits' Estates, which referred to the $60.000. I have a fairly distinct remembrance of what occurred at the time.

The clause in question originally provided that this amount should be divided among the Protestant Universities and other educational institutions of the Province in such manner as should be determined by the Protestant Committee of the Council of Public Instruction. The Protestant members of the House discussed among themselves the advisability of this distribution and conferred with Mr. Rexford, the Protestant Secretary of the Education Department, with the result that they determined to ask you to allow the clause to be modified in such manner as that the same would be paid over to the Protestant Committee to be invested by them and the interest distributed annually in the same manner as the existing sum annually voted for Superior Education is distributed, and when the House was in committee on the whole of the bill you accepted the section thus agreed upon and which is identical with the section of the law as it now stands on the statute book. This is, I think, a complete *résumé* of what occurred at the time.

I am, Mr. Premier,

Yours very truly,

(Signed) W. W. LYNCH.

HON. H. MERCIER,

Premier, etc.,

Montreal.

I need dwell no longer on the subject, my Lord. These documents will be found conclusive no doubt by any intelligent man, and if section 4th of the Jesuits' Estates Act is objectionable on the point raised by the Protestant Committee, it is not the fault of the Government nor of the Roman Catholic members of the House. The responsibility of the change lies entirely and exclusively on the Protestant members. Of course, however, there cannot be the slightest objection on the part of the Government to accept the second condition contained in the resolutions transmitted in connection with the payment of the $60,000. It was the intention of the Government to give the $60,000 in capital to the Protestant Committee the same way and with the same effect as the $400,000 were given to the Roman Catholics, and the Government is ready if the Protestant members of the House agree to it, to restore in the law the original section 4th as placed in bill 169.

(C.) That this amount of $60,000 should be increased because it is less than the amount due to the Protestants, according to population (6). This condition cannot be refused if it is proved that the amount is insufficient. We thought at the time that the amount was the fair proportion to which the Protestants were entitled.

(D.) That the interest on said amount of $60,000 be allowed from the time the Jesuits' Estates Act came into effect till said amount is paid.

7. The Government cannot consent, my Lord, to this fourth condition in the form it is stated, but it is ready to place the Protestants on the same footing as the Roman Catholics in this connection. The interest of the grant to Roman Catholics runs from the 30th. August, 1888, and the Government is prepared to recommend to the Legislature that the interest on the grant to the Protestants should run from the same date and at the same rate.

8. These are the remarks I have to offer. my Lord, upon your honored communication, and I hope they will be found satisfactory. The desire of the Government is to render justice on every occasion, and give full satisfaction to the Protestant minority in this Province, whenever it is possible, and we hope your Lordship, your colleagues, the other members of the Protestant Committee, and generally the Protestants of this Province will appreciate the friendly and liberal way in which we try to meet the views expressed in the resolutions of said committee. I do not think proper to add anything more, my intention

Digitized by Google

being to limit myself to a mere statement of facts, and the publication of documents, and chiefly to avoid any reference to the most regretable agitation that has taken place recently in connection with this question, leaving to the sound judgment and honest feeling of the people of this country to decide who is wrong and who is right in this very important matter.

With profound respect for your Lordship,

I have the honor to be your most devoted,

HONORÉ MERCIER,

Prime Minister.

The Right Reverend James Williams,
Lord Bishop of Quebec, Quebec, P.Q.

Moved by Dr. Heneker, and seconded by Rev. Dr. Cornish, and carried on division:—

First.—That the Committee has heard with great satisfaction that it is the intention of the Government to introduce the necessary legislation in order to restore and perpetuate the Jesuits' Estates Trust as originally constituted; and the provisions made in the Act of 1856 for a permanent Superior Education Investment Fund, in accordance with the memorandum submitted to the Government by this Committee. (Rev. Dr. Cook and Rev. Dr. Weir dissenting.)

Second.—That the Committee begs to express its readiness to co-operate to that end, if informed of the nature of the legislation proposed, and would respectfully suggest that such legislation, in so far as it refers to the pre-existing law, should, as far as possible, take the form of a declaratory Act. (Rev. Dr. Cook and Rev. Dr. Weir dissenting.)

Third.—That the Committee also begs to thank the Honorable the Premier for his expressed intention as to the revision of the proportion of the grant made to Protestants. (Rev. Dr. Cook, Rev. Dr. Weir and Dr. Hemming, dissenting.)

Fourth.—That the Committee would further state with respect to its position in the matter of the grant of $60,000, that, in its answer to the Premier's letter, it was not intended either formally to accept or refuse said grant, conditionally or otherwise, the Committee holding that it has no power to refuse any grant accorded by the Legislature for the purpose of education, but the Committee holds that it is its duty to call the attention of the Government to any matter affecting the educational interests commited to it. Rev. Dr. Cook and Rev. Dr. Weir dissenting.

Fifth— That with reference to the statements made by this Committee in its resolutions of the 25th of September last as to the method prescribed for the administration of the fund, this Committee still holds that these statements were proper and necessary under the circumstances; but at the same time it recognizes the fact that such subjects must be left to the decision of the Legislature. (Rev. Dr. Cook, Rev. Dr. Weir, and Dr. Hemming dissenting.)

Sixth.—That the Committee desires also to state most distinctly that it does not wish in any way to reflect on the Protestant members of the Legislature, and having heard the explanations of the Secretary, given in May last and at this meeting, on the points raised by the Honorable the Premier, considers these explanations satisfactory. Rev. Dr. Cook, Rev. Dr. Weir and Dr. Hemming dissenting.

The Chairman was authorized to communicate these resolutions to the Honorable the Premier of the Province.

The Rev. Dr. Weir having read the following protest against the action of this Committee in regard to the Jesuits' Estates Act, and having requested that his protest be entered in the Minutes of this Committee, it was

Digitized by Google

moved by the Hon. Judge Church, and seconded by Rev. Dr. Shaw, and resolved :—

" That as a matter of courtesy to Dr. Weir, and in view of the great importance of the matter therein referred to, his request be granted."

PROTEST.

The undersigned protest against the acceptance on the part of the Protestant Committee of the Council of Public Instruction of the sixty thousand dollars $60,000 or any other sum as an indemnity for the four hundred thousand dollars $400,000 given by the Legislature of the Province of Quebec to the Roman Catholic Church in the said Province of Quebec ;

1st. Because, if the said four hundred thousand dollars be taken fron the proceeds of the sale of the so-called Jesuits' Estates and the grant be based on the moral claim by the Canon Law of the Roman Catholic Church on the said Jesuits' Estates, the Protestants of the Province of Quebec have no such moral claim on the said Jesuits' Estates, and the offer of sixty thousand dollars or any other sum as compensation to the Protestants can only be regarded in the light of a bribe or hush money.

2nd. Because by the Jesuits' Estates Act a trust established by the Crown of Great Britain for a specific purpose within the Province of Quebec has, to the detriment of Protestant Superior Education in said Province of Quebec, been annulled and done away with, without leave having been either asked or obtained from the Crown of Great Britain, the founder of said trust.

3rd Because, if the money to pay the four hundred thousand dollars $400,000 to the Roman Catholic Church, and the sixty thousand dollars or any other sum to the Protestant Committee of the Council of Public Instruction be taken, as it is professedly done, from the Public Treasury of the Province of Quebec, It cannot be affirmed that there is any moral claim to make such grant specially, as the revenues of the Province of Quebec are in large measure contributed by Protestants for civil purposes only, but there is thereby a violation of Art. 3439 of the Revised Statutes which reads as follows :—" The free exercise and enjoyment of religious profession and worship without discrimination or preference, so as the same shall not be made an excuse for licentiousness, or a justification for practices inconsistent with the peace and safety of the Province, is allowed to all Her Majesty's subjects within the same."

4th. Because there is no parallelism between the granting of four hundred thousand dollars " $400,000 " to the Roman Catholic Church and sixty thousand dollars " $60,000 " or any other sum to the Protestant Committee of the Council of Public Instruction,—the parallel would have been to give the sixty thousand dollars or any other sum to be divided according to population, among the different Protestant Churches in the Province of Quebec.

5th Because it is contrary to British principle and practice to make legislation dependent on the sanction of the Pope before it becomes law, as is done by the Jesuits' Estates Act."

"Signed," GEORGE WEIR,
JOHN COOK D.D.

On the motion of Hon. Judge Church, seconded by Dr. Hemming, it was carried on division in reference to item number 5 of the correspondence submitted,—

" That the Rev. Mr. Frazer, and the Protestant Board of School Commissioners for Montreal, be informed that this Committee has no authority to accept or reject in the name of the Protestants of this Province any grant made by the Legislature, its whole duty in regard to such matters being to invest or distribute the same, or the revenues thereof in conformity with the law."

Nov. 4.—Balance on hand			$ 153 20
" Outstanding Cheques			$ 25 00
" " "			67 75
" Bank Balance			$ 245 95

Examined and found correct,

Signed, R. W. HENEKER.

The Rev. Dr. Shaw gave notice of a motion relative to a diminution of the marriage license fee.

Dr. Heneker submitted the following report of the sub-committee on ways and means:

REPORT OF SUB-COMMITTEE ON WAYS AND MEANS.

1889.

Protestant Committee of the Council of Public Instruction—Sub-Committee on Ways and Means.

The sub-committee met on Tuesday, the 5th of November, at the Education Office, and had the benefit of the assistance of the Rev. E. I. Rexford, who placed at their disposal the accounts of several years.

Digitized by Google

An examination was made of the Contingent Fund, income and expenditure, with the following results, viz :—

ANNUAL REVENUE OF THE PROTESTANT COMMITTEE.

1876-77—		
Normal School Fees	$2,559 43	
Unexpended Balances	305 90	
		$2,865 33
1877-78—		
Normal School Fees	$1,671 64	
Unexpended Balances	136 22	
		$1,807 86
1878-79—		
Normal School Fees	$1,537 97	
Unexpended Balances	149 35	
		$1,686 32
1879-80—		
Normal School Fees	$1,823 53	
Unexpended Balances	321 61	
		$2,145 14
1880-81—		
Normal School Fees	$ 867 99	
Unexpended Balances	370 99	
		$1,238 98
1881-82—		
Normal School Fees	$ 873 40	
Unexpended Balances	43 35	
		$ 916 75
1882-83—		
Normal School Fees	$ 823 89	
Unexpended Balances	273 46	
		$1,097 35
1883-84—		
Normal School Fees	$ 241 12	
Unexpended Balances	845 00	
		$1,086 12
1884-85—		
Normal School Fees	$ 629 36	
Unexpended Balances, ordinary	596 15	
Stoppages on grants for deaf-mute institutions (exceptional)	$1,576 55	
		$2,802 06
1885-86—		
Normal School Fees	$ 493 33	
Unexpended Balances	835 00	
		$1,328 33

Digitized by Google

1886-87—		
Normal School Fees	$ 225 88	
Unexpended Balances	704 00	
		$ 929 88
1887-88—		
Normal School Fees	$ 00 00	
Unexpended Balances	917 70	
		$ 917 70
1888-89—		
Normal School Fees	$ 00 00	
Unexpended Balances	15 01	
Fees for A. A. Certificates	45 00	
		$ 29 99

It will be noticed that the income is derived from two main sources, the Normal School fees and the unexpended balances, and that the falling off in revenue from 1876-77 to 1888-89 has been remarkable. Both of the sources of revenue are necessarily fluctuating. (1) The proceeds from the Normal School depend on the number of scholars in the Model School of that institution, less the charges for salaries and various expenses incurred in the carrying on of the school. (2) The "unexpended balances" comprise the amount unexpended in any year of the Common School Fund, of the Superior Education Fund, and of the School Inspectors' grant, plus any amount which may remain unexpended of the vote made for the expenses of the Council of Public Instruction.

It must be borne in mind also that as the school system of the Province increases in efficiency, these unexpended balances may be expected to become less and less.

The Sub-Committee do not deem it necessary to give in detail the expenditure for the same long period as in the case of the income, as the object is merely to establish a principle.

The expenditure covers the following items, viz:—Secretary's salary; Inspector of Superior Schools: amount of salary and travelling expenses over and above the appropriation made from the Superior Education Fund; the examination of Superior Schools; the printing and other expenses attending thereon.

In addition to the foregoing there will be, commencing with the current year, the additional expense necessary to cover the difference between the receipts by the Central Board of Examiners from candidates and the outlay for services, printing and other expenses incidental to the examination and diplomas.

The following table shows the actual expenditure for the years 1886-87, 1887-88 and 1888-89:—

Digitized by Google

1886–87—

Salary of Inspector of Superior Schools	$ 500 00
" Secretary's	300 00
Travelling expenses of Inspector	300 00
Examination of Superior Schools	177 00
	$ 1,277 00

1887–88—

Salary of Inspector	$ 500 00
Travelling expenses of Inspector	300 00
Salary of Secretary	200 00
Expenses of Examination	224 47
	$ 1,224 47

1888–89—

Salary of Inspector	$ 500 00
Travelling expenses of Inspector	300 00
Salary of Secretary	200 00
Expenses of Examination	228 97
	$ 1,228 97

The following table gives the estimated expenditure for the current year:—

Salary of Secretary	$ 200 00
" Inspector of Superior Schools	500 00
Travelling expenses of Inspector of Superior Schools	300 00
Expenses of written examination of Superior Schools	250 00
Expenses of Central Board of Examiners	250 00
	$ 1,500 00

The expenditure of 1886-87 was exceptionally heavy, owing to the special grant of one hundred dollars to the Secretary of the committee for exceptional services.

It will be seen that there is a tendency to an increase in the amount for the examination of Superior Schools, owing to the increased charges for printing, etc., due to the steady increase in the number of candidates, and the estimate for the current year provides for this and sets the expenses at $1,500.00.

Comparing now the income and expenditure, dating from 1886-87, it will be seen that the Contingent Fund at the disposal of the Committee has not been sufficient to defray expenses, and that the case will be still worse for the current year unless further new sources of revenue are available, or some provision be made whereby a portion, at least, of the expenses of the Committee be charged to other funds.

It may not be uninteresting to note the causes of the great difference,

Digitized by Google

in the revenue from the Normal School between 1886-87 and the present time. The sub-committee finds from the Normal School returns that there is no great difference in the amount of the salaries paid between the two periods, but the cost of carrying on the Normal School has greatly increased of late years. The main difference lies, firstly, in the present large outlay for contingencies, and, secondly, in the amount expended in repairs recently.

The sub-committee do not feel justified in criticising the ordinary expenditure of this excellent institution.

They believe the committee have the greatest confidence in the administration of the school under the present Principal, and that he does his best not only to maintain a first-class school, which shall prove efficient for the work it is called upon to perform, but to exercise due economy as its administrator. They desire, however, to point out that the charge for repairs should, in their opinion, be undertaken by the Government, under the Minister of Public Works. They are moved to make this suggestion, as they find in the public accounts of the Province items charged for repairs to the different normal schools, McGill Normal School included.

The receipts from the Normal School have also been in some cases reduced by the outlay required to give retiring allowances to old and deserving officers when past work.

The sub-committee would suggest that should any like case arise in the future, the ordinary income derived from the Legislative grant, and the Model School fees should not be subjected to such a charge, as they conceive that it must be the intention of the Legislature to make its annual grants in proportion to the supposed needs of the school, so as to carry on its work efficiently. An examination of the last report of the McGill Normal School will show that, unless the authorities of the school had been fortunate enough to begin the year with a balance in hand, they would have ended with a deficit.

Under these circumstances the sub-committee feel that no reliance can be placed on obtaining any revenue from the McGill Normal School, and it becomes necessary therefore that the Committee should submit the case to the Legislature through the Hon. the Superintendent, and should ask for an appropriation sufficient to enable them to carry on this work.

The sub-committee desire to draw special attention to the fact that their engagement to pay salaries entails definite obligations, whereas their resources are indefinite and inadequate.

The sub-committee would also advise that the attention of the Government be respectfully called to the fact that the Special Inspector of Academies and Model Schools stands in an exceptional position as compared with ordinary Inspectors. The work he is called upon to perform requires more than ordinary acquirements, skill, and judgment, and yet a part of his salary is a charge on the Protestant share of the Superior Education Funds, and the remainder, as well as his expenses in the discharge of his

Digitized by Google

duties, which require him to travel from one end of the Province to the other, is made to depend on the fluctuating income of the Contingent fund of the Protestant Committee. The sub-committee feel that this has only to be explained to the Government for a remedy to be applied. It may be asked why this claim has not hitherto been made. An answer will, the sub-committee believe, be found in the fact that such a plan was not only contemplated but acted on for one year, viz, in 1878-79, when four additional Inspectors were appointed for the Roman Catholic schools, and the two Protestant Inspectors of High Schools were paid out of the grant for Inspectors. A change of views, as regards the desirability of Inspectors, caused a temporary decrease in the Legislative grant, and although the four Catholic Inspectors were continued, the Protestant Inspectors ceased to draw any maintenance from the fund.

The sub-committee respectfully urged that this matter be investigated and, if found correct, that it be laid before the Government.

It may also be stated that the Protestant minority have never been extreme in urging their claims on the Legislature, and one proof of this may perhaps suffice. If the accounts of the Province be examined between the years 1879 and 1889, both years inclusive, it will be found that a total sum of not less than $115,187 was appropriated as special educational grants to Roman Catholic institutions, whereas, during the same period, the amount of similar grants to Protestant institutions was only $7,925.00.

The whole respectfully submitted on behalf of the sub-committee.

(Signed) J. W. QUEBEC,
Convener.

Moved by Dr. Heneker, seconded by Sir William Dawson, and Resolved :—" That the report of the Sub-Committee on Ways and Means be adopted, and that a Sub-committee continued, with instructions to wait on the Honorable the Superintendent of Public Instruction, and to advise with him as to the best means of securing a contingent fund to meet the requirements of this Committee, and pointing out that this may be done either by an annual grant of $1,500.00, to be applied by the Committee heretofore, or by a less grant and the placing of the Inspector of Superior Schools on the permanent staff, without curtailment in number or salaries of the present Protestant Inspectors, and to take such steps as may be deemed advisable for the securing of the needed increase of the Committee's funds."

The standing Sub-Committee on Text-books submitted the following interim report, which was received :—

Interim Report of Sub-Committee on Text-Books.

Your Committee begs leave to report that it has had but one meeting since its last report, at which the proposed list then submitted, was carefully revised and amended, but, owing to the fact that new text-books in

Digitized by Google

Drawing, and possibly in French and Canadian History, are likely to be published soon, the Committee cannot yet recommend a final list for authorization, but desires to continue its labors.

(Signed) A. W. KNEELAND,
Convener.

The list of the distribution of grants to poor municipalities was submitted and approved.

On motion of Dr. Shaw, seconded by the Venerable Archbishop Lindsay, it was

Resolved, "That Honble Judge Church, Sir William Dawson, Dr. Heneker, Dr. Weir, Dr. Cameron and the Dean of Quebec be a sub-committee to watch the proceedings of the Legislature in reference to education and generally to take such action in reference thereto as circumstances may require."

There being no further business, the Committee adjourned to meet the last Wednesday in February or earlier, on the call of the Chairman.

(Signed) ELSON I. REXFORD,
Secretary.

Quebec, 7th May, 1890.

Which day the quarterly meeting of the Protestant Committee of the Council of Public Instruction was held. Present: The Right Rev. James Williams, D.D., Lord Bishop of Quebec, in the chair; the Rev. John Cook, D.D., Sir William Dawson, C.M.G., LL.D., the Venerable Archdeacon Lindsay, M.A., R. W. Heneker, Esq., D.C.L., LL.D., G. L. Masten, Esq., the Rev. W. I. Shaw, LL.D., Dr. A. Cameron, M.P.P., A. W. Kneeland, Esq., M.A., Ph.D., E. J. Hemming, Esq., D.C.L., the Very Rev. Dean Norman, D.D., the Rev. George Cornish, LL.D., the Rev. George Weir, LLD., R. J. Hewton, Esq.

The minutes of the previous meeting were read and confirmed.

The Secretary submitted the following correspondence and communications for the consideration of the Committee:—

1. From Miss Kate E. Wilson, Miss Helen Wood, Messrs. John M'Clumpha, J. Gammell, William Reilly, J. H. Keller, Henry H. Curtis, J. P. Arnold, and Adam J. Elliot, applying for diplomas under the Regulations of the Committee and submitting certificates.

The Committee agreed to recommend:—

(*a*) That first-class Academy diplomas be granted to Miss Kate E. Wilson and Mr. Henry H Curtis under Regulation 56.

(*b*) That first-class Academy Diplomas be granted to John M'Clumpha and J. Gammell under Regulation 54, Section A.

Digitized by Google

(*c*) That William Reilly be granted exemptions in all subjects of the examination for an Elementary Diploma except French, Physiology and Hygiene, Scripture History, and School Law.

(*d*) That John Keller be granted exemptions from the following subjects in the examination for a Model School Diploma, namely :—Dictation, Grammar, English Literature, Geography, Euclid, Canadian and English History, and Latin.

(*e*) That as it does not appear from the certificates submitted that Miss Helen M. Wood holds a diploma as a teacher granted by extra-provincial examiners, this Committee has no power under existing Regulations to grant the exemptions from examination for a diploma.

(*f*) Moved by the Dean of Quebec, seconded by Sir William Dawson: "That Mr. Arnold be held to be exempted from examination in those subjects in connection with which he brings certificates of having passed, and that he be invited to come up for examination in those other subjects required to obtain a diploma in this province."—Carried on division.

On motion of Rev. Dr. Shaw, seconded by the Very Rev. Dean Norman, it was resolved on division:

(*g*) "That the Secretary be instructed to inform Mr. Adam J. Elliot that he is entitled under the Regulations of the Committee to exemptions in all subjects of the Intermediate Examination of the Universities, in which he has passed first class.

Sir William Dawson gave notice of motion on the subject of recognizing evidence of high qualifications in special subjects taught in High Schools and Academies as entitling to special diplomas qualifying to teach in such subjects.

2. From certain school boards concerning the $60,000 grant in connection with the Jesuits' Estates Act.

The communications were received and laid on the table.

3. The Sub-Committee on Legislation presented the following report:—

"The Sub-Committee on Legislation beg to report that several amendments were made during the last Session of the Legislature to the laws respecting Public Instruction.

"The most important of these were :—

"The restoration of clauses 1 to 5 inclusive of Chap. 15 of the Consolidated Statutes of Lower Canada, which were omittted from the Revised Statutes as 'effete';

"The restoration of the trust in relation to the Jesuits' Estates ;

"The passage of what has been called the B.A. Bill, whereby candidates for the study of the legal, medical and notarial professions who

Digitized by Google

possess the degrees of any British or Canadian University may enter on professional study without being obliged to pass a preliminary qualifying examination.

"There were other important amendments, some of which affect the privileges of minorities.

"The whole of the amendments will be found *in extenso* at pages 126 *et seq.* of the April number of the EDUCATIONAL RECORD, 1890.

"Respectfully submitted on behalf of the Sub-Committee,

"(Signed) R. W. HENEKER, *Chairman*,

"On the behalf of the Convener."

Moved by R. W. Heneker, seconded by Sir William Dawson, that the report of the Sub-Committee on Legislation be received, and that the said Committee be continued in office, Dr. Heneker Convener, with instructions to report at the next meeting the scope of the amendments referred to in the Report on Legislation and upon the communications from the school boards.—Carried.

4. The Committee agreed that Dr. Cook be permitted to enter the following protest concerning the amendments to the Jesuits' Estates Act referred to in the foregoing report.

(PROTEST.)

"I only wish to say, and, if permitted, to put on record, that having always considered the action of the Provincial Government and Legislature, in what is known as the Jesuits' Estates Act, to be, both in the style and substance of the said Act, insulting to the Protestant inhabitants of the Province and of the Dominion, and to the Imperial Government itself, by introducing the will and law of a foreign power into a matter which concerned only the subjects of the Queen, and fell to be regulated solely by British law and usage; and further considering that the sum allotted to Protestants under the said Act, since whatever moral claim might be alleged to exist for the Jesuits, none such was or could be claimed for Protestants cannot be reasonably regarded as other than a bribe to induce acquiescence in such insult.

"I, for one, cannot consent in any form or way to the acceptance of it by this Committee.

"(Signed) JOHN COOK. D. D."

The foregoing protest is endorsed by the Rev. Dr. Weir.

5. From Dr. Thornton, concerning the grant to the New-Richmond Model School.

The Committee instructed the Secretary to inform Dr. Thornton that his representations would be taken into favorable consideration at the next distribution of grants.

6. From Mr. A. Odell, concerning the grant to Sherbrooke Academy.

After explanations were given by the Inspector of Superior Schools, Mr. Hewton agreed to report upon the matter to the School Commissioners of Sherbrooke.

Digitized by Google

7. The Secretary reported that arrangements had been made to hold four Normal Institutes during the second and third weeks of July next, namely, at Inverness, Lennoxville, Cowansville, and Shawville. The authorities of Bishop's College have again kindly placed the College Buildings at our disposal for the Institute for the St. Francis District, at a nominal charge per head to cover the necessary expenses.

Hitherto the Lennoxville Institute has been only one at which the teachers have paid their own expenses. The plan has worked so well at Lennoxville that we propose to adopt this plan at Cowansville this year with the expectation that all our Institutes will be conducted in this way in the near future. The programme for the Institutes will depend, in a measure, upon the result of the effort that is being made by the Provincial Association of Protestant Teachers to establish a Summer School for Teachers at Bishop's College, Lennoxville, during the month of July. If the Summer School is organized it will be conducted in connection with our Lennoxville Institute, and it will therefore affect our Institute programme to a certain extent. The Institutes will be conducted, as usual, by Dr. Robins. Professor Parmalee, Dr Harper, and the English Secretary of the Department, and if the Summer School is held, additional assistance will be given by Inspector Taylor and Inspector Parker.

8. On the motion of Dr. Heneker, seconded by Archdeacon Lindsay, the following deputy-examiners were appointed for the examination under the Central Board of Examiners in July next.

Local centres.	Deputy examiners	Place of meeting.
1. Aylmer	Rev. T.-E. Cunningham	Model School.
2. Gaspé, village	Rev. J.-P. Richmond	School-room.
3. Huntingdon	Rev. James-B. Muir	Academy.
4. Inverness	Inspector Parker	Academy.
5. Lachute	Rev. Wm. Saunders	Academy.
6. Montreal	Dr. Kelley	High School.
7. New-Carlisle	W.-M. Sheppard	Court House
8. Quebec	T.A. Young	High School.
9. Richmond	Rev. John McLeod	St. Francis College
10. Shawville	Rev. M. Naylor	Academy.
11. Sherbrooke	Inspector Hubbard	Ladies' Academy.
12. Stanstead	Inspector Thompson	Wesleyan college.
13. Sweetsburg	Inspector Taylor	School-house
14. Three Rivers	Alex. Houliston	Academy.
15. Waterloo	D. Darby	Academy.

The Secretary reported that he had arranged for the places of meeting as given in the foregoing table.

9. The following summary of Semi-Annual Financial Statement of the McGill Normal School and Model Schools, from the first of July to the thirty-first of December, 1889, was submitted for the information of the Committee :—

Report of the Sub-Committee on Ways and Means.

The Sub-Committee beg to report that Dr. Heneker on their behalf waited on the Honorable the Superintendant, and drew his attention to the report presented by the sub-committee on the 6th. of November, 1889. and requested that he would lose no time in drawing the attention of the Government to the absolute necessity of providing the Protestant Committee with means sufficient to carry on its work. The Honorable the Superintendent promised to place the matter before the Government at an early date, so that provision might be made at the ensuing session of the Legislature.

Respectfully submitted on behalf of the sub-committee,

(Signed) J. W. QUEBEC.

Chairman.

The report was received and adopted. The sub-committee was continued with instructions to continue their labors and to report at next meeting of the Committee.

Report of the Sub-Committee on Text-Books.

1. The sub-committee begs leave to report that in the prosecution of its labors it has had the assistance of a large and representative sub-committee appointed by the Provincial Association of Protestant Teachers at the last Convention.

2. Several meetings, both with and without that committee, have been held, at which the whole subject of text-books has been carefully discussed, and all the most recently published books have been examined.

3. The sub-committee finds, in some instances, no suitable text-books available; in other instances, the use of two or more equally good books in a given subject has prevented the committee from carrying out the desirable policy of limiting the number to one book for each subject.

4. Sweeping changes have not been recommended, yet certain important additions to and eliminations from the old list have been found to be desirable.

5. The sub-committee is pleased to report that a revision of MacVicar's Primary Aritmetic, by which it will fill the requirements of the Elementary School Course; of the Intermediate Geography, by which the maps of Canada and Africa will be replaced by others showing the results of the latest discoveries; and possibly of Maclear's New and Old Testament Histories, by which the books will be rendered more attractive and useful by the addition of some colored maps, etc., has been secured, as well as an improvement in the Spencerian System of Copy-books, which is recommended for use.

6. A French Reader more suitable for beginners in that language has been recommended in that of the Progressive French Reader, published by Drysdale & Co., of Montreal.

Digitized by Google

7. Your sub-committee finds that none of the English Readers now in use are fully satisfactory; yet cannot recommend any change at present, except that Book VI. of the Canadian Readers be dropped, as it is not in use.

8 The new maps to be added to Lovell's Geography will render that book less objectionable than formerly, although many teachers strongly object to the use of a Geographical Catechism. The Ontario High School Geography is recommended in place of the Advanced, which is out of print.

9. The Canadian Histories at present in use are condemned by nearly all our teachers, yet no better books can be found. It is hoped that a new one, about to be published in Ontario, may better supply the want.

10. A change in Drawing Books, which is considered to be of the greatest value to our young people, is recommended, viz: The Dominion Freehand Drawing Books, to take the place of both series now in use.

These books are published in this province, and are prepared with the greatest skill and care; are self explanatory, thus rendering the use of manuals unnecessary, and are sold at the very reasonable price of ten cents. Copies will be laid before you.

11. The committee recommends "The Beginners' Latin Book" to take the place of "Bryce's First Book," for junior, and "Allan and Greenough's Latin Grammar," for senior classes. These books are very highly recommended by those acquainted with them. "Easy Latin Prose Exercises" is also recommended for Academies, as well as "Goodwin's Greek Grammar.

12. The sub-committee recommends that "Collier's History of England," for junior classes, and "Taylor's Modern History" be the text-books in these two branches of History.

13. "Spottan's High School Botany," a Canadian publication, may well take the place of Gray's texts." It is highly recommended by local authorities

14 "Mrs Hunt's Hygiene for Young People," and the revised edition of "Cutter's Physiology and Hygiene" are considered the best available books in this branch.

15. The "Common School Song Reader" is recommended to be added to the list of music books.

16. "Meiklejohn's English Grammar" having been adopted by the Board of University Examiners for the A.A. Examinations, the Sub-Committee recommends it for Academy grades and the first part for Elementary and Model grades. Arrangements have been made by which copies of the "Citizen Reader," a book designed to develope the spirit of patriotism in our youth, will be distributed as prizes in the schools.

17. The completed list, as laid before you for adoption, has been divided for convenience into three parts:—Those for elementary and model schools, those for academies, and, lastly, those for teachers' use alone.

Digitized by Google

To this list a micellaneous list has been added, which, it is hoped may, be of some use to teachers.

The whole respectfully submitted,

(Signed), A. W. KNEELAND, *Chairman*

G. L. MASTEN.

Moved by Dr. Kneeland, seconded by Mr. Masten, that the list of text-books herewith submitted, be authorized, and that it be published with the statement that any changes therein indicated shall take effect on July first, 1891. (Carried).

From the Provincial Association of Protestant Teachers concerning amendments to the Course of study.

On the motion of Mr. Hewton, seconded by Dr. Cornish. The Course of Study for Protestant Model Schools and Academies was amended and adopted in the following form .....

Sir William Dawson reported from the sub-committee on Course of Study that the recommendation of the Association of Protestant Teachers with reference to the preliminary examination for the A.A., had been transmitted to the University Examiners for their opinion as to the best mode of carrying out the same, and beg to submit the following resolution from that body :—

"That with reference to the suggestion of the Academy Teachers that the Preliminary Examinations may be taken in the previous year to the examination for A. A., it is agreed that the examiners will recommend to the Universities to accept for the preliminary a certificate of passing in all the subjects of the Academy Course, Grade II., provided that the papers set in the preliminary subjects be identical with those in the University Examinations in these subjects.

It is, however, suggested that it would be desirable that the Protestant Committee should appoint three examiners for the subjects in Grade II.

That the Chairman and Rev. Dean Norman be a committee to confer with the Protestant Committee on the subject and to report to the Universities and to the examiners.

The sub-committee would ask that it be continued with instructions to make arrangements to carry out the plan proposed, and report to next meeting, and if necessary to make announcement of the same as soon as these can be perfected.

The report was adopted, and the sub-committee continued.

The Rev. Dr. Cornish having tendered his resignation as a member of the Central Board of Examiners, it was moved by the Dean of Quebec, seconded by Dr. Hemming and resolved :

"That this Committee accepts with regret the resignation of Dr. Cornish of his position on the Central Board of Examiners, and desires to tender him a cordial vote of thanks for his valuable and faithful services during the past twenty-five years in connection with the examination of teachers."

Moved by the Dean of Quebec, seconded by Sir William Dawson, and

Digitized by Google

resolved : " That the name of Miss Nannie E. Green, Professor of Drawing in the McGill Normal School, be recommended to the Lieutenant-Governor in Council for the vacancy on the Central Board."

Moved by Mr. Masten, seconded by Mr. Hewton, and resolved : "That $200 be given out of the sum appropriated for Superior Education, for paying assistants to aid, under the direction of the Inspector, in the examination of the papers of Superior Schools, with the exception of Grade III, of Academies, in order to have the results submitted to the schools before the fifteenth of August, and that the appointment of the assistant examiners be referred to a sub-committee consisting of the mover and seconder, the Chairman (Convener) and the Dean of Quebec.

The Inspector of Superior Schools was then requested to appear before the Committee and submit his report of the inspection of schools. The report was received and the Deputy Examiners were appointed.

On the motion of Rev. Dr. Cornish, seconded by Dr. Cameron, it was resolved : " That a sub-committee consisting of the Dean of Quebec and Dr. Weir, be appointed to supervise the printing of the amended Course of Study and the amendments to the Regulations and Syllabus of Examination for Teachers' Diplomas consequent upon these amendments and the changes in reference to the A. A. Examination.

The Venerable Archdeacon Lindsay presented on behalf of the Standing Sub-Committee on Elementary Schools the following report which was received and the sub-committee continued :—

The Sub-Committee on Elementary Schools.

The Sub-Committee has been deeply impressed with the separation which seems to exist between the Protestant Committee of the Council of Public Instruction and the Elementary Schools. So far as they can discover, the whole work of the menagement of Elementary Schools has been left to the Secretary and the Inspectors, which, no doubt, has been faithfully done. Nevertheless, we are convinced that the Elementary Schools, forming as they do the foundation of any successful system of national education, should receive more consideration and come more regularly under the care of the Protestant Committee. Some reasons may exist why Superior Education has so completely occupied the time of the Protestant Committee. It has had a fund to administer for Superior Education, and has been led to make certain regulations in the case of Academies and Model Schools by which the advantages of that fund could be obtained, and so has brought about a close relationship between such institutions and the Protestant Committee. Between the Elementary Schools and the Protestant Committee no such tie exists. The assistance Elementary Schools derive is a matter of municipal law, and they are without the inducements of extra exertions, which would most certainly be made in many localities if such efforts were recognized and encouraged by some defined system of assistance from the Protestant Committee. The Elementary Schools are in places known to members of the Sub-Committee most deplorable as regards the buildings, sanitary arrangements, appliances for teaching. The teachers, mostly able and faithful, but wretchedly underpaid, and unless some steps are taken to impress school commissioners with the possibility of a better state of things, Superior Education will suffer, and be retarded by the lack of the due preparation which well conducted Elementary Schools should provide. The Sub-Committee has great respect for the able body of men engaged as Inspectors of Elementary Schools, and would suggest that

Digitized by Google

they be invited to report, severally or unitedly, on the present state of Elementary Schools, the stipend of the teachers, etc., in what way Elementary Schools could be made more efficient, and brought more in accordance with the Regulations of the Code of Public Instruction. Such a report will form a trustworthy document upon which the Protestant Committee could reasonably act. They regard this as the first work to be done, as, without such information as this report should convey, the Protestant Committee would be at a loss to proceed. The Sub-Committee are agreed in recommending that a sum of money should be at the disposal of the Protestant Committee for the purpose of making grants to the Elementary Schools in the same way as they are now made to Academies and Model Schools. This would bring the Committee into direct communication with the most important sphere of national education. The Sub-Committee think that a fund should be placed at the disposal of the Protestant Committee, to be applied to that purpose, and that application should be made to the Government for such an appropriation as may be required. The Sub-Committee are deeply impressed with the needs of Elementary Education in the country, and that it demands from the Protestant Committee, equal, if not more consideration than Superior Education, and they are persuaded that the remotest and poorest districts would be encouraged to make exertions for the improvement of their Elementary Schools, if they knew that in so doing they would be sustained by the sympathetic care and assistance of the Protestant Committee.

(Signed) DAVID LINDSAY,
" WM SHAW
" G. L. MASTEN,
" A. W. KNEELAND,
" R. J. HEWTON,

The Sub-Committee on Normal School Repairs presented a memorial from the Normal School Committee concerning repairs and additions to the Normal School building.

Moved by Sir William Dawson, seconded bv Dr. Heneker, and resolved :

" That this Committee concurs in the requests of the Normal School Committee and the Corporation of McGill University with reference to the repairs and extension of the McGill Normal School and Model Schools and would earnestly commend the matter to the favorable attention of the honorable the Superintendent of Education and the Government. That the Sub-Committee be continued with the addition of the Very Rev. Dean Norman, and be requested to call the attention of the Government to the matter. "

The Committee agreed that Dr. Shaw's notice of motion should stand over until the next meeting.

There being no further business, the Committee adjourned, to meet on the last Wednesday of September, or earlier on the call of the Chairman.

ELSON I. REXFORD

Secretary.

FOURTH REPORT

OF THE

SECRETARY

OF THE

PROVINCE OF QUEBEC

FOR THE YEAR

1889-90

REGISTRAR'S DIVISION

PRINTED BY ORDER OF THE LEGISLATURE

QUEBEC
CHARLES-FRANÇOIS LANGLOIS
PRINTER TO HER MOST EXCELLENT MAJESTY THE QUEEN

1890

Digitized by Google

Digitized by Google

To the Honourable AUGUSTE RÉAL ANGERS,

Lieutenant-Governor of the Province of Quebec.

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to submit the Fourth Report of the Provincial Registrar for the year ending the 30th June, 1890.

The whole respectfully submitted,

CHARLES LANGELIER,

Secretary and Registrar.

Quebec, 1st October, 1890.

REGISTRAR'S OFFICE

Quebec, 22nd September, 1890.

To the Honourable CHARLES LANGELIER,

Provincial Secretary and Registrar.

SIR,

I have the honour to submit my report on the working of the Registrar's office for the year ending the 30th June, 1890.

Office receipts

As you may see by Appendix C the receipts of the office for the year 1889-90 amounted to $358.50, the highest amount received since Confederation. This is explained by the strict application of the law and of the orders-in-council which forbid us to register certain documents or to deliver certain copies unless the prescribed fees have been previously paid. This is rather severe, but it is the only means of protection we have against the unwillingness or dishonesty of many people who refuse to pay when we hand over the work without receiving the office fees.

Office work

You will find in Appendix D a summary of the work done in the office during the year to which this report applies, with the exception of the letters-patent for grants of public lands, of which the number mentioned —642—is for the eight months ending on the 31st August.

However, the table given in the said appendix is far from showing all the work done; we are working at the revision of the index of grants of public lands—a considerable work. Besides the fact that many of the registers containing this index are beginning to get old and are becoming deteriorated, the work we are doing is rendered necessary by the inaccuracies in the tables. To remedy all this, we are going over the registers and checking the registered grants, deed by deed. We are making these indexes in alphabetical order and in duplicate; in one we proceed by order of localities, as much as possible county by county, and in the other by order of the names of the grantees.

Digitized by Google

In my last year's report I laid stress upon the necessity of having these indexes printed. I am still of the same opinion. This would be a comparatively heavy expense, but I can assure you that such a publication would be most useful and advantageous.

French archives

You will see by Mr. Evanturel's remarks in Appendix E, what work has been done in connection with these archives. Up to the month of May last I had no control over this portion of my department, as you may see by referring to Appendix F; everything relating to these archives was under the exclusive control of Mr. Eudore Evanturel, who alone directed all the work and certified all the accounts. On resuming the direction of this work I made myself acquainted with what had been done in connection with the French archives, and I found, with regret, that the expenditure of a certain portion of the amounts deposited for the transcription of old documents was a pure loss; the copies which had been made, some at least, are as badly written and almost as difficult to read as the old originals, and in some places the copyists left in blank what they could not make out, so that the copies cannot be of any practical use, to say nothing of their not having been read over with the originals. Finally, the paper used for a portion of these copies is so thin and so common that it will not last ten years without being spoiled.

The above is sufficient to show you that there must be a radical change in the direction of the work of transcribing the old French archives. The first reform to be effected is to employ for this work only persons whose handwriting is good, who have enough knowledge of history and of the old legal and judicial institutions under the French domination to be able to clearly understand what they have to transcribe. These employees should likewise be attached to the office in a *quasi*-permanent manner, so as to acquire the necessary ability by practice. It is absolutely necessary to have specialists for this work; it is impossible to train specialists by temporarily employing supernumerary clerks who have neither the necessary capacity nor knowledge to do a work of this kind. Two competent men, employed permanently, can do more good work, more useful copying, than five or six supernumerary clerks working by the day, and paying but little heed to the quality and result of their labours, having neither the knowledge nor the capacity required for doing useful work.

Digitized by Google

Most of these copies, made as I first stated, have to be done over again, and we have already commenced to do so.

Parisian archives

The originals which we have here comprise really only the deliberations of the *Conseil Souverain* and the proceedings before the other courts of the colony under the French domination. These registers have doubtless their value, and those who write on the History of Canada can find valuable information in them ; but these archives, from a historical point of view, are far from having the importance of those which are in Paris and which contain all the correspondence of the governors and intendants of New France, with the king and his ministers, and that of several of the principal ecclesiastical, civil and military personages of the country. It is there we have to go to obtain full information as to the affairs of New France. We have already copies of some portions of those valuable Parisian archives; but the copies which we have are not one half of the number of originals. I consider that it is highly important to get copied in Paris the documents of which we have no copies here, and this for reasons already set forth in a previous report. We might set apart for this purpose a portion of the appropriation voted for the archives, and before three or four years we would have an almost complete collection and one of great value. We would place within the reach of our writers a mine of information of which they would be sure to take advantage, and historical studies on the French domination would probably result in the publication of works based on positive and official data. This would be a true rehabilitation of the French *régime* in Canada, which requires only to be better known in order to be better appreciated than it has hitherto been.

The whole respectfully submitted,

J. C. LANGELIER,

Deputy-Registrar.

APPENDIX A

STAFF OF THE PROVINCIAL REGISTRAR'S OFFICE, ON THE 30TH JUNE, 1890

Names	Salaries.
J. C. Langelier, deputy-registrar	$2,200 00
H. Roy, first clerk, registration branch	1,000 00
Alfred Simard, clerk, " "	800 00
Pierre Gagnon, " " "	800 00
Eudore Evanturel, permanent clerk, archives branch	1,000 00
Félix Lemieux, messenger	400 00

APPENDIX B

TARIFF OF REGISTRATION FEES

According to law and the orders-in-council now in force, the following fees must be paid to the Provincial Registrar for the registration of the following documents :

Registration of letters-patent and free grants of land by the Crown	$ 0 50
Commission of civil service officers	5 00
Registration of security bonds	2 00
Registration of land surveyors' commissions	3 00
Registration of notaries' commissions	5 00
Registration of letters-patent for the sale and transfer of goods held in mortmain	20 00
Copies of ordinary letters-patent	2 50
Copies of commissions	2 50

It is further ordered that the present tariff be published in the Official Gazette, as being made and adopted in virtue of the statute passed in the first session of the Legislature of this Province, 31st Victoria, chapter 11, and that notice be given that *no document will be registered or given unless such fee shall be first paid.* (Order-in-council of the 27th September, 1868.—See Statutes of Quebec, 45 Victoria, pages VIII et IX.)

* The figures of this horizontal column correspond to the following description:

Digitized by Google

1. Letters-patent containing grants of public lands.
2. Letters-patent incorporating joint stock companies.
3. Security bonds.
4. Appointments of justices of the peace.
5. Commissions of commissioners of small causes
6. Divers commissions.
7. Commissions under private seal.
8. Notaries' commissions.
9. Surveyors' commissions.
10. Proclamations.

Besides the documents hereinabove enumerated, thirty-two cancellations of land sales were registered, and twelve copies of documents were issued, several of them taken from the French archives.

APPENDIX E

(Report of Mr. Eudore Evanturel)

FRENCH ARCHIVES BRANCH

From the 1st July, 1889, to the 1st July, 1890, four clerks were employed at the rate of $60 per month each. They were Messrs. Louis Têtu, Charles Dion, Eugène Gingras and Télesphore St-Jorre.

The sixth volume of the *Jugements et Délibérations du Conseil Supérieur de Québec*, commenced in the month of July, 1889, will probably be completed within a month from this; that is to say that we have 850 pages printed. On the 11th October, 1889, two of the aforesaid clerks were given to me by the minister to assist me in correcting the proofs of the work in question.

Digitized by Google

During the year 1889-1890, about twenty large volumes of the *Conseil Supérieur* were transcribed by us; this completes the collection which will be handed to the printer as the work of type-setting proceeds. We have also transcribed and corrected the proofs of the Franquet manuscript which the *Institut Canadien* of Quebec published in its last yearly report.

During the year 1889-1890, we compared a good third of the registers of the *audiences* within the jurisdiction of Three Rivers, which registers were transcribed by us during the year 1887-1888.

In the month of October, 1889, I was instructed to commence a detailed analysis of the volumes of scattered documents belonging to the jurisdiction of Montreal. This was a lengthy labour. Five of the volumes in question now have their analytical table.

Moreover, we have transcribed a volume intituled: "*Registre Criminel*," from the 4th September, 1743, to the 22nd September, 1751; another volume intituled: "*Registre Criminel*," from the 27th September, 1754, to the year 1759; another volume intituled: "*Registre Criminel*," for the month of November, 1693, and, finally, a volume intituled: "*Petit Criminel*," from the 26th March, 1678, to the 19th August, 1686, and a volume of the "*Procédures Judiciaires Criminelles*" from 1665 to 1696.

APPENDIX F

OFFICE OF THE PROVINCIAL REGISTRAR,

Quebec, 21st June, 1890.

To J. C. LANGELIER, Esq.,

Deputy Provincial Registrar.

SIR,

In answer to your letter of yesterday, I have the honour to inform you that the accounts which I certified for the archives since the 1st July, 1889, are at present in the Treasury Department.

Hon. Mr. Gagnon required these accounts to be made out in triplicate and was satisfied with my approval.

Digitized by Google

The names of the copying clerks employed during the year 1889-1890 are Messrs. T. St-Jorre, E. Gingras, C. Dion and L. Têtu. They received $60 per month respectively.

As regards the transcription of the manuscripts, I followed the written orders of Hon. Mr. Gagnon. I have in my possession all the vouchers authorizing me to act as I did.

During the year I have had about twenty large volumes copied of the *Conseil Supérieur*, which complete the collection. Moreover, I received a written order to have the Franquet manuscript transcribed and the proofs of the same corrected for the *Institut Canadien* at Quebec.

Mr. St-Jorre was authorized to assist me during a portion of the year in correcting the proofs of the *Conseil Supérieur*.

We commenced—always under orders from Hon. Mr. Gagnon—an analytical table of the manuscripts of the Montreal juris iction. We have at present about twelve large volumes completed.

As to the comparing of the documents we have done about one third, that is to say the Three Rivers collection.

In the absence of Hon. Mr. Robidoux the clerks have not been paid for the past month. I have nevertheless certified their accounts as I have generally done at the commencement of each month.

If you require more complete details as to the archives, I will be happy to give them.

Above all, I wish to repeat what I have always said, and that is that there never was any wrong intention on my part. I acted only according to the minister's orders.

On Monday we commence comparing the manuscripts to which you refer.

I remain, Sir,

Your obedient servant,

EUDORE EVANTUREL.

ANALYTICAL INDEX OF THE ARCHIVES OF MONTREAL FROM 1651 to 1672

VOL. I.

8th February 1651.—Ordinance of Monsieur de Maisonneuve, on a Petition of Anne Archambault, setting forth that she had married Michel Chauvin dit Ste-Suzanne, that she had been deceived by him and that she had since learned that he had a wife in France.—Judgment condemning the said Michel Chauvin in four hundred *livres* damages, or to imprisonment.

20th June 1651.—Inventory of the Movables of the late Léonard Barbeau made at the request of Barbe Poisson, by Jean St-Pair, clerk in the Villemarie Registry office, in presence of the Governor of Montreal and others.

14th January, 1653.—Proclamation of Mr. Boucher, Governor of Three Rivers, to all the inhabitants, to observe the ordinances of the Governor of the preceding year under pain of corporal punishment.

29th June, 1653.—Election of Jean St-Père to receive donations for the construction of the Villemarie church, and to distribute the same under the orders of the director, who may be chosen at the proper time and place.

30th May, 1657.—Sentence against Jean Aubuchon, condemning him for having sold brandy to the Indians to pay a fine of fifty francs for the first offence and one hundred for the second.

10th October, 1657.—Confiscation of three acres of land of the domain of the Seigneurs of Montreal belonging to Louis de la Soudray, accused and found guilty of an attempt against the honour of the wife of Jean Milot, half the amount realized

Digitized by Google

by this confiscation to be given to the Villemarie church, and the other half to the children born and to be born of the said Milot and his wife.

6th October, 1659.—Edict of the King in Council at Paris, dated the seventh day of March, 1657, forbidding the inhabitants, merchants, ship captains, sailors, passengers and all others from trading, in any way whatever, with the Indians, in wine or brandy, under pain of corporal punishment.

29th November, 1657.—Sentence condemning Jacques de Laporte dit St-Georges to pay the sum of thirty *livres* for a violent attack upon one Jean Valiquet, a soldier, and, moreover, a certain sum of money to Sieur Bouchard, a surgeon major, for attendance, board and lodging during twelve days.

18th March, 1658.—By-law permitting the inhabitants of Villemarie to provide themselves with guns and ammunition, to defend themselves against the Iroquois, to work in safe places, and to retire to their houses at the sound of the bell.—Further, authority to fish and hunt at certain limited distances, and an express prohibition to sell arms and ammunition to the Indians.

3rd July 1658.—Sentence condemning a man named La Chapelle, *syndic* of the habitants of Villemarie, accused and found guilty of having made use of injurious language damaging to the honour and reputation of one St-Georges and his wife.

9th July, 1658.—Renewed orders, forbidding the sale of liquor to the Indians, under pain of confiscation and a fine to be paid to the Villemarie church.

3rd July 1658.—Sentence condemning a woman named St-Georges, to a fine of twenty *livres*, for having struck a soldier called St-Jacques with a stick at the issue of divine service, and to a fine of fifty *livres* to be paid to the

Digitized by Google

church, for having falsely accused him of having stated that he had had carnal connection with her.

26th October 1658.—Inventory of papers about the notarial minutes of Villemarie.

18th January, 1659.—By-law to put an end to riots and desertions arising from drunkenness and strict orders to the Officers of Justice to enforce it.

5th April, 1659.—Order prohibiting fishing or hunting, except at a certain distance of the houses on account of danger from the Iroquois.

8th March, 1660.—Accusation of robbery against François Labbé, servant at the Villemarie Seminary-

6th March, 1666.—Summons and hearing of certain witnesses in the case of François Labbé, accused of desertion and robbery at the Villemarie seminary.

2nd April, 1669.—Ordinance of the King prohibiting inn-keepers from furnishing the people of the town with food or drink during the hours of divine service, under penalty of a fine for the first offence, and of imprisonment for the second.

4th April, 1669.—Complaint made at the request of the *procureur fiscal* respecting the desertion of François Sénécal, a servant of the seminary of the town, and examination of witnesses on a charge of robbery of that institution by him.

12th April, 1669.—Representation made by Mtre Claude de Bouteroue, intendant of New France, that the Seigneurs in the neighborhood of Quebec and elsewhere having neglected to have the boundaries established of lands conceded to them, it has been found when the division lines were run, that many proprietors have cleared parts of the property of their neighbors, who now claim them as belonging to to them. The Council ordered : that those who had cleared land, which, after the drawing of the lines, was found to belong to their neighbors, and who had had possession

Digitized by Google

of the same for six years or more, including the first year spent in cutting down the trees, should be bound to abandon it to the real owner without having any right to remuneration or indemnity.—Ordered: that all persons conceding land for the future shall have the same surveyed and measured.

20th April, 1669.—Complaint of the wife of Pierre Pigeon against a man named Vincent, for disobedience, and for having inflicted several severe wounds upon her.

20th April, 1669.—Certificate of Antoine Fortier, a surgeon, testifying to the seriousness of the wounds inflicted upon the wife of Pierre Pigeon.

6th April, 1669.—Appearance and trial of Vincent Croteau on the charge brought against him.

17th June, 1660.—Charge of adultery against Marguerite Boissel wife of Etienne Bouchard, surgeon, and Jean Aubuchon dit Lespérance.—Sentence against the latter to a fine of six hundred *livres*, and condemning him to leave the country. Confiscation of the property of the said Boissel, with permission to her husband to confine her for the rest of her days or to send her back to her parents.

28th June, 1660.—Service of the above sentence on the parties implicated.

20th June, 1660.—Inventory of the moveable and immoveable property of the late Blaise Juillet dit Avignon.

9th October, 1662.—Statement of account in detail of a person named Ignace Hébert.

21st June, 1661.—Sentence of Nicolas Hubert, charged with having struck and severely beaten the servant of Sieur de la Forest.

6th October, 1661.—Judgment between Jacques Mousseau dit LaViolette and Mathurin Langevin dit LaCroix.

20th October, 1661.—Sentence against Jacques de la Porte dit St-Georges accused of having ill-treated the Reverend Mr. Galinier,

Digitized by Google

a priest, and of having made threats against him, blaspheming God's holy name. The churchwardens of the parish are hereby authorized to enjoy the revenue of one acre of the property belonging to the said St-Georges, for the term of one year.

29th October, 1661.—Sentence against the wife of a sailor named Janot dit LaChapelle, accused of having been guilty of violence towards Etienne Bouchard, a surgeon, on the public road.

29th October, 1661.—Service of the above sentence on the parties concerned.

19th November, 1661.—Authority to Claude de St-André to receive the dues of the residents of Villemarie for the construction of a chapel on the Mountain, in honor of the Blessed Virgin.

8th December, 1661.—Power of attorney of Louis Pïnard in favor of the Sieur du Portal, to represent him in all cases which may come up for hearing, and to receive all monies due him.

15th December, 1661.—Sale of a concession of land at Cap de la Magdelaine by Louis Tetreau to Louis Bouchot dit La Flotte.

19th January, 1662.—Judgment against Antoine Denis, in favor of Mr. d'Ailleboust.

10th December, 1662.—Ordinance of Monsieur de Maisonneuve concerning a concession of land made by a man named Lemoine in favor of a man named Toban ? (illegible).

24th June, 1662.—New ordinance prohibiting the sale of intoxicating liquor to Indians, seeing the murder, the preceding evening, of one Desjardins by drunken Indians.

9th July, 1662.—General statement of the charges and money advanced by Mathurin Giroult, merchant of La Rochelle, a creditor of the Estate of Jean Baptiste Dupuy with payments made by Mrs. Jacques Mignet, curator and *héritier abandonné* to the said Estate.

Digitized by Google

10th October, 1662.—Monsieur de Maisonneuve obliged to cross over to France to obtain assistance for the Colony. Before his departure he gives permission to the inhabitants of Villemarie, under certain conditions to clear land on the domain des Seigneurs, and appoints Mr. Zacharie Dupuis to replace him during his absence.

20th September 1662.—Firing guns during the night, or going out after retreat, prohibited.

6th August 1663.—Sentence condemning the wife of Nicolas Milot, to a fine of twenty *livres* for having made use of injurious lauguage towards Sieur du Sailly.

25th August 1663.—Concession to Gilbert Barbier, a resident of the island of Montreal, of a certain extent of land.

19th October 163.—A summons to Jacques Beauchamp to pay to Jean Aubuchon dit Lespérance the sum of four *livres* and ten *sols* out of any amount he may owe the estate of René Roussin.

27th January 1563.—Condemnation of Urbain Brassard to a fine of ten *livres* for having made use of remarks damaging to the honor of Louis Loisel and to that of his wife,

22nd February 1663.—Condemnation of Robert Fournier to a fine of twenty *livres* for drunkness and for having blasphemed Gods's holy name, in the house of a man named St-Georges; the latter is also condemned to the same fine.

27th January 1663,—Ordinance about the organization of the militia of Ste Famille de Jésus, Marie, Joseph with a roll of the soldiers.

27th January, 1663.—Statement of fines received by the clerk of the bailiwick of the island of Montreal from 1666 to 1678.

26th May, 1666.—Statement of accounts made and delivered to Mr. Banchot by Seguin.

28th May, 1666.—Deed passed before Jacques de la Touche, notary in the seigniory and parish of Cap de la Magdelaine, in favor of the Missionaries of Three Rivers.

Digitized by Google

'th November, 1666.—Petition presented to the Intendant by the Reverend Gilles Perrot, priest of the seminary of St-Sulpice, setting forth, that in accordance with their rights *de haute et basse justice*, in their seigniory of Villemarie, he would authorize their judge to make a *papier--terrier*, giving them the right to collect debts due them by their tenants, vassals and others.

'7th November, 1666.—An order from the Intendant to Mr. Charles d'Ailleboust, *juge fiscal* of the seigniory of Villemarie, to prepare a *papier-terrier*.

'th March, 1667.—Summons of the *procureur fiscal* of Villemarie to François Lefèvre and to Jean Fournier to appear at nine o'clock, next Wednesday morning.

'6th February, 1667.—Petition of Jacques Bria dit Le Soldat, complaining of having been robbed, and asking that certain witnesses be summoned to aid him in discovering the guilty party.

'1st May, 1667.—Ordinance of Intendant Talon on the appeal between Marie Regnault, wife of Mathurin Langevin, appellant, and Isaac Dodier, respondent.

'2nd May, 1667.—Ordinance of the Intendant Talon about the harvest.

'3rd May, 1667.—Judgment of the Intendant Talon about the *procès-verbal* made by Sieur d'Ailleboust, and ordering Jean Valiquet and Jacques de la Porte dit St-Georges to produce the deed of concession of land made to them at Villemarie by Monsieur de Maisonneuve.

'1st July, 1667.—Petition of Mathurin Langevin, *syndic* of the inhabitants of the Island of Montreal, praying that he be allowed to trade with the Indians from sunrise to sunset, and praying that proprietors of houses and their tenants be prohibited from admitting Indians during the night.

Digitized by Google

22nd August, 1667.—Ordinance of Messrs. de Tracy, Courcelles and Talon about the collection of tithes in Canada.

2nd September 1667.—Petition of the *procureur fiscal* of the seigniory of Villemarie, that Pierre Piron and Mathurin Langevin dit Lacroix be summoned so as to be examined touching a dispute between them in connection with a fraudulent contract.

16th September 1667.—Information laid by Pierre Caillé dit Larochelle against Sieur de la Frédière, in connection with certain liquors sold to the Indians.

7th January 1668.—Appearance of Sieur Denis Sabourin, who declares that he opposes the sale and adjudication about to take place of the dwelling house of Philippe Poitiers dit Lafontaine.

The End of February 1668. Petition presented to the Supreme Council by a number of the inhabitants of Three-Rivers, of Cap de la Madeleine, and of Champlain in which they allege that notwithstanding the prohibition to sell intoxicating liquor to the Indians, many people continue to do so; the petitioners therefore ask that this prohibition be repeated and that people be prevented from bringing merchandize into the woods.

15th August 1668.—Ordinance on the subject of the opening and maintenance of a road at a place called the Grand Coteau.

12 August 1668.—Ordinance about the opening of a high road to facilitate communication between River St Pierre and the town.

9th August 1668,—Ordinance on the subject of the maintenance of the roads already in existence, as being the best.

18th August 1668.—Complaint made by Jean Baptiste Migeon de Bransac, *procureur fiscal* of Montreal, against Etienne Trudeau, accusing him of having struck and insulted him, by using injurious remarks concerning him while in

Digitized by Google

the discharge of his duty ; the said Migeon therefore asks for the arrest of said Trudeau.

15th May 1669.—Letters from his Lordship Bishop de Laval to Mr. Dollier appointing him missionary to the Mississipi country.

27th June 1669.—Document containing the accusation of a man named Laliberté, accused of having killed Simon with all the evidence relating to the matter and also the report of the surgeon Bouchard.

5th July, 1669,—Complaint by Sieur de la Salle, Etienne Banchaud, Lafontaine, Cochon and Turcot, in connection with the murders and robberies committed among the Onéyout Indians, at the River Mascouche.

6th July 1669.—Information given by Eustache Prevost, in connection with above complaint.

8th July 1669.—Petition presented by Etienne Trudeau, asking payment from Mr. Banchaud of the sum of two hundred and seventy-five *livres* for work done.

9th July, 1669.—Inventory of effects and old furniture of Etienne Banchaud, one of those accused of murder and robbery committed among the Indians of the Oneyout nation at the river Mascouche.

12th July, 1669.—An order to the Clerk of the Court to go and take possession of the clothing and furs stolen from the Oneyout Indians and put them into safe-keeping, and to obtain fuller information against Banchaud and his accomplices.

12th July, 1669.—Petition of Guillaume Feniou, praying that sixty-six moose hides found in the cellar of the house of Etienne Banchaud, one of the above accused, be returned to him.

12th July, 1669.—Evidence of Nicolas Maurice containing revelations against Banchaud and his accomplices.

Digitized by Google

13th July, 1669.—Order for the arrest and imprisonment of Banchaud and his accomplices.

16th July, 1669.—Depositions of Louis Brodeur, Urbain Baudacour, Jean Sauviot dit Lavergne and René Houdin, against the above accused.

23rd July, 1669.—Order to the accused Banchaud, Lafontaine, Cochon and Turcot to appear in three days, under pain of banishment. Default entered against the accused, owing to their failure to appear.

28th July, 1662.—An order to all who may be indebted to Etienne Banchaud to make their declaration at the *greffe* of this town.

28th July, 1669.—Order to proceed to the sale and adjudication of the old furniture belonging to Etienne Banchaud.

8th August, 1666.—An order to re-examine the witnesses in the case against Banchaud, Lafontaine, Cochon and Turcot.

12th August, 1669.—Re-examination of the witnesses Nicolas Maurice, René Houdin and Sauviot, against the accused above-named.

12th August, 1669.—Petition of David Bialle, Sieur de St-Meur, asking that certain goods, belonging to him and seized among the effects of Etienne Banchaud, be returned to him.

19th August 1669.—Ordinance compelling all the inhabitants of Canada to keep their cattle either on the common pastures or on their own concessions from the melting of the snow, until after the harvest.

16th August 1669.—Information laid against some Frenchmen, accused of having traded liquor and goods with the Indians in the woods, and the examination of two Algonquin witnesses on the subject.

14th December 1668.—Obligation granted by Edouard Hardouin in favor of Mr. Gabriel Souart, priest of the parish of St-Sulpice.

Digitized by Google

6th February, 1670.—Verbal information given by the *procureur fiscal*, on the subject of the robbery of six bushels of wheat, by Gabriel Trudeau from a man named Lafantaisie, with the testimony of the witnesses.

7th March 1670.—Ordinance instructing the inhabitants of Montreal to mark their sacks and bags when they bring them to the mill.

20th March 1670.—Letter from a man named Rolland to the bailiff Petit on the subject of his affairs

1st May, 1670.—Petition of Gabriel Leclos, asking that, as pigs cause damage to the newly sown grain, they be shut up.

24th May 1670.—Ordinance on the subject of the preceding petition.

6th June 1670.—Petition of Pierre Gagnon, a resident of Quebec, asking the release, on certain conditions, of certain prisoners in custody for having robbed him.

1st July 1670.—Complete abandonment of all charges against the above prisoners by Pierre Gagnon.

12th July 1670.—Ordinance of M. de Courcelles on the subject of the sale of brandy in the woods.

16th July 1670.—Information laid against Léger Hébert, at the request of Pierre Barreau, and the examination of the witnesses summoned.

16th July 1670.—Hearing of Mathurin LeLiève in the preceding matter.

26th August 1670.—Charge brought by Antoine Dufresne against Pierre Chauvin, Pierre Meslé, Jollycœur, Latour and Raimond, soldiers belonging to the Company of M. de la Mothe, accused of having struck and seriously wounded the said Dufresne, with the report of the surgeon Martinet dit Tourblanche, and the examination of the witnesses.

1st September, 1670.—Accusation by Braillard dit le Bourguignon against men named Larente, Massier and Sagouangara for assault

Digitized by Google

and battery with the evidence of the witnesses and the report of the surgeon.

2nd September 1670.—Ordinance of the king for the protection of the forests and for the construction of ships in this country.

4th September, 1670.—Sentence condemning Jollycœur, Raimond and LaTour, soldiers belonging to the company of M. de la Mothe to pay to Dufresne, forty-six *livres tournois* for assaults committed upon the latter.

20th October 1670.—Edict, placing a tax of ten *livres* a barrel upon wine and twenty-five *livres* upon brandy.—another edict abolishing the tax of ten per cent on dry goods.

24th October 1670.—Ordinance of the Intendant Talon, enjoining on the inhabitants to cut up the wood lying along the river to to give a free passage.

24th October, 1670 —Ordinance upon the subject of the construction of a bridge over the river St-Pierre.

10th November, 1671.—Information laid by Pierre Barreau against Jean Aubuchon dit Lespérance and Jacques Guitaut for having struck and wounded him, together with the evidence of the witnesses.

8th December, 1671.—Trial commenced at the request of the said Pierre Barreau against the accused above named, with the report of surgeon Forestier.

4th December, 1671.—Ordinance renewing the prohibition to cut down certain-named kinds of wood for shipbuilding.

20th March, 1671.—Ratification by Louise Bercier, of the sale of a dwelling house in the seigniory of Ste-Anne, made by her husband, Michel Feuillon, to François Morneau.

12th May, 1871.—Petition of Marie-Rogère Lepage, wife of Sieur de l'Ormeau, against Sieur Carion, a lieutenant in Mr. de la Mothe's company, whom she accuses of having struck

Digitized by Google

and threatened to kill her husband; a demand for the appearance and hearing of the witnesses in this matter.

6th May, 1671.—Hearing of Lemoyne, Simon Dastous, Tambour, Sieur de Belestre and other witnesses in the last mentioned cause.

8th July, 1671.—Examination of Françoise Duverger, wife of Jean Poulin dit l'Eveillé, who, having given birth to a child, is accused of having buried it secretly, near the house of Alexis Béranger.

8th December, 1671.—Two detached depositions in the criminal prosecution against Nicolas Manière (?) and the wife of one Laviolette, accused of concubinage.

2nd January, 1672.—List of effects furnished and amounts paid by Marie Renaud, wife of Mathurin Langevin, Sieur de la Croix, a resident of the town, to Sieur René Lanceleur and Elizabeth Languille, his wife.

14th May, 1670.—Ordinance commanding the inhabitants to shut up their horses and cattle until after harvest time, so as to prevent the damage they cause in the fields.

19th May, 1671.—Admissions and declarations made by Jacques Daoust, in the criminal cause against de l'Ormeau and Carion.

25th May, 1672.—Bill of costs and expenses of the Bailli of the Island of Montreal in the special criminal trial of Banchaud and his accomplices, who were denounced by Sieur de la Salle.

5th June, 1672.—Ordinance of the Intendant Talon, expressly prohibiting all persons from leaving their domiciles, to run the woods, to trade with the Indians, under pain of corporal punishment.

31st May, 1672.—Accusation of rape brought by Jean Roy, a resident of Montreal, against Philippe Poitiers dit La Fontaine, with the interrogation of the accused.

Digitized by Google

2nd June, 1672.—Confirmation of the charge brought against Philippe Poitiers dit La Fontaine, who is condemned to make the usual honorable reparation to his victims and the said La Fontaine, on account of his brutal passions, for which he asks pardon of God, of the King and of his victims, is condemned to perpetual banishment from the Colony, and to pay to his victims the sum of one thousand *livres* each, to assist them in marrying; the said sum to be raised from all property of which he may be possessed either in Canada or in France.

8th June, 1672.—Petition of Jean Roy, asking that a curator be appointed to the vacant estate of Philippe Poitier dit La Fontaine, who was sentenced to civil death, so as to enable the said Roy to prosecute his rights.

8th June, 1672.—An order of the *procureur fiscal* on the accused La Fontaine to appear and submit to interrogation.

29th May, 1672.—Information given to Jean Roy and his wife by one Laprairie, on the subject of the rape committed upon his grand-daughters, with the admissions of the said grand-daughters.

31st May, 1672.—Statement made by Jeanne Roy, daughter of Jean Roy, to Jeanne Roussilier, wife of Pierre Cottin dit Châtillon, on the subject of the attempted rape of her daughter Catherine, committed by the said La Fontaine.

8th August, 1672.—Petition of Réné Filastreau, a resident of Quebec, asking payment of the sum of twenty *livres* due him by Pierre Gagnon, also a resident of Quebec.

9th August 1672.—In consequence of a misunderstanding, between François Bailly and Jacques Voynes, with reference to the cutting of the hay in a certain meadow; the latter is ordered to fulfil his engagements. This sentence is preceded by some of verses.

31st May 1672.—Examination of Marie and Jeanne Roy and of Catherine Cottin dit Châtillon, in the matter of the rape committed upon them by La Fontaine.

Digitized by Google

31st May 1672.—La Fontaine the accused is confronted with the above witnesses.

3rd June 1672.—Appearance of the prisoner La Fontaine for the reading over and verification of his evidence.

8th August 1672.—Promise of Pierre Boutaux dit LaRamée to pay to the officers of Justice, the costs of the suits brought by him against Pierre Cottin dit Châtillon.

22nd August 1672.—Complaint law by Pierre Boutaux dit LaRamée against Pierre Cottin dit Châtillon, and his son Laurent of having ill treated him and beaten him with a stick.

23rd August 1662.—Examination of Laurent Cottin dit Châtillon, of Pierre Cottin dit Châtillon and of his wife, in the case of Pierre Boutaux dit LaRamée.

24th August 1672.—Examination of Gabriel, son of Pierre Boutaux dit LaRamée and confronting him with the accused above named.

25th August 1672.—Seeing the examination of Pierre Cottin dit Châtillon, of his wife and of Laurent their son, the clerk of the Court takes up the hearing of the case of Pierre Boutaux dit LaRamée.

26th August 1672.—Examination of a number of witnesses in the above cause.

27th August 1672.—The three accused Cottin dit Châtillon, are summoned to appear in the Council Chamber on Tuesday next.

14th September 1672.—Ordinance of Intendant Talon, concerning persons claiming to have accounts for having furnished effects or provisions to the king's stores, and ordering them to make their declarations and present their vouchers so as to receive their money.

27th September, 1672.—Ordinance of His Excellency le Comte de Frontenac, prohibiting the inhabitants from leaving their

Digitized by Google

houses under any pretext whatever, to go and trade with the Indians in dry goods and brandy, without a special permit from His Excellency the Governor, on pain of confiscation of their merchandize and furs, of a fine of one hundred *livres* and of corporal punishment.

29th September, 1672.—Ordinance of Intendant Talon, concerning those who claim to have paid to the Receiver the duty of ten per cent on all foreign goods.

2nd October, 1672.—Charge of slander laid by Nicolas Hubert and Marguerite Landereau, his wife, against Pierre Lugerat dit Desmoulins.

2nd October, 1672.—Examination of witnesses in the last mentioned case.

6th October, 1672.—Declaration of Marguerite Landereau, taken in the house of Sieur de Carion, lieutenant in the company of Mr. de la Mothe, with reference to the last preceding charge.

6th October, 1672.—Hearing of Marie Cartier, wife of Claude Fezeret, Michel Robert dit le Picard, Pierre Laverdure, Etienne Bouchard, surgeon, and Marguerite Boissel, witnesses in the above affair.

6th October, 1672.—Order to arrest and imprison the accused Lugerat dit Desmoulins.

12th November, 1672.—Ordinance of François Marie Perrot, knight, seigneur of Ste-Geneviève, Governor of the Island of Montreal, prohibiting the sale of liquor by retail or by the glass, under pain of confiscation of the liquor and a fine of fifty *livres*.

8th January, 1672.—Petition of Mtre. Mathieu de Ramesay, treasurer of the Seminary of St-Sulpice, asking to be put into possession of the effects of the late Jacques Brias and Etienne Hardouin.

10th December 1672.—Another petition of M. Mathurin de Ramesay, setting forth that there is due to the seigniors of the

Digitized by Google

island of Montreal the sum of four hundred *livres*, by the late Jacques Brias, and the sum of six hundred *livres* by the late Etienne Hardouin, and asking in consequence that immovables of the said persons be sold.

9th **December** 1672.—Demand made upon Paul Dayé, curator appointed to the vacant estate of Philippe Poitiers de LaFontaine to pay what he owes to the seigniors of the island of Montreal ; on his refusal to pay, a seizure and execution of all the immovables of the said LaFontaine took place.

11th **December** 1672.—Public notice with reference to the sale of immovables of Jacques Brias, Hardouin and Poitier.

12th **December** 1672.—Opposition of Mr. Déscolle to the sale and adjudication of the vacant estate of the late Etienne Hardouin.

10th **January**, 1673.--Order of the *bailli* of Montreal, fixing Tuesday next for the sale and adjudication of the immoveable properties of the estates of Brias, Hardouin and La Fontaine.

10th **January**, 1673.—Petition of the curators of the above named, praying for a delay of eight days for the sale and adjudication of their immoveables.

29th **October**, 1672.—Charge of blasphemy against Michel Poirier dit Langevin, and depositions of the witnesses.

29th **October**, 1672.—The said Langevin summoned to appear and be examined touching the accusation, under pain of imprisonment.

29th **October**, 1672.—An order for the imprisonment of the said Langevin.

Digitized by Google

To the

HONORABLE AUGUSTE RÉAL ANGERS

May it please Your Honor,

I have the honor to submit for Your Honor's information and that of the Legislature, the fourth report of the Provincial Secretary's Department.

I have continued to give the same kind of information as my predecessor, with the exception of certain tables which are to be found in the preceding report.

Your Honor will find in the present report the operations of the Department for the first nine months of the current year.

The whole humbly submitted,

I have the honor to be

Sir,

Your most obedient servant,

CHS LANGELIER,

Secretary and Registrar.

APPENDIX No. 18

REPORT OF THE COMMISSIONER OF THE PROVINCIAL POLICE

To the Honorable CHARLES LANGELIER,

Secretary and Registrar of the Province of Quebec.

SIR,

I have the honor to submit my annual report on the Provincial Police, from the 1st of May, 1889, to the 1st of May, 1890.

The statistical table hereunto annexed will show that the work performed during the present year by this force has been still more considerable than in the past. I will not mention the guarding of the public buildings or their duties before the different courts administering criminal justice in the district of Quebec, because this is what may be termed the routine work of the force ; but permit me to call your attention to the following services to prove that the duties of this force are increasing yearly.

The sergeants or constables have been sent to the following municipalities :

Banlieue of Québec.
Beauport.
Bécancourt.
Berthier.
Cap-Rouge.
Charlesbourg.
Cap St-Ignace.
Chambord.
Chicoutimi
Deschambault.
Kingston, Ontario.
Lake Beauport.
Lorette.
Lévis.
Lotbinière.
Methot's Mills.

Digitized by Google

Montreal.
Pont-Rouge,
Petite-Rivière.
Portland, Maine.
Pointe-aux-Trembles
Rivière-à-Pierre.
Sillery.
Ste-Anne de Beaupré
St-Antoine de Tilly.
St-Anselme.
St-Alban.
Ste-Catherine.
St-David.
St-Edouard.
St-Flavien.
Ste-Foye
St-Gilles.
St-Henri.
St-Jean Chrysostôme.
St-Jean Deschaillons.
Ste-Marie de Beauce.
St-Magloire.
St-Pascal.
Ste-Pétronille.
St-Pierre, Rivière du Sud
St-Vincent de Paul.
St-Raymond.
Trois-Pistoles.

In the execution of these various duties, the sergeants and constables have given great satisfaction to the public, as the thanks and favorable reports received by me from all the places to which they have been sent, amply proves.

I regret, Sir, to be obliged, for the first time, to report to you a general want of discipline among the constables. In order that a police force be well organized and efficient, it is necessary in the first place that there be complete discipline, immediate obedience and no discussing orders received. I am obliged on this account to complain of a certain number of constables. To immediately remedy this evil, in so far as it lay in my

Digitized by Google

power, an example had to be made. I dismissed one of the members of the force, but I fear that this will not be sufficient. The principal cause of this want of discipline is easily explained. It must be ascribed to the manner in which the constables have been appointed since the reorganization of the force.

The law, article 2823 R. S. Q., provides for the appointment of constables, and states that "these constables are selected and appointed by the Commissioner, who shall insist on certain qualifications as to age, character and capacity."

Article 2830 R. S R. says: "Any sergeant or constable may be suspended from his charge or dismissed by the Commissioner or by any superintendent to whom the Commissioner shall have delegated the power to do so; and any superintendent may be suspended from office by the Commissioner until the pleasure of the Lieutenant-Governor in Council shall be known."

"Every such suspension or dismissal shall take effect from the time it shall be made known, either orally or in writing, to the party suspended or dismissed." 33 Vict., c. 24, s. 18.

Although this law is very positive as to the manner in which the constables should be appointed and may be dismissed by the Commissioner, at present the appointments are made by order-in-council. Now, this is what takes place: once he is appointed by order-in-council, the constable believes he has a berth for life, and that he is independent of the Commissioner. This gives rise to a spirit of independence and a want of discipline which leads to neglect in the accomplishing of their duties. Every constable who disobeys or murmurs against orders relies upon the influence by which he secured his appointment. It is only by the knowledge that the Commissioner has the right of appointing them, and of punishing, suspending or dismissing them that he will have the necessary authority over these men. By simply calling your attention to these facts you can at once realize the necessity of putting an end to this state of things.

Our police force is too small and the duties to perform are sometimes very arduous ones; it must therefore be necessarily composed of men whose efficiency will make up, as far as possible, for their numbers.

I have already stated in a previous report, that several constables had not sufficient education to perform their duties in a satisfactory manner—especially before the courts. In any new appointments to be made, the

Digitized by Google

education required by article 2826 R. S. Q., should be insisted on, viz : "The sergeants and first-class constables must be able to read and write either the English or the French language."

In order to obtain perfectly qualified constables, the Government must expect to give them sufficient pay. I do not think that the present pay is a just remuneration for the work which these men are expected to perform. At present the sergeants receive $1.50 a day and the constables $1.25. Wheu the first law was passed—twenty years ago (1870),—creating the provincial police, the salary of constables was fixed at $450.00 a year ; this is the law reproduced by article 2846 R. S. Q. There were then one hundred constables and the duties performed by each of them far less numerous than they are now. Moreover, the cost of living, twenty years ago, was far less than it is at present. What might then have been sufficient pay is not so to day, because circumstances are entirely different. I do not hesitate in declaring that of all the Government employees, the constables of the force under my orders are the worst paid, for the services they render. A few comparisons will prove my statement. Thus, ordinary messengers, who are only employed during office hours and at very easy work, the gaol guards who only do duty in the interior of the gaol, and this alternately every twenty-four hours, receive a higher salary than our constables. I therefore submit to you, Sir, this question of an increase of salary. It would be necessary, if the Government consents to such an increase, to amend article 2816 R S. Q., which could be done during the coming session. In my opinion, the sergeants' salary should be $2.00 a day, and the constables $1.75. I do not think these wages too high for the great services rendered by the police force and for the very hard work they have to perform. Until the law is amended, the Government might, by an order-in-council, grant for this year a bonus of $50 to each of the members of the force to replace this increase of salary which is not allowed by the law as it now stands. I am convinced that those of your colleagues who have had occasion to judge of the work done by the force during last year, will find that this bonus has been well merited and will give their support to your proposal.

I desire to draw your attention to the fact that our constables are not sufficiently trained in that part of the military art which is necessary in a police force. not only to give the corps a good appearance, but also as a help to discipline. Up to the present date I had the force drilled by a sergeant of a volunteer battalion, whom I was obliged to pay ; but having

Digitized by Google

lately appointed an old soldier as constable, I intend to make him act as drill instructor and to increase the number of lessons without injury to the regular service.

It would also be important that the constables should take shooting lessons both with the rifle and the revolver, which has been neglected up to this date. Sergeant Burke, who has care of the arms and ammunitions, has reported to me that the Martini rifles are in perfect order, but that the revolvers worn by the constables and in use since 1870 are in such bad condition that they cannot be repaired, and it is urgently necessary to replace them. I therefore ask you to permit me to purchase new ones.

I have much pleasure in reporting that the best possible feeling exists between our force and that of the City of Quebec. The city detectives are frequently of great use to us; whenever the occasion offers we return the favour.

I must also bring to your knowledge the great services rendered by high constable Gale, who, by the position which he holds, is constantly in relation with the force and frequently accompanies them on their expeditions. It is also under his direction that certain duties of the constables are performed, such as serving the proceedings of the courts, summoning jurymen, arresting criminals in the district. I believe that Mr. Gale should receive a salary for those services, which are almost of daily occurrence. I therefore request you to authorize me to pay him a salary of two hundred dollars a year, payable proportionately on the different semi-monthly pay-lists of the force.

I have the honor to be,

Sir,

Yours truly,

ALEXANDRE CHAUVEAU,

Commissioner, P. P.

SCHOOL OF NAVIGATION OF THE GOVERNMENT OF QUEBEC.

Quebec, September 16th, 1890.

SIR,

In accordance with your desire, I would beg leave to transmit you herewith the particulars of those students who have attended the Quebec Government School of Navigation from January 1st, to date.

As the present statement closes nearly three months before the end of the current year, it cannot, therefore, include those who usually enter about the close of navigation.

I have the honor to be

Sir,

Your most obedient servant,

WILLIAM C. SEATON.

The Honorable

C. LANGELIER,

Provincial Secretary, Quebec.

By order, JOS BOIVIN.

Assistant Secretary.

* In the first and second reports "Supplementary Letters Patent", increasing and decreasing capital stock, as well as those changing a company's name, were counted, by mistake, as so many new companies and numbered as such. The increases and reductions of capital stock mentioned in these Supplementary Letters Patent were added to the amounts mentioned therein. These mistakes are corrected in the third report.

Montreal December 31st 1889.

To the

Honorable J. SHEHYN,

Provincial Treasurer, &c., &c., &c.

QUEBEC.

SIR,

In conformity with the provisions of the Act 45 Vic., chapter 49, sect 2, of the statutes of the Province, I have the honor to submit my Second Report as Inspector of Insurance for the year 1889. This Report contains the statements of affairs of the following companies, viz :

The County of Beauharnois Mutual Fire Insurance Company.
" Eastern Townships " " " "
" County of Maskinongé " " " "
" City of Montreal " " " "
" Missisquoi and Rouville " " " "
" Montmagny " " " "
" Richmond, Drummond and Yamaska Mutual Fire Insurance Company.
" Rimouski, Temiscouata and Kamouraska " " " "
" Stanstead and Sherbrooke " " " "
" The Provident Mutual Association of Canada (in liquidation).
" Comparative Table of the companies and the Recapitulary Table of all the companies.

In submitting my second report, I will take the liberty to make a few remarks which were gathered during my reviewing the financial standing and operations of the Mutual Insurance Companies in this province during the last year.

I am convinced that it would be very profitable for the said companies to exact one third cash on the deposit notes they received, which, besides proving a saving, would permit their having on hand a sum sufficient to meet the first losses and prevent a recourse to loans in order to face the same.

The Mutual Company of the City of Montreal and that of the counties of Rouville and Missisquoi have adopted that system, and, as a natural consequence they possess ready money in bank, from which they actually draw a handsome revenue and which gives a greater freedom in insurance operations.

I do not approve the companies who move outside of their local territory in order to assume risks in other parts of the province, because, outside of the heavy commissions they have to disburse, they are exposed to accept risks already refused by other companies; whilst, on the other hand, they could by holding themselves within their limits, *i. e.* counties or district, transact on a much safer scale. The mutuality principle of rural companies does not permit them to assume very heavy or numerous risks like joint stock companies do. Every five year the nature of the risk is altered; hence it becomes difficult and too onerous for a mutual rural company to properly control all the risks outside of its local territory.

Digitized by Google

It may well happen that in the course of one year a company may be free from losses but for that it should not be exempted from the assessment obligation, the proceeds of which would be carried to credit of the Rest fund in view of coming eventualities and possible heavier losses. First, this would result in a better uniformity in the assessments and the individual proportion of each member of the company, and it would afford these members a chance of paying about one half less than with joint stock companies.

The mutual fire system in the rural district is not yet sufficient appreciated to its value and this explains to a certain extent the high premium tarif maintained by the fire *underwriters*. Every county or at least every district in this province should have its mutual insurance company. That sort of company, when well managed always prove successful, and moreover they prevent a large quantity of capital from being carried outside of our country.

A last remark: for a few years past several foreign associations under the pretence of benevolence, but being nothing but disguised insurance companies, with a head office and treasure outside of Canada, and thus naturally out of the bearing of our laws, have taken root in the Province of Quebec under various reasons. The names of those companies scarcely known to the public, as well as their peculiar designation by letters or figures seem to cover them against any eventual claim by the parties interested. They possess no charter under no Canadian law and in the same time collect from canadian subjects, under the pretence of subscription, considerable sums of money against which, in my opinion, there exists no claim because invested in a foreign country. If it is adopted as a principle that insurance companies must deposit with the public treasury sufficient securities to cover the claims of the assured, I believe that the aforementioned mutual foreign associations, who possess all the character of mutual insurance companies, should undergo the same obligation or at least be placed under the action of a special law properly securing the claims of the claimants in the Province.

The members of the Provincial Parliament would certainly accomplish a patriotic duty by encouraging the extension of mutual insurance companies within their respective counties.

I have the honor to remain,

Honorable Sir,

Your very obedient servant,

GEO. DAVELUY,

Inspector of Insurance.

RAPPORT

DU

GREFFIER DE LA COURONNE EN CHANCELLERIE

A l'Honorable Orateur

et

Aux Honorables Membres de l'Assemblée Législative de la Province de Québec.

Après une élection générale des députés à l'Assemblée Législative, c'est chose ordinaire que de voir le Greffier de la Couronne en Chancellerie soumettre à cette Honorable Chambre une récapitulation des votes donnés dans chaque circonscription électorale.

A cette récapitulation des votes, ne faudrait-il pas ajouter les remarques et suggestions faites à la suite des procès-verbaux par les Officiers Rapporteurs ?

Les soixante-treize élections faites en juin et juillet derniers, sans compter celles occasionnées depuis, devraient suffire pour que toute personne intéressée puisse se rendre compte de l'efficacité de la loi. Et ces soixante-treize appels au peuple n'auraient-ils pas suffi, l'on se trouve tout naturellement enclin à ajouter à ce nombre les élections partielles intervenues depuis, soit par résignation de mandat, soit à cause de décès ou d'acceptation d'une charge en vertu d'une nomination de la Couronne et de laquelle découlent les émoluments, ou encore pour annulation d'élections par les tribunaux.

De ces élections partielles, il faut compter les vingt-cinq dont le tableau explicatif est indiqué ci-dessous :

REPORT

OF

THE CLERK OF THE CROWN IN CHANCERY

To the Honorable Speaker

and

To Honorable Members of the Legislative Assembly of the Province of Quebec.

After a general election of members of the Legislative Assembly, it is usual for the Clerk of the Crown in Chancery to submit to this Honorable House a recapitulation of the votes given in each electoral district.

To this recapitulation of the votes, should we not add, the remarks and suggestions made after the reports of proceedings by the Returning Officers ?

The seventy-three elections held in June and July last, without taking into account those held since, should be sufficient to enable every person interested to ascertain the efficacity of the law. And if these seventy-three elections had not sufficed, one would be inclined to add to that number the partial or bye-elections which have since been held owing to resignation, death or acceptance of an office of emolument under the Crown or again owing to elections having been set aside by the Courts.

Of these partial elections we must count the twenty-five shewn in the explanatory table below :

Toutes ces élections tout naturellement ont fourni autant d'occasions de juger de l'efficacité de la loi électorale : et les députés par leur position et leur devoir, ne seraient-ils appelés qu'à corriger certaines défectuosités qui leur ont paru les plus nécessaires, il resterait encore à consulter les procès-verbaux des Officiers-Rapporteurs chargés de faire exécuter la loi dans toutes ses parties. Evidemment l'intention du législateur était de s'en rapporter, jusqu'à un certain point, à ces *remarques* lorsqu'il insérait dans la loi de 1875 l'article 359 qui se lit comme suit :

" L'Officier-Rapporteur doit accompagner son rapport au Greffier de la " Couronne en Chancellerie d'un procès-verbal de ses opérations,dans lequel, " outre les mentions déja requises, il fait les observations qu'il croit utiles " relativement à l'état des boîtes de scrutin où des bulletins de vote qu'il " a reçus." (Le législateur aurait pu ajouter), " ou relativement à tout ce " qui se rapporte au bon fonctionnement de la loi,"

Il n'appartient pas au Greffier de la Couronne en Chancellerie de trouver à redire contre la législation de cette Chambre ; c'est à peine s'il peut aventurer une opinion sur la loi qu'il lui faut mettre, quand même, en opération du mieux possible. Tout au plus pourrait-il oser déclarer, qu'en maintes circonstances, il entendait dire que la loi électorale laissait à désirer dans beaucoup de ses parties, que la rédaction était défectueuse, et les différents articles mal coordonnés et présentés sans classification méthodique —Mais, qui doit appeler l'attention de la Chambre sur ces remarques des officiers ainsi chargés d'exécuter la loi ? L'article 359 indique que ces documents doivent être préparés pour un but quelconque ; et ce but, c'est de faire donner des informations à votre Honorable Chambre par un officier ayant eu en quelque sorte la charge de la surveillance des élections, comme le Greffier de la Couronne en Chancellerie. Voilà pourquoi, je crois que le temps est venu de bien se rendre compte de l'article 359 de la loi électorale, et qu'il est du devoir du Greffier de la Couronne en Chancellerie de faire connaître ces remarques à votre Honorable Chambre. Que ces suggestions soient acceptables ou non, il convient de les soumettre à la considération des députés. A cette fin, je ferai quelques citations de parties de ces rapports, en commençant par le procès-verbal de l'Officier-Rapporteur de Montréal, Division No. 1, comme suit :

" Je me permettrai de faire des remarques par rapport aux bulletins " de vote.

" La partie où est mentionné " Bulletin de vote " devrait disparaître " car j'ai constaté par le décompte devant le Juge, que plusieurs font leur " croix en cet endroit-là,—le talon devrait aussi disparaître, car plusieurs " font aussi leur croix dessus.

All these elections have of course given us so many opportunities of judging of the efficacity of the election act and even if the members, in virtue of their position and duty were only called upon to make such corrections as they deemed most necessary, we would still have to consult the returns of the Returning Officers charged with the execution of the law in all its details. The intention of the legislator was evidently to rely to a certain extent upon these remarks when article 359 was inserted in the law of 1875. The said article reads as follows :

" The Returning Officer shall accompany his return to the Clerk of " the Crown in Chancery, with a report of his proceedings, in which report, " in addition to the statements already required, he shall make any obser- " vations he may think proper as to the state of the ballot boxes or ballot " papers as received by him."

It is not within the province of the Clerk of the Crown in Chancery to find fault with the legislation of this House; he can hardly venture an opinion on the law which he has, in any event, to carry out as best he can. At the most he might dare to state that, in many instances, he has heard it said that the law left some what to be desired in many parts, that its drafting was defective, the various articles badly arranged and disposed without systematic classification. But who is to call the attention of the House to these remarks of the officers appointed to carry out the law ? Article 359 says that these documents are to be prepared for a purpose, which purpose is to have information given to your Honorable House by an officer who has, to a certain extent, had the duty of superintending the elections, like the Clerk of the Crown in Chancery. It is for these reasons that I consider the time has come to thoroughly carry out article 359 of the election law and that it is the duty of the Clerk of the Crown in Chancery to submit these remarks to your Honorable House. For that purpose I will quote certain portions of these reports commencing with that of the Returning Officer for Montreal Division No 1, as follows:

" I take the liberty of making some remarks with reference in the " ballot papers.

" The portion on which " Ballot Paper " is printed should disappear " for I noticed at the recount before the judge that many mark their crosses " their; the stub should also be done away with for several also place " their marks on it.

Digitized by Google

" Les chiffres 1 et 2 à gauche des noms devraient être blancs et par conséquent l'espace où ils se trouvent devrait être noir.

" Les traits entre chaque nom devraient être plus accentués. Je crois " qu'il serait peut-être mieux de faire à la droite de chaque nom, un rond " très distinct et les voteurs feraient leur croix respective dans ce rond-là."

M. le Régistrateur et Officier-Rapporteur du district électoral d'Hochelaga écrit :

" Dans une élection générale il est bien difficile de trouver 116 Sous- " Officiers-Rapporteurs tous compétents, et les honoraires de ces officiers " sont si restreints que la plupart des personnes responsables ne veulent pas " occuper cette charge. A mon humble opinion, je crois que pour le bon " fonctionnement de la loi, les honoraires de Sous-Officiers-Rapporteurs " devraient être bien plus élevés par le fait qu'on pourrait avoir des per- " sonnes plus compétentes."

C. J. Auger, Ecr., Régistrateur de Montréal-Est et Officier-Rapporteur de Montréal Division No 3, fait les remarques plus étendues, que voici :

" Le décompte fait devant le Juge m'amène de nouveau à déclarer que " d'après l'expérience de toutes les élections qui se sont faites au scrutin " secret, je crois le système actuel tout-à-fait défectueux, surtout dans la " multiplicité des opérations requises d'un voteur pour parvenir à donner " son suffrage."

" Si la loi a bien voulu protéger le voteur en lui accordant le scrutin " secret, elle n'a pas voulu en même temps lui tendre un piège pour lui " faire perdre son vote ; au contraire, le voteur et le candidat ont également, " tous deux, le désir de remplir le devoir qui leur incombe, savoir : le pre- " mier, d'exercer librement son droit de suffrage et le second de compter " sur la confiance que repose en lui celui qui vient déposer son bulletin " dans l'urne électoral. Or il appert par ce dernier décompte (nonobstant " la grande libéralité du Juge en admettant tous les bulletins de votes sur " lesquelles le voteur avait clairement ses vues), qu'un grand nombre de " votes ont été perdus, par le manque d'attention ou l'ignorance du voteur " qui n'a pas rempli *à la lettre* les dispositions de la loi en votant."

" C'est mal pour un citoyen de refuser son vote ou de s'en abstenir ; " c'est un mal plus grand de le fausser en trompant la bonne foi de celui " qui lui demande son suffrage et auquel il le promet ; mais c'est un crime " de lèse-société de priver un citoyen de ses droits et prérogatives, tout en " faisant un dommage réel au candidat auquel il accorde son suffrage, sous " le vain prétexte qu'il n'a pas accompli *à la lettre* les dispositions de la loi " et les instructions qu'on lui a données sur la manière de voter."

Digitized by Google

"The figures 1 and 2 to the left of the names should be white and "consequently the place where they are printed should be black."

"The lines between the names should be better defined. I think it "would perhaps be better to have a clearly defined circle to the right of "each name and the voters would mark their cross in that circle."

The Registrar and Returning-Officer for the electoral district of Hochelaga writes:

"In a general election it is very difficult to find 116 deputy-returning-"officers who are all competent and the fees allowed them are so low that "most responsible persons will not accept the office. In my humble opi-"nion I think that, to secure the proper working of the law, the fees of "the deputy-returning-officers should be much higher because we would "then get more competent persons."

C. J. Auger Esq. Registrar for Montreal East and Returning-Officer for Montreal Division No. 3 has made the following more extensive remarks.

"The recount before the judge leads me once more to state that, from "the experience of all the elections by ballot, I think the present system "entirely defective, especially in the multiplicity of things required to be "done by a voter in giving his vote.

"If the law wished to protect the voter by giving him the ballot, it "did not wish, at the same time, to set a trap to deprive him of his vote; "on the contrary the voter and the candidate are both anxious to perform "the duty devolving on them: the former to freely exercise his right to "vote and the latter to count upon the confidence which the voter has in "him. Now it appears by this last recount (notwithstanding the great "liberality of the judge in admitting all ballot papers on which the voter "had clearly signified his intention) that a great many votes were lost "through the carelessness or ignorance of the voters who did not literally "comply with the provisions of the law in voting."

"It is wrong for a citizen to refuse to vote or abstain from voting, it "is a greater wrong to give a false vote by deceiving the good faith of him "who asks his suffrage and to whom he promises it; but it is a crime "against society to deprive a citizen of his rights and prerogatives, while "doing a real injury to the candidate to whom he gives his suffrage under "the vain pretext that he has not literally complied with the provisions "of the law and with the instructions given him as to the manner of "voting.

" Du moment qu'un électeur manifeste clairement son intention, à " quoi bon toutes ces formalités nuisibles et souvent inutiles, qui entachent " de nullité une action aussi solennelle que celle du scrutin secret ?

" Pourquoi ne pas adopter un système de bulletin plus simple et plus " en harmonie avec nos mœurs et nos usages politiques ?

" Me serait-il permis de vous faire une nouvelle suggestion dont l'effet " serait une source de revenus pour le trésor et une garantie absolue pour " rempli en faisant ce qui suit :

NOUVEAU BULLETIN DE VOTATION

" Si le Gouvernement décrétait qu'à l'avenir le scrutin secret serait " rempli en faisant ce qui suit:

" 1o. Le Gouverneur-en-Conseil aurait seul le contrôle du scrutin " secret.

" 2o. Il préparait d'avance une série complète de bulletins de vota- " tion, de deux pouces carrés sur papier " cartouche " dont l'intérieur serait " en couleur différente, suivant le nombre des candidats (chacun d'eux " choisissant une couleur distincte). Tel choix étant fait, le nom de tel " candidat serait imprimé sur le côté coloré du bulletin qu'il aurait choisi " et dont l'exterieur serait *tout blanc*, avec l'impression du timbre de la Pro- " vince au milieu, et représenterait la valeur d'icelui—(au dixième de " centin, par exemple.)"

" Ce bulletin serait plié en trois parties égales de manières à faire dis- " paraître et le nom du candidat et la couleur, laissant visible seulement le " timbre au dos d'icelui.

"3o. Chaque candidat devrait acheter du Gouvernement le nombre " requis de bulletins de votation, tant ceux de sa couleur que ceux de ses " adversaires pour les distribuer dans ses comités."

" 4o. Chaque électeur disirant voter se procurerait des agents du " candidat nn bulletin de votation de chacune des couleurs susdites et se " rendrait au bureau de votation avec ces bulletins dans sa main."

"5o. En arrivant au bureau de votation, un à un, comme aujourd'hui, " le voteur présenterait ses bulletins au Sous-Officier-Rapporteur qui cons- " tatant de suite, le droit de son interlocuteur à voter, détruirait, par ses " initiales, les timbres sur chacun des bulletins de vote ainsi présentés, et, " après les avoir remis au voteur, ce dernier se retournant du côté opposé

Digitized by Google

" From the moment that a voter clearly manifests his intention, of " what use are all these harmful and often useless formalities which " nullify so solemn an act as that of voting by ballot.

" Why not adopt a system of ballot which would be simpler and more " in harmony with our customs and political usages.

" May I be permitted to make a new suggestion, the effect of which " would be a source of revenue for the treasury and an absolute warranty " for the ballot.

NEW BALLOT PAPER

" The Gouvernment should decree that voting by ballot should be as " follows :

" 1. The Governor-in-Council should alone control the ballot.

" 2. A complete series of ballot-papers should be prepared before " hand, being two inches square, of cartridge paper, the inside being of a " different colour according to the number of the candidates (each one " having a distinct colour.) The selection being made, the name of the " candidate should be printed on the colored side of the ballot paper which " he has selected and the outside of which should be all white with the " stamp of Province in the middle and would represent the value thereof " (one mill, for instance).

This paper would be folded in three equal parts so as to cause the name of the candidate and the colour to disappear, leaving only the stamp on the back visible.

" 3 Every candidate should purchase from the Gouvernment the " number of ballot-papers required, both those of his own colour and those " of his opponents to distribute it in his committees.

" 4. Every elector desiring to vote would obtain from the agents of " the candidate a ballot paper of each of the aforesaid colours and would " proceed to the poll with these papers in his hand.

" 5. On arriving at the poll, singly as at present, the voter would " present his ballot papers to the deputy returning officer who, ascertai- " ning that he has a right to vote, would by initialing them, cancel the " stamps on each of the papers so presented and hand them back to the voter " who, turning his back on the deputy returning officer and other in the

Digitized by Google

" au Sous-Officier-Rapporteur et aux autres employés du bureau de votation
" ferait le choix du bulletin indiquant la couleur et le nom du candidat
" pour lequel il veut voter, le tiendrait de la main droite et les autres de la
" main gauche, après les avoir tous préalablement et soigneusement pliés
" de manière à en cacher la couleur et le nom, et se tournant ensuite du
" côté du Sous-Officier-Rapporteur, lui exhiberait, le timbre du bulletin
" de sa main droite sur lequel se trouveraient les initiales du Sous-Officier-
" Rapporteur et le jetterait dans l'urne électorale, et procédant de même à
" exhiber le timbre sur le dos des bulletins dans sa main gauche afin de
" constater les mêmes initiales, le voteur les jetterait au panier ou dans
" une autre boîte fermée de manière à protéger le secret de son vote ;"

ET TOUT SERAIT FAIT

" 6o. Tous les bulletins trouvés dans l'urne électorale seraient *bons*
" quand bien même ils seraient tachés ou maculés, excepté s'il y avait un
" signe démontrant ou faisant connaître clairement pour qui il a voté.

" Par ce moyen, tout ignorant qu'il soit, le voteur connaîtrait toujours
" la couleur de son candidat et ne serait aucunement astreint à en lire le
" nom, et son vote serait protégé *en tout et partout.*

" Dès lors, plus de décompte devant le Juge, qui n'aurait qu'à décider
" sur les bulletins rejetés par le Sous-Officier-Rapporteur, comme n'étant
" pas secrets."

" Ce procédé tout sommaire serait fait par le Juge en présence des
" candidats ou leurs agents seulement et sans frais.

" Dans vos *Instructions aux Officiers-Rapporteurs*, vous leur recommandez
" de choisir des députés instruits et intelligents, et vous concluez en espé-
" rant qu'on ne verra pas de bureaux de votation tenus irrégulièrement...
" J'espère que ces dernières remarques ne s'appliqueront pas à ceux de ma
" Division, car, je dois me féliciter sur le résultat général quoique j'aie eu peu
" de choix à faire, vû le grand nombre de Sous-Officiers-Rapporteurs requis
" cette année-ci dans la cité de Montréal."

" Avec un honoraire plus élevé, nous pourrions choisir nos hommes de
" professions libérales pouvant enrégistrer un bien plus grand nombre de
" voteurs, ce qui diminuerait de beaucoup le nombre des bureaux de vote-
" tion."

Digitized by Google

"poll would select the paper of the colour and with the name of the can-
"didate for whom he wants to vote, holding it in his right hand and the
"others in his left after having previously and carefully folded them so as to
"hide the colour and the name and then turning towards the deputy return-
"ing officer he would show him the stamp on the paper in his right hand
"bearing the initials of the deputy returning officer and throw it in the box
"and proceeding in like manner to exhibit the stamps on the back of the
"papers in his left hand so as to show the initials, he would throw
"them in a basket or other closed box so as to protect the secret of his
"vote and then."

ALL WOULD BE DONE

"6 All ballot papers found in the ballot box should be *good* even if
"stained or torn unless there were some mark showing clearly for whom
"the elector has voted.

"By this means, however ignorant he might be, the voter would
"always know the colour of his candidate and would not be obliged to
"read his name and his vote would be fully protected.

"Then, there would be no recount before the Judge who would only
"have to decide upon the ballot papers rejected by the Deputy-Returning
"Officer as not being secret.

"This summary proceeding would be done by the Judge, in presence
"of the candidates or their agents only, and without costs.

"In your *Instructions to Returning-Officers* you recommend them to
"select educated and intelligent deputies and you conclude by hoping
"that we will not see any polls irregularly kept..... I hope that the latter
"remark will not apyly to those of my division for I have to congratulate
"myself on the general result although I had not much choice owing to
"the great number of Deputy-Returning-Officers required this year in the
"city of Montreal."

"With a higher fee we might have a choice of professional men who
"could register a much larger number of voters, which would greatly
"decrease the number of polls."

Quelques Officiers-Rapporteurs ont jugé qu'il était à propos de manifester leur approbation des formules nouvelles—non comprises dans les cédules de la loi—pour rendre l'accomplissement de leurs devoirs et celui de leurs subalternes plus facile. Je crois devoir indiquer ici les formules dont il s'agit, et que j'ai cru aussi nécessaires à l'Officier-Rapporteur qu'il est indispensable pour le négociant de recevoir la facture des marchandises qu'il achète.

C'est ainsi qu'en examinant la liste A, l'Officier-Rapporteur se rend compte des documents dont il faut faire usage avant le jour de la nomination des candidats, car il trouve dans trois colonnes les indications concernant les papiers qu'il reçoit, tant pour la page de loi à consulter, et la lettre indicative de la formule, que pour la quantité qu'il lui faut.

Digitized by Google

Some Returning-Officers have deemed advisable to express their disapproval of the new forms—not included in the schedules to the law—for rendering their duties and those of their subordinates easier. I consider it my duty to point out here the forms in question and which I considered necessary for the Returning-Officers to whom they are as indispensable as the invoice is to the merchant for the goods he purchases.

Thus by examining the list A the Returning Officer ascertains what documents he has to use before the nomination day, for he finds in three columns the indications respecting the papers he receives both as regards the page of the law to be consulted and the letter indicating the form as well as the quantity he requires.

Par le décompte qui eut lieu devant l'Hon. juge A. Plamondon le 25 juin 1890, il fut trouvé 1553 bulletins pour A. S. Johnson, Ecr. et 1548 pour l'Hon. W. Rhodes, ce qui montrait une majorité de cinq pour A. S. Johnson, Ecr, qui fut déclaré élu.

Au mois d'octobre 1886, Andrew Johnson, Ecr, était élu par une majorité de 180 contre J. White, Ecr. Cette élection fut déclarée nulle par les honorables juges de la Cour Supérieure; une nouvelle élection eut lieu, et le 27 décembre 1888, l'Hon. W. Rhodes était élu par une majorité de 88 contre Andrew Johnson, Ecr.

By the recount which took place before the Hon. Judge A. Plamondon, the 25th June 1890 1553 ballot papers were found for A. S. Johnson, Esq, and 1548 for the Hon. W. Rhodes, which shewed a majority of five for A S Johnson, Esq, who was declared elected.

In the month of October 1886, Andrew Johnson, Esq, was elected by a majority of 180 against J. White, Esq That election was declared null by the Honble judges of the Superior Court: a new election took place, and the 27th December 1888, the Honble W. Rhodes was elected by a majority of 88 against Andrew Johnson, Esq.

	1958 1878	1878									
Majorité pour / Majority for. J. BELAND	80	....	....	....	.....	.....	.....	.....	.....		.....

Le décompte qui a eu lieu devant l'Hon. J. Wurtele, J. C. S., a fait trouver 1958 votes pour J. Béland, Ecr, et 1878 pour H. Jeannotte, Ecr.

Par la loi 53 Vic., chap. 2, 3 et 4, la ville de Montréal fut divisée en six districts électoraux, reconnus sous les noms de Montréal Division No. 1, 2, 3, 4, 5, 6. Le territoire de Montréal Division No 1 formait partie de l'ancien district de Montréal Est, et était représenté en Parlement par L. O. David, Ecr, qui, au mois d'octobre 1886, avait obtenu par le décompte, devant un des juges de la Cour Supérieure 3056 votes contre 2428 pour A. Gravel, Ecr, et 2870 contre l'Hon, L. O. Taillon qui fut élu en décembre 1886 pour le district électoral de Montcalm J. B. Richard, Ecr, ayant résigné après avoir été élu le 14 octobre de la même année.

By the law 53 Vic., ch. 2, 3 and 4, the City of Montreal was divided in six electoral districts known as Montreal Division No 1, 2, 3, 4, 5, 6. The territory of Montreal Division No 1 formed part of the old electoral district of Montreal East, and was represented in Parliament by L. O. David, Esq, who in the month of October 1886 had obtain by the recount before one of the judges of the Superior Court, 3056 votes against 2428 for A. Gravel, Esq, and 2870 against the Hon. L. O. Taillon, who was elected in December 1886 for the electoral district of Montcalm; J. B. Richard, Esq; having resigned after having been elected the 14th of October 1886.

MONTREAL DIVISION No 5

Par la loi 53 Vic., ch. 2, 3 et 4, le territoire qui formait le quartier St. Laurent de la cité de Montréal, et qui faisait partie de l'ancien district électoral de Montréal, fut constitué en district électoral connu sous le nom de Montréal, Division No 5.

Au mois d'octobre 1886, J. S. Hall, Ecr, fut élu par une majorité de 5 contre W. H. Robertson, Ecr, pour Montréal Ouest, et le 10 juin 1890, le susdit J. S. Hall, Ecr, fut élu par acclamation pour le nouveau district électoral de Montréal, Division No 5.

By the law 53 Vic, chap. 2, 3 and 4, the territory forming part of St. Lawrence Ward of the City of Montreal, and which belonged to the old electoral district of Montreal West was constituted as the electoral district of Montreal, Division No 5.

In the month of October 1886, J. S. Hall, Esq, was elected by a majority of 5 against W. H. Robertson, for Montreal West, the 10th of June 1890, the said J. S. Hall, Esq, was elected by acclamation for the new electoral district of Montreal, Division No 5.

MONTREAL DIVISION No 6

Ce district électoral constitué par la loi 53 Vic., ch. 2, 3 et 4, comprend le territoire dont était formé l'ancien district électoral de Montréal Centre moins le Quartier Est, qui fait maintenant partie de la Division No 2.

Au mois d'octobre 1886, J. McShane, Ecr, était élu par une majorité de 468 contre W. Keys, Ecr, pour le district électoral de Montréal Centre ; le 12 février 1887, ayant été nommé ministre d'Agriculture et des Travaux Publics, l'Hon. James McShane était élu par acclamation pour le même district électoral ; et le 10 juin 1890, le dit Hon. J. McShane était de nouveau élu par acclamation pour le nouveau district électoral de Montréal, Division No 6.

This electoral district constituted by the law 53 Vic., chap. 2, 3 and 4 comprises the territory out of which was formed the old electoral district of Montreal Center, less the East Ward which now is a part of Division No 2.

In the month of October 1886, J. McShane, Esq, was elected by a majority of 468 against W. Keys, Esq, for the electoral district of Montreal Center; the 12th of February 1887, having been appointed Minister of Agriculture and Public Works, the Hon. James McShane was elected by acclamation for the same electoral district; and the 10th of June 1890, the said Hon. James McShane was again elected by acclamation for the new electoral district of Montreal, Division No 6.

Au mois d'Octobre 1886, N. E. Cormier, Ecr, était élu par une majorité de 357 contre A. Rochon, Ecr. Cette élection ayant été annulée par un des juges de la Cour Supérieure, une nouvelle élection eut lieu et A. Rochon, Ecr, fut élu par une majorité de 1236 contre N. E. Cormier, Ecr, le 14 septembre 1887. Cette dernière élection fut aussi annulée le 30 décembre 1889 par les Honorables juges de la Cour Supérieure. Un mandat pour une nouvelle élection fut émis, et l'émission du bref fut retardée indéfiniment, et il n'y eut aucune élection pour ce district électoral avant le 17 juin 1890, époque de l'élection générale des députés de l'Assemblée Législative de la province de Québec.

In the month of October 1886, N. E. Cormier, Esq, was elected by a majority of 357 against A. Rochon, Esq. That election having been declared null by one of the Judges of the Superior Court, another election took place and A. Rochon, Esq, was elected by a majority of 1236 against N. E. Cormier, Esq, the 14th September 1887. This last election was also declared null the 30th December 1889, by the Honorable judges of the Superior Court. A warrant for a new election was issued, and the issuing of the election writ was indefinitly delayed, and there was no election in that electoral district before the 17th of June 1890, time of the general election of the members of the Legislative Assembly of the Province of Quebec.
